Frankana Freiko®
Everything for Caravan | Camping | Leisure

Dear camping enthusiasts,

The time has come – 2024 is a leap year. This means that you get an extra day "for free" this year. We hope you can use it for camping.

To ensure that you can experience unforgettable camping moments all year round, we have once again added many new and innovative products to our extensive range. To make it easier for you to decide what to buy, we have labelled some of our bestsellers. Our products are designed to make your holiday, your extended weekends and every single day with your recreational vehicle an enjoyable experience.

In addition to proven brand quality and products "Made in Germany", we also offer a selection of sustainable items. Your specialist retailer will not only provide you with our products, but also with service and advice.

Using the QR code on the product pages, you can view the current recommended retail prices at any time.

For this year, we wish you 366 days full of joy and unforgettable camping moments.

Your Frankana Freiko Team

Frankana Freiko offers:

- Over **40 years** of experience
- Over **40,000 m²** of storage space
- A large **retailer network** in **Germany** and **Europe**
- Many products **made in Germany**
- Many **sustainable** products
- Over **18,000 products** in the catalogue

Retailer directory at www.frankanafreiko.de/en

Particularly sustainable products are marked with this icon in the catalogue.

All products advertised as „Made in Germany" are produced in Germany according to the manufacturer. We ask for your understanding that we cannot accept any liability should changes occur during the validity of the catalogue. Despite careful compilation, errors may have crept in. We do not accept any liability for this. Misprints, errors and changes are reserved! Some illustrations show decorations and extras that are not included in the scope of delivery.

Sun Canopy Playa

This versatile sun canopy provides shade and can also be used as a canopy for the gas cylinder box and the drawbar.
In addition, it can be used as a carport at the rear of the caravan.
The sun canopy is available in grey and blue.

Material: Trailtex polyester fabric coated with acrylate on the outside, water-repellent, easy to clean and tear-proof.

Poles: sizes 1 and 2 with 2 pitching poles; sizes 3 to 6 with 3 pitching poles.

Scope of delivery: ø 22 mm aluminium poles, tensioning material, sun canopy

With its gauze element, the front wall Kari offers additional protection against insects. The air can still pass through, ensuring a pleasant temperature inside.
Pack size: 60 x 35 x 7 cm; Weight: 2 kg **075/792** **129.95**

Side Wall Kari

The Kari side walls protect the sun canopy Kari from rain, wind and sun on both sides. Includes 2 side walls. Pack size: 80 x 40 x 8 cm; Weight: 5.6 kg **075/791** **189.95**

Aluminium | double-sided PVC coating, 100 % PES polyester | Tent depth: 220 cm

Sun Canopy Canopy Shady Pro

HydroTech® RIPSTOP

MADE IN GERMANY

The sun canopy Canopy Shady Pro is made in Germany and can be directly attached to caravans or to the models Galaxy, Pluto, Pluto XL, Ceres and Vega (model series from 2023 on). With a depth of 220 cm and the high-quality HydroTech® Ripstop material, the Canopy Shady Pro reliably protects you from the sun and the rain. Thanks to the three steplessly height-adjustable poles and four guy ropes, the Canopy Shady Pro is set up quickly and easily. The sun canopy is available in different sizes, each with a depth of 220 cm.

Material: double-sided PVC coating, 100 % PES polyester

Scope of delivery: tensioning material, sun canopy, poles

Advantages

waterproof
UV-resistant
quick to set up

For Pluto size 12 and Ceres size 11. Width: 570 cm; Weight: 8.4 kg	**075/745**	**339.00**

Sun Canopy Kombi

Use it as a sun canopy on your awning or pull it into the piping rail of your caravan. If you are using it as a sun canopy in front of your awning, put the included plastic eyelets into the appropriate places. These places are reinforced with PVC. In addition, there are two hemstitches behind the front wall for further stability. The left and right sides of the piping rail are both equipped with a tensioning triangle so that the sun canopy cannot move or lift off. There is no need for additional tools.

Material: All Weather Tex 1.7, double-coated polyester.

Scope of delivery: 3 eyelets for attachment, sun canopy

Advantages

All Weather Tex awning extension tent depth 240 cm

Sun Canopy Bermuda

Flexibility is everything! Sun, wind or rain – with Bermuda, weather conditions are no longer going to be a problem! With the comfortable depth of 235 cm and the robust side parts that are easily connected to the canopy via zip, you are protected from all sides. The required size depends on the A-measurement of your caravan. Bermuda can be transformed into an awning with an additional front wall. The front wall is secured with a zip in the gable. Connection to side walls via zip.

Material: Airtex UV-resistant, fully synthetic, rot-resistant, waterproof, non-fading, dirt-repellent.

Accessories (not included): complete frame with ø 25 mm steel or ø 28 mm aluminium poles, front wall, partition wall, Sun-Tarp, storm strap set. EasyClip holder at extra charge.

Scope of delivery: 3 pitching poles, tensioning material, sun canopy, transport bag

Sun Canopy Stella

The appealing sun canopy protects against the oppressive heat at lunchtime and creates a comfortable place in the shade where you can read, eat, or just relax. Just order the side walls in your favourite colour to create a nice windbreak with large transparent film windows (incl. gauze).

Roof: with sewn-in gable; with zips to attach the front and side walls. SHS piping to attach the no-screw Vario Clip elements.

Material: roof exterior made of PVC-coated polyester fabric; front and side walls made of trailtex fabric, PU-coated on one side; windows made of a high-quality film with high UV stability.

Tensioning: possible from the inside with flexible tensioning straps; external mud flap with eyelets. Attachment of the optional storm strap over the pole spike.

Please order side walls, front wall and poles separately!

When using basic poles, we recommend two additional roof poles from size 11 and two additional storm poles from size 13 (ø 25 mm aluminium).

Scope of delivery: tensioning material, sun canopy

Seasonal Awning Lux

from 999.00

Double wind corner – advantageous for aerodynamic caravans.

without poles | double-sided PVC coating, 100 % PES polyester | Tent depth: 240 cm

Seasonal Awning Lux

This stylish 5-piece awning in a lively and friendly colour design offers numerous equipment features and comfort at an incredible price. Versatile use, e.g. as a sun canopy, either with or without side walls. Enjoy your holiday and leisure time! Thanks to the doors in the front and side walls, you can easily enter the awning. The roof ventilation provides a pleasant indoor climate.

Front wall and **side walls:** can be removed. Front wall can be divided and used as a veranda. Entrance door can be rolled up. Front wall window with curtains. The canopy is equipped with hemstitches for additional poles (optional).

Side walls: with doors that can be rolled back. The right side wall is equipped with a double wind corner (advantageous for aerodynamic caravans). Large gauze windows.

Roof: with permanent and high ventilation. Equipped with rain gutter piping on both sides.

Material: roof, front and side walls are made of high-quality, PVC-coated (both sides) polyester fabric (Trevira); extremely tear-proof, rinseable and easy to clean.

Poles: not included, please order separately.

Scope of delivery: tensioning material, mud flap, curtains, wheel case cover, transport bag, tent

Storm Strap Set Frankana Freiko

Tensioning is provided by a strong tension spring that regulates the tension of the strap while an iron ground spike ensures the necessary hold. On storm roofs without an overhang, the eyelet of the strap is placed on the spike of the tent poles.
Set: 2 straps with eyelets (length: 280 cm), 2 relief springs, buckles, abrasion protection and 2 pegs.
Suitable for: Lux, Prestige, Jubilee, Lago, Rhön DC and Feldberg. **070/926** **52.50**

Travel Awning Classic

from 1,042.00

Steel | 100 % PES polyester | Tent depth: 240 cm

Travel Awning Classic

Quality and performance at their best! The newcomer model Classic consists of 5 parts and meets all requirements at once. This model's distinguishing features are its sophisticated functionality and ease of use. Side and front walls can be easily removed to form a large sun canopy for afternoon leisure hours. With 3-year manufacturer's warranty. Hemstitches and storm reinforcement underneath all windows, extra strong and covered zips as well as a covered curtain rail complete this model.

Front wall: can be detached from the roof (veranda effect), round arch door with stable door effect. High vents with flaps. Exchangeable, which means that the door can be placed on the right-hand side.

Side walls: can be detached from the roof on both sides. Each side with mosquito window, embossed glass flap and entrance door.

Roof: with roof overhang in the front with hemstitches and poles. Welded seams. Piping rail for sun canopy.

Material: Front wall made of Airtex fabric. Side walls/roof made of polyester fabric with PVC coating.

Poles: ø 25 mm steel, from size 8 on with two roof hook poles.

Scope of delivery: ø 25 mm steel poles, tensioning material, mud flap, transport bag, tent

Accessories

Storm Strap Set Herzog

Resistant to wind and weather. Better safe than sorry! This extremely robust tensioning strap secures your tent in strong winds. The innovative storm strap is clipped onto the sides of the front wall without straining the lateral canopy poles. Thanks to an additional spring, the tensile load on belt and awning is significantly damped. Keep your tent upright with this worthwile investment. The storm strap is suitable for all Herzog awnings with clip equipment.
Consists of:
3 **belt straps** approx. 40 mm wide, with belt clip; 3 galvanised **special pegs** approx. 38 cm long; 3 **spiral springs** approx. ø 18 mm; **tensioning strap** with buckle.

070/925 **84.00**

100 % PES polyester, with PU coating

Tent depth: 240 cm/270 cm

Travel Awning Jubilee 40

MADE IN GERMANY

The typical travel awning Jubilee 40 comes in two different tent depths. With its modern, fresh and contemporary colour scheme, you will attract amazed looks at your holiday destination. With raised splashguard and mud flap made of high-quality polyester (plastic-coated on both sides, weatherproof and completely washable). The window films absorb approx. 90 % of UV radiation.

Front wall: separable and removable; folds down to form a veranda, the door (on the left) can be rolled up; windows fitted with curtains; horizontal hemstitches under the windows to accommodate storm poles or veranda poles. From size 16, the left front wall window is divided into two windows.

Side walls: removable; entrance door can be rolled away to the side; horizontal hemstitches to accommodate storm poles, large ventilation windows made of mosquito gauze with embossed foil flap (can be closed via zip).

Material: roof and walls made of trailtex, polyester fabric coated on the outside; breathable, non-fading and light.

Poles: ø 25 mm aluminium

Scope of delivery: tensioning material, mud flap, curtains, wheel case cover, transport bag, Travel-Paket, tent

Advantages

incl. curtains
veranda option
large windows

removable side walls with entrance door

Can also be used as a sun canopy.

Travel Package

Jubilee 40, depth 240/270 with aluminium poles 28 x 1 mm/25 x 1.2 mm, 2 ridge poles (aluminium 28 x 1 mm), 2 storm poles (aluminium 25 x 1 mm), Grip-Stop quick-release fasteners, pole tensioner + safety belt Plus

Tent depth: 240 cm

Travel Awning Como

This 5-part awning offers everything you need during your camping holiday. It features all important equipment details of its "big siblings" and is made of TenCate's proven quality materials. The five separate tent parts (roof, two front and two side walls) can be stored away easily while travelling. It is easy to set up.

Front wall: coated on the outside for a pleasant room climate. The door in the front wall can be used either to the left of the centre or on the far right. The front wall can be folded to form a veranda. Heavy zips.

Side walls: with doors and veranda effect. Gauze windows for optimal ventilation. Additional weatherproof film cover. Side wall zips protected by fabric covers.

Roof: decorative print on the inside. Reduces condensation. Without seam.

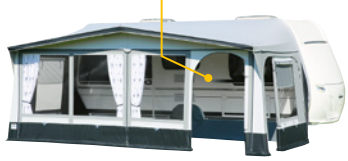

Material: Front wall and side walls made of TC-Touring 180 coated on the outside. Roof made of TC-Touring 240 coated on the outside (roof metallic).

Poles: ø 25 x 1 mm steel – from size 10 on, it is equipped with five roof poles and five pitching poles.

Scope of delivery: tensioning material, mud flap, curtains, wheel case cover, storm flaps, poles, tent

Variable entrance door in the front wall.

Sitting area protected against wind and weather.

Advantages

incl. curtains
veranda option
large windows

Accessories

Tension Rafter

The telescopic tension rafter is used to reinforce canopies. **610/028** **18.50**

Storm Kit

Conventional storm straps that lie above the tent can abrade the roof fabric. Sewn-on storm straps can take an unnecessary toll on the seam and fabric area. The storm kit secures the awning at the pole spike of the corner brackets, one of the most stable points of an awning. Heavy fabric belts and sturdy tent poles provide tension. An inserted steel spiral spring compensates rip and pulling forces that are caused by gusts of wind.

610/321 **61.00**

Aluminium

95 % PES polyester, 5 % cotton

Tent depth: 240 cm

Travel Awning Meira

The 5-piece design travel awning with great equipment offers space for the whole family. The windows are equipped with curtains with roller suspension. The awning is equipped with a special piping to accommodate the screwless retaining brackets (brackets not included). Four storm strap clips, the draught skirt (can be tensioned inside or outside) and the Vario corner on the front slope of the caravan round off the awning. A piping for attaching an extension on the right-hand side and the permanent top ventilation with zip make the awning a functional companion. Hemstitches in the canopy to accommodate the canopy poles.

Front wall: two pieces, interchangeable, can be folded down to form a veranda. Windows with curtains.

Side walls: interchangeable, can be folded down to form a veranda. With large window with mosquito gauze and cover. With door that can be rolled away to the side.

Material: roof made of Tencate WM19 (printed inside), front wall and side walls made of Tencate WR18 (breathable), 95 % polyester, raised mud flap made of PVC.

Poles: ø 28 mm aluminium poles (5 roof poles, 3 legs, canopy poles)

Scope of delivery: ø 28 mm aluminium poles, tensioning material, mud flap, curtains, transport bag, tent

large panorama windows

Extension Meira

included mud flap

Travel Awning Luxor Air

The fully integrated inflatable awning has a depth of 280 cm. Specially designed to create a large, luxurious space with plenty of daylight in front of your caravan. Weatherproof, with sealed seams and double mud flap. Optionally, the awning can be extended with an extension attached to the desired side wall.

Front wall: with covered zips for optimum protection. Transparent film windows with curtains. Windows can be folded down to form a veranda. Front walls are exchangeable. This results in four possible doors.

Side walls: with covered zips. Side walls can be completely removed and replaced thanks to a zip. This means that the ventilation windows can be placed at the front or towards the caravan. Transparent film windows with curtains for even more privacy.

Material: made of extra strong KlimaTex polyester fabric, PU-coated.

Poles: Airtube

Scope of delivery: tensioning material, Airtube, double action pump, curtains, transport bag, tent

Advantages
fully integrated
veranda effect
incl. curtains
all-around canopy

PRICE TIP

Fresh air in your awning thanks to veranda effect.

Travel Awning Ceres

The elegant design and the modern, rounded shape leave nothing to be desired. With a depth of 260 cm, the inflatable awning Ceres is very spacious. It is pulled completely into the piping rail of your caravan. This means that all windows, doors and service hatches can be opened easily and that the awning is sealed. The high-quality HydroTech® Ripstop material, the permanent ventilation and the tinted windows ensure a pleasant temperature inside the awning even on hot summer days. Thanks to the large panorama windows, you always have a great view and optimal lighting conditions. The headroom of approx. 185 cm at the front wall ensures that the space inside the awning can be optimally used and thanks to the AAS system, the inflatable awning is quick and easy to set up. The new model is additionally equipped with a connection for the sun canopy Canopy Shady Pro and is available in additional sizes.

Front walls: removable, with tinted window film. Can be used as needed.

Side walls: with mosquito nets. Can be used as needed.

Advantages

fully integrated inflatable awning
set up in only 20 – 30 minutes
available in 4 sizes

Extension Eris Premium

The extension Eris is quick and easy to set up and creates extra living space in your awning! No matter whether you are sleeping in it or use it as a kitchen or storage tent, Eris offers a variety of possibilities. The door and the tinted windows with privacy function create optimum light conditions and always give you a perfect view. The height of 180 cm offers headroom and leaves nothing to be desired. A double zip allows you to use the existing side wall of your inflatable awning as a partition or room divider. The supplied roof poles ensure optimum tension in the roof.

Scope of delivery: tensioning material, Airtube, roof pole, mosquito net, transport bag, tent
Colour: grey; Dim. (W x H x D): 210 x 180 x 180 cm; Pack size: 95 x 30 x 30 cm; Weight: 11 kg

Sun Canopy Canopy Shady Pro

The sun canopy Canopy Shady Pro is made in Germany and can be directly attached to caravans or to the models Galaxy, Pluto, Pluto XL, Ceres and Vega (model series from 2023 on). With a depth of 220 cm and the high-quality HydroTech® Ripstop material, the Canopy Shady Pro reliably protects you from the sun and the rain. Thanks to the three steplessly height-adjustable poles and four guy ropes, the Canopy Shady Pro is set up quickly and easily. The sun canopy is available in different sizes, each with a depth of 220 cm.

Scope of delivery: tensioning material, sun canopy, poles
Colour: grey

All-Season Awning Rhön DC

from 1,910.00

Retrofittable with the Power Grip on page 55.

without poles | double-sided PVC coating, 100 % PES polyester | Tent depth: 240 cm

All-Season Awning Rhön DC

The ideal PVC awning for both permanent and seasonal campers as well as for those conscious of quality and comfort. Window flaps made of canvas. Heavy and covered zips. Double curtain rail and curtains with roll suspension. Hemstitch pockets in the canopy. Velcro strip channels for increased storm resistance. Suitable for vehicles with aerodynamic bow design (KNAUS, Bürstner, Eifelland, etc.).

Front wall: consists of four parts. Each part can be removed individually. Can be used as a veranda. All windows can be closed with window flaps. The front door can be placed either to the left or to the right of the centre. The door can be rolled up. Velcro strip channel under windows.

Side walls: removable, with one door each. Gauze/foil window with clear foil flap and window flap. Velcro strip channel under windows.

Roof: without attachment seam and with SHS piping. Covered gable ventilation, piping rail for rain gutter, roof overhang 18 cm.

Material: front wall, side walls and roof made of rinseable PVC-coated tarpaulin.

Poles: Not included in delivery, please order separately!

Scope of delivery: tensioning material, mud flap, curtains, wheel case cover, bag, tent

Advantages

veranda option
incl. front wall curtains
incl. bag and mud flap

MADE IN GERMANY

Accessories

Poles

The pole set consists of 5 roof poles and 5 support poles. Material: steel; ø 25 mm **610/060** **307.50**

Storm Strap Set Frankana Freiko

Tensioning is provided by a strong tension spring that regulates the tension of the strap while an iron ground spike ensures the necessary hold. On storm roofs without an overhang, the eyelet of the strap is placed on the spike of the tent poles.

Set: 2 straps with eyelets (length: 280 cm), 2 relief springs, buckles, abrasion protection and 2 pegs.

Suitable for: Lux, Prestige, Jubilee, Lago, Rhön DC and Feldberg. **070/926** **52.50**

Side Wall Curtains

Enhance your awning with curtains and create a homely atmosphere. Protects against unwanted glances. Set consists of 4 curtains. Weight: 800 g **070/409** **100.00**

All-Season Awning Finnland

The 5-part all-season awning is equipped with a special piping to hold the screwless brackets (not included). There are storm flaps and hemstitches under all windows. With double draught skirt, storm belt clip and a Vario corner that adapts to the caravan.

Front wall: two pieces, interchangeable. Entrance door can be rolled up and away. With Velcro and fleece for vertical pole. Lockable permanent top ventilation.

Side walls: with gauze window with clear and dark cover. Lateral piping for attaching a rain gutter. Piping for attaching a bay on the right side.

Roof: hemstitches in the canopy to accommodate the canopy tensioning pole.

Material: roof, side/front wall and draught skirt made of PVC

Poles: ø 25 mm steel (5 roof poles, 3 storm poles, canopy poles)

Scope of delivery: ø 25 mm steel poles, tensioning material, mud flap, curtains, transport bag, tent

Advantages

incl. curtains
veranda effect
optionally extendable

Steel Poles Finnland

If the tent is subjected to harsher conditions or high loads, e.g. wind or roof loads, reinforced steel poles are recommended. For an additional charge, you can purchase 32 mm steel poles instead of the 25 mm steel poles (additional weight: 20 kg). **075/564** **199.95**

Accessories

Anbau Grönland/Finnland

The extension for the awnings Grönland and Finnland is connected to the awning by means of a double piping profile. With blackout front window and a lateral entrance that can be rolled up. Steel | 100 % PVC polyvinyl chloride | Tent depth: 240 cm/280 cm

All-Season Awning Grönland

The ideal awning for permanent campers. Under every window, there are storm straps on the outside and hemstitches on the inside. The tent has three roof channels and a special piping for screwless support brackets (brackets not included) and a lateral piping for a rain gutter. A Vario corner ensures that the awning perfectly adapts to your caravan. The double draught skirt with sewed on piping between the mud flaps makes it possible to move special tensioning hooks.

Front wall: 4 pcs. (6 pcs. from size 11), all parts are interchangeable. Can be folded down to form a veranda. Entrance (80 cm) can be rolled up. Vertical Velcro channels. Closable top ventilation.

Side walls: 2 pcs., all parts are interchangeable (1 x door, 3 x windows), window 1/2 gauze, 1/2 film, with dark cover. Veranda option. Vertical Velcro channels.

Roof: with three roof channels for roof poles with Velcro tape. Hemstitches in the canopy for canopy tensioning poles.

Material: rinseable and easy-to-clean PVC

Poles: ø 32 mm steel poles consisting of: 5 roof poles, 5 pitching poles, canopy poles.

Scope of delivery: ø 32 mm steel poles, tensioning material, mud flap, curtains, transport bag, tent

Storm Package

Simply pull it into the awning's hemstitches. That way, the awning walls are less compressed by the wind and the awning stays upright. Thanks to four additional roof poles, the distance between the poles is halved. This reduces the risk of water accumulating in heavy rain.
Scope of delivery: ø 25 mm and 32 mm steel roof poles and clamps for ø 32 mm steel poles.

All-Season Awning Allgäu

The freestanding, weatherproof awning is entirely made of PVC. A double draught skirt with sewn-on piping allows to move specific tensioning hooks freely. Thanks to hemstitches at the canopy and under the interior windows as well as storm retainer strips on all exterior windows, additional poles (storm poles) can be mounted. All window flaps can be closed via zip. Three-sided roof overhang approx. 25 cm and 40 cm wide overhang flap, parallel to the vehicle wall. With six pre-installed storm clips (storm straps additionally available).

Front wall: two pieces, both pieces interchangeable. Entrance door can be rolled up. A mosquito net door is optionally available (075/449). Vertical Velcro channels for further fixation of the poles as well as quick opening and closing.

Side walls: interchangeable, equipped with a closable permanent top ventilation. One side wall with large gauze windows with see-through cover and a PVC window flap above. One side wall with a laterally retractable door, gauze, see-through foil and a PVC window flap.

Rear wall: made of two parts, rubber foam bulges can be attached via zip. The rear wall's height can vary from 235 to 250 cm.

Advantages

freestanding and weatherproof
double draught skirt
incl. curtains

Material: front wall, side walls and roof made of washable, easy-to-clean, weatherproof PVC tarpaulin fabric

Poles: ø 32 mm steel frame (5 roof poles, 8 vertical poles, canopy poles)

Scope of delivery: ø 32 mm steel poles, tensioning material, curtains, tent

Accessories

Storm Package Allgäu

Stabilises your all-season tent, even in windy conditions. With hemstitches under the inside of the window for the optional storm poles. Wind from the front and side can be absorbed better as the tent walls are less compressed. The four additional roof poles halve the distance between the poles, i.e. water cannot accumulate easily in heavy rain.
Material: steel poles 25 mm and 32 mm

075/538 **399.95**

Rain Gutter Allgäu

The high-quality aluminium rain gutter is attached to the canopy poles and ensures the controlled draining of rainwater from the pent roof.
Scope of delivery: rain gutter, connector and clamps.

Partial Tent Vega 2.0

The inflatable awning Vega is perfect for those who travel a lot and change location often as it can be set up and taken down quickly. Thanks to the tent depth of 250 cm, the inside of the tent is very spacious. The air tubes are designed in such a way that you can stand upright and can optimally use the space. The large panorama windows create a great sense of space. Thanks to the included gauze element, it is perfect for warm weather, because it provides shade, insects stay outside and you can enjoy a pleasant temperature inside the tent. The new model is additionally equipped with a connection for the sun canopy Canopy Shady Pro.

Material: HydroTech® Cotton Touch

Poles: Airtube

Scope of delivery: 2 pressure poles, 2 transport bags, tensioning material, Airtube, mud flap, air pump, wheel case cover, tent

You can find the matching sun canopy Canopy Shady Pro on page 4.

How to attach your awning to your van.

1 Standard mounting (with rain gutter):
Insert the connecting pole into the hemstitch of the spacer strip. Insert into gutter and fix with clamp.

2 Mounting without rain gutter:
Clamp the connecting pole to the clamping suction cup. Attach the connecting pole to the roof of the vehicle.

3 Fixing suction cups:
Simply clamp the connecting pole to the suction cup. Paint-friendly attachment.

4 Mounting with piping:
With the piping magnetic adapter set. Is connected to the tent with piping and profiles and adheres to flat vehicle roofs.

Partial Tent Space Air HQ

The travel tent is an alternative to the awning tent. Set up quickly and easily, it persuades with its stability. Spacious due to a tent depth of 280 cm. The partial tent can be tensioned on the outside and offers storm tensioning possibilities.

Front wall: sizes 260 and 320 with 2 windows, sizes 375 and 445 with 3. All segments can be rolled up or tilted out (optional pitching poles). One window segment has a large gauze insert. The window flap of this window can be stretched to form a protective hood, thus protecting the open window from wind and rain. All windows can be closed completely.

Side walls: with gauze/transparent film window and curtain. Gauze can be closed with film cover and zip. Doors that can be rolled away to the sides, stable door effect, covered zips.

Design: 10 cm Air-In-System; sizes 260 and 320 with 3 chambers, sizes 375 and 445 with 4 chambers; all sizes come with additional spacer pads in the roof that reinforce and stabilise the roof surface.

Roof: equipped with 7 mm and 6 mm piping.

Material: Texolan 150 HQ (High Quality), PU-coated.

Scope of delivery: tensioning material, Airtube, roof pole, spacer pad set, double action pump, curtains, transport bag, tent

Mounting height: 175 – 200 cm
The compact, freestanding van awning is available with poles (Newburg 160) or, for those who want to set it up more quickly, as an inflatable awning (Newburg 160 Air). With mosquito net door behind the front wall. The large windows can be closed from the inside with curtains. The interior space of 260 x 160 cm with raised groundsheet can be enlarged by the depth of the connector by opening the rear wall completely. There are two opposite entrances in the connector and a groundsheet for this area is included. The awning can be attached to the vehicle with double piping (5 and 7 mm) or guy ropes.

Advantages
large canopy
HookTrack System
Link Access Zone

Front wall: vertical for optimum living space. Can be fully opened with double zip. Flat folding front door with mosquito net. Large canopy offers protection against rain.

Side walls: with large windows that can be completely closed.

Material: flysheet: Outtex® 3000/4000 Select, 100 % polyester; groundsheet: coated on both sides, waterproof, 100 % polyethylene

6000 mm

Westfield Top Quality Concept

Inflatable Pavilion Tent Triton

The freestanding tent can be used without a vehicle or you can attach it to various vehicles and caravans with the optionally attachable connectors. Two side walls are equipped with tinted windows, gauze and blackout blinds, while two other walls are equipped with tinted windows and blackout blinds. Thanks to its size of 300 x 300 cm and a roof height of 235 cm, the tent is spacious and you can stand upright inside. The side wall windows can be removed to turn the tent into a pavilion. Thanks to the AAS system, the tent is quick to set up. Incl. groundsheet. The universal inner tent by Westfield can optionally be attached. Triton is available with three different mounting heights.

Side walls: with large, tinted windows that can be removed completely if necessary.

Material: HydroTech® Ripstop 100 % polyester

Poles: Advanced Air System® (AAS)

Inflatable Tent Aquila Pro

The freestanding inflatable tent Aquila Pro provides a lot of extra space for campers and van campers. Both the connector and the optional sun canopy can be attached on the left or on the right and the front wall can also be used in two different places. Without a vehicle, the Aquila Pro can be used as a family tent. The tent is very spacious inside and can be used in a variety of ways – be it for additional sleeping spaces or as a large awning/tent. Since the tent is attached to the side of your vehicle, you overall do not need a lot of space for your vehicle and tent. The built-in AAS system ensures that you can set up the tent very quickly. The Aquila Pro inflatable awning is also equipped with high-quality HydroTech® Ripstop material. A groundsheet is optionally available.

Front wall: can be used in two different places.

Van Awning Mars

Mounting height: 245 – 260 cm

Start your holiday with the inflatable awning Mars with an awning depth of 250 cm. It fits perfectly and has the perfect width for your van. All window/door segments can be removed completely in a short time so that there are no barriers and you have a convenient sun canopy. The double mud flap and the permanent ventilation through the top ventilation make the van awning even more convenient.

Front wall: with two tinted window segments that can be folded down if required.

Side walls: each with a door and a tinted window gauze segment. These can also be interchanged if required.

Material: HydroTech Ripstop with polyurethane coating

Van Awning Zodiac

Mounting height: 180 – 270 cm

The inflatable awning Zodiac for vans and motorhomes from 180 to 270 cm is easy to transport. Thanks to two air tubes and three aluminium roof poles, it can also be set up quickly. With panorama windows, a door in the front wall and side walls with mosquito nets. The functional connector, which is available in three sizes, connects the freestanding inflatable awning to the vehicle. The connector is attached to the tent with a zip and to the vehicle with a piping. Alternatively, a connecting pole can be used or the connector can be tensioned over the vehicle using guy ropes. The two entrance doors in the connector allow direct access to the vehicle.

Front wall and side walls: with windows and ventilation flaps for perfect ventilation. Can be folded down or removed if required.

Material: high-quality 150 D material

Poles: air tubes

Scope of delivery: tensioning material, Airtube, air pump, groundsheet, transport bag, tent

PRICE TIP

Van Awning Journeymaster Deluxe L

Mounting height: 180 – 210 cm

The Journeymaster Deluxe L is a spacious awning with BlackOut Bedroom™ sleeping cabins – the perfect companion for your next trip with your van. The awning is quick and easy to pitch thanks to its pre-assembled steel poles and air tubes, making it well-suited for a road trip with many stops. The integrated large windows let in light, but at the same time, the sleeping cabins equipped with BlackOut Bedroom™ technology guarantee a restful sleep. Thanks to this technology, up to 99 % of daylight is kept out of the sleeping areas.

Van Awning Journeymaster Pro

Mounting height: 180 – 210 cm

The Journeymaster Pro is the perfect companion for your next van trip, as it offers plenty of extra space for living and sleeping. Thanks to the fibreglass poles, the awning scores with its low weight. The large integrated windows are fitted with curtains for more privacy and provide plenty of light, while the sleeping cabins equipped with BlackOut Bedroom™ technology guarantee a restful night's sleep. Thanks to this technology, up to 99 % of daylight is kept out of the sleeping areas. There is a door in the connector through which you can enter the vehicle without having to use the front entrance. Low and high ventilation openings ensure better air circulation and reduce condensation. The awning is also equipped with storm straps, two cable routings and a suspension point for a lantern.

Roof Tent Moonlight Tent

The roof tent for minivans and SUVs is ideal for a holiday in the middle of nature. The tent is attached on the roof rails, which must have a minimum load capacity of 75 kg and a usable width of at least 78 cm. The roof tent can be folded up quickly and easily and can also be used together with a wall awning. Version 140 offers space for 2 people, version 180 for 3 people. Both are equipped with fly screens and blackout blinds on all four sides, a rain cover, windows and YKK zips.

The base consists of an aluminium plate with a honeycomb structure and the integrated mattress is 5 cm thick and consists of two types of foam with different thicknesses. You can easily reach the roof tent using the 2.30 m aluminium ladder (max. load capacity 150 kg). The waterproof cover protects against rain and the internal LED strip with adjustable light intensity provides suitable lighting. You can store your accessories neatly in the pockets.

The optional Privacy Moonlight Tent (075/810 or 075/811) provides even more privacy if required.

Version 140

2

Lightweight roof tent for attachment to almost all common vehicle models

Roof Tent Yano

2

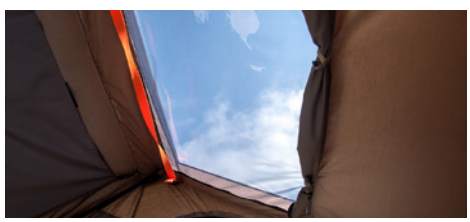

The Yano roof tent with its low weight of approx. 38 kg leaves nothing to be desired in terms of features. The material is a 180 g/m² recycled Ripstop TC (cotton blend fabric made of 65 % polyester and 35 % cotton). The tent has excellent ventilation and many other well thought-out details, such as a storage pocket for shoes and a window for a view of the starry sky. The roof tent can be attached in a few steps with the help of a roof rack and can thus be mounted independently of the vehicle. A comfortable TPU air mattress, an extension ladder and a protective cover are included. This tent is completely PVC-free and one of the lightest roof tents on the market. Despite the simple construction, it offers a lot of sleeping comfort. Thanks to the patter guard, which you can attach to the tent from the outside in case of rain, you will have a quieter night inside the tent.

Advantages
easy to use
durable, PVC-free tarpaulin
aluminium profile frame

polyester part made from rPET polyester from plastic bottles

Scope of delivery: car roof tent incl. frame, protective cover, shoe box, inflatable mattress with cotton cover (in the tent), telescopic aluminium ladder, patter guard/sun protection, fastening set, assembly instructions.

good ventilation thanks to entrance and windows

Accessories

Canvas Awning for Yano

The Yano canvas awning is the perfect addition to the roof tent Yano. It offers plenty of space to relax in the shade at warm, sunny places and also protects your equipment when it rains. The canvas awning is fixed to the frame with velcro straps, tensioned with straps and set up variably in height and according to your needs using the pitching poles supplied. This ensures a dry and protected passage to the roof tent and a dry shelter for your meals.
Colour: brown; Material: 100 % recycled PET, Oxford Polyester; Dim. (L x W x H): 370 x 490 x 0.3 cm; Pack size: 97 x 14.5 x 14.5 cm; Weight: 4.7 kg **075/580 299.00**

Event Shelter Air L

The Event Shelter Air L by Coleman® can be set up quickly and easily by just one person and is a smart option for families who want to spend a longer holiday at a campsite. The spacious shelter can be set up in just a few minutes thanks to the single inflator point system. All you need to do is attach the supplied pump to the valve on the Event Shelter Air. The incoming air is then quickly distributed in the individual arch poles and thus throughout the entire shelter. As soon as the shelter is fully inflated and the valve is closed, the clips included in the scope of delivery allow the individual air tubes to be separated from each other. In this way, in the event of a small leak, it can be ensured that the air only escapes from the affected arch pole and not from the entire shelter. The Event Shelter Air L is equipped with Coleman® UV protection, which increases the durability of the fabric.

Scope of delivery: tensioning material, air pump, pavilion, transport bag

Pavilion Event Shelter Pro

The Coleman® Event Shelter Pro is available in two different sizes and offers a place in the shade for you, your family and your friends – in your garden or on your terrace. The 19 mm steel poles are robust, the taped seams waterproof and the roof is able to withstand a hydrostatic head of 1000 mm.
The Event Shelter Pro is reliable and easy to set up thanks to its well thought-out design. Thanks to UV Guard™, you are well-protected against UV rays with a sun protection factor of 50+. The robust connection feet keep the poles together and can simultaneously be used to hammer down the pegs included in delivery.

Steel UV 50+

Scope of delivery: ø 19 mm steel poles, tensioning material, pavilion

Airtube UV 50+

Airtube poles

two wall sections with mosquito net

Pavilion Relax Air

The space this pavilion offers is simply wonderful. Thanks to the innovative Air-In air tube system, you can set up this protected space of more than 12 m² in no time at all. Leave nothing to chance and be well prepared for all eventualities. Ideal, small pack size – perfect for picnics, camping and at home. Its single-chamber Air-In system ensures that it is set up and taken down quickly. All four walls can be removed via zip and are interchangeable. Two wall sections also contain a mosquito gauze window with an internal foil cover. The foil cover can be opened via zip. Another wall section can be opened to form an entrance (can be rolled away to the left).

Material: Texolan 30, PU-coated

Scope of delivery: 4 side walls, tensioning material, Airtube, air pump, transport bag, tent

Outwell

Sun Canopy Hillcrest Tarp

Mounting height: 175 – 200 cm

The Outwell sun canopy Hillcrest Tarp can be used as a simple canvas awning. It is pulled into the awning rail of the van and is stretched forward using the poles supplied. Alternatively, it can also be attached to the piping rail of an awning, providing additional protection against sun and rain. In no time at all, it transforms a simple shelter into a convenient shaded living space that offers protection and privacy inside. When attached on the other side, the shaded area is particularly beneficial to the refrigerator and its performance. It can also be partially rolled up and secured with toggles. And even then, it still offers protection from the elements.

Material: Outtex® 300 Select Care, 100 % polyester

Poles: 2 pitching poles ø 16 mm steel

Scope of delivery: 2 steel pitching poles, tensioning material, sun canopy
Dim. (W x D): 210 x 235 cm;
Pack size: 44 x 33 x 6 cm; Weight: 2.1 kg

2 fastening options

Sun Canopy Fjord

Visually appealing sun canopy with side wall option in two different sizes.
This sun canopy can be mounted in two different ways. It can be pulled into a piping rail such as the Multirail or other commercial piping rails. The second option is to attach it via a connecting pole (included in delivery). It is inserted into the existing hemstitches of the sun canopy and then placed in the gutter of the vehicle (see drawing). Fixed with the included clamps. Both sizes come with three pitching poles.

Material: All Weathertex 1.7, made of 100 % polyester, PU-coated, therefore extremely light; rot-, tear- and waterproof, taped seams, reinforced eyelets.

Poles: ø 19 mm steel

Scope of delivery: tensioning material, pitching poles, fixing clamps, connecting pole, sun canopy

Outwell

Windbreak

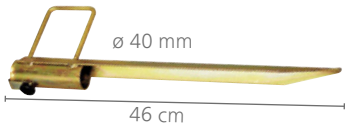

Outwell's windbreak protects you over a length of 5 metres and is therefore large enough for your whole family and your deckchairs. The four sections of fabric are 125 cm high. The convenient PVC panorama window in the upper part allows you to keep an eye on your children. The windbreak is fixed by means of robust steel poles with spring connection and is secured with ground spikes, steel pegs and luminous guy ropes.
Material: Outtex® 3000 Select polyester
Poles: ø 16 mm steel
Material: 100 % PES polyester; Dim. (W x H): 500 x 125 cm; Pack size: 50 x 18 x 11 cm; Weight: 2.6 kg

Power Grip

Power Grip simplifies the setup of your tent. When tensioning the poles, it is sufficient to lightly press the clamping mechanism so that the poles lock. This proven system can be used to replace the pole clamp.

Consider the following advantages when ordering your awning:

- The pole surface cannot be damaged.
- The pole cannot be deformed.
- The clamping mechanism has no galvanised steel parts.
- Optically pleasing
- Can be retrofitted

The Power Grip replacement set is available for the following pole diameters:

- ø 32 mm/ø 28 mm
- ø 28 mm/ø 25 mm
- ø 25 mm/ø 22 mm
- ø 22 mm/ø 19 mm

ø 22 mm	**610/594**	**3.10**
ø 25 mm	**610/596**	**3.10**
ø 28 mm	**610/597**	**3.10**

Gutter TOP-RAIL VW

MADE IN GERMANY

from 195.00

The stylish, tried and tested gutter and fixing rail for awnings and canvas awnings is also available for the VW T5/T6/T6.1. Water runs off perfectly and conveniently along the side of the windscreen, even with an awning attached to the vehicle.

Wind noise at higher speeds is reduced by TOP-RAIL® attached on both sides. You cannot attach roof racks to the VW T5/T6/T6.1. However, the TOP-RAIL® T5/T6/T6.1 features all the other advantages of the TOP-RAIL® T4.

The aluminium profile **TOP-RAIL® T5/T6/T6.1** has been specially formed for the bodywork of the VW T5/T6/T6.1 and is therefore only suitable for these vehicles. Attachment to the T5 California would technically be possible, but Volkswagen AG does currently not allow the removal of the serial rails.
A matching spoiler set is mandatory for TÜV (MOT) approval!

fixing rail for awnings and canvas awnings

VW T4 (short wheelbase)
Dim. (W x H x D): 260 x 3.5 x 3 cm
Weight: 2.4 kg **610/700** **195.00**

VW T4 (long wheelbase)
Dim. (W x H x D): 340 x 3.5 x 3 cm; Weight: 3.15 kg
610/701 **195.00**

VW T5/T6/T6.1 (short wheelbase) left-hand
Dim. (W x H x D): 266 x 3.5 x 3 cm; Weight: 2.45 kg
610/702 **265.00**

VW T5/T6/T6.1 (short wheelbase) right-hand
Dim. (W x H x D): 266 x 3.5 x 3 cm
Weight: 2.45 kg **610/703** **265.00**

no overflowing rainwater

Mandatory for TÜV approval!

75.95

VW T4 left-hand

TOP-RAIL Spoiler Set

The spoiler set for the TOP-RAIL® rain gutter perfectly diverts the rainwater coming from the roof. No rainwater can run through between the aluminium profile and the spoiler. Thanks to this, it cannot overflow.
Dim. (W x H x D): 32 x 4 x 25 cm; Weight: 100 g

BENT

69.95

Folding Suction Cup for Fastening the Tensioning Pole

With the Bent folding suction cup made of 100 % stainless steel, you can fix the universal adapter incl. aluminium tensioning pole to your vehicle. The natural rubber suction plate adapts optimally to smooth surfaces and offers a maximum load capacity of 10 kg. Thanks to the curved clasp, a tensioning pole with a maximum diameter of 22 mm can be hooked in.
Ideal as an addition to the Bent universal adapter + aluminium tensioning pole to attach the Bent system to the vehicle. Material: 100 % stainless steel; suction plate: 100 % natural rubber.
Content: 1 piece **610/669** **69.95**

19.95

Suction Cup

Attach awnings or sun canopies to vehicles without a gutter (e.g. VW T4) by using a negative pressure suction cup. Content: 1 piece;
Dim. (H x ø): 60 x 100 mm **610/664** **19.95**

23.25

Mini Folding Suction Cup

Versatile folding suction cup, e.g. suitable for screwless mounting of canopies, canvas awnings, etc. on smooth, dry and clean surfaces. Load capacity on a perfect surface approx. 12 kg. Content: 2 pieces; Dim. (H x ø): 70 x 55 mm
610/666 **23.25**

46.90

MADE IN GERMANY

Clamping Suction Cup

For attaching the connecting pole even without a gutter or piping rail. Just clamp the pole into the suction cup and attach it to the dry and clean vehicle roof. Content: 1 piece; Dim. (H x ø): 75 x 55 mm **610/665** **46.90**

MAGNETIC CAMPING KIT
flexiMAGS.

MADE IN GERMANY

from 5.50

Round Magnet flexiMAGS

Rubberised magnet in black or white. Thanks to the internal thread, the magnet can be combined with the flexiMAGS accessories and used in a variety of ways. Depending on the diameter, the magnets have a holding force between 3.8 and 25 kg.

flexiMAG-22

Holding force up to 3.8 kg. Thread M4. Dim. (ø): 22 mm; 4 pieces

black	**610/403**	**19.95**
white	**610/404**	**19.95**

flexiMAG-31

Holding force up to 8.9 kg. Thread M5. Dim. (ø): 31 mm; 4 pieces

black	**610/405**	**23.95**
white	**610/406**	**23.95**

flexiMAG-43

Holding force up to 10 kg. Thread M4. Dim. (ø): 43 mm; 4 pieces

black	**610/407**	**27.95**
white	**610/408**	**27.95**

flexiMAG-57

Holding force up to 20 kg. Thread M5. Dim. (ø): 57 mm; 2 pieces

black	**610/409**	**23.95**
white	**610/410**	**23.95**

flexiMAG-66

Holding force up to 25 kg. Thread M6. Dim. (ø): 66 mm; 2 pieces

black	**610/411**	**24.95**

Dim. (L x W): 40 x 40 cm

silver	**610/426**	**45.95**

Tray Vanlett flexiMAGS

The floating tray – quickly attached, quickly removed! Flexible tray made of elegant stainless steel.
Dim. (W x H x D): 30 x 8 x 18 cm

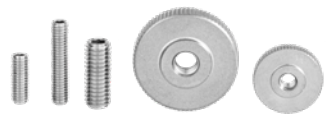

black	**610/427**	**86.95**
silver	**610/428**	**86.95**

Towel Holder Set flexiMAGS

The particularly convenient flexiMAGS magnetic towel holder set is ideal in the camper and at home. The magnetic board is simply stuck on and can be easily removed again if necessary, without drilling. Consists of 1 magnet with hook and 1 magnetic board.
Dim. (ø): 43 mm

black	**610/416**	**15.95**
white	**610/417**	**15.95**

Screw Set flexiMAGS

The 59-piece stainless steel screw set consists of:

- 5 set screws M4 x 12
- 5 set screws M4 x 20
- 5 set screws M5 x 16
- 5 set screws M6 x 16
- 2 knurled nuts M4
- 2 knurled nuts M6
- 5 countersunk screws M4 x 6
- 5 countersunk screws M4 x 8
- 5 countersunk screws M5 x 12
- 5 countersunk screws M6 x 8
- 5 countersunk screws M6 x 10
- 5 hexagon nuts M4
- 5 hexagon nuts M6

610/437 **28.95**

Handles/Brackets flexiMAGS

Consists of a selection of six convenient handles/brackets.

610/438 **19.95**

flexiMAGS Set

The smart, compact magnetic boxes with up to 102 pieces are perfect for van drivers. With flexiMAGS, you can attach objects quickly and flexibly – secure hold guaranteed. To protect the bodywork, we recommend magnet systems with a white rubber coating. Magnets and accessories for indoor and outdoor use. Be it a light, a socket, an outdoor shower or a simple clothesline – everything can be fixed quickly and securely with flexiMAGS. You also receive extensive accessories with each set, such as cable holders, metal tapes or a USB stick with application examples.

Explanation of the magnet systems:

- Magnets ø 25 mm, magnetic on both sides in plastic housing, holding force 0.4 kg each
- Magnet system 55 x 27 mm, in plastic housing, hooks, holding force 18 kg each
- Magnet system 55 x 27 mm, in plastic housing, hooks, holding force 40 kg each
- Magnet system ø 18 mm, holding force 2.5 kg each, M4 thread
- Magnet system ø 22 mm, holding force 3.8 kg each, M4 thread
- Magnet system ø 43 mm, holding force 10 kg each, M4 thread
- Magnet system ø 66 mm, holding force 25 kg each, hole for M5 screw
- Magnet system ø 88 mm, holding force 55 kg each, M6 thread
- Magnet system ø 125 mm, holding force 55 kg each, M6 thread
- Magnet system L115 mm, holding force 35 kg each, with hinge

Magnetic Button for Service Hatch flexiMAGS

This magnetic button keeps the service hatch open when you are, for example, cleaning the toilet. White magnet (magnetic on both sides) with disc ø 45 mm. **610/442** **9.95**

15.20

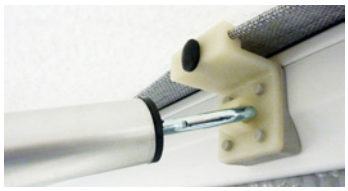

Vario Clip KNAUS

Vario Clip KNAUS was specially developed for mounting your tent poles to the KNAUS models from 2011 onwards.
Content: 2 pieces

610/223 **15.20**

15.20

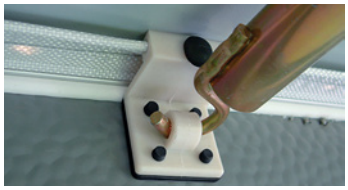

Vario Clip Hobby

Vario Clip Hobby was specially developed for mounting your tent poles on the Hobby Caravan generation 2009 – 2014, partly Fendt built since 2011. Content: 2 pieces

610/222 **15.20**

For your Hobby or KNAUS caravan.

16.90

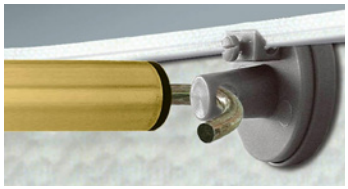

No Screw Brackets

For attaching roof hook poles. Suitable for all awnings with special double pipings (e.g. the models Feldberg and Rhön). Drilling of eyelets is not necessary.
Content: 2 pieces

610/221 **16.90**

9.90

SHS Blocker

The SHS Blocker allows variable placing of roof poles without screws. Suitable for all awning or sun canopy models with double piping. Dim. (H x ø): 30 x 50 mm;
Content: 3 pieces

610/778 **9.90**

40.00

Pole Tensioner Power

This pole tensioner is not only easy to use, but also very effective. The hook is attached to the pole and thanks to the snap mechanism, the pole can be tensioned as desired. Can be used for poles with an outer diameter of 25 – 32 mm.

610/996 **40.00**

34.00

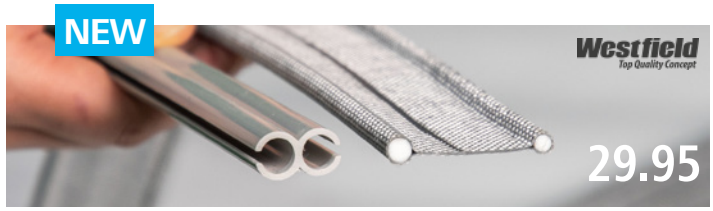

Pole Tensioner Hercules Triple

The Isabella pole tensioner ensures that your flysheet is properly tensioned. This prevents wind noises, increases stability and makes your awning more durable. Suitable for all poles with a diameter between 22 and 32 mm.

610/934 **34.00**

NEW

Connection Set Drive Away Kit

The universal Drive Away Kit with triple piping (7/7 mm or 5/7 mm) serves as a detachable connection between the vehicle and the awning. The piping tape is threaded into the piping rail of the vehicle. Dim. (L): 4 m

610/262 **29.95**

NEW

Crosscamp Connect Set 7 – 9 mm

Adapter between Crosscamp rail and awning. The scope of delivery includes a 9 mm piping profile to connect a freestanding van awning to a vehicle with a factory-fitted Crosscamp piping rail. Connects your van awning to your vehicle. Dim. (L x W): 260 x 4 cm

610/341 **28.95**

Magnetic Adapter

Magnetic adapter consisting of 3 pieces. Allows you to attach your touring awning to your vehicle quickly. Sticks to tin roofs and is connected to the tent via piping and profiles. Incl. guy ropes and pegs. Dim. (W x H x D): 260 x 1 x 17 cm

610/340 **56.95**

Makes it easy to connect and drive away the vehicle.

Double Piping Adapter Set

Suitable for awnings, VW California and conventional piping rails. (7+5 mm). The double piping tape is threaded into the piping rail of the vehicle. By attaching the double profile rail, the awning piping can be easily connected to the vehicle. This makes it easy to dock and drive away the vehicle. Dim. (L): 280 cm

Information

Peggy Peg® – the innovative attachment system!

- Five times lighter than a conventional metal peg but ten times better support!
- Ideal for soft, sandy soils due to compressed threads!
- Also suitable for hard, rocky soils with adjustable hook!
- Very robust: made of fibreglass-reinforced, UV-resistant plastic!
- Fast and easy to use!
- When it is time to go, simply unscrew it – it is that easy!
- Pre-drilling can be advantageous, especially in winter!

1|PP Screw Peg Long Alu

Screw peg made of aluminium for large and team tents, ropes and regular tents. Content: 2 Peggys LA 31 cm long with 2 hooks. 70 Nm. All screw pegs have a wrench size of 17 mm.
Content: 2 pieces **610/124** **26.50**

2|PP Screw Peg Long

Fibreglass-reinforced screw peg for sandy soils, for example at the coast. For awnings, ropes, tents, storm straps, etc. Content: 2 Peggy L 31 cm long with 2 hooks. 30 Nm.
Content: 2 pieces **610/123** **17.70**

3|PP Screw Peg Normal

Fibreglass-reinforced universal screw peg for awnings, ropes and tents, etc. Content: 12 Peggy N 20 cm long with 12 hooks. 25 Nm.
Content: 12 pieces **610/122** **24.50**

4|PP Screw Peg Peg&Stop HeavyDuty

Peggy Peg's strongest screw peg. Made from recycled marine grade stainless steel, specifically for use with an impact wrench. For highly compacted, extremely hard and rocky soils. With height-adjustable lock nut 2.0 (with hook). Salt-water-resistant and rustproof. Contains 4 Peg&Stops HeavyDuty 20 cm long.
Content: 4 pieces **610/451** **45.00**

5|PP Screw Peg Peg&Stop N

Fibreglass-reinforced, infinitely height-adjustable screw peg with lock nut suitable for the Fix&Go anchor plate 2.0. Screwed in using a cordless screwdriver or hand spanner. Contains 4 Peg&Stop N 20 cm long.
Content: 4 pieces **610/452** **14.00**

6|PP Screw Peg Peg&Stop S

Fibreglass-reinforced, infinitely height-adjustable screw peg with lock nut as an addition to the Fix&Go anchor plate 2.0. The screw peg is screwed in via cordless screwdriver or by hand. Contents: 6 Peggys P&S 16 cm long with 6 stop nuts, spanner size 17 mm, torque max. 25 Nm.
Content: 12 pieces **610/145** **15.80**

7|PP Screw Peg Schlag

PP Schlag is the only peg of the PP family that can be hammered into the ground. Can be removed by turning it anticlockwise, be it with a wrench or mechanically. Solely produced for hard grounds. Contains 4 PP Schlag (15 cm long) and 4 hooks. Wrench width: 17 mm.
Content: 4 pieces **610/134** **20.50**

8|PP Screw Peg Small

Fibreglass-reinforced, small screw peg for trekking tents and mud flaps, universal plate, anchor plate, etc. Content: 12 Peggy S 12 cm long. 0.5 Nm.
Content: 12 pieces **610/125** **17.70**

Adapters for machine use.

Isabella

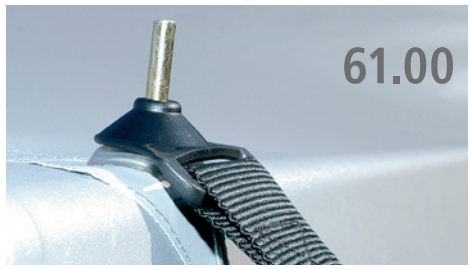

Storm Kit Isabella

The Isabella Storm Kit is attached to the poles from the inside, which prevents abrasions on the roof and you from accidentally tripping over the straps. The storm kit secures any sun canopy or awning in strong winds. We recommend 2 storm straps for each tent. **610/320** **27.00**

Tent and Awning Roof Protection

For all tension straps (such as 610/207). Protects your awning at the critical points of the roof area. Simple mounting with Velcro fasteners. Neoprene. Content: 3 pieces **610/208** **10.95**

brand

Storm Kit

Conventional storm straps that lie above the tent can abrade the roof fabric. Sewn-on storm straps can take an unnecessary toll on the seam and fabric area. The storm kit secures the awning at the pole spike of the corner brackets, one of the most stable points of an awning. Heavy fabric belts and sturdy tent poles provide tension. An inserted steel spiral spring compensates rip and pulling forces that are caused by gusts of wind. Content: 2 pieces **610/321** **61.00**

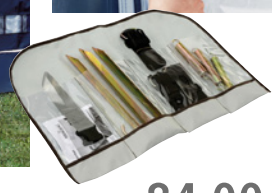

Storm Strap Set

Universal storm strap for tents and awnings. **Consists of** 2 straps with a length of 11.5 m and 1.5 m respectively, 1 strong spiral spring and 2 extra strong pegs. **610/207** **19.95**

HERZOG

Storm Strap Set Herzog

Resistant to wind and weather. Better safe than sorry! This extremely robust tensioning strap secures your tent in strong winds. The innovative storm strap is clipped onto the sides of the front wall without straining the lateral canopy poles. Thanks to an additional spring, the tensile load on belt and awning is significantly damped. Keep your tent upright with this worthwile investment. The storm strap is suitable for all Herzog awnings with clip equipment.

Consists of:

3 **belt straps** approx. 40 mm wide, with belt clip; 3 galvanised **special pegs** approx. 38 cm long; 3 **spiral springs** approx. ø 18 mm; **tensioning strap** with buckle. **070/925** **84.00**

MADE IN GERMANY

FF Kollektion
FF Collection

Storm Strap Set Frankana Freiko

Tensioning is provided by a strong tension spring that regulates the tension of the strap while an iron ground spike ensures the necessary hold. On storm roofs without an overhang, the eyelet of the strap is placed on the spike of the tent poles.

Set: 2 straps with eyelets (length: 280 cm), 2 relief springs, buckles, abrasion protection and 2 pegs.

Suitable for: Lux, Prestige, Jubilee, Lago, Rhön DC and Feldberg. **070/926** **52.50**

universally usable

UniRope Universal Rope

Versatile universal rope. The gaps in the rope developed by a special braiding method allow everything from securing cargo to hanging up a hammock – in just 3 steps and without any annoying knots! With a maximum load of 250 kg, the UniRope black is a robust and innovative alternative to normal standard ropes.

- Versatile universal rope: hammock rope, lunge rope, transport safety rope, clothesline and much more.
- Special eyelets allow all common knots to be tied in just 3 steps! Just pull the end of the rope through three eyelets and you are done.
- High quality through handwork Made in Bavaria
- Braided polypropylene fibres (nylon) ensure high load capacity
- Max. 250 daN

Material: PP polypropylene; Colour: black; Max. load: 250 kg; Length: 10 m; ø 8 mm

from 171.00

Isabella ComfortCarpet

The fabric underlay is placed between foil cover or wooden floor and awning carpet. It keeps the cold and moisture away, which provides more comfort. The ComfortCarpet is water- and air-permeable and hardwearing. Therefore, it is very durable. Available on a roll – 1.5 m x 15 m (22.5 m²). Weight: 14.2 kg

12.93 / m² **610/995** **291.00**

Isabella GroundCover

Never clean the mud flap of your awning again! This thin fibre cloth is laid out as an underlay approx. 30 cm larger than the awning before pitching. The awning is then set up on this underlay and the pegs are driven directly through it. This keeps the awning parts clean at all times. The material is UV-resistant, water- and air-permeable and dries quickly. Suitable up to a depth of max. 3 m. One roll measures 2 m x 18 m (36 m²). The sheets are laid overlapping as required. Weight: 5.9 kg

4.75 / m² **610/994** **171.00**

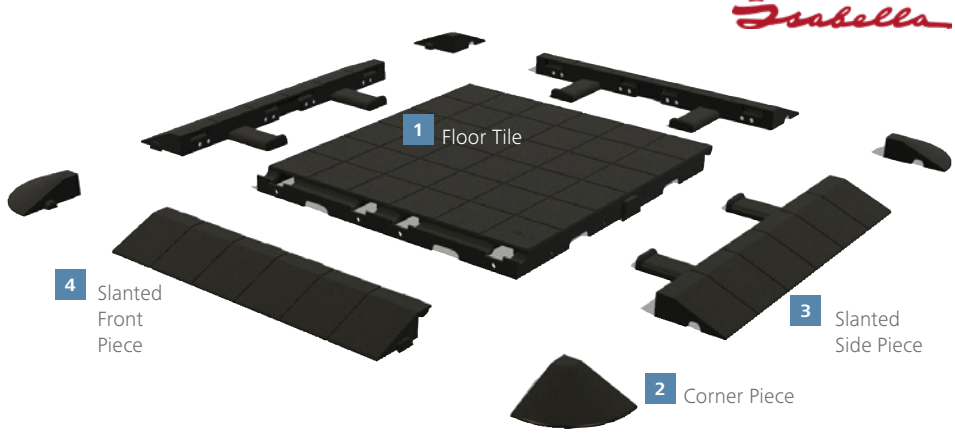

Put an end to having cold and wet feet in your awning.

Floor Tile IsabellaFloor

The IsabellaFloor offers numerous advantages. The honeycomb structure on the underside makes these panels very robust and they can be easily cut to any size without losing stability. Passages allow the installation of e.g. a power line under the panels. They are installed quickly and easily without tools, as the individual panels are simply slotted into each other like building blocks. To avoid tripping edges, you can purchase additional slanted pieces and corners. They not only look nice, but are also very convenient, e.g. for wheelchair users and families with prams.

MADE IN GERMANY

Information

Please indicate the desired dimensions when ordering. Delivery time approx. 14 days. The product is made to measure and cannot be exchanged. The dimensions indicated refer to the external dimensions when rolled out/inflated.

Ideal protection for your awning carpet.

MADE IN GERMANY

7.70

Water Protection Tarpaulin

No more flooded awning carpets or dirty equipment after rain showers. Simply inflate the edges of your new water protection tarpaulin and wait until the rain has stopped. For all awnings, tents and pavilions. The water protection tarpaulin is made to measure in a 10 cm grid. The edges are divided into several chambers so that the clamps that are located in the junctions are only inflated when there is "danger".
Grammage: 600 g/m²; material: hard-wearing PVC film with 0.4 mm thickness.

Colour: grey

4 sqm	52.50 / m²	**610/798**	**210.00**
surcharge for each additional sqm		**610/799**	**11.20**

Protective Fleece

For extreme grounds, e.g. lawn grid stones, gravel or something similar, we recommend the protective fleece in a width of 2.5 m and your desired length. The protective fleece should always be slightly larger than the water protection tarpaulin. Rot-proof for 50 years, thickness: 1.1 mm, weight: 160 g/m², water-permeable and breathable, price per metre. Material: woven fibreglass fleece. Colour: black

Isabella feel free

Tent Carpet Isabella

The Isabella tent carpet is produced in Sweden under the highest environmental regulations, without pollutants and using 100% renewable energy. It can be cut in every direction (without fraying), is durable, UV-resistant, flame-retardant, waterproof and small to pack. During its development, attention has been paid to a good ratio between the weave weight of 495 g/m² (the weave determines the service life) and the lowest possible transport weight. A pleasant feeling beneath your feet is a given. 99% of the time, this tent carpet needs to be cleaned only with clear water and a brush.

Information

BlackOut Bedroom™ Technology

The Coleman BlackOut Bedroom™ technology is perfect for parents or light-sensitive people, as it keeps up to 99 % of daylight out of your sleeping area. This means that you can not only sleep longer, but also put your children to bed earlier – no matter how bright it is outside in the morning or evening. It also stays up to 5 °C cooler in the tent when the temperature is high. Sunlight is absorbed by the outer material, which helps you maintain a comfortable sleeping temperature inside the tent.

Height: 210 cm

4000 mm

Tunnel Tent Vail 6

With its spacious sleeping area, the Vail is great for a trip with family or friends. The ventilation openings provide excellent ventilation. With UV Guard™ and a hydrostatic head of 4000 mm, you are protected from the elements. Maximum flexibility is provided by the two doors with mosquito nets. The pockets inside offer additional storage space and the convenient openings for cables also make the tent more comfortable. The lightweight yet sturdy fibreglass poles and the carry bag make for easy transport.

Material: flysheet: polyester, PU-coated, fire-retardant; inner tent: polyester, PU-coated, taped seams, mosquito net, groundsheet: polyethylene, welded, fully integrated.

Scope of delivery: ø 11 mm GRP poles, ø 12.7 mm GRP poles, tensioning material, inner tent, transport bag, tent

Tunnel Tent Castle Pines L 4

The Castle Pines is a spacious family tent with tunnel structure. The sewn-in groundsheet, the taped seams, the UV Guard® and a hydrostatic head of 6000 mm protect the tent against poor weather conditions. The attached storm guy ropes guarantee additional stability and safety, while the upper and lower ventilation keeps the tent well-ventilated. Thanks to the patented BlackOut Bedroom™ technology, which keeps up to 99 % of daylight out of your sleeping area, you can have a good, restful and cool night's sleep. The sleeping areas are extra spacious and the pockets inside the tent offer additional storage space. The convenient openings for cables round out the tent. The light yet sturdy fibreglass poles and the carry bag make the tent easy to transport.

Material: flysheet: polyester, PU-coated, fire-retardant; inner tent: polyester, mosquito net; groundsheet: polyethylene, welded, taped seams, fully integrated.

Cottage sleeping bags
A cottage sleeping bag is a very thin sleeping bag without filling, which is used as a hygienic underlay for overnight stays in e.g. mountain huts or youth hostels. The cottage sleeping bag protects against direct contact with soiled mattresses, duvets, pillows and covers and can be carried compactly in a backpack.
In mountain huts, a cottage sleeping bag is usually obligatory, as duvets and duvet and pillow covers are either missing or not washed daily. However, they also serve as an ideal addition to your sleeping bag. If temperatures drop unexpectedly, you can still sleep comfortably and stay warm in your summer sleeping bag.

Hammock Set Beach

The bargain among our sets! The powder-coated black frame and the hammock in the popular colour vulcano are a great combination! Thanks to the click fasteners, it is easy to assemble and can be stored space-savingly during winter. Everybody likes this combination!
Colour: multicoloured; Material: 60 % PES polyester, 40 % cotton; max. load: 100 kg; Lying area: 200 x 100 cm; Pack size: 117.5 x 36 x 7.5 cm; Weight: 11.5 kg **612/000** **99.90**

Hammock Paradiso tropical

Paradiso is a very comfortable Brazilian hammock and something quite special: Only very few looms are suitable for making a 1.75 m wide sheet. In order to make this giant hammock both extra sturdy and super soft, almost 5000 threads were woven together! The extra thick cords were connected with a woven band by hand, so that concentrated loads are compensated. Thanks to that, you can use your hammock for a very long time.
Colour: multicoloured; Material: 85 % cotton, 15 % PES polyester; max. load: 200 kg; Lying area: 250 x 175 cm; Pack size: 45.9 x 30.9 x 13.8 cm; Weight: 2.5 kg **612/036** **99.90**

Hammock Silk-Traveller forest

Ultra cool and ultralight: the hammock made of parachute silk! This high-performance system is not only extremely durable and stable, but also wonderfully soft, pleasant on the skin and breathable. Extremely compact and light for your next holiday. Colour: green; Material: 100 % parachute silk; max. load: 150 kg; Lying area: 220 x 140 cm; Pack size: 23.7 x 9.8 x 8.9 cm; Weight: 350 g **612/044** **37.50**

Fly Killer Lamp UV 2-1

The 2-in-1 fly killer lamp can easily be recharged via USB. It is bright and thanks to its special, ultraviolet light, it also works as a mosquito trap. The violet UV LED light attracts mosquitoes within a range of 5 m, which are then killed automatically by the spiral. The lamp works without chemicals or liquids and is 100 % safe for children and pets. Operating time: lamp 7 hours; UV fly killer lamp 8 hours. Charging time: 3 hours.

Protects against flies, moths and other insects ...

Fly Swatter

The electric fly swatter provides an efficient solution against pesky flies, mosquitoes and other insects. At the touch of a button, a static charge is generated, which gives the insects an electric shock that is harmless to humans. This method eliminates the need to use environmentally harmful chemical fragrances and toxins. The electric fly swatter is perfect for use at home, when camping, grilling or fishing and on holiday. Two AA batteries are required.
Please note: Not a toy!

BeFree Drinking Bag

Drinking water instead of dirty water.
Fill your BeFree bag with water from a river, stream or lake. Screw on the filter and quench your thirst. The Stay Clean Flipcap keeps the mouthpiece hygienically clean.

Less worries, more fun.
The BeFreeTM 0.1 micron water filter has been thoroughly tested and protects against harmful micro-organisms such as bacteria and protozoa.

Drink, fold and continue.
The Hydrapak® hydration bag is easy to fill and does not require much space (it even fits into your sports pants or jersey). This makes it the ideal travelling companion.BPA- and PVC-free.

uses gravity to produce fresh water

Filter System BeFree Water Filtration

The Katadyn BeFree Gravity line makes clean drinking water available without the need to pump. The foldable filter system uses gravity to produce fresh, clean water. The EZ-Clean Membrane™ provides an extra fast flow rate of 2 l/min. The hollow fibre filter with a pore size of 0.0001 mm reliably removes bacteria, cysts and sediments. Thanks to the viewing window, the water level in the filter bag is clearly visible. Incl. carrying strap. The outlet hose can be easily removed via a quick-release valve with automatic outlet stop, which prevents contact with contaminated water when refilling. The capacity of the filter is up to 1000 litres, depending on the water quality. To clean the EZ-Clean Membrane™, simply shake or swish it in water. If the filtered water is not used the same day, it can be safely and easily conserved with Katadyn Micropur.

Every household should have a crank radio!

albrecht

Radio, flashlight, camping light and power bank!

Outdoor Crank Radio Albrecht DR 114

The Albrecht DR 114 outdoor radio is indispensable for camping holidays or your next outdoor adventure. As a solar or crank radio, it can be charged completely independently of electricity. That way, you can listen to music on the go and always be up to date (reception via FM/DAB+/ streaming). But that is not all! You can also use this radio as a torch, a camping light and a power bank – without an external power supply. The radio is equipped with a USB-C port and can therefore also be charged at home or in the car. With the integrated SOS alarm function, you can send visual and acoustic emergency calls. The housing is robust and particularly shock-resistant. It is also waterproof (IPX5). Dim. (W x H x D): 10.6 x 20 x 10 cm; Pack size: 23.5 x 13.5 x 11 cm; Weight: 800 g **320/940** **119.90**

Outdoor Crank Radio Albrecht DR 112

The compact outdoor radio provides you with up-to-date information and music on the go (reception via FM/DAB+/streaming) and also serves as a torch, reading light, thermometer and power bank – all without an external power supply! As a solar radio or crank radio, it is independent of external power sources and is therefore perfect for outdoor activities. The DR 112 can also be charged via the USB-C port. The integrated SOS alarm function can be used to send visual and acoustic emergency calls. Highly shock-resistant and waterproof to IPX5 standard.

HYDRACELL
POWERING A POSITIVE FUTURE

from 17.90

Flashlight HydraCell Aqua Series

Discover the HydraCell flashlights – the environmentally friendly LED flashlights of the future! With their innovative TC energy cell, which is activated by water, they set new standards in terms of sustainability and performance.

These flashlights are equipped with a high-quality Cree LED, which provides long-lasting and bright illumination. With the infinitely adjustable lens, you can choose between a sharply focussed beam of light and a broadly illuminating torch, depending on your requirements.

Thanks to the energy cells, the HydraCell flashlights not only save money, but also protect the environment as the need for disposable batteries is greatly reduced.

With an impressive light output of 200 or 350 lumens, the HydraCell flashlights ensure that you always have enough brightness when you need it. Whether you are camping, hiking or in an emergency – these flashlights are a reliable companion. Impact-resistant and splash-proof: IP65.

The HydraCell flashlights offer you long-lasting light without harming the environment. Use the HydraCell and experience the future of environmentally friendly lighting!

Versatile activation options: In emergencies, the energy cells can be activated and reactivated in any type of liquid. Be it rainwater, stream water, seawater or even dirty water – as long as it is not oil-based, you will always have energy available.

Kayak Adventure Plus

Main feature of this robust kayak is the elevated side elements, providing the boats with their characteristic canoe shape. The form provides security on the water and this way, the kayak is perfect for exploratory tours with the family on larger water areas such as lakes. The surrounding polyester cover provides special protection on the water and stabilises the boat. The Adventure is available has 3 seats, while the middle one can be removed. Dimensions 368 x 86 cm, load capacity 200 kg, weight 15.2 kg.

Construction:
3 air chambers - bar side and floor chamber are exchangeable, easily accessible Boston valves, ergonomic soft handles, tension straps in the bow and stern area to secure luggage.
Features: Removable fin, manometer and carrying bag.

61 337 **449.00**

449.00

749.00

Kayak Yukon

With its high travelling comfort and convenient handling, this robust and reliable kayak provides perfect preconditions. The seat, as well as the footrest, can be adjusted individually. Numerous pockets and water-proof compartments offer ample storage room, even for extensive equipment. The form grants excellent protection against intruding water, whereas the removable fin, the welded on lead profiles and reinforced materials provide excellent handling characteristics and stability. Dimensions 382 x 98 cm, load capacity 210 kg, weight 15.3 kg.

Construction:
3 main chambers, 2 removable PVC side chambers, PVC air ground with protective exterior cover, 1 drain bung, 2 screw valves, 1 Boston valve, with straps at bow and stern.
Features:
2 seat cushions with backrest, removable stern pouch, removable fin, bow and stern handle, manometer and carry bag.

61 343 **749.00**

Kayak Charleston

This kayak made of tarpaulin also persuades with the Drop-Stitch technology, as well as its unique and sporty design. The two thermo-formed seats promise ideal sitting comfort and the straps at bow and stern allow you to store luggage. Another feature of the kayak are the carry handles, which, at the same time, can be used as paddle holders and the detachable seats, turning the kayak from a boat for 3 people into a one-seater. The material allows quick drying. Dimensions 347 x 94 cm, load capacity 161 kg, weight 13.3 kg.
Construction:
3 main chambers, 2 high-pressure side side chambers and Drop Stitch ground with protective exterior cover, 1 drain bung, 3 high-pressure valves, with straps at bow and stern.
Features:
2 thermo-formed seats with stable backrest, Dry'N'Store carry bag, foot support made of foam for increased comfort, Easy Inflation manometer, detachable fin, repair kit.

Electric Motors Minn Kota
Minn Kota is the world's largest and oldest manufacturer of electric outboards. Minn Kota developed among other things the turbo electric motor technology and the Cool Power technology.

Cool-Power-Technology:
Comparable engines reach internal engine operating temperatures of up to 260 °C after only a few minutes. Hot engines do not work efficiently and lose up to a third of their possible thrust during longer driving periods. With the Cool Power Technology, these motors operate at operating temperatures that are 100 °C lower.

Endura C2, Riptide and MAX
These models provide reliability and power at affordable prices. With the newly designed bracket, the engine is now also suitable for wider transoms. When the safety lever is released, the motor can be swivelled up in one easy step. The tilt mechanism and motor mount are made of shatterproof polyamide composite material and are completely UV-resistant. The white Riptide 40/SC is particularly suitable for use in salt water thanks to matching materials. The Endura MAX 55 features infinitely variable speed control, which has a particularly positive effect on energy consumption – with one battery charge you have up to 5 times the range of the C2 models.

Traxxis 55
Powerful and at the same time energy-saving motor, equipped with a battery indicator for easy control of the charge level. Thanks to the special bracket, it can be quickly lifted out of the water and tilted over the deck with just one hand. The steering resistance control can be adjusted from smooth to rigid, and the speed control knob can be swivelled up 45° and telescoped 15 cm.

Information

Not suitable fo r children under 3 ye ars due to swallowable small parts!

Kayak Cart Canyon
For effortless transport of kayaks on land. The sturdy non-rusting trolley is light-weight and features a high-quality aluminium-alloy. The practical support allows easy loading and unloading. Folded, the trolley needs only little room within the kayak, the air-filled wheels (ø 26 cm) allow strength-saving transport. Dimensions W 68 x H 36 x D 38 cm, weight approx. 3.4 kg, carrying capacity approx. 80 kg.
62 140 **125.00**

Dinghy Cart Rafty 400
For effortless transport of rubber dinghies and similar sized boats. The boat lies on soft rubber pads. The foldable frame is made of sturdy rust-free aluminium. The air-filled wheels (ø 40 cm) can be removed easily and provide smooth running. The practical support allows easy loading and unloading. Dimensions W 98 x H 52 x D 60 cm, weight 8.2 kg, load capacity approx. 80 kg.
62 148 **159.00**

Beach Trailer

With its colourful cover it is both a means of transport and a comfortable seat with a load capacity of 80 kg. Its air-filled wheels prevent it from sinking into the sand, making it easy and effortless to transport everything you like to carry with you on the beach. When not in use, the aluminium tube frame can be folded up small and thus takes up very little storage space. Dimensions B 72 x H 112 x T 68 cm, weight 3.8 kg.

Familien-Survival-Buch

Wir sind dann mal draußen
Off into the wilderness! Little adventures are waiting right on your doorstep because survival is an experience for the whole family. However, there are a few questions to ask when planning such a trip: How do I build a shelter in the rain or for the night? How do I find my way in the forest? How do I find water and how do I make a pot from leaves for cooking? And what do I actually have to consider in nature when planning a soft survival weekend?
This survival handbook offers soft survival ideas in nature for young and old and helps to answer all these questions. Plan the perfect micro-adventure with the whole family! Language: German.

Rolli Plus Ambiente

Awning and tent as an all-in-one set. The awning, which has a stable front profile, is pulled into the piping rail of the caravan. The front as well as both side panels are detachable and equipped with entrances which can be rolled up or away to the sides. The side panels provide Air-Vent windows, which can be can be pulled out and closed with a foil window flap. Thanks to a simple conversion, a panorama function is possible (accessories against surcharge. The awning consists a fully-synthetic special roofware TenCate All Season with a one-sided coating. The bottom is printed to reduce the formation of condensation water. Thanks to the shaft system with roof and pitching poles made of 28 mm strong aluminium, installation is made even easier and more stable. Thanks to simply turning, the poles are locked into their position and can be positioned individually. Extension 2.5 m, against surcharge and upon a special order, an extension of 3 m is available.

Scope of delivery:
Roof with aluminium profile, front panel and side panels, 5 roof and 3 pitching poles (28 mm) made of aluminium with Power Grip, wheel and wind protection, tensioning materials (optional lashing straps).

MADE IN GERMANY

WIGO® ZELTE

Rolli Plus Lounge

With this awning tent by WIGO, emphasis has clearly been put on high quality: is characterised by an excellent craftsmanship of durable tent tarpaulin materials – the TenCate All Season for the roof and DOLAN for front and side panels. The splash panel is made of PVC. The awning is connected to the caravan by the piping rail. From sizes 7 and up, the front panel is equipped by default with an AIR VENT window. All sizes have AIR VENT windows in the side panels, which can be put out as well as closed with a foil window flap. Front and side panels can be taken out. Thanks to the shaft system with roof and pitching poles made of 28 mm strong aluminium, installation is made even easier and more stable. Extension 2.5 m, against surcharge and upon a special order, an extension of 3 m is available.

Scope of delivery:
Roof with aluminium profile, front panel and side panels, 5 roof and 3 pitching poles (28 mm) made of aluminium with Power Grip, wheel and wind protection, tensioning materials (optional lashing straps).

Rolli Plus

The Wigo awning Rolli Plus with the stable front profile has to be pulled into the piping rail of the motorhome. Rolled up in its sack, the awning is protected perfectly, can be transported as well as kept installed while driving. The advantage during installation: the largest part of the tent, the roof, is already pulled in so that only the poles have to be installed and the awning has to be tensioned. The awning is made of the fully-synthetic special roof fabric TenCate All Season with one-sided coating. The bottom is printed to reduce condensation. Thanks to the wave system with roof and pitching poles made of 28 mm thick aluminium, the installation is even easier and more stable. The poles are locked in their individual position simply by turning. Extension: 2.5 m, against a surcharge and as a special order, a 3 m extension is available.

Scope of delivery:
Roof with aluminium wave, 5 roof and 3 pitching poles made of aluminium with Power Grip, tensioning material (optional guy ropes).

WIGO® ZELTE

BLOXX System for Rolli Plus

The new BLOXX system by WIGO provides in the "Screen" version sun protection while granting an excellent air permeability. Different from that is the "View" version, which keeps prying eyes out while still permitting to look outside from the inside. The front panel is simply pulled into the piping rail of the awning, the side panel is slid onto the lateral roof rail and connected to the awning by Velcro. Both are tensioned to the ground with pegs. Delivery includes tensioning materials. The system is characterised by a low weight and a small packsize. The BLOXX system for other sizes is available upon special order.

Sun Canopy Rolli Classic

The sun canopy entirely made of Airtex fabric is the perfect addition to the Wigo awning Rolli Classic. It is pulled into the awning's front rail, pitched and tensioned. With a depth of 2.4 m, it provides enough shadow for a pleasant outdoor experience.

Scope of delivery:
Roof, 3 pitching poles (22 mm steel), tensioning material.

Length	Weight	Item no.	Price
3 m	3 kg	**93 883**	**296.00**

5.5 m	8 kg	**93 888**	**414.00**
6 m	9 kg	**93 889**	**434.00**

WIGO® ZELTE

1 | Special Tensioning Set Peggy Peg

To secure the awning on the ground. The set includes 2 Fix&Go anchor plates 2.0, 6 Peg&Stop screw rings with lock nut, 4 hardcore Peggy impact screw rings as well as tensioning material to built up counter tension between the awning and the anchor plate. **93 842** **116.00**

2 | Supplementary Set Peggy Peg

For additional tensioning of the awning in the middle. **93 844** **62.00**

3 | Roof Pole

Recommended for awning lengths of 3 to 4 m, for lengths of 4.5 m or more included in delivery.

Extension	Item no.	Price
2.3 – 2.5 m	**93 811**	**47.00**
3 m	**93 814**	**89.00**

4 | Pitching Pole

A third pitching pole is recommended for awning lengths of 3 to 4.5 m, included in delivery for lengths of 5 m and more.

Diameter	Item no.	Price
28 mm	**93 829**	**44.00**
32 mm	**93 840**	**79.00**

5 | Roof Fastener Set

Recommended when the awning is used as a sun canopy. The tent roof fastener is wrapped around the roof pole and mounted to the existing fleecy tape of the Rolli roof; a ground peg is included in delivery. **93 816** **14.00**

6 | Lashing Straps Set

For additional fixation of an awning or tent. Consisting of 2 straps and pegs each. **93 812** **69.00**

7 | Tensioning Set

To secure the tent from within. Is pulled into the Rolli shaft with a piping and tensioned towards the ground. **93 813** **18.00**

DOMETIC OUTDOOR

Thule 4200

Wall awning developed for Compact Vans in a sleek design for a perfect integration onto your vehicle.

- Length up to 3 m
- Extension 2 m or 2.5 m
- Housing in white, anodised or anthracite, fabric in Mystic Grey
- Patented fabric roll support for a better fabric tension and reduced wrinkling
- Perfect fixation of the support feet in the front bezel
- Individual fabric roll adjustments ensure a perfect closing of the awning on the gearbox side
- No risk for damage on the vehicle wall as the support feet swivel vertically out of the cover lead rail
- Installation via flat adapters (included in standard delivery), or with special adapters for wall installation, which have to be ordered separately

1 | Mounting Set 1
2 rails, for an awning length of up to 3.25 m; from length 4.5 m, 2 sets are required (4 rails).

1 | Mounting Set 2
3 rails, for awning length 3.5 – 4.25 m.

2 | Adapter Rooftop
For all straight, fixed glued roofs.

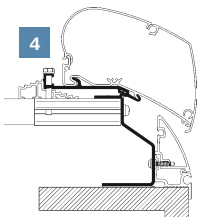

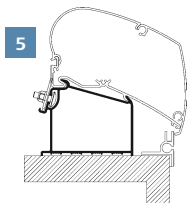

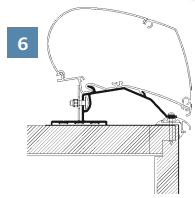

w/o illu.: Additional Roof Adapter
Recommended in additon to the mounting sets to securely mount awnings of 5 m and up in length. Is positioned directly underneath the gear mechanism as reinforcement.

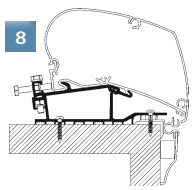

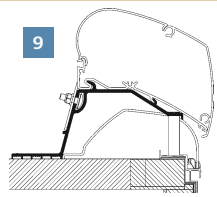

Thule Awning Adapter
Adapter are divided into 2 categories and 3 vehicle groups. Thus, to choose the right adapter, one has to keep in mind, if the awning which is to be mounted will be mounted on the vehicle's side wall with a wall adapter, or a roof awning, which is mounted in a lying position onto the vehicle's roof with a roof adapter.
Additionally, the adapters available are manufactured to fit either certain vehicle groups, or even specific vehicle models. Between the vehicle groups, it is distinguished between campers/ caravans, motor homes and camper-vans/ vans.
The mounting of adapters should be accomplished by a specialised firm. This company can also examine precisely, how and where the adapter should be mounted. This saves you from later-occurring problems if you eventually would like to ad additional awning components.
Awning adapters should always be mounted behind the jointed arm fixation – this prevents potential bending of the awning.

Thule Panorama

Just like the established Thule Residence, the Thule Panorama consists of a front panel and 2 side panels. It provides the same excellent stability and is as easy to pitch, also a partial installation is possible. The front panel is simply drawn into the lead rail of the awning and connected to the side panels, which are attached by a clamping profile to the awning fabric, via zipper. Thanks to the large panoramic windows, increased light incidence and a better view to the outside are provided. The front windows can be vertically opened as a door, or used horizontally for ventilation. All parts are completely detachable. A sufficient ventilation even in a closed tent is ensured thanks to the two ventilation striped integrated into the side panels.

Moreover, both side windows are equipped with mosquito nets. The Thule Panorama is made of Airtex®, coated with acryl on one side and impregnated with a teflon-based finish. Thanks to the fungicide treatment, the water-repellent, washable material is effectively protected against fungal and mould infestation. Available in 3 heights, medium height is required for an installation height of 2.3 – 2.44 m (measured from the bottom edge of the awning cassette to the ground), large height for an installation height of 2.45 – 2.59 m and extra-large height for 2.6 – 2.74 m. Delivery includes 2 packing bags and mud flap.

Intelligent ventilation

Diagonal supports between mast and clamping profile increase stability. Profiles with double rubber lips seal the tent towards the vehicle wall perfectly.

Mosquito net

Clamping profiles provide an easy and secure connection between the side panel and the awning fabric. The side panel is drawn into the insertion aid with a piping.

Information

Thule Panorama versions for vans can be found on catalogue page 161.

Front panel design

Depending on the awning length, the design of the front panel varies without compromising on brightness or comfort. Wide front panels and slimmer spacers are combined. The large panoramic windows can be rolled up vertically and used as a door, or also removed entirely. Opened horizontally, they let some fresh air in.

THULE SWEDEN

– Thule Panorama protection tents for further awning types upon request! –

Measured from the bottom edge of the awning cassette to the ground

4.25 m	91 807	3,170.00
4.5 m	91 808	3,170.00
5 m	91 809	3,250.00

Thule Residence G3

The approved awning tent Safari Residence presents the third generation with a new design. It consists of 2 single side panels and one front panel in a neutral colour (RAL 9002). The window foils integrated in the side panels are equipped with mosquito nets and can be opened completely. The front panel (for lengths of more than 3.5 m) has a door on the left and on the right side and can be rolled up partly or completely. Thanks to the integrated fixation rail, the front can be combined very comfortably e.g. with a sun blocker. By means of a clamping profile the side panels are connected to the awning fabric. Front and sides are connected by a double piping profile – a strong and wind resistant connection. A height adjustable mast profile equipped with double rubber sealing, into which the side panels piping profile is slid in, is pressed to the vehicles side and perfectly seals this section. Additional stability is achieved by a diagonal support between the clamping and the mast profile. Thule Residence is available in 6 different heights (see table) for vehicles with straight sides. In case of an awning mounted straight above the vehicle's entrance, special side panels for combination with a higher front section with less roof pitch can be ordered via special order. All special orders have approx. 4 – 6 weeks delivery time. Delivery includes transport bags and vehicle apron.

Information

Thule Residence G3 versions for vans can be found on catalog page 161.

Front panel design

The design of the front panel varies depending on the awnings length without making a compromise in brightness or comfort. Larger and smaller front panels are combined. All front panels, even those with large panorama window, can be rolled up completely. The smaller front panels are used as entrance.

Length 3 – 3.25 m

Length 3.5 – 4.5 m

Length 5 – 6 m

3XL	**290 – 310 cm**

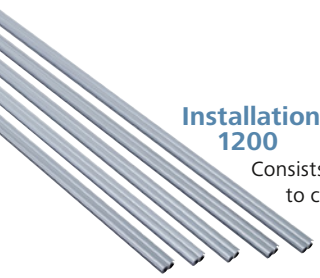

THULE SWEDEN

Thule QuickFit

Light awning tent which can be very easily and quickly set up right beneath the awning thanks to its patented design. The entire tent is made in one piece and needs no additional poles. When roof-mounted either the existing awning rail or an optional mounting set is used. For wall mounting, an optionally available mounting set is also needed. Connection of the front part is done by the awnings piping rail. The timelessly elegant design harmonizes with all awning colours. Thule QuickFit is equipped with integrated curtains on all windows. The rounded canopy, which is stretched by fast-mounted fibreglass poles, offers additional shade above the big picture windows, which can be opened completely. The side windows are equipped with fly screens. Access to the tent is possible either from the left or the right side of the front. The air layer between tent and awning enables good insulation to keep the tent cool. It is made of sturdy rip-stop polyester: a light, water-resistant and tear-proof fabric, which is also used in the aviation industry. Delivery includes bottom skirt, tensioning material and carrying bag.

Information

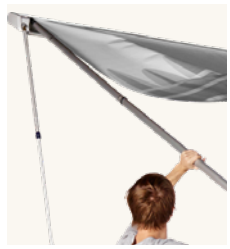

Thule QuickFit versions for vans can be found on catalogue page 161.

Mounting rails to attach the Thule QuickFit to the Thule Omnistor 5200 can be found on catalogue page 158.

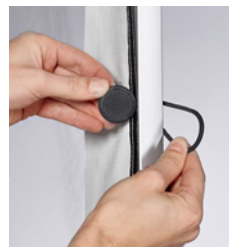

Thule Blocker

The Smart Blockers do not only create additional privacy underneath the awning, they also protect from sun, rain, wind and prying eyes. They are mounted easily and can be freely combined – a perfect and individually adapted private area is the result. Thule Sun Blockers consist of translucent mesh and are available as side and front panel. Also available are Rain and View Blockers made of wind proof PVC. Rain Blockers have a large window. All side elements fit on the left and on the right. They are mounted to the integrated piping rail by means of tensions rafters, front elements are drawn into the awnings front. They are mounted to the support legs by simple straps.

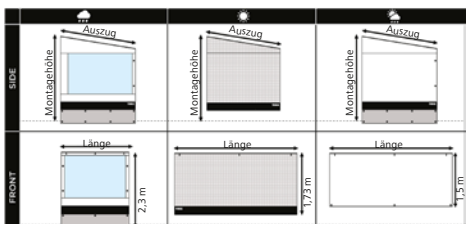

Measurements taken from the bottom edge of the awning cassette to the floor.

Mounting height	
Height XS	180 – 199 cm
Height S	205 – 224 cm
Height M	225 – 244 cm
Height L	245 – 264 cm
Height XL	265 – 284 cm
Height XXL	285 – 304 cm

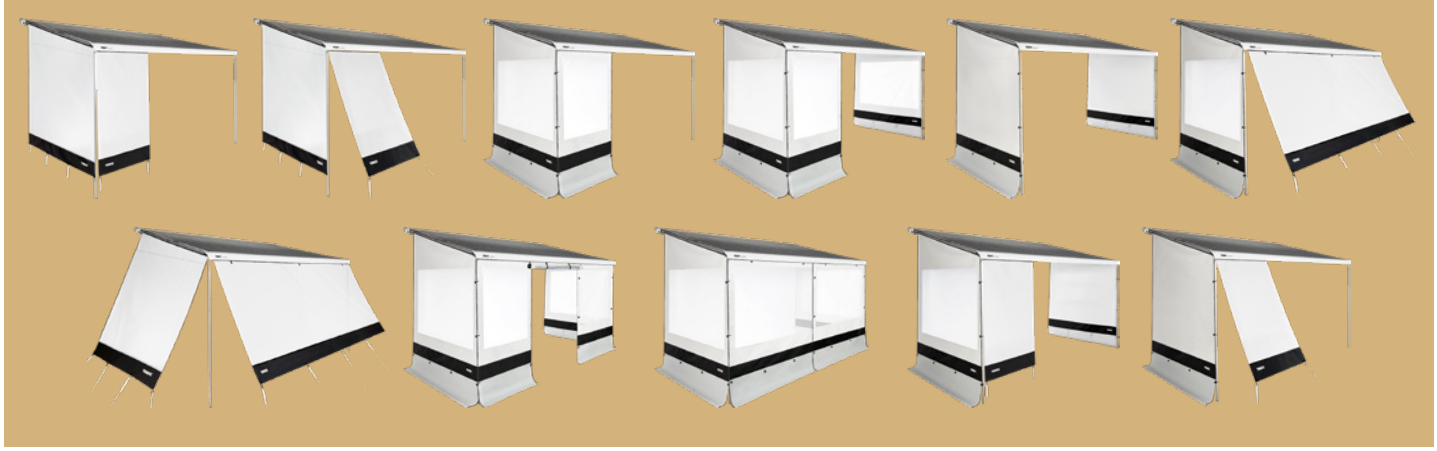

Application

Thule Blockers can be combined in various ways to a complete light tent. The individual types can even be used together to create a perfectly private space, which is adjusted to individual needs. All parts are also applicable in combination with awning tents EasyLink and QuickFit.

Thule Subsola

The modular panel system Thule Subsola for an attractive living and lounge area while camping has been developed for compact vans specifically. It provides privacy and weather protection around the Thule awning. The triangular-shaped panels can be installed very easily and, above all, very versatile: the first panel is attached to the awning. With high-quality zips, other panels can be attached at will and combined differently. An adjustable support pole allows to create more room, if necessary, or to adjust the panels to changing weather and lighting conditions. The individual doors are made of high-quality, breathing, water-resistant material and offer sight, sun and rian protection. Subsola is available as a side and front package; the packages can also be combined. If needed, individual panels and support poles can be added. The system is compatible with the following Thule awnings: Thule 4200, TO 4900, TO 5102, awning for VW California and TO 5200 with 2.6 m length and 2 m extension. A robust storage bag is included in delivery.

NEW

Thule Subsola Front Pack

Extension 2.5 m.

89 754 **59.00**

11 | Thule Fabric Clips

These clips provide a secure attachment of the awning fabric to the awning or blocker tensioning pole to prevent the unpleasant sound of an awning flattering in the wind. The clips universally fit all aluminium Thule tensioning poles, simply snap in, lay the fabric in between and tighten it with the handle. Content: 2 pieces.

89 759 **38.00**

LED Lighting Strip

The flexible LED strap, which has a 3M adhesive tape on its back, spreads warm light underneath the awning. Fitted with 60 LEDs per metre, it can be easily cut every 5 cm, making it suitable for all awning lengths. The LED strap is waterproof and suitable for outdoor use, it can be simply adhered to the bottom of the awning case and connected to the on-board power system. Using a suitable dimmer (item no. 321/277, page 502), the brightness can be adjusted; length connection cable 1 m.

Technical data:
Power supply 12 V, power consumption max. 380 mA per metre, light intensity up to 300 lumen.

Length	Alignment	Item no.	Price

Thule Hold Down Kit

Placed upon the spring arms, the strap is tensioned sideways. Suitable for all awnings. **89 898** **37.00**

Thule Hold Down Side Strap Kit

The tensioning straps are pulled into the upper hinging points of the support feet and tensioned laterally to the front. Suitable for all awnings series 1200, 5, 6, 8 and 9. **90 009** **41.00**

Thule Omnistor 6300 Ducato Set

Specifically designed package for the Fiat Ducato built since 07/2006, consisting of a roof awning 6300 in the fabric colour Mystic Grey, a specific adapter set and a seal strip made of EPDM foam (2 x 2 m). The awning can delivered with an anodised casing with grey or anthracite end caps. The awnings are available in the lengths 3.25 m, 3.75 m and 4 m, with an extension of 2.5 m.

- Compact articulated awning for roof installation
- Casing anodised or anthracite
- Extension: 2.5 m
- Individually adjustable inclination angle
- Perfect stability and fabric tension thanks to integrated tensioning arms (from an awning length of more than 3.75 m)
- Reduced wrinkling thanks to patented awning fabric support
- Robust articulated arms with double steel ropes
- Support feet with Quick-Lock system
- With intake for an optional 3rd support foot (for awning lengths of more than 3.75 m, item no. 89 787, see catalogue page 157)
- Front profile with rain draining system
- Motor can be retrofitted effortlessly (see catalogue page 138)

THULE SWEDEN

from 529.00

Thule Omnistor 1200

High-quality bag awning with the latest construction system offering a quick assembly as well as high stability. The awning is simply drawn into the tent rail and rolled out by hand. The tensioning arms are folded down along with the support arms (1) and fixed at the vehicle wall without drilling using the integrated support kit (2). The ideal awning tension is generated by the user-friendly, exclusive ratchet system (3). Thanks to the sturdy awning roll (4), in which the tensioning arms and support feet are integrated, excellent stability is provided. From awning lengths of 3.5 m, a third support foot (item no. 89 787, p. 127, not included in delivery) can be attached to the awning roll for added stability (5). An additional tension rod is supplied from a length of more than 4 m.

1 The simultaneous extraction of the support feet and tensioning arms enables a quicker installation

Awning length	Extension	Weight	Mystic Grey	Sapphire Blue	Price

2 An integrated support kit distributes the pressure of the tensioning arms without screws securely onto the vehicle wall.

3 Exclusive fabric tensioning system with user-friendly ratchet mechanism.

4 The robust fabric roll provides excellent stability

5 Awnings exceeding a length of 3.5 m are equipped with an integrated mount for an optional 3rd support foot

Thule Roof Rack

Thanks to the innovative Smart Clamp system, this roof rack is very easy to install. Crossbars for the load can be positioned flexibly on the 2 aluminium longitudinal rails to optimally adjust it to the motorhome's roof construction. The maximum load capacity is 75 kg with 2 mounted crossbars or 150 kg when 4 carriers are used. The system is compatible to an awning Thule Omnistor 6200 mounted earlier than 2017 by means of a conversion kit (item no. 89 212). The comprehensive accessory range includes e.g. rooftop boxes and carriers for kayaks and skis (see catalogue page 209). Suitable for Fiat Ducato built since 2006/07 with H2 roof and vehicles identical in construction.

for Fiat Ducato built since 2006/07 with H2 roof

Thule Roof Rack Longitudinal Rails, Standard

Set consists of 2 rails, is required when you do not want to install an awning at the same time; ca be expanded later on with the awning retrofit kit (item no. 89 215 or 216).

Type	Length	Item no.	Price
L2H2	2.85 m	**89 203**	**469.00**

L4H2	3.8 m	**89 205**	**549.00**

Thule Roof Rack Longitudinal Rails with Awning Set

Instead of the Smart Clamps for the passengers side, this set includes a kit for simultaneous mounting of a roof awning Thule Omnistor 6200/ 6300 with Ducato package (see catalogue page 160).

Type	Length	Awning length	Item no.	Price
L2H2	2.85 m	3.25 m	**89 207**	**429.00**
L3H2	3.46 m	3.75 m	**89 208**	**469.00**
L4H2	3.8 m	4 m	**89 209**	**479.00**

Thule Roof Rack Longitudinal Rails Combi

Flexible roof carrier solution for the Fiat Ducato built since 2006/07 with H2 roof, rail length 1.64 m, load capacity 100 kg. It has been designed for campervans where roof superstructures, such as skylights or refrigerator ventilation prevent the installation of continuous longitudinal rails. The installation is done without drilling onto 4 fixating points of the vehicle and a full-surface adhesion, whereas the roof in the area of the longitudinal rails has to be free of obstacles 10 cm to the inside. The system is compatible to an awning Thule Omnistor 6300 in the length 3.25, 3.75 or 4 m. The awning has to be installed to the adapter 90 628 (3.25 m) or 90 629 (3.75/4 m). It can also be used without awning, e.g. to install crossbars or brackets for sports equipment. **89 200** **399.00**

Thule Roof Rack Conversion Kit

For retrofitting the roof rack system with awning pack to the already existing roof awning Thule Omnistor 6200 / 6300 (year of construction of the adapter built before 2017).

89 212 **64.00**

without illustration: Thule Roof Rack Awning Retrofitting Kit

To retrofit a roof awning Thule Omnistor 6200/ 6300 (see caalogue page 138) to an already existing Roof Rack System Standard (e.g. Adria Van Supreme). The kit includes a special adapter set, connectors and two sealing tapes made of EPDM (length 2 m).

Type	Awning length	Item no.	Price
L2H2	3.25 m	**89 215**	**154.00**
L3H2 / L4H2	3,75 / 4 m	**89 216**	**164.00**

Thule Roof Rack Crossbars

For installation onto the roof rack longitudinal rails. Set consists of 2 rails with a length of 1.5 m each. To bridge potentially present skylights and roof constructions, 2 different heights are available. Load capacity 75 kg.

Height	Item no.	Price
15 cm	**89 221**	**409.00**
19 cm	**89 222**	**409.00**

NEW

Thule ProBar Fixpoint Evo Crossbars

To install onto the Ford Transit and VW California. Set consists of 2 rail with a length of 1.5 m each. For more need in height, an elevation kit can be mounted below for additional 3 cm.

Awning Tent Privacy Room F45

With the Privacy Room F45, you can transform your Fiammastore into a cosy living space. The awning and the side walls can be quickly connected using the patented Fast Clip. The awning fabric is clamped between the lower and upper profiles and closed with clamps inside the Privacy Room.

A special vertical padding is located in the rear part of the side walls and is pressed against the awning by a telescopic aluminium rod.

The front of the Privacy Room is pulled into the rail of the front wall and connected to the side walls of the Privacy Room via zips. The two side windows and the front window can be opened. All elements are equipped with a mosquito net and large Velcro strips, so that the window can be closed completely.

Larger windows, rounded shapes and the introduction of different shades of grey make the awning even more elegant and modern. The material and the structure remain unchanged, thus continuing to guarantee function and durability.

For which awning?
Designed for attachment to the F45s and F45L awnings. Can also be attached to the 5002, 5003 and 4900 Omnistor awnings.

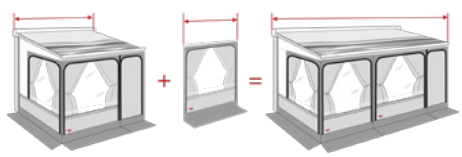

Material: waterproof, UV-resistant and washable vinyl fabric

Front section: If your awning is 350 cm long or longer, you need the Privacy Room F45 300. In this case, you also need a front wall extension, the size of which depends on the length of your awning.

Mounting height	Awning length	Weight	Item no.	Price
180 – 220 cm	263 cm	23.7 kg	**071/511**	**1,393.00**
225 – 250 cm	308 cm	24.4 kg	**071/512**	**1,391.00**
250 – 280 cm	308 cm	24.7 kg	**071/513**	**1,411.00**

Scope of delivery: 1 front wall with roll-up window, mosquito net and a door that can be attached on the right or on the left side. Two side walls with roll-up windows and mosquito nets, curtains for all windows, fastening system Fast Clip and Mega Bag.

Extend your Privacy Room to the appropriate awning length with the respective front wall extension.

Front Wall Extension Van 40

With the front wall extension, the Privacy Room can be easily adapted to the right awning size. Select a basic model according to your awning. Add a front wall extension to extend your awning to the length you want.

Width	For awning length	Weight	Item no.	Price

200 cm	500 cm, 550 cm	1.9 kg	**071/530**	**214.00**

Fiamma ZIP

The Fiamma ZIP combines the advantages of a canopy with those of an awning. For short stops, the awning offers a shady spot in no time at all. At the campsite, you can use the Privacy ZIP to transform the awning into a closed awning with the sewn-on zips.

The ZIP system connects the side sections to the awning fabric using two robust zips. This makes the awning more resistant to wind and water. The ZIP system makes it quicker and easier for you to set up and take down the awning.

Awning: The Fiamma ZIP is based on the F45. Fabric with ZIP system for easy and quick installation.

Windows: The three crystal windows with mosquito nets can be opened. The large Velcro strips allow you to close the windows completely.

Poles: aluminium Rapid Set poles and Rafter tensioning pole.

Front wall: The individual parts of the front wall are interchangeable. If your awning is 350 cm long or longer, you need the Privacy ZIP 300 and a front wall extension, the size of which depends on the length of your awning.

Materials: Awning made of vinyl. Awning with Polar White housing and Royal Grey fabric.

Scope of delivery:
Awning: with 3 standard brackets (Kit AS) for wall mounting and awning crank
Privacy ZIP: front section with mosquito net, curtains for all windows, Rapid Set fastening system (2 + 2 aluminium poles), ground spike kit, Rafter tensioning pole, mud flap, Mega Bag carry bag

Awning Tent Privacy Ultra Light

Since it is quickly set up and easy to use, the Privacy Ultra Light is ideal for short stays, weekend trips or travellers who are always on the go. Thanks to the roof ventilation, it is especially suitable for warmer seasons.

- Awning height 230 – 280 cm, van 180 – 220 cm
- Suitable for awnings F45s, F45L, F65s, F65L and F80
- Various attachment options, regardless of a straight or profiled vehicle wall
- Double roof with integrated self-ventilation
- Ripstop material, light, tear- and scratch-proof
- Side walls can be opened completely
- By extending the side walls with the optional aluminium pole kit and by attaching a Blocker or Sun View to the front wall, the shaded area can be used to protect e.g. bikes or dog crates.

The side walls, which can be rolled up, are equipped with windows and a blackout; removable front wall with transparent window film and door.

Scope of delivery: complete awning consisting of roof, front and side walls as one piece, mounting kit for Fiamma awnings, cross rafter support kit, ground spikes kit, transport bag Bag Light.

Awning Fiamma F43van

Wall awning with magnetic crank, special version developed for vans, also with pop-top. Compact and with an innovative design that harmonises with the look of the vehicle, be it with or without pop-top.

Features:

- Opening via winch with magnetic catch in the end cap, convenient position due to the mounting height of the awning on the van
- Awning opening with negative inclination to utilise the entire space at maximum height (2.20 m)
- LED device in the housing, which is visible even when the awning is closed; recessed front panel lock
- Two concealed piping rails, one in the front panel, the other in the housing (for attaching the Room Van Premium awning)
- One-piece front panel fastener and support foot bracket
- The compact shape reduces the maximum height and makes it possible to enter car parks even with the awning fitted.
- Length 270 with 225 cm extension, 300 with 250 cm extension
- Compatible with F40van accessories: front walls, Room Van Premium and Rafter LED Van (only for length 270)

Awning Fiamma F35pro

Fiamma F35pro is a convenient awning with a manual mechanism and telescopic legs integrated into the roll. It can be installed on any kind of minivan, thanks to a variety of brackets that can be attached to the wall, roof bars, and rails. Due to the double piping rail, two front parts or additional accessories can be mounted at the same time. The case is made from light, sturdy aluminium. The awning is made from waterproof, translucent vinyl. Max. height from the ground: 225 cm. Fabric colour: Royal Grey; Extension: 225 cm

Awning CaravanStore & CaravanStore XL

from 438.00

Easy to operate, very sturdy, elegant, stylish and affordable. Simple assembly as it only has to be pulled into the piping rail. Can be used in seconds thanks to its innovative roll system.
The reinforced roll, which contains the support legs and clamping arms, can be rolled up both inwards and outwards. Thanks to its patented roll, the CaravanStore is easy to unroll and roll up manually. The awning is protected in a soft, grey vinyl case with a strong zip.

Kit Hobby CaravanStore

Supplementary kit for attaching the CaravanStore to Hobby caravans 2009, series 6.

071/815 **17.00**

Awning Tent Privacy Room CS Light

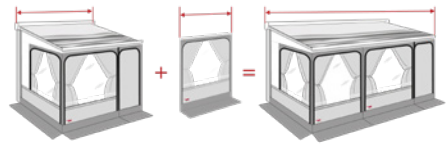

The compact and light privacy solution for the CaravanStore and the F35pro awning. Easy and quick to install. The side windows, which can be opened, are equipped with mosquito nets. The front wall with roll-up window and mosquito net is simply pulled into the piping rail of the roll and is easily connected to the side parts with zips.

The Van version is specially designed for camper vans.
The Privacy Room CS Light XL version is suitable for the CaravanStore XL awning with an extension of 250 cm.

Front wall: If your awning is 360 cm long or longer, you need the Privacy Room CS Light XL 310. You then also need a front wall extension, the size of which depends on the length of your awning.

Scope of delivery: 1 front wall with roll-up window, mosquito net and door, 2 side walls with window and mosquito net, 1 Fast Clip Light for quick and safe attachment to the awning, pegs and elastic tensioning straps, 1 transport bag.

Extend your Privacy Room to the appropriate awning length with the respective front wall extension.

Van Mounting height: 180 – 220 cm			
Awning length 250 cm	8.7 kg	**071/630**	**945.00**
Awning length 270 cm	9.1 kg	**071/631**	**951.00**
XL Mounting height: 240 – 260 cm			
Awning length 280 cm	12.11 kg	**071/632**	**1,051.00**
Awning length 310 cm	12.31 kg	**071/633**	**1,063.00**

Front Wall Extension Light

With the front wall extension, the Privacy Room can be easily adapted to the right awning size. Select a basic model according to your awning. Add a front wall extension to extend your awning to the length you want.

Width	For awning length	Weight	Item no.	Price
50 cm	360 cm	600 g	**071/634**	**54.00**
100 cm	410 cm	800 g	**071/635**	**107.00**
130 cm	440 cm	950 g	**071/636**	**137.00**

CaravanStore ZIP XL

The best complete solution. Canopy in a case with awning. With the ZIP system, the side walls are connected to the awning fabric by means of two robust zips. Easy and quick to set up. The two piping rails in the fabric roll allow an additional Sun View to be drawn in.

- Flexyblock system to increase rafter tension
- Easier opening due to reinforcement of the inner sliding plugs and the larger roller
- Larger support frame and reinforced side walls
- Longer side walls with larger windows

Awning: The CaravanStore ZIP is based on the Fiamma CaravanStore. The fabric is equipped with the ZIP zip system for quick and easy fastening.

Privacy CaravanStore ZIP:
Windows: The three crystal windows can be opened and are equipped with a mosquito net. Large Velcro strip so that the windows can be closed completely.

Poles: Rapid Set CS, CaravanStore, Support Leg (from 3.6 m) and Rafter (from 4.4 m). Kit Magic Privacy for extra stability available as an accessory.

Front part: The parts of the front wall are interchangeable. If your awning is 310 cm long or longer, you need the Privacy CaravanStore ZIP XL 310. In this case, you also need a front wall extension, the size of which depends on the length of your awning.

Colours & materials: The awning is made of white and grey vinyl. Awning with Polar White awning bag and Royal Grey fabric.

Scope of delivery: CaravanStore, front part with roll-up window, mosquito net and roll-up door, 2 side parts with roll-up window and mosquito net, curtain kit for all awning windows, fastening system Rapid Set CaravanStore (2 + 2 aluminium poles), ground spike kit, carry bag Mega Bag (dim. 140 x 27 x 40 cm).

Poles can be attached quickly and securely to almost any ground.

Fix&Go Adapter

With the Fix&Go adapter, you can connect round poles, e.g. those of your awning, a simple pole awning or a 180°/270° awning, to the Fix&Go anchor plate 2.0 and thus secure the awning to the ground. The adapter is used instead of the often used blind plug at the end of the pole. By simply twisting it by hand, the Fix&Go adapter adapts to tubes with internal diameters of 18 to 27 mm and stays securely in the pole. The clever adapter is therefore compatible with the most common tent poles.
In addition, the adapter is so small and compact that it can usually remain attached to the pole so that everything fits easily in your awning bag, for example. If this is not possible, the Fix&Go adapter can be removed in seconds.
It fits perfectly into the recess of the Fix&Go anchor plate 2.0. Thanks to the versatility of the anchor plate, the poles can be securely attached to almost any surface – and also quickly removed again if the weather changes. Content: 2 pieces

610/148 **9.95**

The perfect addition.

8.40

PP Spacer Plate Fix&Go Bridge

Add-on for the Fix&Go Anchor Plate 2.0. With the optional use of the Fix&Go Bridge, the distance between the anchor plate and the ground increases by 2 cm. Water can flow freely and dirt particles are simply washed out.
Content: 2 pieces **610/147** **8.40**

Other Peggy Peg products can be found on pages 68 & 69.

6.50

PP Lock Nut P&S 2.0

Height-adjustable lock nut 2.0 (with hook) for retrofitting Peg&Stop screw pegs. Thanks to the lock nut, the screw peg does not always have to be screwed in all the way. By turning the lock nut one or two times to the right, the Peggy can both attach the Fix&Go anchor plates 2.0 with counterpressure and securely tension tents and storm straps. Suitable for all P&S screw pegs with continuous thread. Content: 3 pieces

610/453 **6.50**

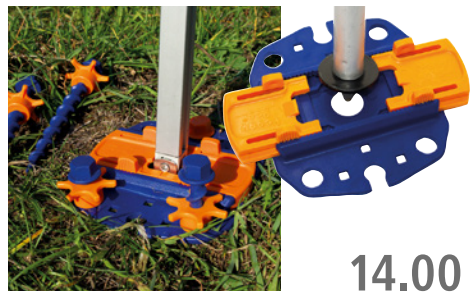

Makes your awning stand securely even on asphalt.

26.50

PP Fix&Go Tube

Peggy Tube is the ideal addition to the Fix&Go anchor plate for setting up the awning on pavement, concrete or asphalt. This extension turns the compact and light transport volume into 10 kg of extra weight. Application: Place the adapter shoe on the existing Fix&Go anchor plate on the awning foot. Fill the hose with 10 litres of water from the tank, a lake or a river and place it in the basket. Use the Velcro straps to fasten the Peggy Tube to the awning foot – and you are done! With a total of 20 kg of ballast (one Peggy Tube on each side), the awning can also be used in slight winds. **Please note:** It is up to the user to decide when the wind becomes too strong for the existing weight. Peggy Tube does not replace awning fastenings! Dim. (H x ø): 90 x 12 cm; Content: 1 piece

610/253 **26.50**

14.00

awnings, tent poles, storm straps

PP Fix&Go Anchor Plate 2.0

For awnings, tent poles and storm straps of all kinds. Awning or tent poles are fixed securely between the plates and cannot sink or raise in soft grounds. The height-adjustable hook of the screw system fixes the plate, even when the peg cannot be screwed in properly. The retracting of awnings is possible as often as required just by opening the slider. Suitable for all Peggy Peg screw pegs (optionally available). Dim. (W x H x D): 13 x 3 x 15 cm **610/133** **14.00**

Secures your awning!

79.95

Fix&Go Peg&Stop Awning Set

Set for attaching awnings, bag awnings and sun canopies. Can also be used as an anchor for storm straps, etc. The well-known Fix&Go anchor plate 2.0 allows the awning to be retracted by hand without any tools. The screw peg Peg&Stop with lock nut allows the screw to be fixed, even if it could not be screwed in completely. The impact screw ring for hard and soft soils completes the set. **Recommended accessories:** Peggy Peg TieStrap and Fix&Go Bridge.

Scope of delivery: 6 Peg&Stop with lock nut 16 cm, 4 impact screw rings 15 cm, 2 Peggys L 31 cm, Kombi Tool with aluminium adapter, and 1 pair Fix&Go Anchor Plates 2.0 cm with storm hook. Comes in a bag made of 100 % polyester (without strap). **610/146** **79.95**

Other Peggy Peg products can be found on pages 68 & 69.

everything in one compact bag

109.95

PP Tensioning Set 270°

Secure your 270° awning additionally when it is windy with this clever product combination of tensioning straps and screw pegs that are screwed in with a cordless screwdriver or a hand spanner. Suitable for 270° awnings, pavilions and much more. Ideal for normal, soft and sandy soils thanks to compressing threads. The PP screw peg Schlag (aluminium) allows you to fasten your awning even on extremely hard, stony ground. Only this peg is hammered in and later unscrewed.

The height-adjustable hook on all Peggys also allows you to use them in a wide variety of ground conditions, e.g. if the screw pegs do not go all the way into the ground – wherever you are, whatever the season (pre-drilling can be helpful, especially in winter). All utensils are stored in a compact bag.

The set consists of:

- 3 screw pegs N 20 cm
- 3 screw pegs Schlag 15 cm
- 3 screw pegs L 32 cm
- 3 Crocodile Peggys
- 6 L-hooks
- 3 N-hooks
- 3 U-Connectors
- 3 T-Connectors
- 1 Combi Tool Aluminium
- 1 orange bag **610/454** **109.95**

For awnings and tent poles.

19.00

PP Anchor Plate

Universal mounting plate for all popular awnings and tent poles. Prevents e.g. sinking in. Can also be used as storm-proof anchoring of the storm belt, etc. Content: 2 anchor plates, 2 storm hooks, 2 universal plates. **610/128** **19.00**

53.50

PP Awning Clamp Fix&Go AntiFlap

The Fix&Go AntiFlap awning clamp significantly reduces annoying fluttering noises. Simply push the device from the side onto the canvas, put it on the rafter or spring beam of the awning existing on both sides, turn to fix the eccentric lever and close by flipping it. The clamp cushions keep the canvas fixed without damaging it. Then, the silicone tapes are tensioned around the rod and, depending on the rod's diameter, hooked into the matching grid perforation. Those seeking more security can additionally push the optionally available TieStrap into the integrated piping. TieStrap is tucked safely into the piping by flipping the eccentric lever so that the T-connector of the TieStrap cannot come loose. Of course, larger awnings can be tensioned better with more than one AntiFlap on each side.
Fix&Go AntiFlap is compatible with nearly all awning systems, no matter if they have round, oval, or square rafter rods.

Content: 2 Fix&Go AntiFlap
Required: 2 rafters of the awning manufacturer (e.g. Fiamma Rafter Standard 071/142)
Optional: TieStrap Peggy Peg
610/250 **53.50**

13.50

PP Awning Strap Tie Strap

For additional tensioning of awnings, bag awnings and tents in bad, windy weather to support the awning extension arms. Is attached to the awning by means of the supplied T-connector in the piping rail or hooked directly onto the tent spike and tensioned to the ground. The system is closed and cannot get loose by itself. It is nonetheless easy to dismantle by unhooking the T-connector in the eyelet.
The tie strap is manufactured circularly and can be adjusted between 1.5 and 3 m. Due to its signal effect, it can be easily spotted even in twilight. Suitable for screw pegs N, L, LA, HC, anchor plates and F&G AntiFlap (optional).

Scope of delivery: 1 strap with fixed relief spring, 1 T-connector. Pack size: 18.9 x 15.6 x 5.4 cm; Weight: 350 g **610/144** **13.50**

8.00

PP U-Connector

The U-connector connects the Crocodile Peggy to the awning strap Tie Strap. It can then be used to tension tarpaulins and pavilions.
Content: 4 pieces **610/252** **8.00**

reusable zip tie

7.00

PP Silicone Straps

Alternative fastening for AntiFlap. Can also be used as a reusable zip tie. Length: 13.5 cm; Content: 4 pieces **610/251** **7.00**

FAHRRADTRÄGER

Tow Bar Carrier Uebler

The tow bar carriers **Uebler X21 S** and **Uebler X31 S** are currently the lightest, smallest and most compact carriers in their class. When folded, they fit easily into almost any car boot. Thanks to the patented folding system, the rear lights, the bicycle rails and the support frame can be folded completely.

Small in size, big in transport: **Uebler X21 S** is specially designed for the transport of e-bikes. It carries 2 bikes with a maximum weight of 30 kg each. **Uebler X31 S** can carry 3 bikes with a total of 54 kg. The integrated foot switch makes it easy to tilt the carrier – even with bicycles.

The carriers are attached to the tow bar via the patented quick lock. Slide it open – close the handle – done. The carrier adjusts itself without any further tuning. It sits safely on the tow bar. Up to a frame size of 75 mm, the bikes are fixed by lockable spacers and the most secure and convenient ratchet system for bicycle tyres. The bike rails are positioned with a gap of 220 mm. Thus, even premium bikes have enough space in between.

Equipped with a carrying handle located in the number plate holder, a plug holder for the 13-pin plug and anti-theft protection.

Tow Bar Carrier Uebler

Extra light and foldable: The Uebler i-Series is equipped with the patented Uebler iQ-lock, which allows the bike carrier to be fixed on the tow bar without any lever, without further adjustment and without tools. Due to the leverage, the carrier can be clamped to the tow bar with little effort. The carrier frame and the bike rails can be folded out in just a few simple steps. The 60° or 90° folding function of the carriers is triggered by a pedal and allows you access to the boot.

The i-Series is equipped with removable spacers that can be operated with one hand and has extra wide tyre rails that have been developed for transporting mountain bikes and e-bikes (Pedelecs). The bike holders and the clamp mechanism of the carrier on the tow bar can be locked with a system with the same locking mechanism.

Suitable for e-bikes: The low weight of the carriers allows a higher vehicle load capacity than with conventional systems.
Colour: silver

Please note the load capacity when loading e-bikes.

MADE IN GERMANY

EuroCarry Ducato/Jumper/Boxer

The electric bike carrier by EuroCarry was designed for the Fiat Ducato, the Citroën Jumper and the Peugeot Boxer built since 2006. This bike carrier allows you to transport two e-bikes with a max. total weight of 50 kg. Thanks to the bike carrier, which can be lowered up to 110 cm electrically, tediously loading the bikes is finally a thing of the past.

The bike carrier comes partly pre-assembled. A 12 V power connection is required. It is mounted to the fastening screws of the door hinges without gluing.

To open the rear doors, the bike carrier can be laterally moved to the right when loaded.

Easy to load thanks to electrical lowering!

Bike Rails
Rail Premium

The Premium rail was standardised and synchronised with the bike carrier series Pro and L. To simplify the rail and make it even more user-friendly, the hand crank, which was used to adjust and fix the bikes, was removed. Now, it is enough to push the support against the bike's tyre and fasten the strap. Together with the rubber support, the bike is secured onto the rail. With black end caps.

The longer **version XL** (139 cm) was designed for especially long e-bikes and mountain bikes (wheelbase > 125 cm).

Rail Premium S – can be inserted flexibly thanks to the special fastening. The rail can be infinitely shifted not only laterally, but also in its depth. This way, the bikes can be positioned closer to the vehicle wall.

The **Rail Premium S Fat Bike** enables the transport of modern Fat Bikes with tyre widths of up to 5 inches on the bike carrier by Fiamma.

NEW

The Fiamma Bike-Block in red and blue can be found online.

More? **Online!**

Security hole – enables the use of an anti-theft cable

Fastening button in an always easily accessible front position

Blocking clamp for pipe thicknesses of 30 – 35 mm

Ergonomic and convenient
A change in position of the knurled screw used to fasten the Bike-Block allows free rotation of the plastic end piece. The knurled screw is now positioned at the front and the mount of the rubber support has been improved, which makes the Bike-Block Pro S very easy to use.

Bike-Block Pro D – with articulated arm, which gives you more space to fasten the bikes.

THULE SWEDEN

10 | Thule Hullavator Pro

899.95

Kayak holder to mount on the Roof Rack system (requires longitudinal and high cross bars), made of aluminium and double coated steel. Due to its lift assistance it enables a very comfortable handling to kayaks by only one person. Double foldable, plastic coated arms lower the loading height for up to 1 m, thus kayaks can be loaded and unloaded very comfortably. Thereby gas pressure springs reduce the weight of the kayak up to 18 kg when lifting or lowering. It offers room for 1 kayak with a maximum width of 80 cm and a maximum weight of 35 kg. Two Hullavator Pro can be installed onto one vehicle. **89 231** **899.95**

11 | Thule Portage

151.00

Canoe holder that is easy to load and suitable both for the Thule Roof Rack system and for most of the standard roof carriers. Its robust holders with round-shaped sides and weather-proof padding protect the canoe while driving. Strong tension straps are equipped with a buckle protection to avoid scratches on canoe and vehicle. Suitable for 1 canoe, max. additional load 45 kg. **89 235** **151.00**

from 202.00

12 | Thule SnowPack

Lockable roof rack made of anodised aluminium for transport of all kinds of skis and snowboards. Suitable for installation on the Thule Roof Rack System and for most standard carriers. The support surfaces (width 25 or 50 cm) of the carrier are equipped with extremely soft rubber pads, which give best grip without causing scratches on the skis or boards. The vertical spring system allows the transport of even thicker boards. 2 sets of support feet are included in delivery to carry also skis with bigger ski bindings. A very big push button allows to open and close the rack even with gloves on.

Type	For	Max. load	Weight	Item no.	Price

13 | Thule Canyon XT

With its stable but still elegant, light-weight steel construction and its low profile this roof frame is perfectly suitable for transport of equipment of any kind and size. Its shifted side walls facilitate loading and unloading, and well designed fairing enhance its aerodynamics. It is suitable for the Thule Roof Rack System and lockable with the Thule One-Key System. Load capacity 68 kg, loading area L 101 x W 91 x H 10 cm, dimensions L 127 x W 104 x H 15 cm, weight 13 kg. **89 253** **505.00**

from 455.00

14 | Thule Roof Box Force XT

Versatile roof box, designed for daily use. Its aeroskin lid material imparts a unique design as well as a high scratch-resistance to the box. The aerodynamic shape lowers the noise emission while driving. Thanks to the PowerClick system, the boxes are installed quickly. The integrated torque display indicates via a "click" sound when the box is installed properly, ensuring a quick and safe fastening. The DualSide opening system allows loading and unloading from both sides and further facilitates installation. The integrated SecureLock technology ensures the lid is closed entirely and locked securely on all edges. Moreover, the extra large locking knob is easy to grip with gloves and protects the Thule Comfort Key against damage; load capacity: 75 kg.

Thule Excellent

This high-quality bike carrier is characterised by its safety, user-friendliness and elegance. The clear lines and harmonic colours suit every vehicle. The installation is done with a sturdy fastening rail, fixated at the bottom with invisible fixating points, at the top, the Thule Excellent fits to many fixation points. The 1. bike rail can be adjusted to the side as well as the depth, allowing easy and effective fixation of the bikes. The wheel holders are attached to adjustable pump buckles with ratchet functions for a comfortable and quick bike fixation. The rail bracket locks automatically, as well in open as in closed position. The Thule Excellent has a load capacity of 60 kg, thanks to its sturdy construction, it is perfectly suitable for heavy bikes like e-bikes, Pedelec-, or downhill bikes weighing up to 30 kg each. Per rail, a lockable distance keeper is included, suitable for cross bars of up to ø 70 mm. The Thule Excellent is also available as a Short Version, the mounting height is variable from 60 to 150 cm depending on version. It carries 2 bikes and can be extended to up to 4 bikes.

Thule Elite G2

Bike rack equipped with massive oval tubes made of anodised aluminium for extra safety and stability while transporting bikes, injection moulding parts made of plastic and aluminium ensure excellent craftsmanship. An innovative platform locking device ensures that the carrier makes no sudden movements on rough roads. The carrier is equipped with 2 flexible bike rails, which can be moved sideways, including the bike. Installation is done with a sturdy fastening rail, installed underneath by invisible fastening points. Thanks to this rail and an optional mounting rail (item no. 89 450) for the upper fixation, the load is evenly distributed on the vehicle wall. The carrier can be extended by a 3rd variable and a 4th fixated rail. The sturdy carrying frame for bikes is pre-assembled and has a load capacity of 60 kg (max. 30 kg per rail); per rail, one spacer with a soft surface is included, suitable for bike cross bars up to ø 70 mm. The installation height depends on the version and varies from 50 to 150 cm.

THULE SWEDEN

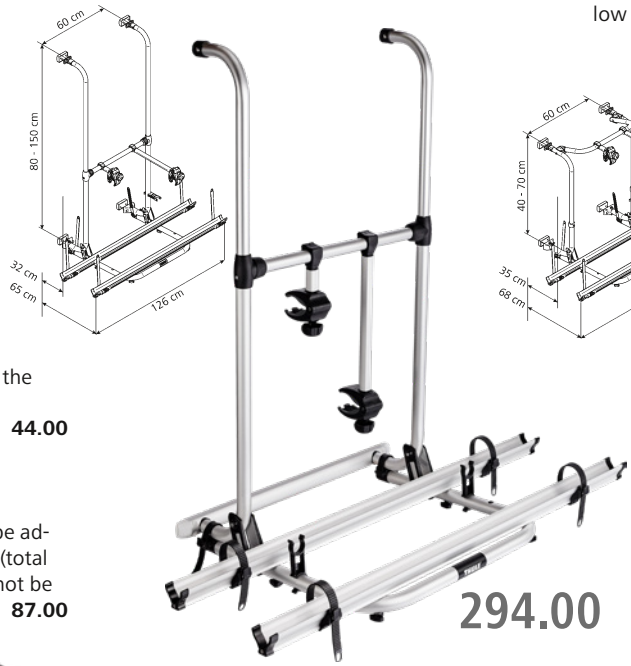

Thule Sport G2

Bike carrier made of round, anodized aluminium tube, based on the established Thule range. The Thule Sport G2 is equipped with bike rails, in which even wide bicycle tires find enough space and good grip. One bike holder is included per bike rail, protecting the bikes' varnishing with a soft pad. The basic frame is mounted with aluminium wall hooks, optionally with a mounting rail (item no. 89 450), ensuring an even more elegant mounting. The lower part of the frame is fixated in a mounting rail with invisible fastening points. The resulting load distribution and additional plastic parts at the connecting points of the frame generate additional stability while driving. The Thule Sport G2 is suitable for bike holmes up to ø 70 mm and has a load capacity of 50 kg (per rail max. 19 kg). Depending on the type of bike, it can be adjusted from 40 to 150 cm. The Sport G2 carries 2 bikes and can be extended to 3 bikes.

THULE SWEDEN

Thule WanderWay

Rear carrier for the VW T6 minivan, which can be mounted quickly and easily thanks to its special adaptation to the tailgate of the VW T6. With the Thule WanderWay, 2, by using the optionally available extension sets, up to 4 normal bicycles can be transported. Alternatively, the robust construction can also carry 2 e-bikes. The maximum load capacity is 60 kg. The Thule WanderWay has been designed with user friendliness in mind. For example, the trunk can be opened effortlessly without mounted bicycles. Once mounted, the Thule WanderWay can easily remain on the car for long periods of time, and the elevated position of the carrier leaves the taillights and license plates free. When the bicycles stand on the easily adjustable, side-sliding rails, they are quickly and securely secured by the ratchet wheel holders and lockable Thule AcuTight bicycle racks. To ensure this safety, the carrier has been subjected to extreme load tests. Weight 12.4 kg.

Thule VeloSlide

Thule VeloSlide is a bike carrier that is without equal when it comes to user friendliness and vehicle integration. What makes this patented rear garage bike carrier unique is its operation. The basic rack in the centre is easy to pull out by hand and has a maximum load capacity of 70 kg. A bicycle or e-bike can be placed on both ends. After the basic rack has been horizontally pulled out of the rear garage up to 1.5 m, the rotationally adjustable and fixable convex wheel intakes can be adapted to the specific wheel dimensions, so that the bikes can be comfortably put up. Robust tightening handles and bike holders secure the bikes on the carrier. Pulling back the basic carrier into the rear garage can be done in steps to store additional luggage in between. For installing the carrier on the floor of the rear garage, a mounting rail set (89 497 or 89 498) is recommended. While not in use, the carrier can be pulled out or aside to save space. Weight: approx. 20 kg.

Two adjustable belts with hooks on both sides to fixate the transparent pocket, length 2.2 m and 5 m.
89 559 **12.50**

Tensioning Straps Set with Snap Hook

Two straps for an all-around fixation, length adjustable, no attachment to the transparent bag, thus universal and versatile application. Length: 4 m each.
89 561 **12.50**

VeloCompact

Very compact and lightweight tow bar bike carrier, which is available as a 2 or 3 bike version. The version for 3 bikes (model 926) can be extended for an additional bike by an extension set. For both versions the load capacity per rail is 25 kg, which allows transportation of lightweight e-bikes as well. The handling of the carrier is very comfortable – an adjustable one hand coupling allows easy mounting of the carrier and due to detachable bike arms, bikes can be mounted very easily. The smart foot pedal tilt enables comfortable trunk access. Carrier and bike arms are lockable. It is City Crash test compliant.

EasyFold XT

The compact and comfortable trailer coupling bike rack, which is available for 2 and 3 racks, is entirely folding. However, a high loading capacity of 60 kg with 30 kg per rail, meaning that both versions can take 2 standard e-bikes. The wide distance between the rack rails facilitates the loading of wide and heavy bicycles. In a detached state, 2 integrated carrying handles and an integrated wheel make the XT 3's transportation comfortable, the installation itself is completed easily thanks to the adjustable one-hand-coupling at the coupling knob. the wheels are fastened by detachable articulated arms with Thule AcuTight torque-limiting knobs, which "click" as soon as the perfect torque is reached. With a foot pedal, the detachment mechanism is operated. This mechanism grants access to the boot, even while the bicycles are fastened on the rack. Rack and articulated arms are lockable. The rack meets the requirements of the City Crash norm.

VeloSpace XT

Thanks to its spacious and stable construction - providing a loading capacity of 60 kg with 30 kg per rail, its bike rails have extra length – the VeloSpace XT bike rack can take on different types, such as children's bicycles, fatbikes or even e-bikes. The detachable articulated arms allow for easy loading of the bicycles. Thanks to the stable connection to the trailer coupling, installation and adjustment of the rack are accomplished easily. However, even in installed and loaded state, there is always easy access to the boot thanks to the handy detaching mechanism with foot pedal. The VeloSpace XT 3 has an extra large folding angle of 70°, what makes it especially attractive for modern vans with large tailgate. The rack as well as the articulated arms are lockable. The VeloSpace XT meets the requirements of the City Crash norm.

Extends VeloSpace XT to 3 or 4 bikes. Maximum load capacity: 15 kg. **89 145** **189.95**

Loading Ramp

Loading ramp for bicycles matching the VeloSpace XT. Included in delivery are 2 adapters with which the carrier can be fixated during transportation. **89 134** **69.00**

Thule BackSpace XT

The light and robust cargo carrier fits onto the rear of the vehicle and is the perfect addition to the VeloSpace XT bike racks. It has a colume of 300 litres, loading (cargo load 50 kg) the carrier is perfectly comfortable thanks to the low loading height. The bag is highly water-repellent. In rain, snow, etc., the load should be packed into plastic covers. The folding carrier is easy to install and no additional tools are needed, the box can be carried comfortably with the integrated carrying handles. The cargo carrier meets the requirements of the City Crash norm. Dimensions: W 140 x H 68 x D 42 cm, weight: 8.6 kg.

89 146 **699.00**

Cable Lock

Strong cable with plastic coating, fitting for the bike holders version up to 2012. Length 180 cm.

89 545 **51.00**

Thule Strap Lock

The 3 m strap contains a highly durable steel core wire, which prevents cutting. Its lockable aluminium strap buckle has a protective cover to avoid scratches and marks. It is possible to tighten the strap in both when open and locked.

89 546 **53.00**

THULE SWEDEN

Linnepe Rack Systems

For excursion trips, scooters are getting more and more popular because they do not require an additional/ extra driving license- and transportation possibilities are available, if the live weight allows it, for nearly every motorhome. Basically, a scooter can be transported inside the spacious rear garage or at the rear of the motorhome at a load rack. As in both cases, restrictions concerning the motorhome's remaining loading capacity have to be adhered to, the Linnepe rack systems are made of seawater-resistant aluminium. At the same time, they provide the same (if not more) stability as do standard steel racks- in combination with the significant weight reduction. All rack systems mounted to the outside are connected to the chassis and not the body. They are detachable without tools and are delivered with an EG type certification, thus, they do not need to be registered in the vehicle's registration papers. Additional costs for a frame extension additionally required for vehicles without or with a non-carrying frame extension: 429. - €.

Please tell us the exact vehicle and vehicle's body data (exact vehicle type, chassis, year of construction) upon ordering!
The 13-pin wiring kit is required to connect the rear load carriers and has to be ordered separately.
Your order arrives directly from Linnepe!

from 1,049.00

Rear Garage Extension SmartRail

SmartRail presents the smartest solution for transporting scooters in the rear garage of your motorhome.

- The scooter is pushed over the hand-placed loading rail in the front wheel recession
- Fixation of the scooter on the carriage of the rail system by means of a handlebar tensioning belt
- Pulled inside via the wired remote control and the toothed belt with the electric version
- Suitable for front wheel sizes of between 8" and 16"

- Space-saving construction
- Electric version: power provision 12 V, power consumption: 7.5 A
- Dimensions: L 190 x W 28 x H 6 cm
- Live weight: up to 150 kg
- Weight: approx. 10 kg, electric version: 12 kg

Scope of Delivery:
Platform with the carriage, wired remote control (electrical version only), loading rail, handlebars tensioning belt, 2 rear tensioning belts.

Tensioning Strap for Handlebar

Cargo securing is a necessity – the handlebar lashing strap is a simple and ingenious way to fix a scooter or motorbike on a load carrier. The belt-loops are simply moved over the handlebar and the belt is tensed with a ratchet to the carrier. Suitable for all Linnepe load carriers and all systems to which the 2 included eyelets can be fixed. Weight 1.8 kg, traction force 1,500 kg.

87 798 49.00

E-Bike Carrier Velo III

For safe transport of e-bikes with the motorhome conventional carriers are not very suitable. Installed high on the back wall of the vehicles, the loading of e-bikes weighing up to 25 kg can be a problem. The carrier Velo III completely made of aluminium is installed right on the motorhomes frame. It is stable, has a low loading height, small net weight and allows higher load capacities–adjusted to e-bikes. Permanently fixed rails care for secure support of the wheels, a conversion kit for e-bikes is included in delivery. Extra charge for reinforcement parts for vehicles without or with non-sustainable frame extension from € 378.00.

Features:

- For max. 2 e-bikes or 2 bicycles
- High-quality, user-friendly design
- Folding platform
- Dimensions W 198 x D 87.5 cm
- Load capacity up to 80 kg
- Low weight approx. 16 kg

Bike Carrier Trigo Van

The bike carrier, which is produced in Germany, persuades with its ergonomic design and enables an effortless swivelling of the loaded carrier. It is equipped with an automatic folding function with reliable fixation possibility, which not only optimises transport, but also saves valuable space. The newly developed locking takes care of an automatic locking in place. The swivelling function of the carrier is equipped with an impact protection for the right door, which not only increases safety, but also prevents damages during operation. Thanks to the 100-degree opening angle, the Trigo Van additionally enables a permanently free access of the rear doors, even in a loaded state.

Features:

- For max. 3 e-bikes, bikes or fat bikes
- Ergonomic design
- Effortless swivelling- also in a loaded state
- Folding, including locking option
- Lockable swivel bracket
- No illumination repeater necessary
- Installation onto the rear door hinges
- Free access to the tow bar
- Also available with LED lights (special order)
- Narrow rail 6.7 cm wide
- Wide rail 17 cm wide
- Load capacity of up to 80 kg
- Individual weight without conversion kit: from 50 kg

Tow Bar Thule VeloSwing

These innovative tow bar solution is designed for transporting bicycles on a Fiat Ducato or vehicles identical in construction. With the new, entirely swivelling Thule VeloSwing tow bar, you can comfortably use the same tow bar bike carrier like with a normal car. The Thule VeloSwing can be swivelled, even when loaded with up to 4 bikes or a luggage box, easily with one hand to the side so that you have unobstructed access to the rear doors of the vehicle. Easy handling with colour indicator on the permanent safety locking, which indicates when everything is locked into place. The Thule VeloSwing is completely certified and more than just a solution for the transportation of e-bikes. With a maximum load capacity of 150 kg, the tow bar can also be loaded with, for example, a rear luggage box or other accessories. Moreover, it can pull heavy trailer with up to 3 t. (Caution: pay attention to the towing capacity of the vehicle).

Features:

- Dimensions W 157 x H 27 x D 60 cm
- Max. towing capacity: 3 t
- Max. support load: 150 kg
- Opening range: 95°
- Additional weight for the vehicle: 49 kg

Not suitable for Italy and Spain!

Warning Sign
Lightweight plastic material. Comes with four round rear reflectors. Non-reflective.
Not permitted in Italy and Spain!

Dim. (W x H): 50 x 50 cm **137/246** **15.00**

33.50

Italy

Aluminium Warning Sign for Italy
For overhanging loads. According to the Italian Highway Law, aluminium warning signs are required since 1/1/1995. They are covered with a special reflective foil and must have four holes with eyelets.
Dim. (W x H): 50 x 50 cm **137/247** **33.50**

46.50

Spain

Special Load Warning Sign Spain
Each overhanging load must be marked with a red and white hatched warning sign. In contrast to the warning sign for Italy, an embossed and black painted border is mandatory.

Dim. (W x H): 50 x 50 cm **137/248** **46.50**

Information

One decanewton is equivalent to 10 newtons. The unit is used in load securing to indicate the load-bearing capacity or breaking strength of ropes or straps.

from 2.90

Rubber Bungee
Rubber rope ø 8 mm, both sides with a hook, for universal tightening and fixing. Material: inside natural rubber, outside high density polyethylene (non-rotting, water-resistant, highly resistant to UV radiation and abrasion), tear strength 80 daN (approx.), elasticity 100 %. Break-proof, plastic-coated hook.

Length: 60 cm	**610/680**	**2.90**
Length: 80 cm	**610/681**	**3.00**
Length: 100 cm	**610/682**	**3.65**

26.95

Lashing Strap Auto Cargo Belt
Lashing strap with automatic roll mechanism. As easy to use as a seat belt. For securing loads in road traffic for moderate use.

Advantages:
- No flapping straps
- Easy handling due to the automated strap winding system
- Quick attachment due to open hooks

Features:
- One piece
- Manufactured according to DIN EN 12195-2
- Tensile force: SWL 250 daN
- Dim. (L x W): 300 x 2.5 cm

S4 framed windows	245
S4 sliding windows	245
Hinged windows	245 – 246

What you always wanted to know about skylights

ABS – A robust, thermally stable plastic that is easy to shape during processing.
Opening angle – This refers to the maximum angle at which the skylight can be opened.
Installation thickness– Only if the roof thickness of the vehicle and the frame height of the skylight match, can it be installed properly.
Gauze – A light, semi-transparent fabric. Used as a fly screen.

Pleated roller blind – In this case, this refers to a roller blind in which folds are permanently ironed into the fabric in close succession.
Polystyrene – Thermoplastic material, also known as Styropor® or Styrodur® when foamed.
Forced ventilation – Permanent exchange of air, especially while driving, to prevent the accumulation of exhaust gases inside the vehicle. Often accompanied by airborne noise.

roofSTAR

BRUNER OUTDOOR IN MOTION

from 169.90

The ultra-light roofSTAR skylights have been specially developed to meet the highest demands. They combine a completely new, innovative design with reduced weight. The extremely flat design also significantly improves aerodynamics, wind resistance and noise development while driving.

- **Extremely flat:** The external height has been reduced by 50 % to just 72 mm.
- **Extremely light:** The weight of the roofSTAR 7 in particular has been reduced by up to 2 kg.
- **Unique:** With the roofSTAR 4, a motorised version is available for the 400 x 400 mm version for the first time.
- **Clever:** On both models, the motorised version is operated via a switch that is integrated directly into the frame and is therefore very easy to reach.
- **Lighting:** For both roofSTAR 4 and roofSTAR 7 models, there is optional high-quality LED lighting.
- **Particularly robust:** Both versions are made of proven, UV-resistant ASA and PMMA material.
- **Thought through:** An additional, permanently acting fly screen is integrated in the motorised version!
- **Effective blackout:** Both roofSTAR models have an integrated roller blind system that effectively keeps out the light and is easy to use.
- **Easy to install:** Generously dimensioned sealing channel to accommodate the sealant and thus prevent water from entering. Incl. 8 fastening hooks for installation with a roof thickness of 25 – 32 mm.
- **Flexible:** The roofSTAR 4 and roofSTAR 7 can be easily retrofitted.
- **Perfect for everyday life:** The inner frame of the roofSTAR skylights can be easily removed and reattached for quick cleaning.
- **Water management:** With effective water drainage system to prevent gushing water from entering the vehicle.
- **Spoiler effect:** The rubber sealing lip on the side of the hinge effectively minimises noise.

Information

The standard versions of all roofSTAR skylights are designed for a roof thickness of 25 – 32 mm. For roof thicknesses of 33 – 45 mm, an additional mounting kit is required for both roofSTAR 4 and roofSTAR 7.

Roof Ventilator MaxxFan

Can be used either for aeration and ventilation with the outer hood open or as a roof ventilator with the outer hood closed. The 10-step fan provides up to 26 m³ of air exchange per minute. The temperature required in the motorhome can be set by the built-in electronic thermostat. The removable and washable inner mosquito net protects against insects. Both models can also be used while driving.

299.00

1 | MaxxFan Plus

With manually operated hood, colour white.
Technical data:
Installation dimension 40 x 40 cm, external dimensions L 37.5 x W 38.3 x H 9.9 / 31.2 cm (opened), weight 4.6 kg; suitable for roof thicknesses of 40 - 80 mm. **89 318** **299.00**

2 | MaxxFan Deluxe

With electrically operated hood, which can also be operated manually in case of power failure. The patented shock-proof and UV-resistant outer hood protects against rain when the hood is open – even while driving. Also equipped with a remote control and an electrical control panel on the unit.

Technical data:
Energy consumption 0.2 – 0.3 A, installation dimensions 40 x 40 cm, inner frame 46 x 46 cm, overall dimensions L 58.5 x W 41.7 x H 12.7 / 23.7 (opened), weight 6 kg; suitable for roof thicknesses from 25 – 80 mm.

Roof Ventilator Fan Tastic Vent

With 3-stage high-performance motor and removable mosquito screen. Clear fan blades maximise incidence of light. Exterior proportions 47.1 x 47.1 cm, suitable for skylights of 40 x 40 cm and roof thickness of 27 – 65 mm. Bodywork 12.5 cm, weight 5 kg. Material: corpus made of ABS, hood of polycarbonate/ Makrolon.

Performance:
- Stage 1: 13.5 m³/min, power consumption 23 W
- Stage 2: 18.5 m³/min, power consumption 28 W
- Stage 3: 26.5 m³/min, power consumption 36 W

Fan Tastic Vent 2250

With thermostat control, ventilator turns on or off if the preset temperature is reached.
87 171 **359.00**

Fan Tastic Vent 3350

Additionally with rain sensor, which ensures that the hood closes automatically if rain starts falling during ventilation. **87 175** **489.00**

Fan Tastic Vent 7350

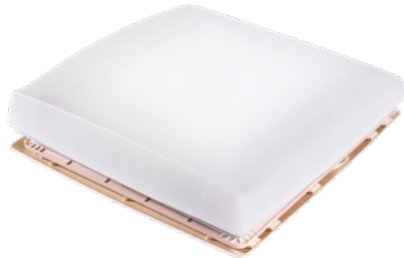

Technically identical data with model 3350, the huge advantage can be found in its comfortable handling: a remote (including handy wall mounting) is included in the scope of delivery with which the ventilation can be regulated and the opening height of the roof hood can be adjusted, additionally, the rotational speed can be adjusted infinitely. **87 178** **555.00**

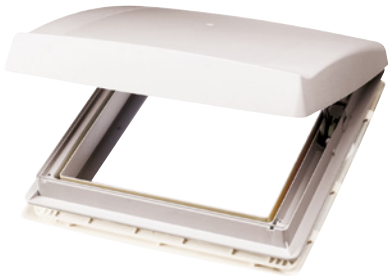

Thule Skylight

The exterior frame is made of dimensionally stable, weather-proof ASA plastic. Thus secure bonding and sealing during installation is possible. The operating knob is located on the side, keeping the opening clear across the entire surface. When closed, the Thule roof hood provides a continuous forced ventilation of 100 cm². Both, the housing as well as the vent, have been newly composed, special attention was paid to low energy consumption (0.15 – 2.5 A) and silent operation even at high velocities. Due to the aerodynamical form no additional spoiler is needed. Due to the embedded hinge with continuous rail and the long protruding exterior capsule, rainwater can drain optimally. Furthermore the mosquito blind (standard for all models without vent) as well as the blackout blind (standard for all models) have been newly designed. The blackout blind can be opened in 3 positions. The ventilation version provides 6 levels of aeration and deaeration, a power save function as well as a comfort mode. Circulation of air amounts to max. 20 m³ per minute. The ventilation kit can be retrofitted to all existing Thule roof hoods. Due to the perfect screw-clamping-system, the roof hood can be installed without additional drilling holes into the bodyshell, this provides the best protection against water ingress.

Technical data:
Installation dimensions 40 x 40 cm, interior frame 45.8 x 46.2 cm, exterior dimensions 45.9 x 47.2 cm. The closed roof hood is 7.8 cm in height. Thule roof hoods are suitable for roof thickness of 25 – 60 mm (from 40 mm roof thickness, the kit, item no. 89 342 is required). Materials: exterior frame made of ASA, interior frame made of polystyrene, blind frame made of ABS, hood made of polypropylene.

Roof Double Ventilation Titan TTC-SC21/V3

This quietly running 12 V double ventilator can be easily integrated into existing roof windows from 38 to 55 cm, such as Dometic Mini Heki or MPK, thanks to the mounting material included in delivery and the extendable mounting rails. Advantage: The roof window can be opened and closed without removing the fan. The two ventilators (ø 14 cm) with their strong reversible air flow (aeration and ventilation) ensure fast heat dissipation and regulated circulation. The air flow can be regulated in 6 different speeds via the remote control. Dimensions L 32 x W 15.6 x H 3.4 cm, weight 1.2 kg.

Skylight Midi Heki Style

700 x 500 mm

MADE IN GERMANY

from 615.00

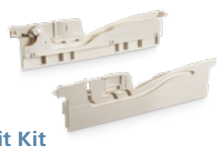

Let fresh air and light into your vehicle! This upgraded version of the Midi Heki Style skylight is characterised by improved safety devices, improved aerodynamics, a better look and less necessary maintenance. Proven benefits such as the blackout panel, the fly screen or the fact that it is easy to clean ensure a high level of comfort and convenience when travelling.

NEW

- Optimised aerodynamics – noise level is up to 20 % (3 dB) lower
- Thanks to the new shape, less dirt gets stuck between the roof and the dome.
- Hinge and lock are integrated into the frame and provide more safety and mechanical stability.
- Separately adjustable blackout blind and fly screen
- Well insulated dome with double acrylic glazing
- Bracket version: 3 catch positions, max. opening angle 45°
- Crank handle version: infinitely adjustable, max. opening angle 60°
- Roof thickness: 30 – 34 mm; 25 – 29 mm and 35 – 60 mm also possible
- Frame colour: RAL 9001 (pure white) or RAL 7016 (grey)

Cut-out nominal dimension: 700 x 500 mm
Weight: 8.1 kg

Hinged Window S7P

with aluminium frame

Infinitely adjustable hinged window for vehicles with a rounded design. Additional side windows in the rear are great for letting in natural light and creating a pleasant atmosphere, which is especially helpful when converting a van into a recreational vehicle. The elegantly designed window performs this task with flying colours while providing effective insulation and security.

MADE IN GERMANY

Roller Blind System Dometic DB1R

- Stylish design
- Pre-assembled – can be easily installed on most motorhome windows
- Blackout blind and fly screen can be adjusted separately
- Fly screen can be installed at the top or the bottom
- Maximum field of vision thanks to slim profiles
- No visible screws
- Roller blind and fly screen can be adjusted without tools

The DB1R roller blind system by Dometic harmonically fits into the interior of modern vehicles. Blackout blind and fly screen are infinitely adjustable. The fly screen can either be installed at the top or the bottom of the window.

DOMETIC OUTDOOR

Roller Blind System Dometic Roller Blind 3000

MADE IN GERMANY

- Roller blind with spring drive for effortless and even rolling-up
- Blackout blind and fly screen can be adjusted separately
- Is installed above the window and is therefore ideal for frameless windows
- Adjustable blackout blind can be locked in various positions
- Aluminium-coated roller blind offers excellent insulation
- Effective fly screen ensures that insects stay outside

Easy to operate, thermal insulation and insect protection – the roller blind 3000 is a convenient 3-in-1 solution for motorhomes and caravans. The aluminium-coated roller blind is installed directly above the window and is particularly suitable for frameless windows. The fly screen can be adjusted separately so that daylight can enter while insects stay outside.

UCS Pleated Blinds Resizable

High-quality, versatile blinds and fly protection for windows. Developed for caravans and motorhomes. The UCS pleated blinds feature the solid, stylish "Softline Design" and can be operated silently. The height of the gauze and the blackout blind is infinitely adjustable. Overall dimensions, minus 78 mm = cut-out dimension.

Excellent features of the UCS pleated blinds system:

- Incl. gauze and blackout blind
- Infinitely adjustable
- Frame profile with ventilation function (top and bottom)
- Separable and robust aluminium handle strips
- No visible screws
- Standard colour RAL 9001 cream
- Partly pre-assembled
- Can be shortened with handsaw
- Quick installation

You can shorten the UCS Pleated Blinds 2.0 to the next smaller standard size:

- Shorten the pleated blinds package and side profiles with a handsaw
- Put the end caps onto the handle strips
- Connect the side profiles to the package and screw them together
- Screw the unit onto the reveal in the corners

Manufacturing and operating instructions are included.

Blind REMIflair I

High quality dual cassette window blind for protruding windows, offers excellent isolation with externally applied aluminium coated foil. A shapely box houses, both the sun blind and the fly screen of the REMIflair dual blind system. The sun protection blind is freely adjustable. The guide rails can be individually shortened.

Basis of calculation:
Width: window section + 70 mm = overall dimension of frame
Height: window section + 105 mm = overall dimension of frame

Dimensions (W x H)	cream	grey	Price
75 x 70 cm	88 500	88 515	92.90

Blind REMIflair IV

The cream coloured dual pleated blind is suitable for rubber sealed windows. Good isolation is ensured by an externally white (interiour grey) coated sun protection pleating. Darkening blinds and insect screens are firmly connected with a handle bar and graduly adjustable. The guide rails can be individually shortened.

Basis of calculation:
Width: window section + 64 mm = overall dimension of frame
Height: window section + 100 mm = overall dimension of frame

REMIS

MADE IN GERMANY

Blind REMIsun

The blind for darkening and protection against sunlight is made of opaque PVC material and unsusceptible to moisture. Thus the blind protects against glares, giving absolute privacy. In the summertime, the sun blind protects against heat rays. Even in winter months, these blinds have a high insulation value and decrease the heating load.

Smart caravaning for caravans and motorhomes with the E-Trailer app!

With the E-Trailer app and the specially developed sensors for retrofitting to any recreational vehicle, owners of caravans and motorhomes can always keep an eye on the condition of their holiday homes with their smartphone.
The E-Trailer solution consists of three elements: a central base station, the sensor modules for the respective tasks and the E-Trailer app on the smartphone. Only the base station needs to be connected to the 12 V power circuit of the caravan or motorhome. All other modules communicate wirelessly with the E-Connect base station.
To use the E-Track&Trace function and future sensor modules with internet-based remote access, an internet subscription is required, which can be taken out directly in the E-Trailer app at a price of 99.95 euros per year.

Use the app to keep an eye on everything. Download it now!

Additional packages

Special packages in caravan, motorhome and comfort versions can be found online.

Caravan	**115/423**	**449.95**
Motorhome	**115/424**	**269.95**
Comfort	**115/425**	**259.95**

base station (always required) **219.95**

E-Level E-Volt

E-Trailer Starter Pack Basic

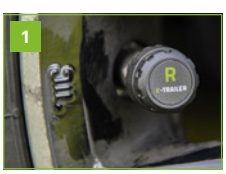

The **E-Trailer Starter Pack Basic** works with Bluetooth transmission in the close range around the recreational vehicle. It consists of the base station, which is to be installed in the vehicle, the **E-Volt** (battery voltage) and **E-Level** (spirit level) modules as well as the **E-Trailer app**. In addition, the starter pack opens up the possibility of adding numerous other E-Trailer modules with Bluetooth connection. You can decide for yourself which Bluetooth sensor modules you want to retrofit. **115/420 219.95**

base station (always required) **349.95**

E-Level E-Volt Track& Trace

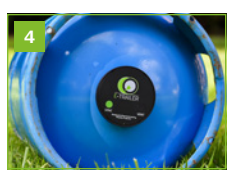

E-Trailer Starter Pack Plus NEW

The **E-Trailer Starter Pack Plus** works with Bluetooth and Internet transmission and thus allows for the remote retrieval of information. The E-Trailer Starter Pack Plus consists of the base station, which is to be installed in the vehicle, the modules **E-Volt** (battery voltage), **E-Level** (spirit level) and **E-Track&Trace** (GPS tracking) as well as the **E-Trailer app**. In addition, further E-Trailer modules with Bluetooth and Internet connection can be added. **115/426 349.95**

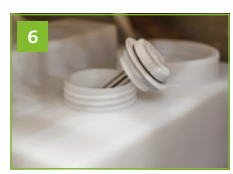

1 | E-Pressure

For checking the tyre pressure.
115/413 109.95

2 | E-Switch

Checks whether all doors, windows and skylights are closed.
115/414 69.95

3 | E-Load

Jockey wheel especially for caravans. For determining the bearing load.
115/415 269.95

4 | E-Gaslevel

For determining the gas fill level of gas cylinders.
115/421 109.95

5 | E-Temperature

Temperature and humidity indicator for indoor + outdoor use.
115/419 49.95

6 | E-Waterlevel

For determining the water level.

Manoeuvring Aid Truma Mover smart

Easy installation, simple operation, precise driving quality.

- **Universal:** fits all standard frames
- **Controlled:** smooth starting, precise stopping
- **Intuitive:** easy manoeuvring with the handy remote control
- **Powerful:** masters inclines of 13 %

The Mover smart is the mid-range model among manoeuvring aids. It excels with its convincing price-performance ratio – with proven Truma quality.

Mover smart M and Truma Mover smart A.
M for manual, **A** for automatic: that explains the main difference between the two manoeuvring systems.

With the Mover smart M, you swivel the Mover in and out manually using a lever movement. With the Mover smart A, you can do this conveniently at the touch of a button.
The Mover smart A4: you can now also swivel double-axle caravans in and out easily at the touch of a button on the remote control! The new revised Mover smart M now has even more power in manoeuvring mode.

More power!

1,499.00

NEW

Mover smart M

More power: manoeuvring up to 2000 kg
Simple: Manually swivel with a lever movement from one side – no cranking required
For single-axle caravans with a total weight of up to 2000 kg.

Technical data:
- Maximum gradeability (at maximum weight): 13 %
- Power supply: 12 V
- Maximum current consumption: 125 A
- Average current consumption: 35 A
- Max. speed: 0.15 m/s = 9 m/min

Scope of delivery:
2 Mover smart M drive units (left, right), remote control, Mover control unit, connection cable, mounting parts, swivelling lever

Nominal voltage: 12 V
Nominal current: 35 A
Permissible weight: 2000 kg
Weight: 33 kg **115/308** **1,499.00**

swivel automatically

3,899.00

NEW

Mover smart A4

Superior: Manoeuvre tandem-axle caravans up to 2800 kg with ease and swivel automatically at the touch of a button.
For double-axle caravans with a total weight of up to 2800 kg.

Technical data:
- Maximum gradeability (at maximum weight): 10 %
- Power supply: 12 V
- Maximum current consumption: 150 A
- Average current consumption: 60 A
- Max. speed: 0.15 m/s = 9 m/min

Scope of delivery:
4 Mover smart A drive units (left, right, front, rear), remote control, Mover control unit, connection cable, mounting parts

Nominal voltage: 12 V
Nominal current: 60 A
Permissible weight: 2800 kg
Weight: 64 kg **115/307** **3,899.00**

Smart, universal and intuitive!

1,989.95

Mover smart A

Convenient: automatically pivot at the touch of a button.
For single-axle caravans with a total weight of up to 2000 kg.

Technical data:
- Maximum gradeability (at maximum weight): 13 %
- Power supply: 12 V
- Maximum current consumption: 125 A
- Average current consumption: 35 A
- Max. speed: 0.15 m/s = 9 m/min

Scope of delivery:
2 Mover smart A drive units (left, right), remote control, Mover control unit, connection cable, mounting parts

Nominal voltage: 12 V
Nominal current: 35 A
Permissible weight: 2000 kg
Weight: 32 kg **115/306** **1,989.95**

Manoeuvring Aid Truma Mover XT

from 2,779.00

Extremely superior: With the Mover XT, caravans can be manoeuvred masterfully, safely and precisely – even around corners and bends. Even in narrow parking spots in confined spaces, parking is effortless. Depending on the model, the powerful engines master inclines of up to 13 per cent.

- **Light:** saves up to 20 kg in weight
- **Precise:** runs 100 % straight like on rails
- **Accurate:** couple it to the towing vehicle with millimetre precision. Parking in confined spaces.
- **Powerful:** accelerate smoothly thanks to the Truma Dynamic Move Technology.

You can find the exclusive product range at your authorised Truma retailer.

MADE IN GERMANY

Permissible weight: 3100 kg
Weight: 60 kg **115/303** **4,799.00**

Truma Mover PowerSets

The perfect accessories for your Truma Mover – save up to 20 kg of system weight!

Charger BC 10: Small, light and flexible at an attractive price!

Compact dimensions, 800 g light and easy to remove: The Truma charger BC 10 with 10 A power performance offers the perfect solution for all purposes. You can choose between three battery types (wet/gel, AGM or Optima). The corresponding charging curve is set automatically according to your choice.

A charging curve specifically developed for Optima batteries ensures perfect charging and maximum availability of your battery. Simply select "Optima" – and you have an ideally matched system.

The Truma Charger can be removed easily due to a "plug and play" connection, for example in order to recharge your battery in the winter. Furthermore, the BC 10 is completely dust-tight and splash-proof. Together with the light, compact Optima batteries, Truma offers convincing PowerSets that stand out due to their weight, price and performance.

Safer manoeuvring with easydriver flashlight.

207.50

Upgrade now!

Hazard Lights easydriver flashlight

With the hazard lights easydriver flashlight, your caravan is illuminated. While shunting in the dark, e.g. on the street in front of your garage or house entrance, a caravan without lights is hard to see. Easydriver flashlight draws attention to the caravan for other road users via hazard lights and outline markers.

- Safer manoeuvring due to greater visibility in the dark
- Hazard lights and outline markers (can be switched on/off individually or at the same time)
- Power supply via the manoeuvring aid battery or an own energy source
- Easy to retrofit
- Also suitable for manoeuvring aids with safety outlet

Scope of delivery: easydriver flashlight electronics box with two switches, cable harness, 13-pin socket, mounting material, mounting instructions **115/217** **207.50**

anti-theft protected

Tyre Pressure Monitoring System easydriver Safetyre

The sensors of this theft-proof monitoring system working for a tyre pressure of up to 6.3 bar are simply put on the valve instead of the usual caps. The measured values are transferred via Bluetooth to the free easydriver app. If need be, 2 or 3 sensor sets can be used simultaneously. Set content: 2 sensors. Operating temperature -20 °C - +85 °C. Weight: approx. 9.5 g per sensor. **86 023** **139.00**

JETZT BEI Google Play

App Control

To be able to conveniently control the easydriver manoeuvring aids via app, you need the so-called App Controller (Bluetooth receiver). This comes as standard with the easydriver infinity. Other models must be additionally equipped with it. For easydriver models up to 2015, a software update is also necessary.
Connect this module to your easydriver pro, active or basic and manoeuvre your caravan comfortably with your smartphone. Your control commands are transmitted to your manoeuvring aid via Bluetooth. The easydriver app is available free of charge for iOS and Android and offers many more advantages. **115/146** **129.00**

Manoeuvring System Ranger

AL-KO quality and design at a good price

The strong starter model for single-axle caravans with up to 1.8 t and tandem caravans with up to 2.5 t. Precise manoeuvring without any outside help. Even on uneven grounds.

Your advantages

- AL-KO quality and design
- Levelling capacity of up to 18 % (long inclines)/more than 18 % (short inclines, e.g. levelling ramps)
- Perfect and tested AL-KO chassis connection of the European market leader for chassis
- Softstart and Softstop
- Ergonomic remote control with lanyard
- Suitable for single- and tandem-axle vehicles
- Protected mechanism
- 5 years warranty

Nominal current: 20 A

The extra kit for height compensation is suitable for a frame height smaller than 193 mm and larger than 147 mm. It consists of 2 spacer plates (15 mm each) and an attachment kit. A maximum of 3 can be combined. Weight: 920 g **115/228** **44.95**

Manoeuvring Aid AL-KO Mammut Single-Axle

360° rotation | Soft start Soft stop | Obstacles up to 4 cm | Inclines up to 28 % (single-axle) | Stepless control

The clever manoeuvring system

Perfect precision with maximum chassis clearance.
The tried and tested mammoth-strong manoeuvring system by the world's leading chassis specialist for caravans. Includes remote control with a joystick for perfect and precise one-hand operation.

Your advantages
- Turning on the spot up to 360°
- Maximum gradeability up to 28 % (max. gradeability (total weight): 15 % (2.0 t), 17 % (1.8 t), 28 % (1.2 t))
- Fully automatic adjustment of the tyres
- Ergonomic remote control with joystick
- Infinite speed regulation and change of direction
- Soft start and stop
- Maximum chassis clearance
- Robust aluminium casing (splash-proof IP65)
- Double bearing and sandblasted rollers
- 5 years warranty

AL-KO QUALITY FOR LIFE

MADE IN GERMANY

from 3,289.95

5 Jahre Garantie / years warranty

BESTE MARKEN 2018 1. PLATZ

KÖNIG KUNDE AWARD 2018 1. PLATZ

Your advantage
- Maximum chassis clearance
- Maximum weight reduction
- Maximum price advantage
- Minimum mounting efforts

AL-KO chassis with "M" embossing at the longitudinal frame (EA from model year 2010, TA from model year 2015) are equipped as standard with mounting holes for the MAMMUT system.

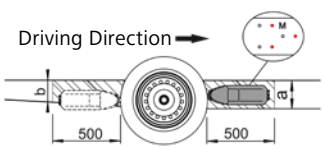

The housing of the Mammut is splash-proof and guarantees safe operation even in humid environments (IP65).

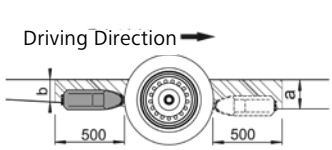

With the joystick control, you can infinitely steer, accelerate and brake with one hand.

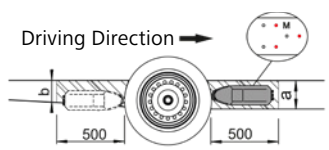

Powerful, robust, compact: powerful electric motors in every unit drive the wheels of the caravan.

GO2, the small manoeuvring aid with the charm of a big one.

MADE IN GERMANY

Manoeuvring Aid GO2

The proven GO2 manoeuvring aid has been further developed and optimised. The remote control fits perfectly in your hand and can be operated intuitively. The improved driving programmes allow manoeuvring that is accurate to the millitmetre and precise coupling. You can swivel the GO2 in and out easily and quickly with a lever movement from one side. In addition, the proven quick-fastening system facilitates assembly.

More? **Online!**

1,348.95

Advantages
- **Light and compact:** at 33 kg a real lightweight
- **Convenient:** optimum operating comfort thanks to ergonomic and intuitive remote control
- **Proven direct drive:** with soft-start technology, jerk-free starting, precise stopping and manoeuvring that is accurate to the millimetre
- **Easy to assemble:** the tried-and-tested quick-fastening system guarantees easy assembly.

Scope of delivery
Remote control, control unit, drive units incl. pre-assembled fastening set, connecting tube, cross actuation device and swivelling lever.

Swivelling in and out
The GO2 manoeuvring aid can be easily and conveniently swivelled in and out from one side using the swivel lever. Thanks to the sophisticated mechanism, this is possible without much effort.

Installation
The GO2 manoeuvring aid is mounted on all common frames with L or U profiles using the fastening set included in the scope of delivery. Further accessories are not required in most cases. Extensive mounting accessories are available for all other chassis (e.g. for AL-KO, BPW, Knott and Eriba Touring chassis).

Remote control
The remote control fits comfortably in your hand and can be operated intuitively. Driving straight ahead, around bends or turning on the spot is effortless. In addition, directional corrections are made possible without stopping while driving straight ahead. The symbol of a caravan facilitates manoeuvring.

Batteries must be disposed of properly!

Please refer to the standard procedure for returning used batteries: According to the German Batteries Act, which governs the return and disposal of used batteries,
- accumulators and batteries must never be disposed of in normal residual waste.
- batteries containing harmful substances must be returned to a distributor or to collection points set up for this purpose by the public waste management authorities.

18.50

Tyre Wrench

The long lever achieves a high power transmission, which allows you to easily loosen wheel bolts. Convertible bits 17 + 19 mm. Can also be used with other bits. Material: chromium vanadium. TÜV/GS. Extendable: 38 – 51 cm

Aluminium Wheel Rim for Fiat Ducato

In comparison to vehicle alloy wheels, Goldschmitt wheels provide a significantly higher carrying capacity and have been designed for the Fiat Ducato built since 07/2006. Moreover, they provide a distinctive design and improve the exterior look of your motorhome significantly. They are available in 4 different designs. Increasing the permitted load is possible with these rims, depending on the model. They are suitable for winter operation. Please follow the care instructions!

Goldschmitt Air Suspension Systems

Double bellows system including 12 V compressor for installation on the rear axxis of the vehicle. This product from Goldschmitt sets standards in terms of driving comfort and operational safety. This air suspension system is designed as a so-called "low-pressure system". This means that the effect of the air spring is not achieved by a high operating pressure in small-volume bellows, but by a low pressure in the largest possible bellows. With the standard cab control panel, the air suspension system can be conveniently regulated at the touch of a button: This lifts the rear of the vehicle gently and torsion-free. For the systems built since 2006/07, the compressor mount is included in delivery.

– Air suspension systems for other vehicles upon request! –

For Fiat Ducato

Dual circulation system. Delivery includes a universal or special control unit for the driver's cab.

For Fiat Ducato Including Soft-Touch Control Panel

The high-quality air suspension system with soft-touch control panel is now available for the Fiat Ducato built since 07/2006. Its control panel features a homogeneous surface with elevated pressure points, ensuring supported by the LED manometer illumination a more comfortable and secure operation. In this set, the compressor mount as well as the wiring harness and the air duct are pre-mounted.

* not for vehicles with wide track chassis

Air Suspension System Airlift Maxi

The additional air suspension system increases driving comfort and safety. The easy installation of the compressor-controlled AirLift Maxi to the rear axis is done while keeping the existing leaf springs. Handling and ride height can be influenced easily from the driver's seat. Some versions include a load bearing certificate in delivery.

Technical data:
TÜV component report, Firestone double folding bellows, 12 V compressor, splash-water-proof, exclusively dual-circuit systems with driver's cab control panels.

Information

Reinforced coil spring for the front axis of the Fiat Ducato,Citroën Jumper and Peugeot Boxer built since 2006/07. For front axis load starting at 1,850 kg.

Air Suspension System Airlift

The additional air suspension system for the rear axis of older motorhomes with leaf springs and single tyres is delivered as a inexpensive 1-circuit system without compressor. Thanks to the long tradition of the AirLift systems, it is also possible to equip a camper with a historic number plate with an additional air suspension. Delivery comes as a complete installation package, which needs little effort to build in.

Technical data:
Contitech roll-bellows, upper part galvanically zinc-plated, bottom part hot-dip galvanized, max. operation pressure 6 bar, air bellows, manometer, filler valve.

Information

An adapter set is required for installation!

Adapter Set

For an easy installation of the Linnepe AutoLift onto the Fiat Ducato built since 2006/07 with or without frame extension or with AL-KO chassis, adapter sets are required. For the 4-jack systems, 4-piece sets are required, for the 2-jack system, 2-piece sets. For the new Fiat Ducato, it has to be distinguished between vehicles with or without AdBlue technology. Please note: the jack systems are not suitable for van installation.

Thanks to a door contact switch, the step extends and retracts automatically when the door is closed or opened, and retracts as well, when the vehicle is started. **89 387** **289.00**

Step

from 459.00

MADE IN GERMANY

The steps are suitable for the original driver's cabs of Fiat Ducatos built since 2006, Mercedes Sprinters built since 2006 and VW Crafters built between 2006 and 2016 as well as of vehicles with identical construction. Aluminium profile with screwed synthetic safety cover at the edges and anti-slip profile. The steps are screwed safely to and under the vehicle's crossbeam via the vehicle-specific brackets included in delivery.

incl. fastening material

The problem: Due to their construction, the Fiat Ducato's, Sprinter's and Crafter's first steps are situated inside the driver's cab at a height of 46 – 51 cm above ground. To surmount this height difference, drivers often misuse their steering wheel to climb into the vehicle. This is not possible for the passenger, as no such aid is within their reach. Due to the height difference of 46 – 51 cm, climbing into the vehicle is uncomfortable and tiring.

The solution: With these steps, the height difference is cut down to approx. 23 cm. The steps are adaptable and vertically adjustable to the existing vehicle construction. This is done via entirely vertical profiles at the bottom of every step. Thus, the set of steps can be adjusted specifically to the different vehicle bodies. **Consists of:** 2 anodised aluminium steps (driver's and passenger's side); 2 sets of stainless steel brackets; fastening material; manual illustrated in colour; drilling template; Vehicle Type Approval; maximum bearing load per step: 140 kg. Dim. (W x H x D): 79 x 8 x 13 cm; Weight: 7.1 kg

MADE IN GERMANY

EMUK

Compensating Cushion EMUK Air-Lift®

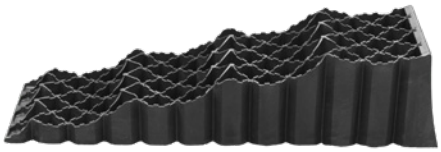

The EMUK Air-Lift® is a highly resilient compressed air lifting cushion developed particularly for camping vehicles. All height differences between 1.5 and 20 cm can be compensated infinitely. The EMUK Air-Lift® can bear a load of up to 11 t. It is very easy to use. The cushion is simply placed beneath the wheel you want to lift and levelled with a hand/foot pump or a 12 V mini compressor. The particularly thick rubber skin gives the air cushion sufficient protection against external impact from stones, rubble or shards. The ribbed profile makes sure that the wheels you want to lift do not slip. On request also available for twin tyres.

Technical data:
- Load capacity 11 t at 6 bar
- Height (inflated) 1.5 – 20 cm
- Inflating & deflating one car valve
- Applicable in temperatures from -20 °C to +60 °C

Levelling Ramp Level Pro + Anti-Slip Plate + Chock

from 11.60

Neatly stored!

Chock

Optional chock for levelling ramps (Level Up, Level Pro, Magnum). For blocking the vehicle during longer stays.
Content: 2 pieces
Dim. (W x H x D): 141 x 84 x 140 mm
Weight: 130 g **136/134** **10.90**

Support Plate Set

Reinforced base plates prevent the crank supports from sinking in. ø: 20 cm.
Content: 4 pieces
Weight: 800 g **136/005** **21.30**

Level Bag S

The perfect carry bag for storing your levelling ramps Level Pro, Level System Magnum and Wheel Saver in the vehicle. Incl. carrying strap.
Dim. (W x H x D): 22 x 15 x 57 cm; Weight: 233 g
136/322 **11.60**

Level Bag

The perfect carry bag for storing your levelling ramps Level Up or Level Up Jumbo in the vehicle. With handy carrying strap.
Dim. (W x H x D): 24.5 x 18.5 x 65 cm;
Weight: 298 g **136/321** **11.70**

Information

IMPORTANT!
Only use in connection with swivel supports!
Never use as a repair axle stand!

Why use axle stands?
1) For permanent campers, to take the load off the wheels.
2) For winterisation
3) On sloping campsites
4) To stabilise your motorhome

Accessories

Axle Stand Set Jumbo

Reinforced aluminium casting – no sharp edges! The axle stands are made of high-quality aluminium (rust-free), while the spindle is made of corrosion-resistant, galvanised steel. The handles are firmly anchored to the spindle in order to prevent loss.
Only for stabilising – not for lifting!
• Aluminium casting alloy
• Stackable
• Height: 28 – 43 cm
• Max. load: 2700 kg
Dim. (W x H x D): 155 x 220 x 155 mm; Weight: 3.3 kg;

AL-KO big foot™ Support Base

Prevents the supports from sinking in or slipping off.

Secure stand
With its large footprint of 200 x 180 mm with transverse ribs, AL-KO big foot™ prevents the supports from slipping off or sinking in. It ensures that your caravan stands securely. Max. load of the support leg: 1250 kg.

Compact design
Interlocking attachment via springs of the AL-KO big foot™ to the support when driving.

AL-KO QUALITY FOR LIFE
MADE IN GERMANY

149.95

Functionality
When in contact with the ground, slots guide the support so that it slides directly onto the AL-KO big foot™, i.e. the support does not have to push the AL-KO big foot™.

Installation
Big foot™ can be attached to all AL-KO Stabilform and Premium plug-in supports. From model year 2001, the corresponding mounting holes are already included on the Stabilform supports. Up to model year 2000, the mounting holes have to be drilled in accordance with the operating instructions.

Retrofittable for caravans with AL-KO chassis and Stabilform support.

Scope of delivery
Four AL-KO big foot™ incl. mounting material and instructions.

136/006 **149.95**

MADE IN GERMANY

Adapter 45 mm for AL-KO big foot™

Secure stand even in deep hollows
Installation: The adapter allows AL-KO big foot™ to be closer to the ground by about 45 mm. Please ensure that enough ground clearance is available.
Scope of delivery: 4 adapters 45 mm, 4 fixing kits for steadies, instructions. Weight: 2.5 kg

136/008 **119.95**

Electronic Support System UP4

AL-KO QUALITY FOR LIFE

One step ahead!

MADE IN GERMANY

1,637.95

Can be extended and retracted quickly and effortlessly!

UP4 – developed for camping today
UP4, the electronic support system for caravans with up to 2.5 t. With UP4 by AL-KO, you use a remote control to extend and adjust the supports of your caravan. Quickly, safely and conveniently. UP4 can be retrofitted to your AL-KO chassis. It upgrades your holiday because you spare your back and nerves, and you start relaxing upon arriving at the campsite. Your neighbours will envy you!

Faster
No matter how fast you can crank: the electronic support system UP4 is faster. And more relaxed.

More convenient
Extend and adjust the props simply by using the remote. Good for your spinal discs and nerves.

More stable
With the UP4, you can switch off bumps electronically and the BIG FOOT is already included. For a secure stand and more stability on every terrain.

More intelligent
Combine the UP4 prop system with the AL-KO RANGER: you can park and manoeuvre elegantly using only one remote.

Scope of delivery:
Four premium supports including motor, BIG FOOT, ground rail, 4 bearing bushes, adapter to secure against theft and unauthorised, manual switching back, remote with lanyard and mounting, control unit, battery disconnector with key, mounting material including cable protection conduit

Nominal voltage: 12 V; Permissible weight: 2500 kg; Weight: 34 kg **120/030** **1,637.95**

AL-KO
QUALITY FOR LIFE

AL-KO Corner Steadies

Stable
You can also rely on AL-KO at your destination: Numerous components ensure that you can park your caravan comfortably and securely.

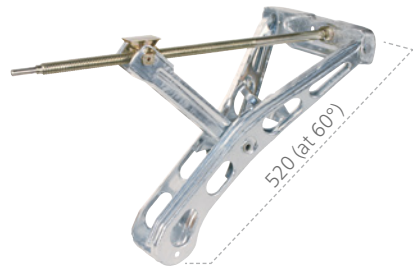

Easy to install
Mounting brackets provided on the chassis allow quick and easy assembly. One side is plugged in, the other side is fastened to the caravan floor with two screws.

Sturdy
Caravans can achieve up to 20 % more stability with AL-KO corner steadies. The steadies are particularly stable due to their pressed profiles, angled side struts and strong, rolled trapezoidal thread spindles.

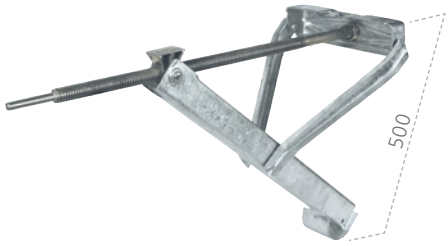

High-quality corrosion protection
Hot-dip galvanising in high layer thicknesses of up to 70 µm makes the corner steadies almost indestructible.

AL-KO Spare Wheel Holder

Retrofittable to AL-KO chassis built since 1985.

The weight-optimised spare wheel holder places the spare wheel under the caravan. This creates more storage space in the drawbar box. The mounting under the caravan directly behind the axle lowers the centre of gravity and improves driving behaviour.

- Space-saving storage of the spare wheel
- Low weight
- Ideal installation: directly behind the axle
- Reduces the centre of gravity and improves driving behaviour
- Can be retrofitted to caravans with AL-KO chassis from 1985 onwards
- No TÜV approval required

The size corresponds to the frame distance in mm.

MADE IN GERMANY

AL-KO Comfort Kit for Supports

Installation

The floor area where the plastic profile section will be fitted must be clear of, for example, pipes and other components. Vehicles with outer mud flap require a drilling hole. Four plastic profile sections are sawn to length as required, and then, using wood screws, fastened to the floor of the vehicle to act as a guide for the crank handle.

No bending down

The AL-KO Comfort Kit allows you to operate your corner steadies from a standing position via a universal joint.

No kneeling

The universal joint locator, i.e. the plastic guide tube, can be seen from a standing position. You do not have to kneel down to find the hexagon socket locator or operate the corner steady with the crank.

Scope of delivery

- 2 plastic profiles, 400 mm long
- 2 plastic profiles, 200 mm long
- 1 universal joint, long
- 1 universal joint, short

CARAVANING Sehr gut

Caravan Weight Control CWC

With this scale, you can check the total weight of your vehicle on the spot. The advantages are obvious: You can prevent overloading your vehicle, which makes it both easier and safer to drive. Using it is very simple: Put the scale down in front of the first wheel. Then drive slowly over the scale and repeat this procedure with the second wheel. Now the scale indicates your total weight. To weigh the support wheel, you do not have to drive over the scale. You only need to put it on the scale. For cars, vans, motorhomes, caravans and trailers.

Technical data:

- Max. load per wheel:
  Type CWC – 1000 = 1000 kg
  Type CWC – 1500 = 1500 kg
- Deviation: < 3 %
- Temperature range: 0 – 50 °C

Batteries are not included in delivery (3 x AAA required).
Dim. (W x H x D): 70 x 360 x 45 mm;
Weight: 1.02 kg

Jockey Wheel with Bearing Load Indicator

The scale of the indicator was designed so that the value indicated corresponds approximately to the load on the ball coupling at the front. The user can read off the trailer load easily to ensure safety when driving with a caravan. The topic of bearing load has gained even more importance due to the 100 km/h speed control regulations. In addition, the spring-suspended wheel fork makes manoeuvring in an uncoupled state easier as the inner tube acts as a shock absorber. No TÜV registration required. Scale of 0 – 125 kg.

moog TRAILERPARTS

Safety Clamp with Eyelet

The safety clamp is attached to the towing vehicle's tow bar.

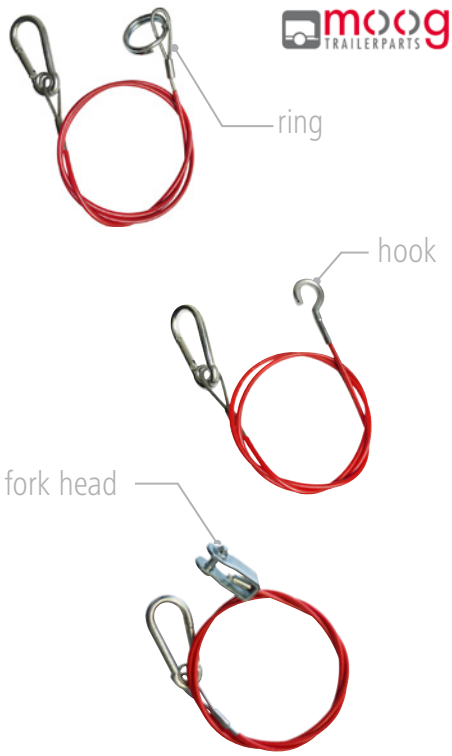

- Mounting for breakaway cables onto the neck tow bar
- The breakaway cable can be installed easily
- The breakaway cable cannot slip from the clamp on its own
- Compatible with trailers, motorhomes and recreational vehicles

If the necessary eyelet is missing, the device can simply be retrofitted with a safety clamp.

Attention: Obligatory in Switzerland and the Netherlands!

You cannot just lay the breakaway cable around the neck of the tow ball. **127/303** **12.50**

WINTERHOFF QUALITY TRAILER SYSTEMS

MADE IN GERMANY

Protective Cap – Ball Cap

The Ball Cap provides protection for the ball coupling and your shin. Dim. (W x H x D): 62 x 59 x 61 mm; Weight: 55 g **127/476** **6.75**

58.50

Securely attach the tow rope!

Manoeuvring and Rescue Aid

With the manoeuvring aid and a tow rope as a connection between the towing vehicle and the trailer, it is possible to place the towing vehicle on solid ground and thus recover the trailer. The manoeuvring aid is not approved for towing on public roads. Ball ø 50 mm. Material: steel, galvanised. Max. towing capacity: 1.0 t.

- Safe and quick attachment of the tow rope or tow bar to the drawbar of the trailer. The manoeuvring aid is simply snapped into the coupling of the trailer.
- The operating point of the hook is arranged in such a way that it is on one level with the centre of the ball. This prevents an unfavourable leverage effect on the coupling of the trailer.

Electronic Trailer Stabiliser LEAS

MADE IN GERMANY

The LEAS universal trailer stabiliser max offers safety for all makes and brands!

799.00

- Easy assembly
- For all chassis up to 3.5 t
- With radio information on the vehicle
- Power supply via 13-pin car plug
- Easy brake force adjustment when changing vehicles
- Chip-controlled electronics
- Always optimum braking force in just 0.06 seconds due to computer-controlled spring

136/160 799.00

For single- and tandem-axle vehicles!

Install it in 3 steps and you can safely drive off. No additional TÜV approval necessary!

Information

Trailers, including caravans, can start to swerve uncontrollably even at low speeds and without any warning. Situations like that can become critical very quickly and usually have dramatic consequences. They can be caused by overtaking vehicles, ruts, crosswinds or sudden evasive manoeuvres.
The LEAS Universal is the world's first road legal ESP (electronic stabilisation programme) for braked trailers. It was designed for retrofitting to trailers of any make or design, including all caravans. An optimal safety system for the user and a major contribution to road safety.

With the LEAS Universal max System, you get monitoring electronics on board, connected to a computer-controlled spring, which, by means of a set force, automatically builds up an optimum braking force and activates the caravan's brake until the electronics no longer receive any impulses. And it just takes 0.06 seconds. The car/trailer combination stretches and returns to a stable position. LEAS Universal is a robust and reliable system.
This spring technology always guarantees a constant braking force of approx. 15 % and is independent of voltage fluctuations in the general electric circuit of the car/trailer combination.

Seit 1965

Every operation (braking), including the detection run during commissioning, is acoustically signalled to the driver via radio so that they do not have to turn their gaze away from the road to receive the information.

ATC AL-KO Trailer Control

Simply better:

- Improved early detection of snaking risk
- Faster brake access
- Use up to GA of 3.5 t
- Optimised weight and design
- Horizontal installation (installation space and ground clearance)

Simply clever: Evasive manoeuvres or side winds can cause trailers to start swerving. AL-KO Trailer Control actively counteracts these forces. It detects the swerving motion directly at the axle and automatically brakes the trailer gently.

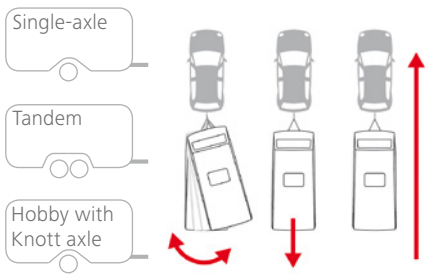

Keep safely in your lane:
The emergency system reacts automatically when the swaying of the car/trailer combination exceeds limit values.

- The driving behaviour of the trailer is permanently being monitored by the ATC.
- Sensors detect dangerous lateral movements directly on the trailer axle, even before an ESP system for trailers installed in the car is able to sense the pendulum movement.
- The trailer will immediately – without any action on the part of the driver – brake gently and return to a stable driving position.
- Braking automatically puts the trailer back on track, i.e. there is little risk of a rear-end collision due to sudden, sharp braking. Overtaking manoeuvres are not affected.

ETS Plus

Stay safely in your lane with the stabilisation system for your caravan.

Heading straight for your holiday with your caravan? No problem – if the ETS Plus is on board. If your caravan starts to swerve, the system provides stability and brings you safely back on track.

Your advantages:

- **Provides more stability.** The ETS Plus reacts quickly in dangerous situations with controlled braking and reliably prevents swerving.
- **Fits perfectly to your Hobby.** The ETS Plus is perfectly matched to your vehicle and installed quickly.
- **Lasts longer.** Thanks to high-quality and high-performance materials, you can enjoy your ETS Plus for a long time.

For further information, please visit: www.besser-knott.de

Safety Coupling WS 3000-D+Z

- The only one of its kind that reached the critical speed of 130 km/h in France without any side motion of the trailer. Had the best attenuation and the highest damping factor during swerving movements.
- Single-lever system for all functions:
  - Connecting – disconnecting
  - Stabilising – destabilising
  - Locking – unlocking
- Coupling is no problem even for vehicles with an externally mounted spare wheel and not a lot of space between bumper and ball coupling
- Maxi-Soft buffer protects legs and bumper
- Plenty of space between handle and drawbar
- All friction linings are exchangeable due to the Clip system
- Extremely slim design allows unrestricted ball neck clearance
- Easily readable wear indicator
- Low tare weight with 3 t towing capacity
- Bearing load up to 150 kg
- Drawbar ø 35, 40, 45, 46, 50 mm
- EG-approval no. 00-0065 e1
- No registration required!
- Retrofittable to all trailers with drawbar connections between ø 35 – 50 mm, cross or parallel fitting

Scope of delivery:
- WS 3000-D+Z
- Safety Ball
- Ball Cap

Coupling indicator for checking if the ball of the vehicle sits securely in the WS 3000 after coupling. More accurate wear indication for testing the condition of the friction elements and the ball of the vehicle, reinforced handle for maximum stability during use, optimal seat of the Maxi-Soft buffer by new mounting points on the top and bottom of the housing of the WS 3000.

Safety Coupling AKS 3004

Safety coupling with trailer stabiliser and stabilising device

462.95

Movements
Any swerving movements of the trailer are effectively suppressed.

Quiet journey
Smooth, relaxed driving with car/trailer combination increases safety.

Speed
The AKS™ ensures a higher theoretical top speed (mind the maximum permissible speed).

Emergencies
Quicker stabilisation of the car/trailer combination in an emergency.

Functionality
By using the stabilisation handle, two special friction pads are pressed against the tow ball of the car from the left and right. Vibration movements are effectively suppressed.

Operation
Coupling and stabilisation handle are separated and operated by hand. No additional protection needed. For easy manoeuvring of the trailer, open the stabilisation handle.

Approval of installation
The AKS™ does not have to be registered in the trailer papers.

Weather protection
Weatherproof, breathable, does not rot.

AKS stabilising handle
Detachable, e.g. for vehicles with spare wheel with missing clearance to support opening/closing with AKS 2004/3004 up to 2011.

Permissible weight: 3000 kg
Bearing load: 150 kg
Weight: 4.2 kg **136/410** **462.95**

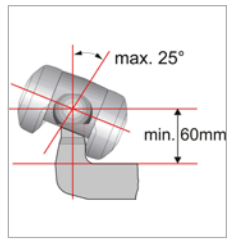

Visual control
1 Wear indicator for friction linings
2 If the green cylinder is visible, the AKS™ 3004 is attached correctly
3 Wear indicator for coupling

AKS 3004

Four friction linings for lane stability.

Safety Coupling AKS 3004 Safety Pack

AKS 3004 (permissible weight up to 3000 kg)
The safety coupling with stabilising device against the swinging and pitching movements of the trailer.

Safety Compact
Secures against unauthorised coupling and uncoupling of the trailer and against the theft of the AKS 3004 Comfort.

Safety-Ball
In combination with the Safety Compact, locks the ball bearing of the AKS 3004 Comfort in standby mode and thus prevents unauthorised coupling.

High-Performance Brake Premium Brake

The premium brake that adjusts automatically.

from 339.95 AL-KO QUALITY FOR LIFE

For wheel brakes (RB) with screwed standard brake plate from 1999 onwards.
RB 2051 = up to 1500 kg (single-axle), 2800 kg (tandem)
RB 2361 = up to 2000 kg (single-axle), 3500 kg (tandem)
The proven wheel brake with its far above-average braking values is supplemented by the automatic adjustment function. When reversing, the adjustment is automatically deactivated.

Shorter braking distance, more safety
Once the brake has too much room to play, the AAA automatically adjusts it. As the braking system is always optimally adjusted, you save valuable braking distance in a dangerous situation.

Shortens the braking distance up to 5 m!

Your advantage
- More driving safety thanks to an up to 5 m shorter braking distance
- More driving comfort through gentle braking without jerky acceleration
- Lower maintenance costs due to extended service intervals + no need for the first garage interval after 1000 km
- No additional TÜV inspection necessary after installation

	Item no.	Price

AL-KO QUALITY FOR LIFE

Can be retrofitted to caravans equipped with AL-KO chassis.

AL-KO Octagon Shock Absorbers

Octagon shock absorbers are precisely tuned for a clearly defined weight range and significantly improve the caravan's driving characteristics. Body vibrations and "bouncing" are thus significantly reduced. They are characterised by quality seals and special oil.
Installation: Rubber-mounted articulated connection eyes allow for a low-wear, tension-free installation position.
Please note: Shock absorbers should always be replaced in pairs. Please order two shock absorbers per axle.

Scope of delivery: 1 shock absorber with fixing screws and nuts

	Colour	Weight	Item no.	Price

Wheel Clamp Compact

The wheel clamp Compact is recognised by insurance companies and is suitable for all caravan and motorhome wheels with size 12" – 16" and for all tyre sizes 145 – 225. Suitable for steel and aluminium rims. The unique design offers an integrated closing mechanism with winch, which makes the clamp very secure. The back is equipped with a foam bolster to protect your aluminium rims. A storage bag is included. Simply turn the winch to attach the wheel clamp to the wheel and then press to close the lock.
Dim. (W x H x D): 29 x 51 x 5 cm; Weight: 3.9 kg

127/471 **150.90**

Wheel Clamp Wraith 2

The wheel clamp Wraith 2 offers uncompromising security for your motorhome. It locks with a special wheel bolt and encloses the tyre to prevent rotation. As a result, it provides a strong visual deterrent to theft and protects your vehicle from attacks. The high-security lock is made from high-quality steel, making it extremely resistant to drilling, sawing, hammering, freezing and all other common types of attack.

- Light and compact
- Easy to attach
- Fits steel and light alloy wheels
- Heavy-duty safety
- Insurance-approved
- 5-year guarantee on the lock
- Incl. foam backing to protect your alloy wheels
- Complete with 3 keys and a carry bag

Material: plastic, steel; Dim. (W x H x D): 37 x 12 x 35 cm; Weight: 4 kg

Ventilation Grille Airvent

A black, stable aluminium version for safe ventilation and rain protection at the same time thanks to the ventilation grid being oriented towards the ground. The Airvent is simply put into the opened window and fastened from the inside, after the window has been closed. Locking holes are pre-installed. Now, the Airvent can only be opened from the inside and thus acts as an additional anti-theft device.

Rain and Wind Deflector

The rain and wind deflectors by ClimAir are deliverd in pair for the front side windows and provide, thanks to them being made of high-quality cast, 3 mm thick acrylic glass, first-class quality and a multitude of advantages. With the deflectors, the side windows can remain opened, thus reducing heat accumulation inside the vehicle. Thanks to the optimised air circulation, a comfortable driving experience is offered, while disrupting wind noise is minimised. This leads to unrestricted driving comfort in every weather. The rain and wind deflectors by ClimAir are available in the colours black, smoke-grey and crystal-clear. In Switzerland, only the crystal-clear version is approved! Special orders for other vehicles as well as rear side and roof windows possible upon request!

EMUK Towing Mirror for Caravans

A vehicle-specific bracket made of vibration-damping cast aluminium makes a perfect fit with virtually no vibration possible.

MADE IN GERMANY

- Aerodynamic mirror head with large field of vision
- Quick installation without tools thanks to wing screws
- Adjustable from driver's and passenger seat
- Foam rubber layer on bracket protects against damage and scratches
- Dimensions: mirror head H 120 x W 180 mm. Total length approx. 400 mm
- All mirrors are also available with XL mirror head (special order!)
- Stylish, safe and reliable
- With 10 years EMUK manufacturer's warranty
- Very clear, vibration-free mirror image

from 128.95

Variants XL

Mirror size: 200 x 140 mm, convex wide angle: radius 450 mm.

- Particularly large field of vision and wide angle; reflector as standard
- Lateral connection of the bracket, thus longer extension

Towing Mirror Universal III Pro

The universal mirror is suitable for almost all vehicle wing mirrors with adjustable mirror glass. It is mounted with two screws – without any tools. The base body made of high-performance plastic is very sturdy. The stainless steel clamping screws are equipped with a knurled handle and run in brass nuts. To prevent it from slipping, the mirror is equipped with two swivelling clamps with a special rubber coating. The counter bearing is a 2 mm thick, spring stainless steel plate that is also coated with special rubber. The aerodynamic mirror head with curved safety mirror glass is adjustable. The bent aluminium tubes are powder-coated. Spare parts available. Content: 2 pieces

Towing Mirror Universal III Pro
Mirror W x H: 120 x 180 mm; Weight: 990 g
136/972 **101.75**

Towing Mirror Aero Platinum

The Aero Platinum mirror is an improved version of the Aero 4 mirror. The flexible, spring-loaded stainless steel gripper plate is larger than on conventional Aero 4 mirrors. This improves grip and ensures that the Aero Platinum can be easily adapted to the shape of the vehicle mirror frame. It is therefore suitable for mounting on all vehicles. The clamp and the diameter of the arm have also been enlarged.

Thermal Curtain for Rear Door

Custom-fit for the high H2 rear door of Fiat Ducato built since 2006/07, the insulating curtain made of a 3-layered sandwich construction (upper layer 100% polyester, bottom layer 100% polyurethane) increases the comfort within the vehicle thanks to an efficient thermal insulation. Even with the rear door being open, the outwardly pointing aluminised polyester foil does not soak up humidity. The rear door insulation is fixated along the top edge with two rows of snap fasteners. The curtain can be opened with 2 zips so that the storage space below the bed and also the gas cylinder box are comfortably accessible from the outside.

399.00 MADE IN GERMANY

HINDERMANN

Rear Door Insulation

Developed specifically for the high rear door dimensions of Fiat Ducato from 07/2006 on. Consisting of 2 parts with inner velour coating. Is attached via magnets to doors inside the vehicle. When the doors are closed, both parts overlap in the centre to create an efficient heat insulation in the sleeping area.

Colour	Item no.	Price
beige	**87 148**	**399.00**
light grey	**87 147**	**399.00**

Thermal Curtain

Separates the uninsulated driver's cab of the Fiat Ducato built since 2006/07 in full height from the living area and protects against intruding cold and loss of heat (upper material 100 % polyester, backside 100 % polyurethane). Towards the living space, the thermal curtain is coated with cosy polyester velour, outwards it shows a reflecting, aluminized polyester foil. It is mounted at the height of the sun visors and fastened on both sides with screw-on press studs (already integrated top parts). An integrated, lockable flap allows for a comfortable radio access.

Colour	Item no.	Price
beige	**87 114**	**289.00**
light grey	**87 117**	**289.00**

The angles are inserted between windscreen and A-pillars.

The flap on the top edge of the mat is hung over the sun visors.

with innovative front attachment

Internal Thermal Cover Premio

The 3-piece driver's cab insulation for Fiat Ducato built since 2006/07 provides an effective protection against cold and noise in a cosy design. The 8 mm strong foam insulation, which is equipped with a polyester velour towards the living space, creates a comfortable room atmosphere. The exterior material is coated with an aluminised polyester foil which reflects sun rays. This way, the Premio helps to effectively keep out cold in winter and heat in summer. The air cushion between windscreen and thermal cover provides additional heat insulation. The easy fastening is done with magnets. For lateral fastening, included angles are pulled behind the A-pillars and connected to the magnets which are sewn-on at the back. The flap attached to the cover's upper edge, is pulled over the sun blinds and wedged. The slightly larger-dimensioned side parts, are also fastened with shrink-wrapped magnets, the outer edges are welded in the door seals upon closing the doors. The lateral parts for vehicles with integrated interior darkening (MV) are pulled in between the frame construction of the darkening and the window. They close all around. A carrying bag is included in delivery.

OV = fits only without an installed interior darkening system
MV = fits with an installed interior darkening system

Thermal Cover Set

Three-piece thermal cover set for motorhomes for insulation, darkening and noise protection. Consists of a large cover for the windscreen as well as 2 smaller covers for the driver's and the passenger's side. The 6-layered material contains insulating layers made of polyester wool and Aircap bubble wrap. The inside is grey, the exterior is made of a reflective aluminium foil. With eyelets and suction cups, the individual covers are quickly and easily attached to the insides of the windows. Delivery includes a storage bag.

HINDERMANN

Thermal Velour Set

The thermal material as a DIY set for interior DIY projects. Made of three-layered, approx. 8 mm strong ISO sandwich material (upper material 100 % polyester, lower material 100 % polyurethane), which has proven itself for years in thermal curtain manufacturing. This way, for example window mats and thermal insulation below the sleeping area or covers can be done by yourself. The material can be cut to whatever size needed with scissors or a knife. Delivery includes 15 large suction cups with ø 40 mm each, 20 m light grey polyester bordering tape as well as a foil to create a stencil. Dimensions: approx. L 3.5 x W 1.48 m. **87 076** **179.00**

Thermal Foil Set

Thermal foil as an DIY set for the own expansion for the exterior and interior. Made of bubble wrap with double-sided aluminised polyester foil. The easy to manufacture thermal foil can be used as a cold and warmth protection as well as for sun reflection and is universally applicable for camping, car, boat and house and also suitable as a tent roof or tent ground insulation. This way, the intended insulation can be customised to fit the needs exactly. The included foil to create a size and form template helps to achieve this. Delivery includes 15 large suction cups ø 40 mm each, 20 m light-grey edging stripe made of polyester as well as a foil to take off a template. Dimensions approx. L 3.5 x W 1.48 m.

Driver's Cab Summer Cover Sun Breaker Light

Made of 100 % polyester, aluminised on one side, this cover provides ideal sun protection and a comfortable climate inside the driver' cab on hot summer days. Despite the outstanding insulation, the cover allows you to watch the outside without any restrictions. The cover is especially characterised by its low weight and of 320 g and its small pack size of 28 x 20 cm. As a result, it fits, for example comfortably into the side door.

Driver's Cab Insulating Cover Ice Breaker Two

External insulation mat for all standard motorhomes- the warmth is kept inside the vehicle, the cold outside. The cover can be rolled down at the A-pillar to the lower edge of the windscreen, thus even with installed mat one can look outside. Moreover, the mat is divided in two parts so that e.g. In the summer, only the top can be mounted. Featuring an attached ground skirt, the floor-long mat can be mounted optimally with its special tightening solution; divided in 2 parts, it can be handled easily. At the same time, it insulates the hood's ventilation slits, the doors, and the openings of the coupling rod. Thanks to its good cold-elastic quality, the mat clings to the vehicle and gives no chance to coldness. Due to its insulation from the outside, thermal bridges are avoided, thus hardly any condensation water forms on the window panes.

Vehicle model	Year of construction	Item no.	Price
Fiat Ducato Typ 290	2014/05 – …	**86 789**	**799.00**
Ford Transit 7. / 8. gen.	2014/05 – …	**86 793**	**799.00**

Rear Insulating Cover Heck Breaker

Custom-made for the Fiat Ducato van built since 2006/07. Two-piece insulating cover, suitable for winter use, which provides excellent insulation thanks to its special interior fabric (Tentsulation ®™), thus effectively protecting against wind and cold, but also against warmth. In winter, in particular, this creates a pleasant climate inside the can, as a lot of warmth is lost through the doors and there is draught quickly. The surface of the thermal cover is made of a robust tarp material, which is enormously tear-resistant and very easy to clean. Both parts are equipped with a detachable window insert.

Installation

Pockets are sewn into the cover's inside into both upper edges of the door parts which are hung over the door edges. At the lower edges, rubber bands are attached, which are also hung over the door edges providing a perfect fit. In the middle, both parts overlap and are fixated with Velcro and fleece straps. Moreover, eyelets are attached to the bottom edges of both cover parts left and right, with which the cover can be fixated with tensioning hooks below the vehicle.

Available in 2 Versions:

Without Cut-Out for Rear Carrier

For vehicles without an installed rear carrier. **86 806** **339.00**

With Cut-Out for Rear Carrier

Specifically designed for vehicles onto which a rear carrier of the types Thule Elite Van XT or Fiamma Carry-Bike 200 is installed.

86 807 **359.00**

Sun Protection Cover Screen

Innovative exterior cover screen, which not only provides perfect protection against the sun as well as prying eyes while viewing the outside perfectly, but which also integrates well into the vehicle's looks. The screen is hung into the door compartments at both vehicle doors and is tensioned towards the exterior mirrors or wheel housing. Rubber tensioners included in delivery.

External Insulation Mat Four Seasons

Insulation against cold in winter, protection against sunlight in summer. The mats are slipped clipped to the door edges (without screwing or drilling) and anchored with rubber straps (included). The door edges are flexible to better fit over installed darkening systems. Four Seasons are made of weather-proof thermal foil with double-sided, vaporized UV stabilised polyester foil. The front can be opened easily.

Thermal Window Cover Classic

Winterproof thermal window mat, perfectly covering the front and side windows while reducing your heating costs in winter and the temperature inside your vehicle by reduced sun radiation in summer thanks to its ca. 10 mm thick polyester insulation. The cover is characterised by its excellent insulating qualities as well as its low weight and that it can be rolled up or folded even in bitter cold. It is attached to the doors with pockets, providing a secure hold and a perfect fit. The front flap can be opened and with the optionally available "Screen" insert, the inside of your vehicle is protected against prying eyes. Rubber tensioners are included in delivery.

Front Protective Cover Supra for Integrated Motorhomes

Universally fitting front protective cover made of Tyvek, available in 2 sizes. The cover protects the vehicle against dirt, snow and ice build-up and is impregnated to repel water and dirt so that algae, moss and flower pollen find no fertile ground. It is attached to the sides with eyelet lashes and rubber tensioners. A tight seal along the lower edge is provided by an integrated elastic band and by an integrated rubber tensioner along the upper edge. The tensioner is attached to mounts of the exterior mirrors which are attached at the top, or alternatively to LOXX press studs (not included in delivery).

two-pieces

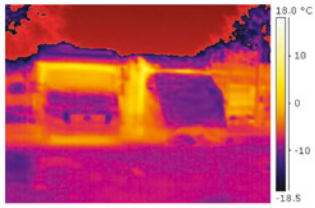

Thermal Window Cover LUX-DUO

Perfectly tailored, two-piece exterior insulation cover, which keeps the warmth inside, providing the perfect thermal insulation for your winter holidays. It consists of an upper and a lower part, which are separately available. The upper part insulates the front and side, the lower part covers the non-insulated engine bay, providing a spacious exterior insulation for the entire driver's cab and increasing the living comfort during your winter holidays significantly. The integrated wind cover protects against draught below the driver's cab. The external space of the lightweight, ca. 20 mm thick insulation (lower part ca. 10 mm) consist of weather-resistant and robust PE fabric, the inner insulation of polyester, which prevents retaining moisture.

The material is winterproof and can be rolled up or folded even if it is extremely cold.
The upper part is simply put over the slightly opened doors via pockets and fastened by the included rubber tensioners. The door pockets are adjustable in size and also fit with a mounted darkening system. The lower part is equipped along the topside with an integrated Velcro strap, which serves as the connection element to the upper part, creating a two-piece thermal cover. Once installed, both parts can be detached together and later be re-attached together. The front of the window cover can be equipped with a separate screen insert as a privacy shield from the outside.

The lighter the area, the more heat gets lost.

In comparison: vehicle without insulation (left), vehicle with LUXDUO (right). The heat insulation at the windows and doors is clearly visible.

Information

MADE IN GERMANY

LUX-DUO is not suitable for laterally protruding indicator lights!

Door bags

Additional scrub protection on the varnish.

Additional flap for secure hold of the opened front flap.

MADE IN GERMANY

Crossbelts provide a firm hold

Roof Protective Cover Van

Breathable roof protection tarpaulins made of Tyvek Supra-FC, whose cut sizes are specially adapted to the various vehicle lengths of the Fiat Ducato built since 07/2006 with H2 roof. For a perfect fit on the vehicle, the tarpaulins have an eyelet strip all round so that they can be tensioned exactly as required by the vehicle using the standard belt system. The eyelets used have integrated reinforcement and a protective strip underneath to prevent them from coming into contact with the vehicle.

Dimensions (L x W)	Suitable for	Number of belts	Item no.	Price
450 x 300 cm	Vehicle length 541 cm	6	**85 817**	**385.00**
510 x 300 cm	Vehicle length 599 cm	6	**85 818**	**425.00**
550 x 300 cm	Vehicle length 636 cm	6	**85 819**	**465.00**

Tip

The roof protection tarpaulin can also be perfectly combined with the motorhome front protection tarpaulin made from the same Tyvek Supra FC material. In addition to the roof, the front of the vehicle is also optimally protected against icing, snow and sunlight (item no. 85 663, see catalogue page 319).

Van Protective Cover Wintertime

Fully breathable cover that protects the vehicle from negative effects such as rain, dirt, ice, heat or contamination from birds or trees. Moisture can also evaporate easily via the side surfaces. The cover is made of 3-layer SFS-3 nonwoven material (160 g/m²) and is characterised by its high tear resistance and low weight. It has been specially tailored to the proportions of the Fiat Ducato built since 07/2006 and identical models and has 4 zippers to facilitate handling and allow access to the entrance door. On the basis of the exact vehicle dimensions, the cover was dimensioned slightly larger on all sides so that any existing bicycle carriers and other projections can be easily mounted on the vehicle and still be covered. Eyelet strips on both sides, tension belts at the front and rear as well as special underbody tension belts ensure a perfect fit. In addition, a repair kit and a transportation and storage bag are included in the scope of delivery.

Vehicle length	Dimensions (L x W x H)	Number of belts	Item no.	Price
541 cm	550 x 210 x 227 cm	6	**85 841**	**439.00**
599 cm	610 x 210 x 227 cm	6	**85 842**	**469.00**
636 cm	655 x 210 x 227 cm	6	**85 843**	**479.00**

Protective Cover Wintertime

All-around breathable covers, which protect the vehicle from negative influences, such as rain, dirt, ice, heat or soiling caused by birds and trees. Humidity can easily evaporate via the lateral areas. The covers made of a 3-layered SFS-3 Nonwoven material (160 g/m²) are characterised by their high tear-resistance and low weight. All versions are equipped with 4 zips, which facilitate handling and enable an access to the entrance door and the storage box. Moreover, they are equipped with an eyelet strip on both sides and clamping straps at the front and back side. To find the right size, find the biggest girth, including, for example, bike carriers and all overhangs. Included in delivery are a tensioning system which is adapted specifically to each girth, a repair kit as well as a transport and storage sack.

Information

Size determination

To choose the correct size, the largest circumference of the vehicle (girth = 2 x length + 2 x width) is measured. In doing so, all overhangs, such as bike carries, have to be taken into account. Subject to minor dimensional tolerances. The height of the hood is always approximately 35 cm lower than the overall vehicle height.

HINDERMANN

Roof Protection Cover Wintertime

Breathable protection tarpaulin made of 3-ply SFS-3 Nonwoven material with high tensile strength and low weight. Freely selectable in length the tarpulin fits universally for caravans and motorhomes. Thus, if desired, the front and rear end can be protected against rain, dust and dirt, ice and snow, heat and bird droppings, too. For problem-free fixing the tarpaulin is outfitted with triangular flaps to which the included lashing straps can be fixed. Delivery includes a repair set and a spacious storage bag.

Additional Straps for Protective Cover Wintertime

Tension belt set consisting of 4 belts (length 2.4 m each) for front and rear, as well as 4 cross belts (length 3.8 m each) for the vehicle's underside.

85 814 45.00

Additional Straps for Roof Protection Cover Wintertime

Tension belt set consisting of 6 belts with hook, width 3 cm, length approx. 8 m each.

85 816 45.00

Window Protection Film

Protects the glass against scratches. Roll length 30 m, width 50 m. 85 813 59.00

Gable Profiles

2 pieces, spacers for campers and caravans that enable water to run off the protective cover or the roof tarpaulin, thus reducing possible puddles. They are universally suitable for all caravan or camper roofs and can be retrofitted to existing covers. Distance profile for motor homes and caravans, made of weather-proof PE-foam. The gable height of approx. 21 cm protrudes the body height – skylights and antennas. The 2-part gable profile is put together and stabilised by 4 feet. Placement and number of the spacers depend on the vehicle's measurements. Overall length 2.1 m, gable height approx. 21 cm, unmounted package length approx. 120 cm.

85 724 99.00

Protective Cover for Caravans and Motorhomes

Universally fitting protective cover, made of SFS-3 tarpaulin material, which is particularly breathable and water-repellent, thus preventing condensation and mould growth. Delivery includes a storage bag, guy ropes and adhesive repair strips. Available for caravans, motorhomes and vans.

Darkening System darkStar

This newly developed darkening system which has been designed for highest demands and is suitable for installation in a Fiat Duacto, Peugeot Boxer and Citroën Jumper built since 2006/07. The windscreen darkening differentiates between the vehicle types partially-integrated motorhomes and vans. The side window darkening differentiates between the year of construction of the vehicle. This innovative darkening systems has been developed specifically to protect your private area inside the vehicle from prying eyes. At the same time, the double-pleated honeycomb material provides pleasant temperatures by cold and heat insulation. The infinitely adjustable windscreen darkening from top to bottom makes individual light conditions possible. The darkening system is easy and quick to install and gives the vehicle a professional look. It is also suitable for vehicles with interior mirror and/ or sensors and can be used with left- as well as right-hand-drive vehicles.

Darkening System REMIfront

The custom-fit darkening solution for the driver's cabin protects from prying eyes into the vehicle thanks to perfect darkening while increasing the usable living area inside the motorhome significantly. The multi-layered construction of the darkening material reduces the heating up or cooling down of the vehicle. The installation is very easy: the divided front blind is fixated to the securing points on the A-pillar provided by the manufacturer. By means off a tube system, the blind is guided to the centre of the windscreen, the reversing mirror can remain in place. The side parts, with their pleated material are screwed into the door frames and guided by rods and profiles. When closed, the pleated material is concealed by a profile and is hardly visible. In addition, the front blind features a security locking system which prevents the front part from opening accidentally while driving. The sturdy, high-quality darkening system is maintenance-free and features a highly light-proof pleat. It easily adjusts to potential manufacturing tolerances of the vehicle and ventilation openings are not covered. REMIfront can (if not mentioned otherwise) not be used in vehicles with rain sensors, light sensors, a storage compartment underneath the roof or airbags within the A- or B-pillars or above the doors.

Ford Transit V363

This robust blackout blind has been specially designed for the Ford Transit V363 Facelift models launched in June 2019. It can be adjusted from bottom to top in three positions and offers the perfect combination of privacy, shade and thermal insulation. The aluminium-coated material efficiently keeps the heat or cold outside. Installation takes just a few minutes, with flawless results. The retrofit looks like the original, installed directly at the factory.

FR 400 Ford Transit (V363), Facelift, built since 2019
500/876 **385.00**

Excellent sound quality. Side panels with cut-outs for the speakers in the A-pillar.

Perfect closure – operation from bottom to top – protects your privacy.

The small mirror is more visible.

Easily installed in a matter of minutes!

Side Window Blackout Blind for Recreational Vehicles

from 465.00

The set consists of blinds for the left and the right side window.
- Double-pleated honeycomb material for optimum insulation against heat and cold
- New guide panel for more privacy and better darkening
- Quick and easy to install without having to remove door components
- Approx. 40 mm left clear for better visibility of the small passenger mirror
- Ultra-flat handle for comfortable handling
- Impeccable look – like an integrated solution ex factory
- Lightweight, only 1.2 kg per side – significantly lighter than other available systems

fly screen curtain sliding door

Fly Screen Curtain Fiat Ducato

MADE IN GERMANY

To ensure that annoying flies and mosquitoes stay outside and to increase your living comfort, Hindermann has further optimised their established fly screen curtains. The Hindermann fly screen curtains are tailored to fit every vehicle's chassis cut-outs perfectly and cover the entire opening. At the rear doors, a lead tape is attached along the bottom edge.
All versions are equipped with multi-path zips that can be operated from inside and outside the vehicle and make trouble-free access possible. For example, the zips for the curtain at the rear door are positioned in a way that the rear windows can be opened easily. Access to the gas cylinder cabinet or the storage room is possible without having to open the entire curtain.

HINDERMANN

Material: close-meshed, fire-retardant polyester fabric, with excellent view to the outside and good air circulation. It shields approx. 65 % of solar radiation, reducing the heat development in the vehicle significantly.

Sliding Door

H1 – normal roof
For sliding door with standard cut-out (short), universal size with zip in the arched door, passage on the right.
Fiat Ducato X250/X290, all models, 06/2006 – ...; Weight: 1.5 kg **500/579** **299.00**

H2 – high roof
Bottom edge magnetic tape. For sliding doors with a high and wide door cut-out: universal size with zips in the arched door, only for doors on the right-hand side.
Fiat Ducato X250/X290, all models, 06/2006 – ...; Dim. (W x H): 136 x 178.5 cm; Weight: 1.4 kg **500/575** **299.00**

Installation sliding door: The installation is done with a magnet fixing. No adaption necessary. All versions have an integrated multi-path zip that can be operated from the inside and the outside.

Rear Door

H1 – normal roof
For rear door with standard door cut-out, can be rolled up, with two zips.
Fiat Ducato X250/X290, all models, 06/2006 – ...; Weight: 1.5 kg **500/578** **289.00**

H2 – high roof
Bottom edge lead tape. Rear door with high door cut-out, can be rolled up, with two zips.
Fiat Ducato X250/X290, all models, 06/2006 – ...; Weight: 1.4 kg **500/576** **289.00**

Installation rear door: The installation of the curtains is completed very quickly thanks to the magnet fixing. No buttons, no Velcro straps. The curtains can be removed just as quickly. They can stay mounted while driving. An adaption to the extension settings is not required.

Tailgate, fastening with Velcro tape.

Gutter RainTec RT 100

Everyone who has opened a sliding door while it was raining is familiar with the phenomenon of the "automatic shower". As this is not much fun, Dometic developed a **retrofit rain gutter** for vans. It drains the rainwater down the side and is additionally equipped with an **LED strip,** which solves the problem of a missing **outside lighting** in a very elegant way! For Fiat Ducato and similar vehicles. Light source: SMD LED diodes. Light colour: 3150 K (warm white). Life span: 50,000 h.

Luminous flux: 435 lm; Material: aluminium; Nominal voltage: 12 V; Nominal capacity: 7 W; Dim. (W x H x D): 150 x 1.6 x 3.2 cm; Weight: 480 g
Colour: white **052/160** **235.00**
Colour: black **052/162** **235.00**

Remote Control for LED Lamp

Remote control with dimming function for LED gutter RainTec RT 100. Convenient clamping bushes for easy installation. Max. load 8 A. Functions: On | Off | Brighter | Darker.
052/163 **45.00**

Roller Fly Screen

for split caravan entrance doors

Let fresh air in and keep insects out – no sooner said than done with Dometic Seitz's clever, economical fly screen solution. The aluminium frame is simply attached to the top half of the door, which can be opened separately.

- Durable powder-coated aluminium frame
- Robust fibreglass-reinforced fly screen
- Very easy to use
- Requires little space (only 62 mm thick)
- Frame profile: 62 x 40 mm

580 x 1100 mm **500/850** **189.00**

easy to install

Dimatec Best for Caravanning

A G

Gutter for Vans

You can elegantly solve the problem of missing exterior lighting on your van with the LED aluminium profile by Dimatec. Simple installation on the upper frame of the sliding door. The LED aluminium profile with 270 LEDs provides a very nice, pleasant light. Burning time: 25,000 h.
Luminous flux: 370 lm; Material: aluminium; Nominal voltage: 12 V; Nominal capacity: 8 W; Length: 150 cm; Weight: 444 g **320/428** **129.95**

HORREX from 232.90

only 50 mm wide

visible fly screen gauze

cable duct

Pleated Fly Screen Door

The gauze is pleated and folded. This has the advantage that the pull-bar can remain in any position. Even small children can easily operate this fly screen door, as the pull-bar can be operated at any height.

Features:
- Pleated fly screen gauze is more visible
- Very user-friendly
- Noiseless operation
- Pull-bar stays in any position (no spring)
- Stylish design (no screws visible, aluminium construction)
- Slim shape
- Case with pull-bar only 50 mm wide

Accessories 63.90

Threshold

The threshold can be retrofitted to allow cables to pass under the fly screen door.
Dim. (W x H): 750 x 36 mm
Weight: 718 g **500/506** **63.90**

Pleated Fly Screen Door

The lightweight fly screen door offers campers the opportunity to enjoy a wide view of nature without having to worry about mosquitos and other pests inside the vehicle. The curved cassette and the pull-bar ensure that the door does not take up much space inside your van. Despite its size, the fly screen works quietly and smoothly.

- Easy installation with pre-assembled kit and clips
- All aluminium parts are light and durable
- Rolled edge of upper profile prevents head injuries

Protective Net SLiiPER

High safety thanks to 50 cm high net – so that parents can also sleep peacefully. Particularly suitable for motorhomes or caravans.
The close-meshed net made of high-quality polyester protects the fingers of your little ones and still offers a very high visibility for parents and child.
Finely anodised aluminium profile with piping rail for variable mounting of the fastening straps. Thanks to the four different widths and the variably adjustable fastening points, SLiiPER can be installed in all common motorhomes and caravans. The children's net is delivered ready for installation.

SLiiPER was completely developed in Germany and is produced in Germany. It fulfils the requirements of DIN 1645/1646.
Installation: universal installation thanks to sliding straps for ceiling or wall with freely adjustable strap length of up to 60 cm. Up to 8 attachment points for bed base or slatted frame ensure high stability and prevent the net from slipping. Once attached, the SLiiPER can be quickly assembled and disassembled thanks to quick-release fasteners and placed under the mattress.

Scope of delivery: 2 ceiling or wall mounting brackets, net, screws, installation instructions

Froli®

759.00

MADE IN GERMANY

Use needle-nosed pliers/ tweezers to wrap the Velcro connectors around the grid and the spring mat. Fixate grid and spring mat on at least 12 points.

Froli Sleeping Set for VW T5 / T6 California

The complete retrofit system consists of lying grid, spring mat, roof bed mattress and 25 Velcro connectors. It is installed in about 60 minutes: simply take out the old mattress, roll out the lying grid and the original Froli cup springs, fixate, roll out the new mattress, done!
The slatted frame serves as a base for the bed system and does not have to be removed; the lying grid prevents the springs from slipping through the slatted frame. The spring mat provides a pressure-relief support. This way, tensions and one-sided strain can be avoided. Open, breathable cells provide perfect ventilation and an ideal sleeping climate. The roof bed mattress is made of a high-quality PUR coal foam.

Features:
Overall height: 7 cm, overall weight: approx. 10.9 kg, hardness level: medium / firm, dimensions: L 200 x W 120 x H 4 cm. The cover is breathable and 30 °C washable, double cloth / Air Mesh fabric made of 100 % polyester, flame retardant. Grid and spring mat are 100 % recyclable. Reinforcement grid made of 100 % HD-PE.

Scope of delivery:
- Lying grid
- Spring mat (height: 3 cm)
- Mattress (height: 4 cm)
- 25 Velcro connectors **86 241** **759.00**

Driver's Cabin Mattress CampSleep

Comfortable, additional bed (for a person up to approx. 95 kg) which fits the measurements of the driver's cab. Thanks to the patented version and an easy folding mechanism, it is placed quickly onto the front seats (driver and passenger seat) and thus, offers another sleeping accommodation on top of the cab's seats. The 10 cm thick mattress is supported by two light plywood boards balancing the seats' shape and creating a comfortable, horizontal sleeping position. A Velcro strap provides further stability by attaching it to the passenger's door handle, keeping the broader part in front of the glove compartment in place. The robust cover is equipped with a zipper and can easily be taken off to wash it. The standard version is suitable for the Fiat Ducato and similar motorhomes, the small version is tailored to VW vans and similar.

	Dimensions (L x W x H)	Item no.	Price
Standard	**160 x 73 x 10 cm**	**86 242**	**399.00**
Small	**148 x 64 x 10 cm**	**86 243**	**299.00**

Protection Bag

Transportation bag made of steady, robust fabric to store the driver's cab mattress CampSleep. Equipped with 2 carrying straps and Velcro.

Fitted Sheets for Caravans and Campers

The problem is well known – the beds in recreational vehicles often have special mattress shapes adapted to the spatial conditions, which is why conventional fitted sheets cannot be used, or at least not in a satisfactory way. Our new fitted sheets in the corresponding special shapes with slanted corners for French beds or as a 3-piece set for lengthwise beds in caravans or motorhomes provide the remedy. Thanks to the shape and the stretchy material – 97 % cotton with 3 % elastane – there is always a perfect fit. The jersey fabric is skin-friendly and you rest very comfortably on the delicate fabric, which is available in 4 colours.

Features:

- Made of 97 % cotton, 3 % elastane (approx. 160 g/m²)
- Non-pilling and non-iron
- 4 colours: silver, sand, titanium, macchiato
- Excellent fit
- With all-around rubber
- Washable up to 60 °C
- Suitable for tumble dry
- Mattress height approx. 10 – 16 cm

Version for Caravans

Suitable for French beds in the motorhome with diagonal right with a surface of 195 x 137 cm (e.g. for Knaus or Weinsberg).

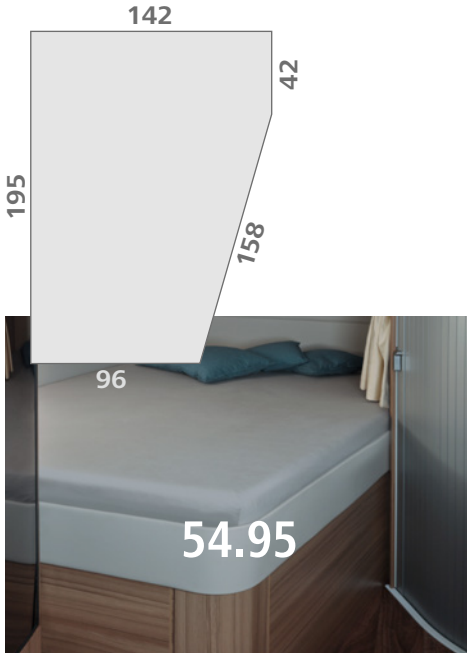

Colour	Item no.	Price
Silver	**86 320**	**54.95**
Sand	**86 321**	**54.95**
Titanium	**86 322**	**54.95**
Macchiato	**86 323**	**54.95**

Version for Campers

Suitable for French beds in the motorhome with diagonal right with a surface of 195 x 142 cm (e.g. for Knaus or Weinsberg).

Colour	Item no.	Price
Silver	**86 326**	**54.95**

Titanium	**86 339**	**89.95**
Macchiato	**86 340**	**89.95**

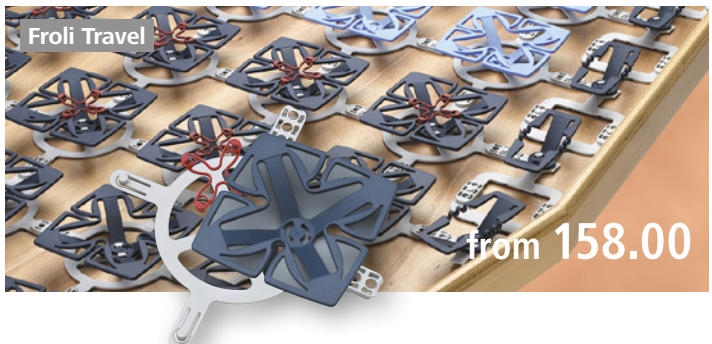

Molleton Stretch Protective Cover

The stretchy molleton sheet adjusts perfectly to the mattress thanks to the corresponding cut, the processed material cotton and elastane as well as the integrated all-around rubber, providing its protection and creating a perfectly flat surface for the fitted sheet. It is washable up to 95 °C, suitable for a mattress height from approx. 10 – 16 cm.

Suitable for	Item no.	Price
French bed in the camper	**86 346**	**49.95**
French bed in the motorhome	**86 347**	**49.95**
3-Piece rear beds	**86 348**	**89.95**

Froli Bed Systems

Comfortable pre-assembled retro-fitting systems, consisting of spring elements, which, as a modular system, are suitable for all bed sizes and slants. By clipping the elements together an orthopaedic base is formed which supports the body in both lateral and longitudinal alignment. The chambers are permeable to air and support a healthy sleeping climate without condensation. A mattress made of cold-foam with a height of approx. 10 cm is recommended.

Froli Star

Installation height 43 mm, weight 2.2 kg/m².

Mobil-Safe Seat Base Safe

from 201.90

The perfect safe for vans
The door can be removed after it is unlocked. The original screw connections of the seat consoles are always used for fastening. It is not necessary to drill holes into the vehicle. The dimensions of the safes ensure that the space underneath the seat is optimally utilised.

Accessories

BEST SELLER

Security Screw
Simply exchange one of the original screws with this security screw. The screw can only be tightened or loosened with the included code nut. Suitable for Easy-Fix X 250 (item no. 250/729) and Easy-Fix X Laptop (item no. 250/720).

HEOSafe® Van Security

from 99.00

additional security for sliding, rear and hinged doors

The HEOSafe® VAN Security 1760 door lock is a special lock for securing sliding, rear and hinged doors. It consists of a unit that is fixed to a part of the car body. This way, it prevents a door/sliding door from opening. On the opposite side, you do not need additional parts, which have to interlock or can get wedged when the bodywork is wound. The distances between the lock and the bodywork are reduced to a minimum.

MADE IN GERMANY

SECURE CAMPER

Window Protection

Motorhome burglary protection with stainless steel profiles by secure camper

Small effort, big effect. The profiles protect the locks from being forced open. Available for all standard motorhome and caravan windows. Also suitable for old window models.

Window Protection

A glued security profile made of V4A supports the window locks and prevents burglars from tearing open the window with their bare hands or a screwdriver.

Scope of delivery: security profile, fixing bracket, knurled screws and required fixing material (adhesive material already applied).

Depending on the window size, two or more profiles should be fitted. Thanks to the modular system, it is usually not necessary to modify the signalling systems if CO alarms or alarm systems are installed. All window functions are retained, and the roller blind and fly screen can still be used without restriction for all profile types and sizes.

Information The frameless Dometic/Polyvision M profile can be used to secure panorama windows in semi-integrated motorhomes and vans with SkyRoof above the driver and passenger seats. You need 2 x 214/427 for this.

NEW from 83.00

Skylight Protection

Protection against climbing through from the roof into your vehicle. The safety clamping bar(s) is/are fixed at the desired position in the frame of the skylight and fastened to the frame using 4 (Mini) or 16 safety screws (Midi & Midi 2). This reduces the opening of the skylight sufficiently to prevent access from the outside. Depending on the size of the skylight, one or two safety clamping rods. All functions of the skylights remain fully intact. The fly screen and sun blind also continue to function without restriction.

Wireless Alarm System WiPro III & WiPro III safe.lock

MADE IN GERMANY

Wireless alarm system for motorhomes, compatible with CAN bus.

Simple and convenient protection. The alarm system for motorhomes does not have disturbing motion detectors and protects the vehicle effectively using tamper-proof wireless magnetic contacts. This prevents false alarms and you can use the alarm system when it matters most – with you present! For example, the WiPro III safe.lock makes it possible for many vehicle types to also operate the vehicle's central locking system with the wireless hand-held transmitter. When using a networking module or a Pro-finder, this can even be done via an app. Alternatively, you can control the WiPro III safe.lock with the NFC module. The integrated interior siren in conjunction with the vehicle horn or an optional siren ensures the necessary attention. The WiPro III's sophisticated jammer detection prevents sabotage with so-called "jammers", which cause interference with conventional wireless alarm systems and connected wireless sirens.

Scope of delivery:
WiPro III or WiPro III safe.lock control panel, status LED, wireless hand-held transmitter 868, wireless magnetic contact 868 black, wiring harness, installation material, warning sticker, manual

Technical data:
Power supply 12/24 V, current consumption approx. 11 mA, alarm sound approx. 102 dB, dimensions (W x H x D): 80 x 29 x 80 mm, weight: approx. 90 g

Special features:
- Simple, intuitive handling: vehicle locked/alarm system armed
- Wireless magnetic contacts without wiring!
- No interference-prone motion detectors
- Staying in the vehicle possible without deactivating sensors
- Control of the alarm centre via wireless vehicle key and wireless hand-held transmitter
- Easy add 2.0: subsequent coupling of wireless accessories via wireless hand-held transmitter or car doors
- Panic alarm function
- Also suitable for vehicles without CAN bus
- Battery life of the wireless accessories approx. 2 years
- Up to 100 wireless modules can be linked
- Radio range of up to 75 metres (free field)
- Copy-proof thanks to over 4 billion codes
- Protection against replay attacks
- Anti-jamming" jammer detection
- Remote alerting and localisation with Pro-finder (optional)

List of compatible vehicles

NFC Module 167.00

Attention outdoor enthusiasts, sportsmen and globetrotters –

attached to the inside of your vehicle window, the NFC module, as a virtual key, is the perfect control solution for your WiPro III, WiPro III safe. lock and WiPro easy alarm system. Conveniently arm and disarm your alarm system with the included transponder card or with the robust, waterproof accessories, such as a wristband, a key fob or a compatible credit card. Owners of a WiPro III safe.lock can additionally access the central locking system and unlock and lock the vehicle without a key. The NFC module can be retrofitted as an accessory at any time.

Scope of delivery: NFC module, batteries, transponder card, quick guide

Technical data:
NFC accessories use MIFARE DESFire and are encrypted with a security code for maximum security. Power supply: 3 x alkaline AAA battery. Temperature range: -10 °C to +70 °C.

Dim. (H x ø): 19.5 x 89 mm
Weight: 150 g **214/171** **167.00**

NFC Transponder Card	**214/172**	**19.00**
NFC Tag	**214/173**	**19.00**
NFC KeyStrap M	**214/174**	**25.00**

The KeyStrap is available in 2 sizes and 3 additional colours.

Pro-finder 479.00

Remote locating solution for WiPro III / WiPro III safe.lock and as a standalone locating system.

Technical data:
Voltage supply: 12/24 V; current consumption transmission: approx. 16 – 21 mA; current consumption standby: approx. 25 mA; transmission frequency: quad band; number of destination call numbers: up to 10; interface: RJ10 (input for WiPro); outputs: 2 x open collector (max. 0.5 A). Dim. (W x H x D): 103 x 30 x 96 mm; Weight: 110 g

Download the THITRONIK® app now!

2G/3G/4G

In the event of an attempted break-in, Pro-finder alerts you via SMS or call on up to 10 mobile phones. Depending on the installation, the stolen vehicle can be shut down via app. The status of the alarm system and its in- and outputs can be retrieved and changed at any time via app. Low battery voltage of the supply voltage source is also reported via SMS. Thanks to the two outputs, features such as your stationary heating or your AC can be remote-controlled. Pro-finder can also be used without WiPro III for locating, controlling and monitoring. Your Thitronik premium partner will provide you with a suitable SIM card with an attractive basic fee.

Scope of delivery:
Pro-finder, quick guide, connection cable, installation material

Special features:
- Receive alerts via SMS or call
- Locate your stolen vehicle
- Can also be used without an alarm system
- Remote control of alarm system via SMS or phone call
- Geofencing (virtual fence) by WiPro
- Easy add 3.0: subsequent connection of wireless accessories via app
- Low monthly costs (only SIM card fees or prepaid cards)
- SMS costs are incurred only with a real alarm (SIM card must be SMS, telephony and data-capable)
- 2 connecting transistor outputs
- Integrated GPS receiver and GSM antenna
- Voltage monitoring
- Special caravan mode
- Integration of Büttner Elektronik batteries, consumer switch-off in case of deep discharge, battery monitoring with undervoltage alarm

THITRONIK MADE IN GERMANY

Network Interface Module

Comfortably control all functions of the WiPro III with your smartwatch or smartphone.

This sophisticated BLUETOOTH® module optimises your THITRONIK® security system: Operate all remotely controllable functions of the WiPro III conveniently with your smartphone/smartwatch. This is possible with the Thitronik network interface module. Connect your smartphone to your WiPro III alarm system and operate it within close range of your motorhome via BLUETOOTH®. Authorised users can easily activate and deactivate the system at any time. Owners of a WiPro III safe.lock, which also accesses the existing central locking system, can open and close the vehicle without a vehicle key or remote control. The network interface module can also be integrated if the Pro-Finder locating system is installed.

129.00

Special features:
- Control the WiPro III via BLUETOOTH®
- Control the central locking system via smartwatch or smartphone (only in combination with the WiPro III safe.lock)
- Easy add 3.0: subsequent connection of wireless accessories via app

Technical data:
Power supply: 12/24 V, Bluetooth® 5.0 low energy, temperature range: -20 °C – +80 °C, radio range (free field) approx. 10 m.

WiPro easy

Your project. Your pride. Your protection.

STAND ALONE

299.00

Top **price.** Top in terms of **safety.**

The WiPro easy is the ideal alarm system for caravan owners and DIY enthusiasts. The compact alarm system is easy to install and offers the proven THITRONIK® security standard. You can arm and disarm the alarm system via a wireless portable transmitter. A wireless magnetic contact is also included in the scope of delivery. In addition, the system can be expanded by up to 8 further wireless components. The 105 dB loud siren scares off any intruder and the panic alarm function provides additional security.

The WiPro easy can be expanded modularly and thus adapts to your security needs. Thanks to the extensive range of wireless accessories, the alarm system optimally meets every security requirement. It does not matter whether your vehicle is the latest in its class or a beloved classic car: Thanks to its inputs, the alarm system can be used in all basic vehicles regardless of manufacturer and age.

Scope of delivery:
- WiPro easy central unit
- Wireless portable transmitter 868 (loud/silent)
- Black wireless magnetic contact 868
- Siren
- Status LED
- Connection cable
- User manual, installation material
- Warning label

Technical data:

CO Detector (optional)

PROPANE K.O. CO BUTANE

G.A.S.-pro III is a modular gas warning system for permanent installation in your vehicle. It reliably alerts you in case of gas poisoning and narcotic gas attacks, with integrated siren and radio unit.
The G.A.S.-pro III is available in 2 basic setups: one with an integrated liquid/knockout gas sensor and one with an integrated CO detector. Both versions can be combined with an additional gas or CO detector. The G.A.S.-pro III is a technological quantum leap: in combination with a liquid gas/knockout gas sensor, it reduces current consumption to a mere 26 mA; in combination with a CO gas detector, current consumption is reduced to a mere 9 mA. The internal siren increases to a piercing 94 dB, an integrated humidity sensor optimises the already precise measurement at high humidity in the vehicle or with breathing air directly next to the sensor. Precise temperature adjustment is mandatory. Additionally, an alcohol filter prevents false alarms caused by alcohol in the air. Thanks to the integrated radio unit, the G.A.S.-pro III communicates with the WiPro III alarm system without additional wiring.

G.A.S.-pro III at a glance

- Gas detection according to **DIN EN 50194-2**
- Gas detection according to **DIN EN 50291-2** (CO version)
- CI-Bus compatible
- Detects propane and butane, narcotic gases or carbon monoxide (depending on the version)
- Permanent compensation of temperature and humidity
- Regular self-test to check functionality
- Alarm output/siren output
- Auto Sense input
- Alcohol filter
- Button for "Pause" and "ON/OFF"
- LED display for both sensors
- Internal siren 94 dB

Download the THITRONIK® app now!

Gas Warning System TriGasAlarm

Gives warning of escaping propane, butane, and narcotic gas. The highly sensitive sensor signals even the slightest gas concentration. Proper functioning is always checked when the system is turned on, the automatic calibration checks the settings every 40 seconds and corrects them if necessary. Through optical (change of colour: green–red) and acoustical signals, the system check, the standby state as well as the alarm is displayed. By a quick tip on the on-/off-switch the brightness of TriGas in standby state can be dimmed.

99.00

Technical data:
Operating voltage 9 – 16 V, power consumption in standby mode: 95 mA, in alarm mode: 160 mA, sensitivity 98 ppm, sound level of the alarm: approx. 80 dB, dimensions W 9 x H 4 x D 9 cm, weight: approx. 120 g. **87 191** **99.00**

Information

The proper function of the device is only guaranteed using a vehicle battery. Operation with a power supply or a charger can cause malfunctions.

Additional Sensor for TriGasAlarm

Optionally a second sensor can be connected to the TriGAsAlarm system. The additional sensor has the same technology as the built-in one and is used as an addition e. g. in large motorhomes. In cooperation with both sensors a secure detection of rising or falling gases is guaranteed. Cable length: 2.5 m. **87 192** **49.00**

49.00

Gas Sensor Caratec CEA100G

Detects all common anaesthetic gases such as propane/butane (LPG), carbon monoxide or knockout gases and warns with an extra-loud alarm tone before the anaesthetic effect of the gases can kick in. The CEA100G reacts to even the smallest amount of gas in the ambient air, protecting both humans and animals even at night. If the sensor detects a gas concentration in the ambient air, it generates a pre-alarm of 40 seconds. If the gas concentration stays the same during that time or even increases, the sensor emits a continuous alarm tone and the red LED remains permanently on. If no gas concentration can be detected after the alarm, the gas sensor switches back to its standby mode. The power supply of the gas sensor takes place directly via the 12 V vehicle supply voltage. Up to 2 additional sensors can be connected.
87 196 **89.00**

89.00

KÖNIG KUNDE AWARD 2022 – 1. PLATZ in der Zubehör-Kategorie Gas-Warnsystem – REISE MOBIL

Technical data:
Supply voltage 12 – 24 V; power consumption: 100 mA in standby mode, 180 mA during the alarm; volume alarm: 80 dB; dimensions: W 5.3 x H 5.3 x D 2.4 cm, connection cable length 94 cm.

Additional Sensor for Gas Sensor Caratec CEA100G

Due to the different densities of the various gases, it is recommended to distribute several points of measurement within your vehicle. To do this, up to two additional sensors can be connected to the main unit. The additional sensor Universal detects the same gases as the gas sensor and can be used, e.g. to secure a separated room. The additional sensor CO serves for a quick detection of a over-concentration of carbon monoxide inside the vehicle. Dimensions: W 2.5 x H 2.8 x D 2.5 cm, connection cable length 267.5 cm.

Gaswarner 3-Sicur

Gas warning device for recreational vehicles with highly sensitive sensors for propane/ butane, carbon monoxide and knockout gases, which in case of need sound the alarm via an acoustic signal. Calibrating the individual sensors is automatically done. A buffer battery (item no. 322/7444, see catalogue page 574) ensures the functionality of the device even when the onboard power breaks down. Can be used mobile or installed permanently. The operation is very simple - all functions such as turning on, off, test, reset, are all controlled via one button. With LED control lamp and 12 V cigarette lighter plug.

Technical data:
Supply voltage 12 V; power consumption stand-by: 0.5 W, power consumption alarm 0.9 W, dimensions W 11 x H 4 x D 7 cm, cable length 110 cm.

99.90

Gas Alarm System MSG-150

Recognises to all common narcotic gases in the ambient air before their anaesthetising effect starts. It is insensitive to temperature and adjusts itself to the ambient air. In case of an alarm, an acoustic signal is send via the integrated siren and the red LED signals an optic alarm.

Technical data:
Operating voltage: 10 – 32 V, power consumption: 1.3 W, temperature range: 0 °C to + 40 °C, dimensions: W 8 x H 15.6 x D 5.1 cm, weight: approx. 240 g. **87 340** **139.00**

139.00

DOMETIC OUTDOOR

Park Distance Control System MagicWatch MWE-7006

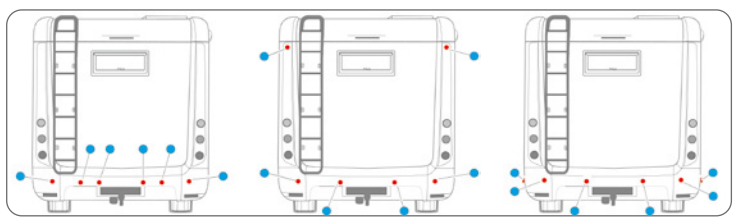

System with 6 compact digital sensors (ø 18 mm), which can be varnished in vehicle colour, ideally suitable for especially high or wide vehicles. With the measurement it considers also attachments to the bodywork, as for example bike carriers or towbars. If a bike carrier is attached, the system can be switched manually between 2 stop zones, depending on whether the carrier is folded in or out. The system warns acoustically within a detection range of approx. 3 m of obstacles, sensitivity is adjustable in 3 steps.

6 digital sensors offer 3 assembly variations:
- 6 x bumper
- 4 x bumper and 2 x top rear
- 4 x bumper and 2 x sides

87 355 **545.00**

545.00

Vodafone Automotive

Park Distance Control System Cobra ParkMaster

Parking aid available as front (F294) and rear version (R294). The 4 extra flat mini ultrasonic sensors detect every obstacle in front or back of the vehicle. The small sensors with a diameter of only 22 mm are very easy to install by clip-mounting. Thanks to its very slim retaining ring (only 0.75 mm thick) the sensors, varnished in the colour of the vehicle, blend perfectly into the bumper. Training the parking aid is not necessary. Adjustment of the settings (sensivity and volume) is possible.

MILENCO

129.90

Premium Alarm Milenco

A premium alarm with remote control for utility and recreational vehicles that is easy to install and very effective. The alarm is activated with a radio remote control. The alarm includes motion and impact protection and has a panic function. With code-hopping transmitter that chooses a random code each time, which prevents the code from being copied with a code grabber. The ultra-high decibel alarm provides the ultimate theft protection for your vehicle and years of reliable service.
Nominal voltage: 12 V; Dim. (W x H x D): 9.05 x 15 x 9.05 cm; Weight: 460 g **310/869** **129.90**

29.95

smartwares group

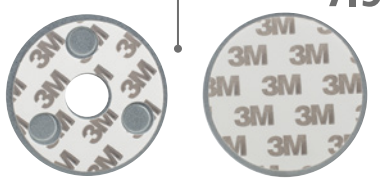

Smoke Alarm RM218

Smoke alarms are incredibly important for being able to react immediately in case of a fire. This smoke alarm uses a high-quality, sealed lithium battery with a 10-year life span. It is also equipped with a photoelectric sensor, a large test button and an LED display. With the German Q seal of quality.
Features: battery display, pause function, fault alarm, sleep mode, test button.
Dim. (H x ø): 3 x 10.5 cm; Weight: 180 g
310/859 **29.95**

3M Science. Applied to Life.™

7.95

Magnetic Fastening Kit for Smoke Alarms

With the universal fastening kit, you can mount devices such as smoke alarms or heat detectors in no more than 15 seconds – without any drilling. Tests have proven that the mounting kit does not negatively impact the smoke alarm.
Fastening type: 3M tape, fastening diameter: 6 cm. **310/858** **7.95**

KOMBI ALARM

from 136.50

The AMS Kombi Alarm detects narcotic gas even at the smallest concentration, even before it can develop its narcotic effect and impede your ability to react. The alarm threshold for butane, propane and methane lies way under the ignition limit of the gas. The system convinces with its especially low power consumption. Automatic adjustment of the sensitivity threshold.

Application: caravans, motorhomes, driver cabins of lorries.

Nominal voltage: 12 V
Dim. (W x H x D): 115 x 90 x 30 mm

Kombi Alarm

Kombi Alarm Compact

MADE IN GERMANY

Kombi Alarm

Depending on the size of the vehicle, you can connect two additional sensors. For connecting external alarm devices (e.g. flash signal lamp, siren, etc.), a relay output is available. Power button. Power consumption sleep mode 90 mA, alarm approx. 145 mA – relay output 1 A/30 V DC.
Weight: 128 g **310/867** **175.00**

Kombi Alarm Compact

For installation in caravans and motorhomes with little space. Also suitable for installation in driver cabs of lorries. On/off switch. Power consumption sleep mode approx. 90 mA, alarm approx. 145 mA. Weight: 140 g
★ **310/874** **136.50**

Accessories

76.50

Sensor for Narcotic Gas and Gas

Additional sensor for detecting gas (propane, butane, methane) and narcotic gas. Power consumption approx. 60 mA, green power indicator. Cable length: 3 m; Dim. (W x H x D): 50 x 50 x 24 mm; Weight: 62 g **310/868** **76.50**

Marten repellent – the perfect solution for these unwanted guests!

299.00

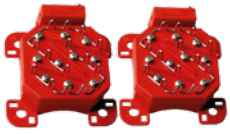

Marten Repellent Device M9900

The waterproof, self-sufficient marten repellent M9900 with waterproof encapsulated electronics can be adapted to the engine compartment. It is equipped with four fur-penetrating, movable multi-contact high-voltage brushes with activation sensors and is powered by AA batteries (4 x AA 1.5 V, not included in delivery). The batteries are only used when contact is made, thanks to the sleep mode of the activation sensors. The low-battery indicator lets you know in good time when the batteries are running low. This method of marten repellent is particularly efficient and requires little energy. Acid-resistant and self-extinguishing plastic, E1 mark of the German Federal Motor Transport Authority, function display in control mode, battery operation with protective function independent of the electrical system of the vehicle. Extendable by 2 contacts. Incl. safety bonnet switch. Suitable for all motor generations.
Dimensions basic device: 8.6 x 5.5 x 5 cm.
Nominal voltage: 6 V; Weight: 820 g

452/125 **299.00**

74.95

Marten Repellent Extension Kit M9900-Kit

Increase the defensive power of the M9900 with two additional multi-contact high-voltage brushes with activation sensors. This may be necessary if the engine compartment is very narrow and full of nooks and crannies.
Dim. (L x W x H): 7.5 x 6.8 x 3.3 cm
Weight: 120 g **452/128** **74.95**

96.00

Marten Repellent Device M2700

The waterproof and dirt-resistant M2700 is an ultrasonic marten repellent and prevents bite damage right from the start. Unlike many other ultrasonic devices, it can be placed exactly where it is needed – at the very bottom. Because that is where the martens enter the car. Since it is equipped with a fully encapsulated 360° dome loudspeaker, you can install it in the engine compartment without hesitation (even in splash water areas). There, the device creates a 360° ultrasonic barrier. This way, martens cannot sneak into the vehicle in the sound shadow. Self-extinguishing plastic, E1 mark of the German Federal Motor Transport Authority. Suitable for all motor generations.
Dimensions basic device: 8.5 x 5.3 x 4.2 cm.
Nominal voltage: 12 V; Weight: 140 g

452/124 **96.00**

95.95

Marten Repellent M7500

Bonnets and car roofs are a popular "runway" for martens, but also for cats and other small animals. To prevent them from scratching your car and from chewing on cables and hoses, the M7500 – unlike conventional marten repellents – transmits the ultrasound as a vibration directly onto the sheet metal of the bonnet, thus turning it into a loudspeaker. The ultrasound reaches the engine compartment from above and the outside and keeps martens, cats and the like away. Waterproof, suitable for CAN bus and hybrids, self-extinguishing plastic, E1 mark of the German Federal Motor Transport Authority. **Please note:** The ultrasound is effective up to 3 m outwards and can possibly be perceived by pets.
Dimensions basic device: 7.5 x 2.8 x 5 cm.
Nominal voltage: 12 V; Weight: 180 g

452/113 **95.95**

249.00

Marten Repellent Device M9300

The waterproof high-voltage marten repellent does not rely on the on-board power supply as a source of energy, but is operated independently with AA batteries (4 x AA 1.5 V, not included in delivery) – without affecting the car battery. Thanks to the integrated low-battery indicator (LED), you will be informed in good time that the batteries are about to run out. The device effectively protects your vehicle as the 6 multi-contact high-voltage brushes can penetrate the martens' fur at any point. Self-extinguishing plastic, E1 mark of the German Federal Motor Transport Authority. Automatic on/off switch and waterproof compact plug for easy replacement. Extendable by 4 contacts. A safety bonnet switch is optionally available. Suitable for all motor generations.
Dimensions basic device: 15.5 x 8.8 x 3.2 cm.
Nominal voltage: 6 V; Weight: 730 g

452/119 **249.00**

29.90

GARDIGO

Marder-Frei Marten Repellent

Protects against marten bites on ignition cables, brake lines and other rubber parts in cars, motorhomes or trucks. The device emits an ultra-high whistling sound at intervals of 15 seconds. Two-way connection system with mounting safety through reverse battery protection and fuse. Sound pressure: 85 dB. Complete with 30 cm connection cable. Marder-Frei works with 12 kHz. Cable length: 30 cm; Nominal voltage: 12 V; Nominal capacity: 0.1 W; Dim. (W x H x D): 9 x 5.5 x 2.5 cm; Weight: 80 g

2 | Sealant XSEAL EXTREME

Extremely flexible sealant based on MS hybrid polymers that replaces all other sealants: sealants for painting, sealants for sanitary applications, construction sealants, water-repellent sealants, sealants for glazing, natural stone sealants, concrete sealants, etc. It is easy to apply and can be painted over without any problems. The combination of superior adhesion and permanent elasticity guarantees durable joints. Perfect resistance to weather and wind, UV radiation and temperature fluctuations.

Capacity: 310 ml

white	60.97 / l	**451/226**	**18.90**

3 | Adhesive and Sealant TRANSCLEAR

Works on all materials! High UV resistance. The cartridges are long-lasting and do not set. The products are food-safe, can be recoated, and are resistant to mould and bacteria. The material is solvent-free, odourless and non-toxic.

Capacity: 310 ml

transparent	78.23 / l	**451/227**	**24.25**

4 | Assembly Adhesive XTACK EXTREME

Extremely fast and strong assembly.

- Extremely high initial adhesion, no more clamping necessary
- The fastest assembly adhesive among the MS polymers.
- Specially developed for indoor and outdoor use on construction sites, as it replaces connections such as screws, bolts, etc.
- Capacity: 290 ml

black	105.17 / l	**451/228**	**30.50**
white	105.17 / l	**451/229**	**30.50**

5 | Multifunctional Spray GT7

- Serves as a moisture displacer, rust remover and penetrating oil, i.e. it makes its way under old grease layers and dissolves them
- As a lubricant, it prevents cracking and squeaking; as a contact spray, it dissolves oxidations
- Also cleans grease, brake dust, cylinder locks, etc.
- Protective agent: forms a long and persistent, transparent and moisture-repellent layer

Capacity: 400 ml	33.75 / l	**451/230**	**13.50**

6 | Cleaner HP POWER CLEAN

Quickly and safely removes grease and organic dirt. Completely biodegradable, not flammable, acid-free and non-corrosive. Complies with the HACCP standard. Pleasant smell.

Capacity: 1 l	19.50 / l	**451/231**	**19.50**

7 | Cleaner and Degreaser TEC7 Cleaner

Clean – degrease – finish

- For cleaning the materials to be bonded before and after using TEC7.
- Quick and safe removal of grease and dirt from all surfaces such as wood, metal, stone, tile and most plastics. Does not attack surfaces.
- Used for degreasing and cleaning tools and workshop equipment
- Removes glue residues of stickers/labels
- Removes residues of contact adhesives, wax, tar, etc.
- Also serves as a joints spreading agent

Capacity: 500 ml	31.50 / l	**451/232**	**15.75**

8 | Foam Cleaner MULTICLEAN

- Degreases, cleans and brightens
- Safe to use on almost all materials
- Perfect degreasing for gluing
- Very effective on rubber accumulations, dirt, grease, nicotine, pencil stains, ...

Capacity: 500 ml	33.80 / l	**451/233**	**16.90**

1|Conservation Wax TEROSON WX 210

Particularly suitable for long-term protection of disused vehicles, machines, generators and gardening tools. The transparent conservation wax is a high-quality corrosion protection for prevention, care and repair. With flat jet spray nozzle for vehicle underbodies and spray tube for cavities.

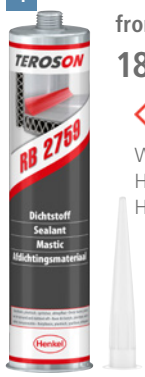

500 ml	29.50/l	**450/220**	**14.75**

3 from 26.90

EUH066, EUH210

4 from 18.95

Warning!, H315, H412

2|Protective Wax TEROSON WX 990

TEROSON WX 990 is a sprayable wax-based rust inhibitor. After thorough drying, a firmly adhering, plastically tough and water-repellent film remains. Since the flow point of the dry substance is above 100 °C, there is no risk of it running off or dripping even in the engine compartment. The dry film adheres to untreated and painted sheet metal.

- Adherent
- Water-repellent
- Transparent
- Tack-free drying

6 22.95

H412

3|Sealant TEROSON RB 4006

Low-solvent butyl rubber sealant.

- High adhesive power on all common surfaces
- Easy to smooth
- Good stability
- Visco-plastic
- Coatable

TEROSON RB 4006 is used for sealing mechanically fixed overlapping joints on frame constructions, facades, steel and sheet constructions, e.g. air conditioners and silos.

grey 570 ml	48.95/l	**451/065**	**27.90**

7 31.50

Danger!, H225, H304, H315, H336, H411

4|Sealing Compound TEROSON RB 2759

Sprayable butyl sealing tape for use in caravans and motorhomes. Cold processing at room temperature. Stable, solvent-based, elastoplastic sealing compound, easy to dab off. Medium adhesion. Very good water and ageing resistance.

Areas of application:

- Skylight replacements
- Window replacements
- Awnings/rear carriers/reversing cameras

grey 310 ml	61.13/l	**451/059**	**18.95**
grey 570 ml	39.47/l	**451/056**	**22.50**

5|Industrial Sealant TEROSON MS 935

Medium/high-strength industrial sealant for elastic sealing. Wide adhesion spectrum and good weather resistance. TEROSON MS 935 can be used without a primer. The product is very UV-resistant and can be painted over. TEROSON MS 935 is easy to smooth and achieves high stability due to thixotropic properties. The sealant is suitable for interior and exterior application. Skin forming time: 15 – 20 min.

grey 310 ml	73.28/l	**451/190**	**21.25**
white			
310 ml	73.28/l	**451/191**	**21.25**

6|Adhesive TEROSON MS 939

TEROSON MS 939 is an industrial adhesive for high-strength, flexible bonding. The adhesive is perfect for bonding satellite antennas, solar panels and awnings.

- Incredibly versatile
- High strength
- Good elasticity
- Excellent weather and UV resistance

black 310 ml	79.14/l	**451/192**	**22.95**
white 310 ml	79.14/l	**451/193**	**22.95**

7|Pre-Treatment Agent TEROSON VR 10

TEROSON VR 10 is a liquid pre-treatment agent. It is based on a liquid hydrocarbon free of aromatics and low in n-hexane. The product does not contain any chlorinated hydrocarbons and does not attack paint when applied for a short time. TEROSON VR 10 does not prevent adhesives/sealants from hardening.

1000 ml	31.50/l	**451/194**	**31.50**

8 from 17.50

8|Sealing Tape TEROSON RB VII

Sealing tape for cars, houses, caravans and boats. The sealing tape is adhesive on both sides and based on synthetic rubber. Sealing tape width: 20 mm. Sealing tape height: 2 mm.

Product advantages:

- Adheres to all clean and dry surfaces
- Can be painted over to a limited extent
- Very high water and ageing resistance
- Low adhesive power

6.95

Dehumidifier Refill Tabs

- **Innovative** – faster absorption due to the immediate reaction of the pressed calcium chloride with the ambient air compared to loose granules or granules in a fleece bag.
- **Effective and fast** – the tab reaction starts within a short time after excess moisture is detected.
- **Universal** – the tabs can be used in many dehumidifier containers (observe TAB dimension).
- **Smart** – the air in the room is regulated to an optimal level of 40 to 60 % only in case of excess humidity.
- **2-in-1** – air humidification and room air improvement. Removes bad odours without adding fragrances.

ABSODRY Box

The dehumidifiers are characterised by efficient contact surfaces between air and the moisture-absorbing crystals by utilising the air movement! This way, the moisture is optimally absorbed. The spread of mould and other allergens is effectively minimised. The refill bag and the collection container are designed in such a way that your skin does not come into contact with the crystals during insertion and replacement, which makes it easy to use.

WOSHUP!

MADE IN GERMANY

Woshup! is a company straight from the mountains of Bavaria. It is backed by a parent company with more than 35 years of experience in the field of industrial cleaning. Development, production and marketing bear the seal "Made in Germany". With its neon-coloured and cheeky appearance, Woshup! attracts all attention. Of course, all Woshup! products are biodegradable. The specially developed and patented Xtra Skin effect ensures that a protein layer remains invisible on the surface after washing, so that subsequent washes are easier and a significant amount of water is saved.

1 12.50 2 27.50 3 14.95

Width: 25 cm

1 | Ice Scraper and Snow Shovel
Ideal for removing snow from the car roof, motorhome or caravan. The ice scraper on one side and the rubber lip of the snow shovel enable a simple removal of ice and snow from the windows. Snow shovel/brush is flexible, but can also be fixed by fastening the thread. Ice scraper: 15 x 4 x 0.5 cm. Snow shovel: 25.5 x 2 cm. Brush 25.5 x bristles 5 cm.

430/224 **12.50**

2 | Mop Micro
Cleans gently and efficiently thanks to its microfibre bristle sponge. When unscrewed, it can also be used without the telescopic rod.

430/210 **27.50**

3 | Combined Window Cleaner
For thoroughly and quickly cleaning even extremely dirty windscreens, windows, etc. Sponge with coarse dirt net (mesh fabric) for softly removing dirt and insects. Rubber lip for cleanly pulling off the water. Infinitely adjustable telescope. To protect the windscreen, you should first wet the sponge thoroughly with water and, if applicable, a cleaning agent. Then, pull the water off with the rubber lip to one side. Tip: You can avoid streaks if you keep the washing water as clean as possible and squeegee the window quickly in overlapping lines.

430/211 **14.95**

Universal Washing Brush FF

With the accessories for the washing brush, your caravan will definitely be clean. Our washing brushes can be used in even more different ways now.
- Buy one device and extend it when needed
- Mob, brush heads and squeegee can be combined with the 3 m aluminium rod as well as the rods of the universal washing brush

1 | Cleaning Brush FF incl. telescopic aluminium tube. Solid design with metal thread, convenient on/off switch and 19 mm hose connection (Gardena-compatible). Width of the brush at plastic part about 25 cm.
Extendable: 120 – 180 cm **430/205** **29.95**

2 | All-Round Cleaning Brush FF
You can easily reach every corner of your caravan or motorhome with the all-round washing brush head. The washing brush head is equipped with super soft bristles on the side for gentle and thorough cleaning. The reinforced, telescopic aluminium rod convinces with its stability, the metal connection for the washing brush as well as the reinforced handle. Furthermore, the handle has a 19 mm hose connection (Gardena-compatible) and a convenient on/off switch.
Extendable: 110 – 177 cm

430/213 **34.95**

Accessories

All-Round Cleaning Brush Frankana

3 | Spare Head Brush head width: approx. 10 cm. Length: approx. 28 cm. Spare brush for 430/213, 430/205 and 430/223. Cleans thoroughly.
430/209 **14.95**

4 | Mop Attachment
The cleaning rag can be removed and lashed together. The microfibre bristles (approx. 2 cm) absorb dust and dirt perfectly. Detergents are therefore not necessary (rod not included). Top material: 100 % polyester. Can also be used without rod.
Dim. (L x W x H): 26 x 18 x 18 cm

430/221 **10.50**

5 | Window Squeegee and fly remover in one. Ideal for holidays, camping with caravans or motorhomes. With the sponge and the rubber lip, you can clean your windows in no time. In combination with the telescopic aluminium rod, you can even clean hard-to-reach corners (rod not included). Squeegee W: 25 cm. Fly remover 25 x 3.5 cm. Dim. (L x W x H): 25 x 9 x 9 cm

Drinking Water Hygiene with certisil and certinox

Water only remains drinkable and harmless to health in a clean tank. There are multiple causes for contamination. Besides germs and other pathogens in freshwater, taps and hoses are often also contaminated. Germs will quickly find their way into pipes and pumps. Long periods of water storage guarantee the formation of germs and algae, especially at high temperatures.
Not approved for Switzerland!

Step 1: cleaning the tank
Certinox TankRein dissolves algae and germ deposits with active oxygen in your fresh water tank, pipes, taps and pumps – without chlorine and surfactants.

Step 2: removal of lime and odour
Certinox TankFrisch removes lime deposits, biofilm, musty smell and bad taste with natural citric acid. Furthermore, TankFrisch protects the pump against wear.

Step 3: drinking water disinfection and hygiene
In countries with poor drinking water quality like those in Southern and Eastern Europe, the newly added drinking water should be disinfected. For this, simply add certisil® combina.
It should act for at least 30 minutes. In countries with good quality drinking water like those in Central, Northern and Western Europe, using certisil® argento is sufficient. Application time: 2 hours before consumption.

certinox SchleimEx cse 100 p

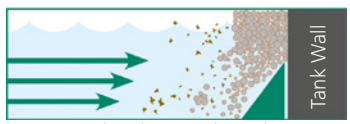

Removes foul-smelling deposits in waste water tanks and pipes. Using active oxygen and degreaser, SchleimEx removes even stubborn stains, for example after long periods of standstill. The powder is sufficient for 100 l tank content!
Not approved for Switzerland!

mycleantank Cleaner for Water Systems

Go on holiday with a clean tank.
The easydriver mycleantank water system cleaner was developed to prevent dirty pipes and tanks from clouding your holiday with your motorhome or caravan. The cleaner rejuvenates pipes and tanks and instead of scrubbing, you can relax and look forward to your holiday. Just let the award-winning mycleantank take care of it.

REICH WATER SOLUTIONS

It is as easy as this: Empty your fresh water tank, add 0.5 litres of the cleaning product and then fill up the rest with water. Turn on all water taps and consumers. Once the water coming out of the pipes is blue, close all taps again.
Resting times:
- 25 l tank – 1 hour
- 50 l tank – 2 hours
- 75 l tank – 3 hours
- 100 l tank – 4 hours

BEST SELLER

After letting the cleaner take effect, turn on all taps and let the water run through completely until it is colourless again.
- 3 % stable hydrogen peroxide reliably removes organic stains and deposits
- Suitable for fresh water tanks, fittings, pumps and waste tanks

Water filter for mobile travel companions

myclean®water

MADE IN GERMANY

Water Filter myclean Installation Set

The reliable filter for clean drinking water on the road. Easydriver myclean water fights microorganisms such as bacteria, pseudomonads, legionella, fungi and protozoa. With its micro-fine membrane, the safe filter ensures 99.99999 % bacterial retention. For clean drinking water and pure refreshment. Tested according to ASTM F838-20.

Connect the filter to the pipe system or the end of the filling hose, depending on the set. Then you can just let the water flow! Easydriver myclean water takes care of everything else. After one camping season (or after 12 months), only the filter cartridge needs to be replaced – the housing can be used again. Really sustainable: the clever cartridge system reduces plastic waste by 80 %.

UV 12 Disinfection

Storing drinking water leads to contamination within days. Bacteria develop and harm your health. UV lamps disrupt the transfer of genetic information and the germs die.

The UV lamp consists of a submersible tube encased by special quartz glass and an electronic control gear used for controlling the power supply. Waterproof power connectors and a compact size allow its use as a submersible lamp in fresh water tanks. The UV lamp is activated every 4 hours for 15 minutes. This short amount of time is sufficient to
disrupt the transfer of DNA during cell division so that the bacteria die. Sterilisation performance tested and proven by the Hygiene Institute of the University of Heidelberg.
For a tank volume of up to 500 litres.

Cable length: 3 m; Nominal voltage: 12 V; Nominal capacity: 12 W;

Silvertex

Conservation capacity up to 40,000 litres

Silvertex protects the water in the tank against recontamination for up to 6 months without any dosing effort – automatically with every new tank filling! Silvertex prevents the formation of biofilm and thus protects not only the water but also the entire fresh water system. The water is conserved by the automatic dosing of pure silver ions (no nano-silver!) – active agent according to DIN EN 15030.

- Easy handling and comfortable application – self-dosing
- Flexible material – fits almost all tank openings
- Automatic dosing of silver ions with each new tank filling
- Active agent according to DIN EN 15030
- Conserves up to 40,000 litres of water depending on the version
- Pure silver ions without additives such as chlorine or minerals
- Suitable for stainless steel and plastic tanks
- Change recommended 1 x per year
- BAuA (German Federal Institute for Occupational Safety and Health) registration no.: N-108213

Water Filter bluuwater

KT08 KNAUS

105.00

This modern filter system retains up to 99.999 % of bacteria and finest particles on a highly efficient ultra-filtration membrane. It is used to produce hygienically clean water for motorhomes, caravans and camping.

The KT08 filter is only suitable for use with drinking water and is manufactured in food quality. Do not use water of unknown origin or doubtful quality.

Fitted as standard in KNAUS Tabbert vehicles from model year 2022.

The filter must be replaced after 6 months at the latest. It can be installed vertically or horizontally according to the installation instructions. It is essential to use the appropriate quick couplings. From model year 2022, the connection system with quick couplings is pre-installed in KNAUS TABBERT recreational vehicles ex works.

Dim. (H x ø): 190 x 65 mm **300/320** **105.00**

Retrofit Set Water Filter bluuwater

175.00

Retrofit set for the brands KNAUS/WEINSBERG/ TABBERT for recreational vehicles before model year 2022.
Consists of:

- 1 water filter KT08 (with TimeStrip and operating instructions) suitable for KNAUS, WEINSBERG and TABBERT
- 1 holder (filter attachment)
- 1 dummy line with sealing rings (operation without filter, standing time or frost)
- 2 quick couplings suitable for KT08
- 2 stepless ear clamps 13.5 – 16 mm
- 2 cable ties (depending on the mounting option of the holder: cable ties or wood screws)
- 4 wood screws 3 x 16 mm (depending on the mounting option of the holder: cable ties or wood screws)

From model year 2022, the connection system with quick couplings will be pre-installed in KNAUS/WEINSBERG/TABBERT recreational vehicles ex works.

For recreational vehicles before model year 2022.

GERMAN INNOVATION AWARD '20 WINNER

NOMINIERT Deutscher Nachhaltigkeitspreis Design 2021

100 % without chemicals

[1] Reduction of E. coli at a volume flow rate of 2.25 l/min (99.99 % @ 5 l/min, 99.9 % @ 8 l/min)
[2] In exceptional cases (sensor-controlled pumps), the use of an external flow sensor may be necessary.
[3] With an average water withdrawal of 365 hours per year

UV-C LED Water Disinfection

MADE IN GERMANY

The UV disinfection unit by WM aquatec is the first fully automatic water disinfection unit of its kind. It switches on automatically when water is withdrawn and thus guarantees hygienically clean water wherever you are! It was specially developed for operation in motorhomes and uses UV-C LED technology instead of environmentally hazardous gas discharge lamps.

- Water disinfection – 100 % without chemicals
- Disinfection performance up to 99.999 %[1]
- Flow rate up to 8 l/min
- Suitable for submersible and pressure pumps 12/24 VDC[2]
- Mercury-free and without harmful disinfection by-products
- Low power consumption
- Easy to retrofit
- Can be used for over 13 years[3] – with unlimited switching cycles
- No lamp replacement necessary
- Maintenance-free
- Safe operation thanks to internal function monitoring and signalling (optical and acoustic) as well as digital output signal for external status indication
- Connection material (electrical and water-side)

Technical data:
Dimensions (W x H x D): 113 x 159 x 105 mm (without connections)
Recommended flow rate: max. 8 l/min @ 99.9 % sterilisation rate (99.99 % @ 5 l/min, 99.999 % @ 2.25 l/min)
Max. water pressure: 8.3 bar
Water connections: 9/10 mm and 12/13 mm hose nozzle (included)
Service life max.: 5000 h water withdrawal (operating mode)
Ambient temperature max.: 55 °C, recommended water temperature: 0 – 38 °C
Supply voltage: 11 – 18 VDC, max. power: 14 W, current consumption: 0.02 A (standby), 1.2 A (operating mode)
Weight: 900 g **300/440** **599.00**

TW-DES Filters

TW-DES water filters keep water tanks clean and therefore protect pump and boiler. The Comfort model is additionally equipped with an integrated water meter. This means that water treatment agents can be optimally dosed and the tank can be filled as required.

Desolyt Water Disinfection

For installation, a standard or a Uniquick installation kit is required!

- Permanently installed in motorhomes, caravans, boats and yachts
- Chemical-free disinfection with no change in taste thanks to the flow-through method with UV-C light
- Mercury-free and environmentally friendly, housing food-safe and easily recyclable (PETG)
- Safe operation thanks to electronic UVC LED monitoring
- Optical and acoustic displays and warnings
- Units can remain in the vehicle when the system is completely emptied in winter
- Connection options 3/8 inch / 9/10 mm, 12/13 mm, Uniquick (installation kit can be ordered separately)
- Use with all pressure and submersible pumps (IQ series, even electronically controlled pumps)
- Maintenance-free, at least 5000 operating hours
- As suspended particles hinder the penetration of UV-C radiation into the water, we recommend using a TW-DES filling filter for water refilling.

Separate control unit for tight installation conditions.

Certec® Inline Compact Turbo Filter System

LILIE water | light | energy

The Certec Inline compact turbo filter system by LILIE was specially developed as a solution for pressure pump systems in recreational vehicles.

- Innovative LILIE Push-and-Connect
- Cartridges can be exchanged very quickly
- Compact, easy to use and reliable
- Bioelectro DEPOT Plus
- Especially antiseptic and antibacterial
- Highest possible flow rate
- Minimised loss of pressure
- Very high protection against germs
- Extremely high filter performance
- Special activated carbon made of organic coconut
- Extremely high molecular filtering
- Extremely high wide-band absorption
- Integrated ventilation function
- Patented
- System-modular in LILIE TWSWG
- Unique integrated filter system
- Uniquely germ-extracting
- Approved for drinking water

199.95

Certec® Inline Complete Set

Compact, easy to operate and reliable. Highest possible flow rate, minimised pressure loss, with ventilation knob for operation without splashing, incl. robust stainless steel holder for easy click-in of the housing.
LILIE Push-and-Connect valve adapter and quick coupling. High internal diameter, ideal for high flow rates suitable for LILIE TWSWG, quick and easy installation, long-term high and reliable sealing at high flow rates, connection for hoses with an inner diameter of 10 mm. Pressure-resistant and leakproof up to 5 bar.
Consists of housing (303/084), cartridge 6-in-1 (303/083), holder (303/085) and 2 x LILIE Push-and-Connect valve adapter and quick coupling.
Dim. (W x H x D): 18.3 x 32.5 x 12.1 cm;
Weight: 1.4 kg **303/082** **199.95**

69.00

Certec® Inline Cartridge 6-in-1

The Certec cartridge achieves an excellent flow rate and impresses with its extremely low pressure loss.

- Retention value: 0.3 µm, service life: 15,000 litres or 6 months, flow rate: 14 l/min, pressure loss: max. 0.6 bar
- These substances are filtered: asbestos: 100 %, bacteria/fungi/germs: 99.99 %, viruses: 99.9 %, chlorine: 99.9 %, foul odour/taste: 100 %, hydrocarbons: 99.9 %, pesticides/disinfectants: > 98 %, radioactive particles: 99.9 %, dirt/sediment: 99.9 %, heavy metals: 96 %, lead: 99 %, copper, silver: 99 %

All products on this page are made in Germany!

These food-safe plastic canisters are made of environmentally friendly polyethylene (PE). The use of modern tools and machinery makes it possible for the canisters to have a low weight but the highest level of quality. Due to the large opening of the canisters DIN 96 (80 mm), you can easily clean the inside of the canister by hand. Please also note the rich assortment of accessories for our canisters.

Tip

Exhaust Valve

Who is not familiar with this? You want to empty your canister, but no water comes out or it starts to gurgle. The drain cock starts dripping and you do not know why? The reason: There is no more air in the canister. When you want to empty your canister, that is a big problem.
The solution: An exhaust valve, which is easy to install. You only need to position the installation tip on the side of the O-ring on the tap and break through the canister wall with the tip, so that the tip drops inside. Now the exhaust valve is in place. **300/078** **8.95**

Easy to clean by hand!

42.50

Wide-Neck Canister Aquafill

Filling canister for fresh water tanks

With this ideal filling canister, filling your fresh water tank is no longer a problem. Thanks to the lateral, rotating handle, the canister can be moved easily. The exhaust valve ensures easy pouring. The stable spout can be simply stored in the canister after use. Due to the big opening (DIN 96), you can clean it easily by hand.
The folding handle can be locked after use!

Capacity: 16 l; Material: PE polyethylene;

complete set

Fresh Water Tank Display FTA 5

Installation kit for a fresh water tank display for all canister types and fixed tanks with DIN 96 opening. Consisting of a rod tank probe with cuttable rods that can be adjusted to the correct tank or canister height, a 12 m connection cable and a level indicator that can be installed in the vehicle wherever you want it. Installation and operating instructions are included. All parts are delivered ready for connection, no further assembly is necessary.

Filling level display
- Operating voltage: 12 V DC (9 V – 16 V)
- Current consumption: off: 0 mA; on: 35 mA, 12 V
- Installation dimension/depth (W x H): 29/14 x 62 mm

Water level sensor
- Tank opening: 80 mm
- Rod length: max. 370 mm (can be adjusted to tank height)
- Cable length: 12 m

300/349 **105.00**

Tank Sensor SuperSense

259.00

- Works with fresh, grey or black water
- Wireless connection via Bluetooth to the SuperSense app
- Several sensors can be operated simultaneously
- Remote access to the SuperSense app possible
- Additional signal output for external displays and panels

Keep an eye on everything with the optional app.

from 99.00 NEW LILIE water | light | energy

Tank Heater ULTRAHEAT

The heating foil, originally developed for space technology, offers reliable protection at outside temperatures as low as -40 °C.

- Low power consumption thanks to temperature-controlled switching levels
- Insulating special foam for excellent thermal conductivity
- Insensitive to stone impact, as the heating wire covers only approx. 15 % of the surface area
- Overheating-proof, thermostatically controlled with special adhesive coating
- Easy to install by gluing onto all freshwater/ wastewater tanks, even with uneven surfaces and protrusions

Now available for new tank sizes!

If the temperature at the tank drops below 7 °C, the ULTRAHEAT tank heater heats the water. From a temperature of 19 °C, the heating process is automatically terminated.
Nominal voltage: 12 V

is stuck onto the outside of the tank

MADE IN GERMANY

Heating Tape ASS

ASS = **A**uftauen **S**uper **S**chnell (superfast defrosting). When you are **winter camping**, it quickly and reliably defrosts **frozen waste water pipes and valves**; works with a 12 V power port. Defrosting times are pleasantly short and with 70 W, the battery consumption is relatively low. The heating tape ASS is wrapped around the frozen drain pipe and valve. Once the connector is plugged into the cigarette lighter, the ice in the pipe or valve melts. The defrosting time depends on the length and the diameter of the pipe and the current sub-zero temperature. Depending on content, temperature and insulation, defrosting takes between 5 to 60 minutes maximum. Connection cable included.

Technical data: universal plug with 8 A fuse for cigarette lighter and power outlet, temperature difference 65 °C.

TIP: Defrosting can be accelerated if the pipe wrapped with the heating tape ASS is additionally equipped with insulating foam from the HVAC sector. Nominal voltage: 12 V; Nominal capacity: 70 W; Nominal current: 5.8 A; Cable length: 65 cm; Dim. (L x W): 170 x 6 cm;
Weight: 100 g **300/313** **82.90**

39.00 LILIE water | light | energy

No more residual water in the pipes!

Floë – Drain Equipment

for caravans and motorhomes

Floë is an easy-to-install system that uses the air of a car compressor or a foot-operated pump to enable the complete drainage of your water system. This prevents water from stagnating and causing potentially dangerous diseases. Drainage during the winter also prevents frost damage. An easy process that enables you to use your vehicle for a longer period of time during the winter months. **300/069** **69.90**

Diaphragm Pumps for Motorhomes from 99.95

All pumps of the **CLASSIC-** and **SOFTSERIE®** and **IQflo** are 3- or 4-chamber diaphragm pumps for the automatic supply of drinking water. The pumps for reliable water supply in motorhomes. The membrane technology patented by LILIE Pumpen enables precise and controlled dosing. Each pump head is equipped with a non-return valve for over 13 bar. Filters are strongly recommended to protect the pump and water system. All LILIE pumps are dry self-priming and may run dry for a short time.
Pressure = cut-off pressure. Warranty: 2 years.
Nominal voltage: 12 V

4-chamber diaphragm pumps

7.5 litre | 11.3 litre SOFTSERIE®:
The tried and tested diaphragm pumps are equipped with a smooth-running motor and an integrated bypass control. The self-priming pumps can run dry for a short time. The motors are highly efficient and have a very low power consumption. Multiple tests of each produced pump ensure 100 % functionality. The bypass guarantees smooth water flow even at low water consumption. No pulsating water flow anymore!
Taps: 7.5 litres = 3 | 11.3 litres = 4
Static head: 7.5 litres = 2.5 m | 11.3 litres = 3.1 m

Pressure Compensation Tank
For convenient water withdrawal. An air bubble with constant pressure is enclosed by a flexible membrane. The pressure of the air bubble is preset to 1.4 bar and can be changed using a bicycle pump. Optimum function when this value is close to the restart pressure of the pump. Mounting hole 105 mm. Capacity: 0.75 l;
Dim. (W x H x D): 123 x 200 x 114 mm;
Weight: 383 g **303/129** **54.95**

14 litre SMARTSERIE™:
The 5-chamber diaphragm water pump with electronic control is characterised by its high performance and a special design that enables soft and smooth water pumping without splashing and pulsation. The water pressure is constantly being monitored and regulated by an integrated sensor. Its signals are transmitted to the microprocessor-controlled electronics in the base. These electronics dose the water as needed by regulating the engine speed and flow rate. The pump is protected against over- and undervoltage and encapsulated to keep moisture out. Its diaphragm is made of one piece. Thus, it is very sturdy and resistant to pressure.

Smart LP1001
Pressure: 4.5 bar
Nominal capacity: 83 W
Nominal current: 6.9 A
Output: 14 l/min
Dim. (W x H x D): 145 x 123 x 230 mm
Weight: 2.8 kg **300/117** **352.50**

LILIE water | light | energy

powerful and quiet

Diaphragm Pump IQflo® IQ111

Let water flow the smart way. The patented IQflo® technology controls the water flow smartly and quietly using modern, combined microcontroller, sensor and fluid technology. IQflo® makes your camping life more comfortable! Please note that the IQflo® technology is especially effective when all components of the drinking water system WeißGELB® work together.

Gain comfort
- Comfort like at home
- Up to 25 dB quieter than comparable solutions
- Holistic drinking water system WeißGELB®

Gain performance
- Powerful; powerful shower jet
- 5-year warranty on the motor
- Long service life
- Minimised power consumption
- No separate pressure compensation tank

Save stress
- Powerful with constant water temperature
- Quiet even when used at night
- Flow-controlled regulation system

Pressure: 2.4 bar
Nominal voltage: 12 V
Nominal capacity: 70 W
Nominal current: 6.5 A
Output: 11 l/min
Dim. (W x H x D): 22 x 11.5 x 13 cm
Weight: 1.9 kg **303/068** **229.00**

Accessories **10.50**

Screw-On Filter

Is screwed directly onto pumps of the CLASSIC-SERIE™ and the SOFTSERIE®. A fine-meshed, stainless metal filter prevents damage to the pump and water system. The screwed-on, transparent filter cup enables easy cleaning and is suitable for drinking water. The wing nut facilitates installation so that the filter remains movable even after installation. Connection: ½"; Dim. (W x H x D): 8.5 x 7.2 x 4.8 cm
300/295 **10.50**

Diaphragm Pump 4-Chamber SOFTSERIE®

Runs particularly quietly and smoothly thanks to the soft mechanical bypass control.
With the **SOFT**SERIE®, the **CLASSIC**SERIE™ has been further improved. Thanks to the unique, flow-optimised 4-chamber diaphragm, a smooth-running motor and integrated bypass control at the heart of the pump, the water flow is particularly smooth and quiet. Each pump head has a non-return valve for over 13 bar. Both when opening and when closing the tap, the pump remains quiet without rattling.
Scope of delivery: ready-to-connect pump with 2 screw-on nozzles 10 mm and instructions for use. Nominal voltage: 12 V; Dim. (L x W x H): 205 x 125 x 110 mm; Weight: 2.02 kg

Installation Kit Leise Sohle

For all LILIE, LILIE by SHURflo pumps (except SMARTSERIE™). Reduces sound transmission from the pump to the vehicle as it is mounted on rubber. The pump is simply plugged on. Secured by self-locking nuts. The pump is attached to the vehicle with drive-in nuts. Set contains assembly instructions and four vibration absorbers, nuts, drive-in nuts and sound buffers each.
300/178 **17.75**

Pressure Diaphragm Pump

Automatic drinking water pump with bypass control.
- High delivery rate with pulsation-free operation
- Very quiet due to four-chamber membrane technology and fully rubberised anti-vibration feet
- Flow rate up to 11.6 l/min
- With adjustable bypass control
- Adjustable pressure switch (presetting: 1.4 – 2.8 bar)
- Safe to run dry
- Self-priming up to a height of 4 m
- Materials suitable for drinking water
- Incl. stainless steel pre-filter strainer and hose connections
- Compatible with UV-C LED water disinfection and sterile filters by WM aquatec

Technical data:
- Max. delivery rate: 11.6 l/min (open flow)
- Cut-off pressure: 2.4 bar (adjustable from 1.4 – 2.8 bar)
- Water connections: 12/13 mm hose nozzle (1 x straight, 1 x angled)

Matches the UV-C LED disinfection unit by WM aquatec perfectly. Germs do not stand a chance!

City Water Regulator Colorado

The Colorado city water regulator is an outdoor water connection for the direct supply of your vehicle's water system. Tanks or cans are not necessary. The integrated regulator with non-return valve is suitable for input pressures of up to 12 bar and reduces them, depending on the version, to an output pressure of 0.7 bar. The closing pressure is 1.1 bar. The Colorado water regulator is located inside a dyed UV-resistant ABS housing. When not in use, the housing is closed with a snap-on lid made of the same material. The hose is connected with a common hose coupling at the input side. The internal dimensions of the hatch are 90 x 110 mm. Outlet pressure 0.7 bar, closing pressure 1.1 bar in a rectangular box with lid.

REICH WATER SOLUTIONS

- Made of a special material that meets even the latest and strictest regulations for drinking water and food in Germany and Europe even up to 90 °C
- Installation – simply plug the pipe into the UniQuick fittings, without screws, adhesives or welding
- Guaranteed to be 100 % leakproof up to 80 °C up to a pressure of 6 bar
- Frost-proof
- UniQuick is extremely resistant to mechanical damage
- With UniQuick, radii can be laid without bending the pipe
- Even in the area of the fittings, the flow remains
- Due to the stability of the pipe, you can lay it accurately without having to worry about the formation of "water pockets"
- Check valve 1: for 12 mm pipe
- Check valve 2: 1 side with nozzle 10 mm, 1 side for 12 mm pipe
- Check valve 3: 1 side with thread 10 mm, 1 side for 12 mm pipe

LILIE Drinking Water System WeißGELB

- Certified according to EWG, DVGW and KTW
- Drinking water certified according to DIN 2001-2
- Optimised flow for ideal (high) water transport
- Dimensions suitable for LILIE TW hoses Native and Eco Native and for LILIE hose clamps
- High pressure resistance up to 15 bar (at 20 °C)
- Thread lengths ideally suited for screwing in (water tanks, valves, etc.)
- Temperature range: 100 °C short-term, 90 °C long-term
- Reliably leakproof, lightweight and quickly installed
- Improves the quality of the drinking water

LILIE water | light | energy

The LILIE pipe connection system GrauGELB® 40 mm with double O-ring connects pipe, ball valve and sleeves not only quickly and easily, but also securely and tightly. O-ring 1 is fixed in the outer ring grooves of the pipe ends. O-ring 2 is located in the inner ring grooves of the valve body and the sleeves. When the pipe end is inserted, the two O-rings engage in the respective complementary groove on the other component. The double O-ring seals and simultaneously secures the connection. The connection stays flexible, so that it can be readjusted. In contrast to the commonly used gluing, the connection can be loosened and reassembled if necessary. Stress cracks are avoided as well. All of the connectors shown can also simply be plugged onto the pipe.

space-saving – installed quickly – can be controlled remotely

- Drinking water certified
- High discharge capacity
- Manual emergency operation
- Robust and durable
- Flexible
- Resistant to hot water

Is needed to control the valves.

Rocker Switch with Pole Reversal Function

5.50

Changeover switch for electric ball valve system.
I = open
II = close
0 = without power/off
Dim. (W x H x D): 2 x 2.5 x 2.4 cm

303/059 **5.50**

You can find the matching pipe connection system and connectors on page 420.

Ball Valve – Electric Incl. Toggle Switch

The electric ball valve system by LILIE can be used to comfortably open, close and drain (waste-)water circulation systems. A unique combination of various special functions ensures long-term reliability. Valve body with high-performance drive. The valve is controlled via a 4-pole switch.

Single-Lever Mixer Lucca

The single-lever mixer LUCCA is a modern synthetic tap. The high functionality is emphasised by the swivelling water outlet (360°), the ceramic cartridge that has proven itself over many years, the easy-to-clean surface and the removable water outlet with cleaning wrench included as standard for descaling and cleaning. The amount of water and the temperature are individually adjustable. For application in caravans or motorhomes. Spout length: 164 mm.
With switch. Colour: chrome; Material: plastic; Connection: Comet a; Pressure: 3 bar; Installation height: 305 mm; Mounting hole: 33 mm

Information

Recessed sinks are the easiest way to retrofit a washbasin. Depending on the substructure, you cut a plate to size (plastic or wood), saw in a corresponding cut-out and insert the recessed sink. Seal it and then you are done. The fittings find their place on the base plate. This way, you can retrofit any washbasin. These washbasins (except stainless steel) are made of 4 mm polystyrene base material. Even at the lowest and most sensitive point (at the drain), there is enough material to withstand the pressure of the drain.

Big bristle brush with container for your motorhome bathroom. The large brush allows you to optimally clean the toilet without scratching it. Dim. (H x ø): 36 x 10.5 cm

301/042 **11.60**

NEW

Now also available in matt stainless steel.

29.50

Toilet Brush Extraclean

A must-have for chemical, dry and other toilets in motorhomes, caravans and boats. The innovative brush head is easy to clean and reaches all nooks and crannies without damage thanks to the flexibility of the different bristles. One side (brush) is gentle and efficient, the other side (scraper) is powerful, e.g. for incrustations. Fix the adhesive holder in the desired place, hook it in, done! The brush head can be replaced if necessary. Can be removed without residue and reused. Sticks to almost all surfaces.
Dim. (W x H x D): 14.5 x 31 x 11.5 cm

THETFORD Portable toilets

As the inventor of the Porta Potti, Thetford can draw on many years of experience to meet customers' needs.
The Porta Potti is a compact and lightweight closed sanitary system. You can place the portable toilet almost anywhere.

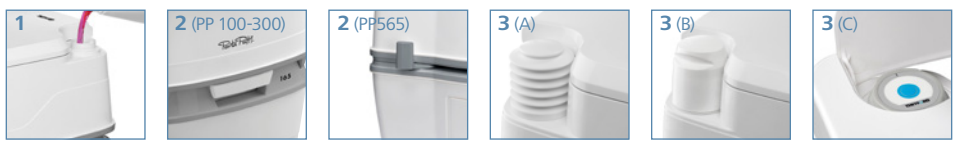

The Porta Potti consists of two parts:
1. Flush water tank/flush system: The flush is always quiet, yet powerful and fresh.
2. Waste tank: the clever alternative to a sewage system.

1. Flush Water Tank

The upper part is a combination of flush water tank and toilet bowl with removable seat and lid.

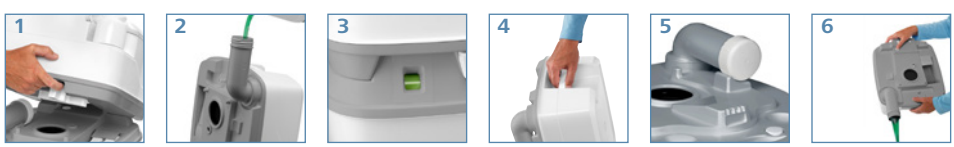

1. Fill the flush water tank with water and the flush water additive Aqua Rinse Plus.
2. Use the handle to open the closing plate.
3. Flush the toilet with the manual bellows (A) or with a piston pump (B) with three or four short flushes for optimal flushing. An electric pump (C) flushes the toilet automatically.

Spare Parts? **Online!**

More? **Online!**

2. Waste Tank

The lower part consists of:
Pouring spout for clean disposal. **Vent button** – prevents splashing during emptying.
Closing plate – closes the tank to prevent odours.

1. Waste tank: prepare for use. Remove the two tanks using the latch at the back.
2. Add 3 litres of water and the appropriate dosage of Aqua Kem Blue or Aqua Kem Green for perfect odour control and easier emptying.
3. Check the waste tank level indicator (depending on the model) to see if the tank needs emptying.
4. Simply transport the tank to the designated disposal station on the campsite (if none is available, a normal toilet connected to the waste water infrastructure will also suffice).
5. Turn the pouring spout. Remove the lid.
6. Press the vent button and hold it down with your thumb while the pouring spout points downwards. Empty the waste tank.

This effective system requires fewer pumps.

Type 976

Type 972

These portable toilets are small but very convenient and space-saving. They provide greater hygienic comfort in your motorhome, on your boat or on camping trips. The scratch-resistant, matt surface is easy to clean. In combination with the robust design of the highly leakproof polyethylene version, the toilet will look like new for a long time.
- Portable, can be taken anywhere
- Cleaner thanks to extra long, rotating drain pipe
- Fewer pumps thanks to operation at the touch of a button
- Less splashing water, as the tank level indicator prevents overflow
- Comfort like at home on a standard size seat

Special features: level indicator for waste tank, level indicator for flush water tank

Type 972
Seat height: 310 mm
Flush water tank: 8.7 l
Waste tank: 9.8 l
Dim. (W x H x D): 333 x 317 x 387 mm

Portable Toilet BI-POT

FIAMMA home is everywhere

The portable toilet is easy to use and equipped with an external vent valve and a robust one-piece base. The waste tank is removable and the convenient hand pump has a large flush volume. The toilet is easy to lock with stainless steel hooks.

Bi-Pot 34
Seat height: 340 mm
Flush water tank: 15 l
Waste tank: 13 l
Dim. (W x H x D): 435 x 360 x 340 mm
Weight: 4.5 kg

301/000 **120.00**

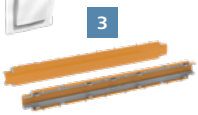

Bi-Pot 39
Seat height: 392 mm
Flush water tank: 15 l
Waste tank: 20 l
Dim. (W x H x D): 435 x 360 x 392 mm
Weight: 4.6 kg

301/001 **121.00**

Accessories

1 | Super Absorber

Simply place a sachet in the toilet compartment before it is sealed to absorb liquids. The bio-film made from PLA dissolves automatically and the granules absorb up to 400 ml of liquid. 20 pieces

301/723 **4.50**

2 | Barrier Film Liner

Faeces and toilet waste are hygienically sealed in multi-layer barrier film. Odour-proof storage for several days is possible. One film liner is sufficient for approx. 40 bags. 2 pieces

301/722 **27.00**

3 | PTFE Tape

The PTFE (Teflon) tapes are positioned over the welding wire and prevent the hot polymer from adhering to the welding jaws during the welding process. To maintain the quality of the welds, you have to change the two tapes after approx. 1500 welds. **301/724** **39.95**

Water Protection Cover (w/o pic.)

Made of special sailcloth. Protects against water ingress caused by e.g. jet water during showering. Sewn to fit precisely, with high hydrostatic head.

301/725 **69.00**

Liquid Insert

The Clesana C1 liquid insert is the perfect accessory for maximum independence. Thanks to the insert, you can do number one without a bag. Hygienic and easy to clean. Swiss Engineered.
Capacity: 1.7 l **301/732** **119.00**

Clesana

clesana

1,440.00

completely without water

completely without chemicals

The first portable, waterless toilet with bag sealing. Easy to install and retrofit via round base or L adapter. Spend the night away from campsites without giving up the convenience and cleanliness they provide – thanks to "thermal pressure sealing". A key objective in the development of the C1 was to ensure excellent environmental compatibility without compromising on hygiene. With the C1, you do not need any sanitary additives and save water at the same time.
Power consumption standby: 0.28 W
Power consumption sealing process: 0.55 Wh
Material: ABS acrylonitrile butadiene styrene
Seat height: 47.8 cm
Nominal voltage: 12 V
Nominal current: 22 A

Please note: Supplied with accessories for initial equipment.

Scope of delivery:
- 1 barrier film liner
- 1 pack of super absorber
- Software version 0.1.91

Clesana C1

Macerator Toilet Elegance

completely quiet

Macerator toilet for installation in boats, motorhomes, caravans or mobile homes. It can be connected directly to the waste tank or waste water system and operates very quietly. In addition, automatic flushing makes it more convenient. An indicator light on the control panel can be connected to the waste water system and indicates when the waste tank must be emptied. The ceramic bowl is stylish and easy to clean. A powerful macerator crushes not only faeces, but also has no problem with shredding toilet paper – without any chemicals. Extremely economical water consumption.

Technical data:
- Current drain pump: 40 A
- Water consumption per flush: 0.5 – 2.7 l
- Maximum head: 11 m
- Maximum distance: 90 m

Connectors:
- Inlet pipe: 1/2"
- Drain pipe: ø 40 mm (outside)

Seat height: 400 mm
Nominal voltage: 12 V, 24 V
Nominal current: 40 A
Dim. (W x H x D): 370 x 460 x 430 mm
Weight: 22.5 kg **301/295** **1,339.00**

Trelino® Composting Toilet

no chemicals

Trelino® declares war on chemical toilets!
Trelino® composting toilets are made in Germany and allow you to travel more freely, more sustainably and without using as many resources. The Trelino® composting toilet needs neither water nor chemical additives. This eliminates the need to plan a route along waste disposal stations and gives you more flexibility in your choice of destinations. The clean and odourless separation of liquid and solid waste protects the environment. No matter whether you want a toilet for your tent, van, motorhome, summer house, boat or holiday home, Trelino® will fit anywhere you cannot use conventional toilets.

Dry Composting Toilet TTT

from 1,069.00

MADE IN GERMANY

KAMPMADE®

Flexible, chemical-free disposal
With the dry composting toilet (TTT for short), you do not need to use any chemicals. Disposal can therefore be carried out via any residual waste bin and toilet.

Hygienic
The surfaces of the TTT can all be wiped. The toilet seat is magnetically fixed and can therefore also be removed. A vent is optionally available.

Recycled material
The body of the TTT is made of a special board material that feels and looks like wood, but is made of over 60 % waste product from the food industry (rice husks).

Handmade in Germany
More than 70 years of passion for furniture and creativity meet the highest quality standards, paired with a unique design. Designed to enhance your feeling of space, this toilet fits perfectly into the corner of a room.

Material: Ultra Performance Board (UPB) (body); recyclable ABS plastic (divider insert).
Colour: nature

335.00 Cactus

Cactus II

MADE IN GERMANY

Cactus I

Without water and electricity!

Dry Toilet Cactus®

Cactus dry toilets without water and electricity. The Klean-Contor dry toilet can be used worldwide without any problem – regardless of time and place!
The Cactus dry toilet is of advantage wherever you lack a hygienic possibility of using the toilet or when you are sick.
The Cactus dry toilet works with special disposable LidBags which provide an odour- and above all germ-free seal. The extremely hygienic, leakproof lid bag system can be disposed of with the rest of your residual waste.
Thanks to the hermetic sealing of the hygienic insert and lid and the direct disposal with household waste, cleaning the container with unmanageable amounts of disinfectants is no longer necessary. The Cactus dry toilet only needs a new toilet bag with a wetness buffer if necessary. Loadable up to 120 kg.
Scope of delivery: toilet, 1 lid bag, 1 wetness buffer.

Cactus I Seat height: 500 mm
Dim. (W x H x D): 460 x 495 x 390 mm

WC PURE Hygiene MADE IN GERMANY 20.95

WC-PURE Inlay

PURE inlays protect the toilet bowl from contamination. Furthermore, the inlays provide protection from splashing water and the associated risk of infection. The paper inlay is very easy to use. The PURE inlay is placed in the toilet bowl and flushed down after use. To flush it away, you only have to use the economical flushing. The toilet inlay dissolves immediately after flushing and is also not an additional burden for the waste water. To be used with household toilets, chemical toilets as well as bedpans and children's potties.
Content: 50 pieces **301/703** **20.95**

Toilet Seat Cover

Toilet seat covers prevent contact infections and make you feel less uncomfortable when using unfamiliar toilets. Content: 25 pieces

MADE IN GERMANY 3.75

delivery without bucket

Toilet Liner Superbag

Unfold it, put it in a sturdy 10 litre bucket and pull it over the edge. The superabsorbent in Superbag absorbs all liquids completely and immediately. After you are done, take the Superbag out of the bucket, close it using the drawstring and dispose of it as residual waste.
The bucket is not included in delivery.
301/091 **3.75**

Pocket Toilets roadbag® and ladybag®

The inner bag of roadbag® and ladybag® contains a superabsorbent (polymer crystals) that quickly absorbs up to 1000 ml of urine and solidifies it into a firm gel – without skin contact and in a hygienic, odourless way. However, the average amount of urine that is released lies between only 300 to 500 ml. Completely leakproof – the perfect disposable urinal.
After urinating, it is sealed by using the adhesive strip and simply disposed of in the residual waste bin.
Please do not use while driving! Children should only use roadbag® and ladybag® under adult supervision. Do not swallow the contents or the superabsorbent. If it is stored in a cool and dry place, it can be kept practically indefinitely.

roadbag® Das Taschen-WC für Männer from 2.95

MADE IN GERMANY

roadbag®

Every man has been in situations in which he had beads of sweat on his forehead and would have given anything for a toilet. With roadbag®, these situations are no longer a problem!
Whether you are in a traffic jam or at a festival, camping or on a sports plane – roadbag®, the convenient disposable toilet for men and boys, makes life easier wherever you are.
Roadbag® is ready for immediate use, handy, safe, hygienic and convenient.

Warning!, H315, H319, EUH208

MADE IN GERMANY

Toilet Additive abtyCAM

The abtyCAM toilet additive is a faecal decomposer for chemical toilets and best suited for use without a fixed water connection. The product has a pleasant citrus scent that lasts even at higher temperatures above 35 °C. In addition, abtyCAM toilet additive can be added to the toilet's flush water tank and thus prevents slime build-up in the tank. At the same time, a pleasant citrus scent is also sprayed here. BauA (Federal Institute for Occupational Safety and Health) regulation no.: N-107861

NEW

MADE IN GERMANY

suitable for use on most surfaces

Berliner Sanitär-Elixier

Berliner Sanitär-Elixier is a concentrated, highly effective, red toilet additive for use in portable toilet tanks. The product does not use aggressive chemicals and is based on plant extracts as well as natural oils. It is non-hazardous and has an excellent effect against unpleasant odours. It decomposes commercially available toilet paper, prevents deposits in the tank and is environmentally friendly. Berliner Sanitär-Elixier is completely biodegradable and has good material compatibility (rubber, plastic, glass or metals are not attacked). It is free of acids, alkalis, solvents and biocides and is non-flammable.

MADE IN GERMANY

no chemicals

Sanitary Additive mikiGREEN® Outdoor.Mobile.Toilette

With mikiGREEN®, you are on the road to sustainability. This sanitary additive liquefies faeces, removes deposits and neutralises unpleasant odours without using chemicals. Portable toilets, grey water tanks and pipe systems in motorhomes, cabins and boats are reliably cleaned. Thanks to its purely natural, microbiological formula, the additive is gentle on bodies of water and is also ideally suited for sewage treatment plants.

500 ml	31.90 / l	**450/316**	**15.95**

BIODOR

15.50

MADE IN GERMANY

Sanitary Additive Biodor Eufakto

The microbiological sanitary additive permanently removes odours from drains and toilets. The additive systematically breaks down organic deposits in tanks, pipes and siphons. The toilet paper disintegrates. The waste water system becomes clean and odour-free. The additive is easily biodegradable and environmentally friendly. Eufakto does not cover odours, but instead ensures long-lasting hygiene.

Application areas: waste water tanks, waste tanks, drains, camping toilets, portable toilets, floor drains, grey water holding tanks, siphons, etc.

1000 ml	**450/451**	**15.50**

For an explanation of the pictograms and the hazard and safety information, see catalogue page 858 and www.frankanafreiko.de!

- Sustainable cleaning without aggressive chemicals
- 100 % biodegradable
- Harmless to humans, animals and the environment
- Developed without animal testing
- Odours are completely neutralised
- Excellent price-performance ratio
- Highly concentrated and very economical

awiwa®

MADE IN GERMANY

1|Toilet Bowl Spray flush spray

The awiwa flush spray is a microbiological toilet bowl spray for portable toilet systems that receive their flushing water from the central fresh water tank, such as in caravans, motorhomes or on boats. It forms a protective film, which makes it harder for residues to stick to the toilet bowl and subsequently saves water while flushing. The gentle formula makes the toilet more durable. Does not contain aggressive chemicals and is easily biodegradable.

500 ml 25.90/l **301/607** **12.95**

2|Flush Water Additive flush

Environmentally friendly liquid sanitary additive for toilet flushing. Awiwa flush relies on the natural effect of microorganisms, keeps the flush water clean, ensures even flushing and a fresh scent in the toilet bowl. It creates a protective layer against bacteria in the flush water tank and in the toilet bowl. Suitable for toilets with separate flush water tank. One litre is enough for 20 dosages.

1000 ml 22.95/l **301/609** **22.95**

3|Waste Water Additive fresh

Microbiological additive for odour neutralisation in grey water tanks and pipes. Awiwa fresh prevents unpleasant odours from drains, keeps grey water tanks and pipes clean, prevents dirt and grease deposits and makes emptying the waste tank easier. Free of chlorine and aggressive chemicals.

1000 ml 15.95/l **301/700** **15.95**

4|Toilet Additive wc mobil ★

With its highly effective formula of enzymes and natural microorganisms, the microbiological toilet additive awiwa wc mobil breaks down faeces and toilet paper, ensuring splash-free emptying of the waste tank: no clumps, no clogging and no smell. Unpleasant odours are removed instead of covered. Hygienically clean and free of chemicals for environmentally friendly disposal. The tank content can be flushed down the toilet. Suitable for all portable toilets in motorhomes, caravans or boats. Highly economical: 1 l is enough for 20 applications.

1000 ml 22.95/l **301/606** **22.95**

5|Fresh Water Tank Cleaner oxi ★

Awiwa oxi powder cleans fresh water tanks and pipes in motorhomes, caravans or boats quickly and easily without leaving harmful residues and without rinsing. It dissolves dirt and deposits without affecting pipes and seals. The product ensures that you save a considerable amount of time and water. After a reaction time of only 2 hours, the mixture can already be pumped out. Rinsing with fresh water is not necessary. The grey water tank is cleaned as well when you drain the mixture into it. Awiwa oxi is based on active oxygen and minerals. It is odour- and tasteless as well as free of chlorine and artificial additives. Incl. dosing spoon.

500 g 39.90/l **301/701** **19.95**

6|Dosing Aid awiwa

The awiwa dosing aid fits onto all round awiwa 1 l bottles and makes precise and easy dosing of awiwa cleaning agents possible. With a scale of 5 ml to 20 ml in 5 ml steps.

Accessories

NEW

299.00

Ventilator Compact quick

The ventilator switches on automatically as soon as the toilet lid is opened and extracts unpleasant odours directly at the toilet bowl via the aerodynamically adapted extraction shaft. A powerful filter removes these odours, resulting in a pleasant room climate and a noticeable increase in comfort in a confined space. The ventilation system integrates all electrical and other components and is effortlessly glued to the toilet without the need to drill holes in the seat, tank or vehicle.

SOG – Electric Toilet Ventilation from 205.00

MADE IN GERMANY

SOG makes it possible to use the toilet without having to worry about bad odours – even without sanitary additives.

How does it work?
A specially developed, small high-performance fan, which switches on automatically when the toilet is opened, creates a negative pressure in the waste tank:

- This creates suction (German: "Sog") at the slider opening. This suction draws in fresh air as well as the odours produced during use and directs them outside. The drawing in of air acts like a seal and prevents all unpleasant foul gases from escaping from the tank. With each use, more air (oxygen) is sucked into the cassette. Water is added each time you flush.
- Even after automatic switch-off (closing the slider), the system is permanently ventilated thanks to a pipe or hose connection to the outside that is always open. This supply of oxygen accelerates the decomposition process.

Induction Stove Dometic CVI1350 And CVI1525

The induction stoves with top-modern induction technology by Dometic makes quick and comfortable cooking on the campsite possible. They are equipped with a easy-to-clean glass surface and Sensor-Touch operating elements for the handy regulation of the cooking temperature in 9 steps. The stoves can be heated up especially quickly which is why an automatic overload protection is integrated. Moreover, they can be combined easily with the matching sink.

Extractor Hood CK 500

Extraction hood with touch control and three-stage fan.
The extraction hood CK 500 fulfils the highest comfort requirements. Fan speed, time and lighting can be simply adjusted by touching the elegant control panel made of heat-resistant glass. The front strip, the hygienic stainless steel surfaces and the 5-layer metal filter are easy to clean.

Advantages of the CK 500:
- Temperature-resistant glass control panel
- Touch control for fan speed, time and LED lighting
- Three-stage fan
- Washable metal grease filter
- Weatherproof roof dome
- With timer

Technical data: capacity: max. 100 m³/h; LED lighting (3 W, warm white, energy consumption in 1000 hours: 3 kWh); roof thickness: from 25 mm; exhaust hose: 1.20 m with attachment set for the exhaust hose ø 60 mm.

integrated work lights

Activated Carbon Filter

475.00

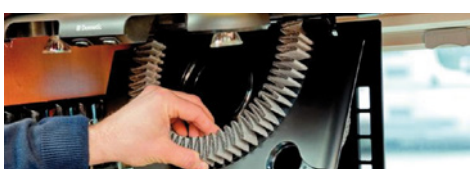

Extractor Hood CK 2000

The Dometic CK 2000 extractor hood for motorhomes uses the principle of air recirculation. Hence, installing a roof ventilator is not necessary. Cooking fumes are drawn upwards along the centre line of the unit, the cleaned air is returned via the side and front vents. The resulting air dome catches the cooking fumes and ensures good suction power.

Advantages of the CK 2000:
- Easy installation as no exhaust air hoses have to be installed
- Washable metal grease filter
- Exchangeable activated carbon filter
- Easy access to both filters
- Two-stage fan
- Integrated work lights

Technical data: capacity: 38/45 m³/h; 2-stage fan, 2 built-in halogen lights (2 x 10 W/12 V, GU4, 2 lighting levels), washable metal grease filter, exchangeable activated carbon filter.

Stainless Steel Stove Turbo

Stainless steel stoves with new gas technology:
The Turbo effect increases the swirl of gas and oxygen. Hence, combustion is more concentrated. This reduces consumption significantly and saves energy. At the same time, the efficiency of heat production is increased.

All stoves are equipped with a safety pilot and piezo ignition. The high-quality processing of stainless steel has a high corrosion resistance and significantly extends the life of these stoves.

Suitable for 30 mbar and 50 mbar without switching. Details match performance at 30 mbar.
Hose and regulator not included.
With safety pilot.

2 Cook 3

Thanks to the automatic piezo ignition, the handy stoves with two pan stands are easy to ignite. Removable windbreaks on the sides prevent the gas flames from being blown out by the wind. The units are stable, have non-slip rubber feet and are supplied with a convenient carry and storage bag. Supplied without hose and regulator. Gas consumption: 2 x 160 g/h.
Without safety pilot. Nominal capacity: 4 kW; Gas consumption: 320 g/h; Dim. (W x H x D): 55 x 9 x 30.7 cm; Pack size: 60 x 32.5 x 12.5 cm

2 Cook 3 Turbo

Enter the world of innovation with the new 2 Cook 3 Turbo. The new burner technology with inner flame provides higher heating power on the cooking surface and can reduce cooking time by up to 20 %.

The two burners are located lower in the housing and are therefore less susceptible to wind. Each burner is operated independently with its own rotary knob and piezo ignition. In addition, the 2 Cook 3 Turbo has a safety pilot that allows it to be used indoors.

The rubber feet prevent the stove from slipping. After use, the lid can be closed and stowed away in the included carry bag.
Grill surface: 2 x 25 x 27 cm
Gas consumption: 2 x 160 g/h.
With safety pilot. Nominal capacity: 4.4 kW; Gas consumption: 160 g/h; Dim. (W x H x D): 55 x 9 x 30.7 cm; Pack size: 60 x 32.5 x 12.5 cm

Primetech Stove Set

Thanks to the effective windbreak and a pot with an integrated heat exchanger, the gas consumption is about 50 % lower compared to conventional stoves. The adjustment valve with pressure regulator ensures a constant power output. In addition, the burner has a patented design that prevents the flame from flashing if the stove falls over. The stove is set up quickly and is immediately ready for use. For transport, all parts can be stored in the pot. The second pot is supplied without a heat exchanger.

The PrimeTech Stove Set consists of:
- Windbreak with integrated burner
- 1 PrimeTech pot with ceramic non-stick coating
- 1 aluminium pot hard anodised (stackable)
- Lid with integrated colander
- Pot gripper
- Piezo ignition
- Insulating bag

Gas Stove Moja Stove

The single burner is light, compact and easy to transport. Also ideal as an ultra-compact kitchen solution in a boat/van. If you want to use a large pan/pot, simply remove the cover. This gives you extra space to place the pan in the centre of the flame. The powerful 3000 W burner with precise flame control allows you to cook and fry with just the right amount of heat. The stainless steel pan holder and drip tray can be easily removed for cleaning. A wood-coated handle makes the stove easy to transport and closes the stove securely for transport. **Supplied without gas cartridge.**

Without safety pilot. Operating pressure: cartridge; Nominal capacity: 3000 W
Gas consumption: 180 g/h
Dim. (W x H x D): 29 x 32 x 27 cm
Pack size: 29.5 x 26.6 x 7.8 cm
Weight: 2.3 kg **310/465** **204.95**

Gas Stove Kinja Stove

This two-burner stove is compact, lightweight and easy to transport. It comfortably accommodates two large pots. Each burner can be lit and operated independently. Made from die-cast aluminium, this slimline stove will be a faithful companion for years to come. The stainless steel pan supports and drip tray are easy to remove for cleaning. Simply close for storage. **Supplied without gas cartridge.**
Without safety pilot. Operating pressure: cartridge; Nominal capacity: 3000 W; Gas consumption: 360 g/h; Dim. (W x H x D): 47.3 x 32 x 32 cm
Pack size: 47.5 x 29.5 x 7.8 cm
Weight: 3.7 kg **310/468** **224.95**

The Flameguard™ burner technology offers optimum flame protection, even in moderate winds. It has a separate piezo ignition, a reinforced lid for storage and transport, an extra-strong coating on the hob and a windbreak and is perfect for high temperatures. Cleaning is easy thanks to the removable pan supports and the windbreak. The housing is made of painted steel, the knobs and pan supports are made of enamelled steel.

30 mbar	**310/703**	**14.90**

Information

With the Flameguard™ technology, you can start cooking quickly even in windy conditions. The boiling time for 1 litre of water is less than 12 minutes at a wind speed of up to 3 m/s (boiling time of 90 °C).
Thanks to the new Flameguard™ technology, optimum flame protection and lower gas consumption are possible.

Gas cylinders and gas cartridges are not included with stoves, barbecues and lanterns!

Portable Gas Barbecue

Cook and grill at the same time. High-quality stove with three cooking plates and one separate grill surface of approx. 1580 cm². Cook delicious side dishes on the upper cooking plates while chicken or fish is being grilled underneath. No spurting flames as the heat comes from above: If grease drips down during grilling, it does not hit any heat source. The grease drip tray is dishwasher-safe. The barbecue is easy to transport and stow away. Without safety pilot. Operating pressure: 50 mbar; Nominal capacity: 5200 W; Gas consumption: 378 g/h

360 Grill CV 149.00

Table barbecue 360°, anthracite, with durable and reversible die-cast aluminium grate, piezo ignition, incl. protective lid, carry bag, hose and regulator. The Campingaz® 360 barbecue offers extensive grilling and cooking options with the integrated, ribbed grill grate, a flat contact grill grate and pan supports for cooking just like on a stove.

with protective lid

CV 470+

No tools are needed for this pre-assembled table barbecue. You can get started straight away – without the hassle of setting up and assembling.

Whether you are on a city balcony or on a camping trip, you can grill easily and comfortably sitting at the table. Thanks to the reversible grill grate and the integrated pan supports, it offers you a variety of grilling and cooking options and there are no limits to taste.

The "push & turn" ignition for convenient lighting and a 360-ring burner with excellent flame distribution for even heat distribution across the entire barbecue make it easier to eat well outside.

A durable die-cast aluminium contact grill grate with non-stick coating and a dishwasher-safe fire/water tray ensure that the barbecue is quick and easy to clean. Grilling surface: ø 30 cm. Without safety pilot.

Party Grill™ from 105.00

CAMPINGAZ®

Multi-functional, compact stove that can be transformed into a barbecue within seconds. All devices from the Party Grill™ series are a multi-functional alternative to traditional stoves and compact barbecues. They are easy to clean and available in three different sizes and for different energy sources. Easy to transport, with pan support, reversible grill and contact grill grate, grill grid and lid. The tray underneath the Party Grill™ 600 R can be used to store utensils and provides more stability. The grill surface is non-stick coated and the heat supply is very finely adjustable via a rotary knob. Grease and meat juices drip into the grease pan, reducing smoke and spurting flames. The convenient legs can be easily attached and stowed away in the barbecue for transport or storage (delivery does not include gas cylinder).

200 CV
With piezo ignition and Easy Clic™ connection for valve cartridges CV 300 Plus and CV 470 Plus. Scope of delivery: pan support, grill grate and lid.

Party Grill™ 400 Caravan Connect

The Campingaz Party Grill™ 400 in the 30 mbar version with caravan connection can be safely and easily connected to your vehicle's gas system. This means that in the future you will not have to carry the heavy gas cylinder out of the vehicle. The Party Grill™ is an easily transportable gas stove with which you can prepare many different dishes such as pasta, pancakes or classic grilled food. The convenient lid not only protects the Party Grill during transport, but can also be used as a wok. The grill surface is non-stick coated and the heat supply is very finely adjustable via a rotary knob. Fat and meat juices drip into the water bowl, thus reducing smoke and flames. The convenient legs can be easily attached and stowed away in the barbecue for transport or storage.

- Versatile cooking appliance: cook, grill and fry with one appliance
- With pan support, reversible grill and contact grill grate, grill grate and lid with wok function
- Grill attachment ready for use after only a short preheating phase
- Hose and caravan connection
- Piezo ignition for quick ignition without matches
- Finely adjustable heat supply
- Easy to clean and maintain
- Compact pack size, protected transport
- Gas consumption: 19.5 h with R907, 12.5 h with R904.

With safety pilot. Operating pressure: 30 mbar; Nominal capacity: 2 kW; Gas consumption: 145 g/h; Dim. (H x ø): 42 x 36 cm; Pack size: 55 x 38 x 18.7 cm; Weight: 4.92 kg **310/403** **145.00**

easy to transport

Citi Chef 40

The robust, compact and portable barbecue can be used on a table. It is equipped with a GreenGrill ceramic-coated grill grate made of aluminium with integrated deflector for perfect heat distribution. The drip pan fits into the exterior burner pan and is easy to detach and clean. The pot stand is included in delivery! This way, you can use pots, the CADAC paella pan or the pizza stone. The hose and the pressure regulator are not included in delivery.

Scope of delivery: grill grate, pot stand, lid and carry bag.

electric barbecue

E-Braai 40 FS

Discover the taste and convenience of electric grilling with the CADAC E-Braai 40 FS. This electric barbecue is perfect for use on the balcony or in the garden.
The 2.3 kW heating coil ensures a fast heat-up time. A removable glass ring protects the heating coil from dripping fat. With the automatic grill temperature setting, the desired temperature can be set precisely. The temperature is not measured under the lid as usual, but on the grill grate itself. The temperature of the E Braai can be adjusted from 70 to 270 °C and is therefore also suitable for slow cooking.
The removable fat pan is dishwasher-safe and easy to clean. Four lid openings ensure good air circulation and even heat distribution. The E-Braai comes with an accessory tray, a grill grate with GreenGrill ceramic coating, a pan support and a lid.

Nominal capacity: 2.3 kW; Dim. (L x W x H): 44.5 x 35.5 x 48 cm; Pack size: 67 x 45.5 x 37 cm; Weight: 12 kg **350/625** **299.00**

249.00

electric barbecue

E-Braai

The E-Braai is an electric barbecue with precise temperature regulation. The 2.3 kW heating coil ensures that it heats up fast. A removable glass ring protects the coil from dripping fat. Thanks to the unique "spot-on-grilling technology", the temperature is measured directly on the grill grate (instead of under the lid). The desired temperature can be set precisely on the digital display and kept constant. The temperature of the E-Braai is infinitely variable from 70 to 270 degrees, which makes it suitable for slow cooking. The removable drip tray is dishwasher-safe and easy to clean. The lid has four ventilation holes for good air circulation and even heat distribution.
The E-Braai comes with a pan support, a GreenGrill ceramic-coated grill grate, a lid and a carry bag.

Nominal capacity: 2.3 kW; Dim. (W x H x D): 48 x 35.5 x 44.5 cm; Pack size: 47 x 46 x 37 cm; Weight: 8.05 kg **350/622** **249.00**

279.00

Citi Chef 40 FS

The Citi Chef 40 FS is easy to clean thanks to the removable enamelled grease drip tray. The grease drip tray can also be put in the dishwasher. The black side tables are removable and are equipped with storage hooks to keep the barbecue tongs always within reach. On the shelf between the legs, there is space for the gas supply, such as the CADAC Trio PowerPak or the Dual PowerPak. The legs are made of durable wood. The Citi Chef 40 FS is supplied with pot stand, grill grate and lid with thermometer. The entire surface of the GreenGrill ceramic-coated grill grate is heated and you get an optimal grilling result.

Without safety pilot. Ignition system: Piezo ignition; Nominal capacity: 2.7 kW; Gas consumption: 196 g/h; Dim. (W x H x D): 72 x 94.6 x 45.5 cm; Pack size: 68.5 x 47.5 x 37 cm; Weight: 11 kg

Safari Chef 30

This portable and versatile gas barbecue weighs less than 4 kg and includes four interchangeable cooking and grilling surfaces: pan stand, GreenGrill ceramic-coated grill grate and grill plate and a lid that can be used as a pot.
The complete barbecue is stored in a convenient carry bag (included in delivery).
The Safari Chef 30 is available in a high or a low pressure version. The Safari Chef HP (high pressure) works with a 500 g threaded cartridge (not included), which is screwed directly into the device, while the Safari Chef LP (low pressure) can be connected to a normal gas cylinder (hose and pressure reducer not included). The Safari Chef 30 is ideal for camping, climbing or fishing.

Accessories (optional): paella pan, pizza stone

Without safety pilot.

Safari Chef 30 Compact

The Safari Chef 30 Compact is an ultra-compact, lightweight gas barbecue. It works directly with a 227 g bayonet cartridge. Simply insert the gas cartridge into the appliance, click it in and you can start cooking or grilling. An ideal appliance for outdoor activities and camping holidays. Despite its small size, the Safari Chef 30 Compact is extremely versatile as it has various cooking surfaces: a pan stand, a grill plate, a grill grate and a lid that can also be used as a pot. You can easily cook a pot of soup or noodles on the pan stand. The grill grate and grill plate have the CADAC GreenGrill coating and are perfect for roasting and grilling meat, fish and vegetables. The lid can also be used as a (soup) pot and is therefore multifunctional. The drip tray catches cooking residues, but also serves as a windbreak so that the burner does not go out. A robust carry/storage bag is included so that you can easily take the Safari Chef 30 Compact anywhere.

With safety pilot. Operating pressure: cartridge; Nominal capacity: 1.8 kW; Gas consumption: 130 g/h; Dim. (W x H x D): 30 x 23 x 35 cm; Pack size: 35 x 35 x 26 cm; Weight: 3.8 kg

CADAC PowerPak

from 39.95

The CADAC Trio PowerPak and CADAC Dual PowerPak make gas cylinders redundant. The PowerPaks are lightweight, compact and easy to handle. Hose and pressure reducer are included. Once you have inserted the gas cartridges into the PowerPak, the liquid gas supplies your equipment or your barbecue. The universal fitting at the end of the hose has a 1/4 "BSP" left-hand thread so that the Dual PowerPak or Trio PowerPak can be used with all brands of camping stoves or barbecues.

CADAC Trio PowerPak

- Operated with 3 nozzle valve cartridges, each with a 227 g bayonet lock (not included). This amount of gas supplies a small appliance or a barbecue for approx. 7 hours.
- With removable back cover. If the cover is removed, the 3 cartridges can be inserted into the valve and fastened.
- All 3 cartridges supply gas simultaneously, which is beneficial in cold weather.

30 mbar **350/418** **69.95**

50 mbar **350/408** **69.95**

CADAC Dual PowerPak

- Operated with 2 x 445 g or 500 g EN417 thread cartridges (not included)
- Each cartridge can be inserted individually and all cartridges supply the appliance with gas.
- 1 kg can supply a small barbecue with gas for approx. 10 hours

Plug-In Coupling Set SKU-QR

The plug-in coupling SKU-QR is equipped with an ergonomic, non-slip handle that makes it easy to connect and disconnect. When you disconnect the coupling, the gas passage is shut off. The sealing plug prevents the ingress of dirt and animals when the coupling is not in use. Additionally, the plug-in coupling is tamper-proof thanks to a special device – unlocking is only possible using a standardised STN plug-in nipple.

completely disposable

100 % natural materials

NEW

CasusGrill™ Disposable Barbecue

The innovative, environmentally friendly and fully disposable instant barbecue is ready to use in just 5 minutes and provides heat for an hour. Thanks to its design, you can hold it in your hands even when you are grilling. The barbecue is made from natural materials. Therefore, you can dispose of it easily and safely in the rubbish, compost or fire after use and reduce your ecological footprint. No more foil pans in parks or nature. The award-winning CasusGrill is made from FSC-certified cardboard and naturally occurring lava stone. The grill grate is made of bamboo, which does not burn, and the briquettes are made of Quick Oxilite™ bamboo charcoal. This disposable barbecue uses less charcoal and emits around 50 % less CO_2 than conventional disposable barbecues. Material: cardboard; Dim. (W x H x D): 31 x 14 x 24.5 cm; Pack size: 34 x 26 x 6 cm; Weight: 1.25 kg

electric arc

NEW

Arc Lighter

Safe, reliable and environmentally friendly with an electrically generated arc instead of a flame – this is how candles, lanterns, the gas stove, barbecue or fireplace are lit today. Since the arc lighter does not produce an open flame, it ignites in wind and weather like a storm lighter. Pressing the button immediately builds up the arc between the electrodes. A protective cover prevents unintentional ignition. With automatic shut-off function.
The arc lighter can be charged easily and economically via micro-USB cable (included). Charging time: 1.5 – 2 hours. An LED indicator light shows when the battery is running low. The stick shape makes the lighter safe and comfortable to use. Additional flexibility is provided by the movable neck. Material: plastic, metal; Dim. (L x W x H): 21.9 x 2.6 x 1.8 cm

Gas Pressure Regulator with Crash Sensor from 139.95

The gas pressure regulators by Truma are characterised by their extremely compact and light design. The crash sensor (CS) was optimised: if the sensor is triggered, it is shown by the yellow button. The Truma gas pressure regulator CS can be used whether your motorhome or caravan is parked or in motion.

Reliable: secure operation of gas devices even on the road – thanks to the integrated crash sensor
Comfortable: simply detect the triggered sensor and reset it
Convenient: indicates which bottle is in operation and thus full or empty (DuoControl CS)
Light: low weight

Technical data: type of gas: liquid gas (propane/butane); input pressure: 0.7 – 16 bar (DuoControl CS), 0.3 – 16 bar (MonoControl CS); output pressure: 30 mbar; regulator capacity: 1.5 kg/h; regulator input: external thread M 20 x 1.5 (G.13); regulator output: cutting ring connection 10 mm or 8 mm (H.9).

5 Jahre Hersteller-garantie
Für alle, die auf Truma setzen – nur bei der ausschließlichen Verwendung unserer Regler, Filter und Schläuche. Jetzt registrieren auf www.truma.com/reglergarantie

Replace the filter pad every time you change the cylinder.

Safe gas supply even while driving!

Truma provides no warranty for defective gas pressure regulators that were used without Truma gas filters and Truma high-pressure hoses!

Accessories from 57.95

Truma Gas Filter

The Truma gas filter effectively protects your gas system against soiling: oily residues are reliably filtered out and collected in a filter pad. Simply replace the filter pad with a new one each time you change the bottle. The gas filter fits all wall- or ceiling-mounted Truma gas pressure regulators.

- Filters up to 99.9 % of aerosols and protects the gas system and all gas devices.
- Together with the pads, you can use the filter for longer and save money.
- Can be opened quickly and without tools to control and replace the pad.
- Opening is only possible when the gas cylinder is closed.
- Fits into nearly all gas cylinder boxes.
- Quick to retrofit.

High-Pressure Hoses from 52.95

For maximum security on the road and at the campsite, Truma offers high-pressure hoses equipped with hose rupture protection (SBS). They meet all legal requirements for running gas systems while driving but are also suitable for stationary use. If the hose is damaged, the protection is triggered and stops the gas flow.

truma

get through the winter without any problems

56.95

EisEx

At a temperature of 0 °C, tiny droplets of ice or propane hydrate can form in the regulator due to traces of water in liquid gas. This reduces or stops the gas supply.
The regulator heater Truma EisEx prevents the formation of ice droplets with electrical heating. EisEx ensures trouble-free gas supply even in winter.

Gas Fill Level Indicator LevelControl

measures via ultrasound

178.95

The Truma LevelControl uses ultrasound to measure how much gas is in a gas cylinder. It is attached to the bottom of the cylinder either magnetically (for steel gas cylinders) or with the help of a clamping plate (for aluminium cylinders – not included). The measurement data is transferred to your smartphone via Bluetooth. The Truma LevelControl app thus provides a convenient overview of the gas fill level and shows it as a percentage and the gas quantity in kilograms. Thanks to an extensive database, the Truma LevelControl can be used with all common European steel and aluminium gas cylinders from 5 to 33 kg. The LevelControl is not suitable for plastic gas cylinders, fillable tank gas cylinders or gas tanks!

Advantages:
- **Precise:** precisely measures the cylinder's fill level in per cent and kg.
- **Comfortable:** easy to install and use with the Truma LevelControl app
- **Convenient:** simply use the integrated magnets to attach it to the bottom of the cylinder and remove it when changing cylinders
- **Universal:** works with all common European steel and aluminium gas cylinders (Logo EIA 2019)

Scope of delivery: LevelControl, magnetic foil, 2 x AAA alkaline battery, feet

Technical data: current consumption: 70 mA; for propane and butane; Bluetooth class 2

Dim. (W x H x D): 185 x 16 x 73 mm

Weight: 100 g	**320/393**	**178.95**

JETZT BEI Google Play

Truma iNet app when a Truma iNet system is installed in the vehicle.

Accessories

Clamping Plate

Clamping plate for attaching the LevelControl to aluminium cylinders, as they are not magnetic.

Dim. (W x H x D): 22.9 x 6.3 x 2.6 cm; Weight: 150 g	**320/395**	**23.95**

Gas Fill Level Indicator LevelCheck

Level Check detects the fill level of your gas cylinder. The convenient level check indicates reliably and fast if there is liquid gas in the measuring range. For this, the measuring device is simply placed horizontally on the gas cylinder. The measurement is made via ultrasound.
- LED display: green/gas, red/no gas
- Reliable measurement via ultrasound
- With integrated LED flashlight
- For all steel and aluminium gas cylinders with a diameter between 200 – 350 mm
- Not suitable for refillable gas cylinders!
- Incl. 9 V monobloc battery alkaline

Dim. (L x W x H): 135 x 35 x 30 mm

Weight: 100 g	**320/373**	**84.95**

With the LevelCheck, you always know if there is enough gas left when camping!

Motorhome – Heating while Driving

Caramatic Safety Gas Pressure Control System

The gas pressure control systems Caramatic DriveOne and Caramatic DriveTwo enable heating while driving by means of an integrated mechanical crash sensor with a pendulum solution. The sensor shuts off the gas flow in the event of an accident with a delay of 3.5 g ± 0.5 g acting directly on the release element. With an average vehicle weight, this corresponds to an impact speed of approx. 15 to 20 km/h against a solid obstacle.

If heating is required while driving, safety devices must be installed in the gas system to prevent unburned gas from escaping in the event of an accident.

- Europe-wide use thanks to country-specific high-pressure hose lines – Caramatic ConnectDrive (not included)
- Test device for leak testing of the liquid gas system without dismantling the pressure regulating device
- Version with outlet connection RVS 10/8 is equipped with a transition piece for connection to 8 mm pipes

Advantages of the crash sensor with pendulum solution:
- Faster and easier commissioning as well as reset after response
- More precise functioning and therefore fewer faults due to incorrect response behaviour
- Start-up possible without any problems, even if the recreational vehicle is in an inclined position

GOK NEW CRASH Sensor IMPROVED SAFETY FEATURE

All products on this page are made in Germany!

Caramatic DriveOne Set

Safety gas pressure control system for operating one-cylinder systems in caravans and motorhomes while driving.

Consists of:

- Low pressure regulator with excess pressure protection S2SR (ÜDS)
- Mechanical crash sensor with new pendulum solution
- Test device and wall bracket
- Caramatic ConnectClean with angle bracket
- Caramatic ConnectDrive

Advantages and features: Heating while driving thanks to integrated mechanical crash sensor with a new pendulum solution, which shuts off the gas flow in the event of an accident with a deceleration of 3.5 g ± 0.5 g acting directly on the trigger element. This corresponds to an impact speed of approx. 15 to 20 km/h on a fixed obstacle with an average vehicle weight.

vertical	**311/162**	**202.90**
horizontal	**311/163**	**202.90**

Information

Please note: Meets the requirements of DGUV regulation 79 (German Social Accident Insurance – previously BGV D 34) and is suitable for use in commercially used caravans and motorhomes!

30 mbar 346.50

Caramatic DriveTwo Set

Safety gas pressure control system with automatic switch valve for operating two-cylinder systems in caravans and motorhomes while driving.
For connection to gas cylinders via high-pressure hose line and for pressure control to the nominal pressure of the gas device.

Consists of:

- Automatic switch valve
- Low pressure regulator with safety relief valve PRV
- Mechanical crash sensor with new pendulum solution
- Control knob
- Operating and reserve indicator
- Check valve
- Test device and wall bracket
- 2 x Caramatic ConnectClean with angle bracket
- 2 x Caramatic ConnectDrive

Advantages and features: Heating while driving thanks to integrated mechanical crash sensor with a new pendulum solution, which shuts off the gas flow in the event of an accident with a deceleration of 3.5 g ± 0.5 g acting directly on the trigger element. This corresponds to an impact speed of approx. 15 to 20 km/h on a fixed obstacle with an average vehicle weight.

GOK Caravan and Motorhome

All products on this page are made in Germany!

A | Connection to the cylinder

The shown connection solution for caravans and motorhomes is the classic way to connect a gas cylinder to the supply line of the vehicle. The low-pressure regulator is mounted directly on the cylinder. The medium-pressure hose line provides the connection to the supply line of the vehicle.

B | Connection to the wall

To make travelling through Europe with different cylinder connections easier, we recommend a low pressure regulator with a wall bracket. The connection to the gas cylinder is made with the country-specific high-pressure hose line without having to change the low-pressure regulator.

Information

Information regarding the use of caravan regulators

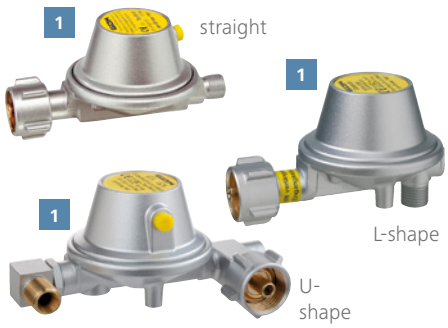

According to DVGW Worksheet G 607 "Liquid gas systems in inhabited recreational vehicles and for residential purposes in other road vehicles – operation and testing", pressure regulators, among others, must be replaced no later than 10 years after the date of manufacture. If the operating pressure of the system is 30 mbar, a regulator according to EN 16129 Appendix D must be used when replacing the regulator in accordance with G 607. For liquid gas systems in vehicles with an operating pressure of 50 mbar, there is protection of the existing standard. **There is no obligation to convert to 30 mbar.**

C | Service hatch

With a service hatch, gas appliances such as barbecues or cookers can also be supplied with gas outside the vehicle via the internal liquid gas installation. The connection to the gas appliance is made with a medium-pressure hose line and a plug-in connector on the vehicle. The vehicle owner no longer needs to carry an additional gas cylinder.

Caramatic BasicOne

from 25.50 ■ 30 mbar

1 | Low Pressure Regulator 0.8 kg/h

Type: EN61

The regulators are ideal for gas boxes and small camping vehicles where space is limited. In the VW camper vans by Westfalia, the regulator with the L-shape was installed until 2005. For vehicles built since 2006, the regulator with the U-shape is used. Nominal flow: 0.8 kg/h.

U-shape: Thanks to the U-shape, the transition to the hose is located at the base of the gas cylinder and therefore does not extend beyond the gas cylinder.

L-shape: Thanks to the L-shape (90° angle), the hose is guided downwards and needs less space than conventional regulators. Connection: KLF x G 1/4 LH-KN

Operating pressure: 30 mbar

max. pressure: PS 16 bar

straight	**310/711**	**25.50**
U-shape	**310/709**	**47.50**
L-shape	**310/710**	**45.50**

2 | Low Pressure Regulator 1.2 kg/h

Type: EN71

Low pressure regulator for direct connection to the liquid gas cylinder with safety relief valve PRV. Connection: KLF x G 1/4 LH-KN

Operating pressure: 30 mbar

max. pressure: PS 16 bar

straight	**310/712**	**29.50**

3 | Low Pressure Regulator 1.5 kg/h

Type: EN61-DS

Low pressure regulator with overpressure safety device S2SR (ÜDS). For direct connection to the liquid gas cylinder.

Connection: KLF x G 1/4 LH-KN

Operating pressure: 30 mbar

max. pressure: PS 16 bar

without pressure gauge	**310/714**	**49.50**

Caramatic SwitchTwo

The automatic switch valve transforms your wall-mounted gas pressure regulator into a system that can connect two gas cylinders simultaneously. It automatically switches to the reserve gas cylinder when the main gas cylinder is empty. The gas cylinder in use is indicated by a display on the regulator, and the cylinder can be changed without interrupting operation.

Consists of: automatic switch valve, control knob, operating and reserve indicator, check valve and wall bracket (hose line not included).
Nominal flow: 1.5 kg/h; nominal pressure: 0.75 bar.
max. pressure: PS 16 bar

Two-Cylinder System Caramatic BasicTwo 193.50

MADE IN GERMANY GOK

Automatic regulator changeover for connection to gas cylinders, for pressure regulation to the nominal pressure of the gas appliance.

Advantages and features:
- With safety relief valve PRV
- Equipped with an adapter piece for connection to 10 mm pipes
- Check valve prevents the gas flow from breaking through when changing cylinders
- Medium-pressure hose (rubber with textile insert; cold-resistant down to -30 °C; hose dimensions 6.3 x 3.5 mm) G 3/8 LH-ÜM x G 3/8 LH-ÜM x 400 mm for connecting the two regulators, brass connections, stainless steel ferrules
- Medium-pressure hose (rubber with textile insert; cold-resistant down to -30 °C; hose dimensions 6.3 x 3.5 mm) G 1/4 LH-ÜM x RVS 8 x 400 mm for connecting the system to the pipe, brass connections, stainless steel ferrules
- Connectors to 8 or 10 mm
- Combination connection for optional connection to 5, 11 or 33 kg gas cylinders
- Incl. MiniTool for connecting and disconnecting regulators

Technical data:
- Connections: Input: Combi.W
- Output: central regulator: G 1/4 LH-KN
- Switchover regulator: G 3/8 LH-KN
- Outlet pressure: central regulator: 30 or 50 mbar

Low Pressure Regulator 1 kg/h

Type: EN61 | max. pressure: PS 16 bar

For connection to cylinders or for gas containers permanently attached to the vehicle, for pressure regulation of the nominal pressure of the gas device.

Consists of: low pressure regulator, safety relief valve PRV, toggle valve and plug-in coupling SKU with shut-off valve for leak testing and supplying external gas devices, e.g. a gas barbecue.

Operating pressure: 50 mbar

Only for replacement – not for new installation!

Caramatic BasicControl

Convenient information and control unit for monitoring the operating and backup cylinders of the Caramatic BasicTwo two-cylinder system in motorhomes and caravans as well as on boats.
- Remote indication of the operating status (normal or standby operation) of the gas cylinders.
- Information on which of the two gas cylinders is empty and needs to be changed
- For easy installation in new systems or for retrofitting in existing systems
- Can be used with the Caramatic BasicTwo two-cylinder system
- Connection of all components via connector system, no soldering necessary
- Information and control unit including 6 m connection cable and cover frame
- Pressure and reed sensor for remote indication with connection cable 2 m

311/168 **159.90**

For safety reasons, we recommend that the replacement of the consumer appliance and the pre-pressure regulator only be carried out by a specialist camping company.

Gascon Safety Adapter

gascon
FÜR IHRE SICHERHEIT ✓ FOR YOUR SAFETY

GASCON – Safety adapter for propane cylinders

Maximum safety combined with simplicity and practicability. GASCON is a safety adapter for consumers. Easy installation directly at the valve outlet opens up new possibilities. If there is a leak, the gas flow is stopped immediately and automatically. This safety device is quick and easy to install and always shows the current gas pressure. Detect leaks in your gas system and protect yourself by shutting off 100 % of the gas flow in an emergency.

Features:

- Emergency stop of gas supply in case of leaks
- Easy installation
- With pressure indicator
- Leakage test
- 100 % stop in case of leakage

Technical data:

- Connection type: screw type G. 12
- Gas type: propane LPG

Regulator Hose Line Set

For connection to gas cylinders, for fuelling gas barbecues with a gas cartridge connection.

- Medium-pressure regulator type M50-F/SBS, 2.0 bar, 2 kg/h with 35° outlet and integrated hose rupture protection EFV (SBS) with manual opening, locking the gas flow if the hose is damaged.
- Medium-pressure hose (rubber with textile insert, cold-resistant down to -30 °C, hose dimensions 6.3 x 3.5 mm) G 3/8 LH-ÜM x plug-in coupling SKU.
- Connecting piece with plug nipple STN for easy unplugging of the hose line on one side, AG 7/16-28 UNEF or AG 1-20 UNEF for connection to the gas device on the other.
- Thanks to a special mechanism, the plug-in is manipulation-safe – unlocking is only possible with the plug nipple STN.

Please note: At the gas unit, a low pressure regulator is required for gas cartridges with connection thread IG 7/16-28 UNEF in accordance with EN 417 or IG 1-20 UNEF.

External Gas Supply for Recreational Vehicles

Gas Supply for Recreational Vehicles

For connecting an external gas supply (gas cylinder) for caravans and motorhomes with a one-cylinder device. The connection between the external cylinder and the supply line of the vehicle is made quickly and safely via a plug-in coupling. Thanks to the manual switch valve, you can easily and quickly switch the device from the internal cylinder to an external gas supply.
Cut-out nominal dimension: 155 x 65 mm

Includes:
- Medium-pressure regulator with hose rupture protection
- Medium-pressure hose line 3000 mm
- Gas service hatch
- Integrated check valve
- Manual switch valve
- MiniTool

Aluminium Gas Cylinder

Overloaded drawbar boxes and rusty bottles are outdated. Compared to common gas cylinders, you can save up to 5 kg in weight. Alugas cylinders do not rust, which means that your gas lines cannot be blocked by rust particles. Internationally and TÜV-approved. Safety valve and valve cap included. The cylinder is empty.

- Lighter than conventional gas cylinders
- TÜV approval strictly according to EN standard
- No rust, no blocked pipes
- High-quality alloy, timeless design, fine surface
- Durable, energy-saving, recyclable

Senso4s PLUS

Fill Level Indicator for Gas Cylinders

GOK

With Bluetooth remote transmission of measurement and reporting data to a smartphone or tablet. The Senso4s PLUS fill level indicators measure the weight of the gas cylinder and transmit this value to the app via Bluetooth. The app automatically calculates the fill level and creates a consumption forecast.

Please note: For error-free measurement, the Senso4s PLUS measuring device must be placed on a flat and solid surface. The app for the Senso4s PLUS can be downloaded free of charge for the respective operating system from the Apple App Store or the Google Play Store.

Advantages and features:
- Easy installation: switch on Bluetooth, place the gas cylinder on the adjustable feet of the Senso4s fill level indicator, measure and read the values in the app
- For all common steel, aluminium and plastic gas cylinders with a filling weight of up to 16 kg
- Connection via Bluetooth between Senso4s and your smartphone/tablet
- Menu language of the app: German, English, French, Italian, Spanish or Slovenian
- Records the parameters filling and tare weight of the respective gas cylinder
- Management of several gas cylinders in different sizes
- From the second measurement, the app already calculates a long-term forecast of the gas consumption
- If a Bluetooth connection is established, the Senso4s PLUS sends the measurement data to the app at 15-minute intervals
- Battery level indicator of the level meter in the app

109.00

Dim. (W x H x D): 250 x 210 x 35 mm; Weight: 362 g

- May also be used e.g. in the gas cylinder box of recreational vehicles thanks to ATEX certification.

Technical data:
- Measuring accuracy: ± 1 %
- Senso4s PLUS protection class: IP44
- Supply voltage: 3 batteries type AAA LR03 1.5 V Alkali (not included)

Gas Fill Level Indicator W8 Gascontrol 2.0

The electronic device W8 Gascontrol 2.0 measures the fill level of gas cylinders and transmits it via Bluetooth to smartphones or tablets with Android or iOS technology. Due to its very low installation height, the Gascontrol W8 can be used in the gas cylinder box of most recreational vehicles.

Features: for ø 30 cm gas cylinders (steel, aluminium, plastic, fibreglass); compatible with Android and iOS systems: the app can be used to operate two scales; operation with batteries (not rechargeable); housing made of impact-resistant plastic; delivery without batteries and mobile device.

Dim. (W x H x D): 292 x 31 x 292 mm
Weight: 800 g **320/384** **149.90**

Trolley

Transport Protection for Gas Cylinders

With this gas cylinder holder specially designed for private use, gas cylinders can be secured in the vehicle for transport. The gas cylinder is firmly strapped to the sturdy frame and must also be secured via the fixing points in the vehicle (e.g. lashing eyelets) to prevent uncontrolled movements. Thanks to the rubber studs on the underside of the holder, the gas cylinder will not slip even on a smooth surface. The holder is suitable for gas cylinders with a diameter of 230 to 320 mm and up to 11 kg. Please note that the gas cylinder is not included in the scope of delivery.

Please note: The regulations of the DVFG data sheet "Transport of liquid gas cylinders with motor vehicles" apply. Please observe the operating instructions.

Truma iNet X Panel

The Truma iNet X Panel allows you to connect and control Truma products and other devices.

As part of the Truma iNet X system, subsequent extensions and updates are possible, making your vehicle ever smarter.

Technical highlights
- 4.3" colour display
- Touchscreen
- Backup battery – settings are retained even in the event of a power failure
- Control via smartphone possible (via Bluetooth)
- Can be updated
- Intuitive and multilingual menu navigation
- Outdoor and indoor temperature sensors
- Can be expanded with elements of the Truma iNet X system, e.g. a remote control

Technical data:
- Touchscreen display: TFT-LCD 4.3" (resistive)
- Power supply: 12 V (8 V – 16 V)
- Interfaces: TIN bus, CI bus, CAN bus, Bluetooth
- Power consumption: 1.5 W (0.13 mAh)
- Battery: Lithium button battery 3 V CR 2032

Truma Combi Heater for Caravans and Motorhomes

Heating and hot water in one: Truma Combi heaters.
The Truma Combi heaters combine two functions in one unit. They heat your living space and heat water in the integrated stainless steel tank. Depending on the model, the Combi heaters can be used in gas, electric, diesel or mixed operation.

from 2,349.00

"next generation"

Combi D (E)

- **Lighter:** weight reduction of 3 kg for Combi D and 3.4 kg for Combi D (E) compared to previous models.
- **Self-sufficient for longer:** very low battery power consumption
- **More economical:** less diesel consumption due to more efficient combustion
- **More service- and maintenance-friendly:** longer service life due to more efficient combustion control
- **Automatic altitude adjustment:** integrated altitude sensor automatically ensures optimum combustion at altitudes up to 3000 m
- **Uniform:** wall cowl is the same for both Combi variants

Technical data:
- Number of firing stages: 4 (Combi D 4), 6 (Combi D 6)
- Heat output: 4000 W (Combi D 4), 6000 W (Combi D 6)
- Water capacity: 10 l
- Nominal heat output in mixed mode: max. 3900 W (Combi D 4 E), max. 6900 W (Combi D 6 E)
- Nominal heat output in electric mode: 900 W & 1800 W
- Heating of water from approx. 15 °C to approx. 60 °C: approx. 24 min.
- Power consumption 12 V: heating and hot water 0.4 – 8.1 A; hot water 0.5 A
- Power consumption 230 V: 3.9 – 7.8 A

Scope of delivery: Combi D (E) heater with room temperature sensor, Truma iNet X panel, control panel cable 6 m, fuel line, metering pump, standard tank connection set and mounting parts (without exhaust system and without water connection set).

Combi D 4 iNet X Panel	**309/839**	**2,999.00**
Combi D 4 E iNet X Panel	**309/841**	**3,339.00**
Combi D 6 iNet X Panel	**309/838**	**3,459.00**
Combi D 6 E iNet X Panel	**309/840**	**3,799.00**

iNet X

Combi heaters can be controlled with the Truma iNet X panel and the Truma iNet X app, the Truma CP plus or via the Truma iNet Box using the app.

Heat Hybrid

The Truma Combi E models offer you all the advantages of the classic Combi variants with an additional electric option.

Combi (E)

- **Flexible:** powered by gas or diesel, depending on the model. Also available as a hybrid heater in the Combi E variant.
- **Combi E variant:** save more fuel with quiet, emission-free, electric energy for your daily space heating and hot water.
- **Fast:** up to 25 % faster heating in mixed mode thanks to powerful 6900 W (Combi 6 E / Combi D 6 E).
- **Compact:** light and space-saving heating
- **Convenient:** easy installation
- **Can be combined:** automatic air conditioning possible in conjunction with Truma air conditioning system

Technical data:
- Heat output: 2000 W – 6000 W
- Water capacity: 10 l
- Nominal heat output in mixed mode: max. 3900 W (Combi 4 E), max. 6900 W (Combi 6 E)
- Nominal heat output in electric mode: 900 W & 1800 W
- Heating of water from approx. 15 °C to approx. 60 °C: approx. 23 min.
- Power consumption 12 V: heating and hot water: 1.2 – 6.5 A; hot water: 0.5 A
- Power consumption 230 V: 3.9 – 7.8 A

Scope of delivery: Combi (E) heater with room temperature sensor, Truma iNet X panel, control panel cable 6 m and mounting parts (without exhaust system and without water connection set).

Heater Truma VarioHeat from 1,588.95

The compact Truma heaters for motorhomes, caravans and vans.

Truma VarioHeat eco and Truma VarioHeat comfort are identical in size but have different outputs. The compact construction allows you to install both versions flexibly in the vehicle without losing storage space. With the Truma E-Kit, you can add an electric heater to the Truma VarioHeat. Both devices are controlled via the control panel Truma CP plus VarioHeat or the Truma app.

Truma CP plus VarioHeat
With the digital control panel, iNet-ready devices can be controlled and monitored. The ergonomic form and intuitive handling make it easy to set the desired function.

TIP: Add an electric heater to your Truma VarioHeat with the Truma E-Kit (item no. 309/599, not included in delivery).

Heater Truma S 2200

Small, light and compact – those are the outstanding features of the Truma S 2200 that make the heater perfect for smaller motorhomes.
- **Convenient:** warm air is distributed evenly in the interior via an optional fan
- **Independent:** currentless operation without fan possible
- **Flexible:** exhaust gas led out via roof, side or rear wall stack, exhaust pipe connection left or right.

With automatic ignition. Heat output: 1850 W; efficiency: approx. 95 %; gas consumption: 50 – 170 g/h; 1.5 V automatic ignition (Truma S 2200)

Exhaust piping on the right, control knob on the left. **310/071** **598.95**

Exhaust piping on the left, control knob on the right. **310/070** **598.95**

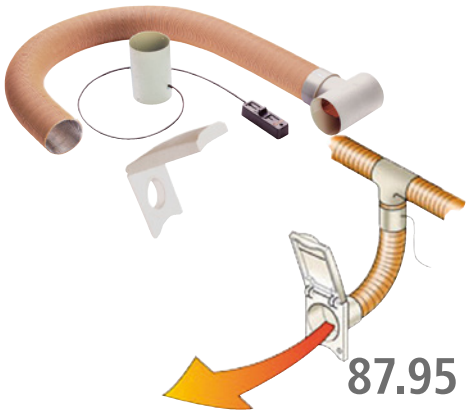

Accessories

1 | Multivent Fan
The two-level 12 V universal fan is suitable for extracting kitchen odours and for strengthening the air performance of already existing warm air systems with especially long pipes. Two-stage control panel for air flow rate 29,000/60,000 l/h, connection: 12 V DC, power consumption: 0.23/0.5 A, pipe connection: 65 mm air duct.
310/321 **174.95**

2 | Installation Box S 2200
Installation box for integrated installation of a heater in a wardrobe, also suitable for Truma-vent fans. **310/076** **198.95**

3 | Wall Cowl Set AKW 2
Exhaust piping and combustion air supply for Truma heating S 2200 (without cover and pipes).

Awning Heater Kit

Uses the Truma warm air distribution to lead the warm air into the awning.

- Can be connected to any Truma heating system with warm air distribution
- Increases the use value of your awning especially in the evening and morning hours, but particularly during the transitional period thanks to simple temperature control
- Comfortable and simple operation
- Extracts moisture from the awning or at least reduces it (e.g. overnight, 300 – 500 W at continuous operation is sufficient)
- During winter camping, items in the awning (e.g. ski shoes) can be preheated pleasantly

Scope of delivery: warm air diffuser with hatch, fan T-piece, string lock with slider, 1 m warm air distribution pipe

robust and proven heating classic

30 mbar

558.95

Heater Truma S 3004

- Currentless heating even while driving
- Optimal integration into the interior thanks to flat casing
- Infinitely variable control of temperature and fan power
- Pleasant radiant heat
- Efficient, robust and low-maintenance
- Booster function for 20 % more air volume flow
- Nominal heat output 3500 W

Just switch it on and you will be comfortable immediately: Truma S heaters provide heat and comfort in no time at all. The caravan or motorhome heater is not only especially powerful, but also extremely reliable – even when temperatures drop below zero in winter. To heat up the caravan even faster, the optional heater fan is equipped with a booster function. Heater for LPG liquid gas, with automatic ignitor, thermostat and installation box (without casing). For use in caravans and motorhomes. **Operation only permitted with original Truma casing!**

309/497 **558.95**

from 924.95

Heater Truma S 5004

- Pleasant radiant heat for optimal room climate
- Faster warm air distribution and dehumidification thanks to booster function
- Efficient, robust and low maintenance
- Various equipment variants, e.g. fireplace casing with flame acoustics
- Nominal heat output 6000 W
- The Truma S 5004 is characterised by its absolute reliability and high performance. With two burners and two heat exchangers, you will be comfortably warm at any time of the year. You can set the temperature and fan power precisely using the convenient rotary knobs. You can achieve an average room temperature of around 22 °C without fan operation. For optimum warm air distribution, we recommend that you operate the caravan heater with a fan. This way, you also prevent the air from condensing on cold surfaces. The booster function enables a particularly fast distribution of the warm air. Your caravan will also be dehumidified.
- The design is timelessly modern, so that the caravan heater with its flat casing fits perfectly into the interior of any caravan. The Truma S 5004 is approved for installation in caravans.

Operation only permitted with original Truma casing!

truma

heat your water quickly

MADE IN GERMANY

Truma Boiler

from 849.95

Inside the Truma Boiler Gas, a powerful gas burner heats up the water in your caravan or camper within a short amount of time – entirely without mains power. The gas boiler is insulated perfectly so that hardly any heat gets lost. If the water temperature is sinking, the electronic system automatically restarts. On the control panel, you can set the water temperature between 50 °C or 70 °C.
The Boiler Gas/Electric is additionally equipped with an electric heating element that heats up the water even more quickly. It shortens the heating time from half an hour in gas mode to a quarter of an hour in the mixed mode – e.g. heating water from 15 °C to 70 °C.

- Low gas consumption with high effectiveness
- Independent from the mains supply (Truma Boiler Gas)
- Particularly compact dimensions, enabling a space-saving installation

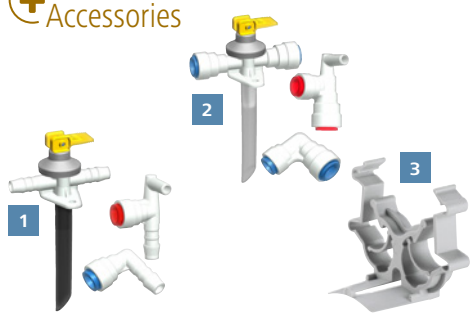

Technical data: power consumption at 12 V max. 0.16 A, water content 10 l, temperature limit 70 °C, pump pressure max. 2.8 bar, gas consumption 120 g/h, heating power 1500 W.
Scope of delivery: boiler, wall cowl, cowl cap (KBS 3) and control panel with 3 m cable (water set not included in delivery).

Gas	**309/594**	**849.95**
Gas/Electric	**309/595**	**1,119.95**

Information

The water set must be ordered separately!
Consists of drain valve ABO and two elbow connections. Either water set ABO TB (fir tree connection) for connection to flexible water hoses ø 10 mm or water set ABO JG (John Guest) for connection to fixed ø 12 mm pipes.

Accessories

1 | Water Set ABO TB
For 10 mm hose systems.

2 | Water Set ABO JG
For 12 mm pipe systems. **309/598** **57.95**

3 | Hose Clips SC
With the hose clips SC, you can clip up to two water hoses or pipes (John Guest System) to the warm air ducts. 5 pieces **310/351** **25.65**

MADE IN GERMANY

Truma Boiler Electric 579.95

The Truma electric boiler heats the water in your caravan or motorhome quickly and keeps it warm for a long time. This way, you can always thoroughly wash your hands, do the dishes or even have a long, hot shower. The high-quality stainless steel container with extra high capacity makes this possible. At the same time, the electric boiler consumes little electricity and operates almost silently.

Scope of delivery: boiler, control panel, 3 m cable.

- Powerful heating element provides hot water in a short time
- Minimal loss of heat thanks to high-quality insulation
- Low energy consumption

Technical data: 14 l capacity, 230 V – 850 W, power consumption 3.7 A, heating time from 15 °C to 70 °C: approx. 70 min., pumping pressure: max. 2.8 bar, weight: 3 kg, dimensions (L x W x H) 405 x 405 x 295 mm. Thermal cut-out: 70 °C. **309/596** **579.95**

especially for caravans

Water Heater TT 2 298.95

Especially for caravans.
The 5 l water heater provides hot water in the smallest dimensions. It uses the warm air distribution to heat water. The heater can be used without using the heating, as it is equipped with an electric heating element (230 V/300 W).

Scope of delivery: control panel, drain and vent valve (without mixing valve)
Technical data: heating-up time from 15 °C to 60 °C approx. 50 min; power supply: 230 V ~ 50 Hz; power consumption: 1.3 A (300 W); thermal cutout: 65 °C; pressure: max. 1.2 bar

Low-Pressure Water Heaters

All products on this page are made in Germany!

ELGENA

These devices are specifically designed for use in recreational vehicles. They can be used where space is limited and only low current ratios with weak fusing are available. KB 3 (3 l, wall installation) and KB 6 (6 l, ground installation) are low-pressure boilers and can be connected with a hose to submersible pumps without a check valve or to any other water system with a suitable fitting. Heatable from approx. 35 °C to approx. 85 °C, mixable to approx. 3 times the quantity at full heating, less power consumption and fast reheating with good insulation. The boilers are made of high-quality plastic, heat- and corrosion-resistant. Quick and easy assembly with mounting bracket.

- Fast heating
- Low-pressure boiler
- Low power consumption
- Frost monitor for winter operation
- Water connection 10 mm
- TÜV-approved
- 5 years warranty

Scope of delivery: adjustable thermostat, frost monitor and overheating protection, 1 m cable.

Nautic Compact Air

All products on this page were developed exclusively for vehicle installation!

The domestic water is heated during the heating phase by the warm air from your heating system via the built-in heat exchanger. The water can also be warmed up to 70 °C via the built-in 230 V electric cartridge. Nautic Compact Air is a convenient addition to your warm air heating. Suitable for 230 V and the connection to your pre-existing heating system in combination with the heat exchanger.

- Self-regulating heater
- Overheating protection
- Water drain valve
- Heating element: 230 V, 500 W (2.2 A)
- Water connection: 10 mm
- Air hose connection: 65 – 75 mm
- For pressure water systems, a safety drain valve is required (optional)
- Cable length: 1 m

Pressure-Resistant Warm Water Systems

Small and powerful: the Nautic water heaters for caravans, motorhomes, sales vehicles and boats present themselves in proven ELGENA quality. Nautic water heaters are a space-saving hot water supply with high-quality V4A stainless steel tank and compact insulation and fit even into the smallest of spaces. Nautic water heaters are pressure-resistant and can be fitted as standard or retrofitted to any cold water supply with a hose line. Water connection to a submersible pump, hand pump or foot pump as well as a pressure pump is possible. Robust insulation ensures that hot water is still available the next day.

- Thermostatically adjustable from 30 °C to 80 °C
- 1 m connection cable with Schuko plug
- Safety valve up to 3 bar
- Water drain valve for winter drain
- Service water connection
- Overheating protection

Low-Pressure Water Heaters Therm Boiler Air

The boiler was specially developed for installation in motorhomes, caravans, camper vans, etc. and can be used wherever there is little space and weak power conditions. The PUNDMANN THERM AIR boiler is a pressure boiler that can be connected to any water system with existing fittings in the mobile area. The connections are designed for a 10 mm hose. This boiler is not only very light, but thanks to its size, it requires little space and can be used at almost any campsite. During the driving time, the surplus electricity is used to guarantee hot water.

Capacity: 3 l

Mobile Heater in a Heat Box

from 1,149.00

NEW

PUNDMANN

The mobile parking heater Autotherm 2D by Pundmann in 3 variations. Be it in a roof tent, in small quarters, in a tent or generally when camping, it is the ideal companion for outdoor enthusiasts. Due to its small dimensions and the small capacity of 40 litres, the heater can easily be stowed in the boot and is therefore always with you. Two handles make it easy to carry the heater from one place to another. Incl. remote control and Anderson plug for charging other devices. Ideal for rooms up to 20 m².

Technical data: Heat output: 0.8 to 2 kW; consumption: 0.10 l/h to 0.24 l/h.

Heating System Webasto Thermo Top Evo

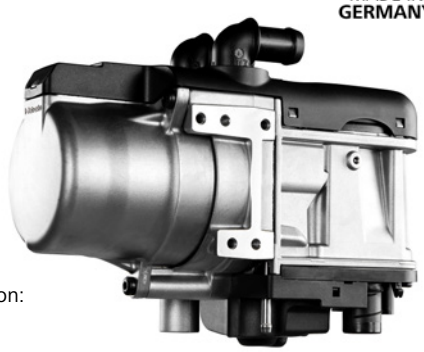

1,366.95

Webasto
Feel the Drive

The Webasto Thermo Top Evo Motorcaravan water heater is a powerful auxiliary heater for vehicles. It ensures rapid heating of the driver's cab, reduces fuel consumption and enables operation with diesel directly from the vehicle tank. With a heat output of 1.8 – 5.0 kW and low energy consumption, it offers quiet operation and a fast heat-up time. It is ideal for the cold season and protects the engine by preheating it before travelling. Various installation kits and an optional radio remote control are available.

- Warm air via air outlets inside the dashboard
- Quick warming up of the driver's cabin
- High heating power of 5 kW
- Low diesel fuel and energy consumption
- Runs on diesel right out of your vehicle tank
- Low-noise operation
- Quick heating-up time
- Heating power: 1.8 – 5.0 kW
- Fuel: diesel
- Fuel consumption: 0.22 – 0.62 l/h
- Nominal power consumption: 10 – 33 W

Air Heater Air Top 2000 STC

1,760.00

This low-noise heater – the smallest air heater on the market – is characterised by its outstanding heating performance and optimum efficiency.
Compact and powerful!
Webasto air heaters provide cosy heat in your motorhome in a short amount of time. Various warm air outlets ensure good distribution of the warm air and dehumidification. The Air Top 2000 STC air heater is particularly suitable for small vans.

- Compact heater, takes up little space
- Quiet operation due to air silencer
- Warm air is distributed via a hose system
- Constant temperature thanks to external temperature sensor
- Very fast heat-up phase
- Fuel directly from diesel tank
- Underfloor installation possible
- Heating is also possible while driving
- Heating output: 0.9 – 2.0 kW
- Fuel consumption: 0.12 – 0.24 l/h
- Nominal power consumption: 13 – 30 W
- Air volume: 93 m³/h

Radiant Heater Buddy

This patented 1.2 – 2.4 kW gas radiant heater is directly connected to a standard propane and butane gas cartridge and the perfect solution for mobile use outside and in closed rooms of up to 21 m². With the optionally available retrofit gas hose, the "Buddy" can be run with standard propane gas cylinders. For transport, you can purchase a handy bag (not included in delivery), in which you can not only store the heater, but also gas cartridges or the gas hose.

- Suitable for operation with propane gas and butane gas
- Low oxygen safety shutdown (ODS)
- Tilt safety shutdown
- With Piezo ignition
- Rotary switch for temperature control
- Integrated, fold-down handle
- For rooms of max. 21 m²
- Heats up to 6 hours with a 450 g gas cartridge
- Integrated gas pressure regulator 50 mbar

Gas consumption: 95 g/h; Nominal capacity: 2.4 kW
Dim. (W x H x D): 35 x 32.5 x 18.5 cm
Weight: 4.81 kg **310/029** **209.90**

Retrofit Hose Buddy

High-pressure hose line PS 30 bar 1.5 m for connecting the heater Buddy to a 5 or 11 kg gas cylinder. Length: 1.5 m
310/028 **52.50**

62.50

Industrial Infrared Heater 4200 Z

With hose and regulator, adjustable up to approx. 4300 W, with thermoelectric ignition fuse, to be screwed tightly to the bottle.
Gas consumption: 330 g/h; Nominal capacity: 4.3 kW; Operating pressure: 50 mbar
Dim. (W x H x D): 35.5 x 33 x 18.5 cm
Weight: 2.2 kg **310/065** **62.50**

105.00

Camping Heater

Camping heater with safety pilot for propane/butane. Incl. 1.5 m connection hose.
Operating pressure: 50 mbar; Gas consumption: 130 g/h; Nominal capacity: 1.7 kW
Dim. (W x H x D): 37.5 x 18.5 x 12.5 cm
Weight: 1.3 kg **310/025** **105.00**

23.90

Operating pressure: 50 mbar

Outdoor Connection Set

Consists of: low pressure regulator type EN61 without manometer, 1.5 kg/h, 50 mbar and plastic medium-pressure hose line 400 mm down to -20 °C, G ¼ left-hand thread union nut on both sides and MiniTool. **For private outdoor use only!** **310/768** **23.90**

Operating pressure: 50 mbar

73.50

In- and Outdoor Connection Set

Consists of: low pressure regulator type EN61-DS with manometer, 1.5 kg/h, 50 mbar and rubber medium-pressure hose line 400 mm, down to -30 °C, with G ¼ left-hand thread union nut on both sides and MiniTool. Mandatory for all commercial and private small bottle devices (e.g. catalytic or infrared) **indoors**, as well as commercial small bottle devices **outdoors**.
310/767 **73.50**

Operating pressure: 50 mbar

57.50

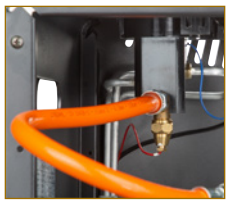

Industrial Regulator

For connection to gas cylinders in the industrial sector. With excess pressure protection. Suitable for connection to 5 or 11 kg gas cylinders. 1.5 kg/h. **Please note:** According to system diagram F1, low pressure regulators must be equipped with a pressure gauge. Pressure regulators with an outlet pressure of 30 mbar are not suitable for use in Germany!
311/161 **57.50**

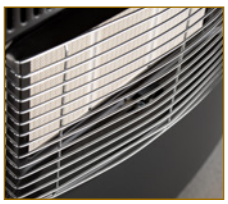

Infrared Gas Heater Vulkana

129.00 Vulkana

In the Vulkana infrared heater, a perforated ceramic combustion field acts as a catalyst. Behind this catalyst is a metal reflector that throws the heat of combustion to the front.

The advantage: The infrared heater can heat up a particular area of a room in no time thanks to 4.2 kW. The heat is transferred by thermal radiation, which makes this version a more pleasant heating option for those suffering from allergies as no house dust is blown up by air circulation.

- Oxygen deficit protection
- 3-step regulation (1.4 – 4.2 kW)
- Piezo ignition
- 4 wheels for individual positioning
- Operation with small propane cylinders 5/11 kg
- Incl. gas hose, without gas regulator

Operating pressure: 50 mbar
Gas consumption: 310 g/h
Nominal capacity: 4.2 kW
Dim. (W x H x D): 41 x 72.5 x 45 cm
Weight: 8.2 kg **310/032** **129.00**

Infrared Heater BC 4200 Turbo 229.00

The infrared heater BC 4200 Turbo 2-in-1 can be operated with propane gas or used as an electric heater. It is easy to use and equipped with a convenient piezoelectric ignition and a three-step regulation. Thanks to the oxygen deficit protection, the heater is safe to use. The infrared ceramic burner keeps you pleasantly warm, so that you are extra comfortable. Thanks to the four castors, the gas heater can be moved comfortably.

Features gas operation:
- Flame failure device
- Oxygen deficit protection
- Piezo ignition
- Gas hose
- 3-step regulation
- For operation with commercially available propane gas cylinders 5 – 11 kg

Features grid operation:
- Adjustable thermostat
- Tilt protection
- Fan and 2-step regulation of heat output

Operating pressure: 50 mbar
Gas consumption: 305 g/h
Nominal capacity: 1500 W
Dim. (W x H x D): 42 x 72 x 36 cm
Weight: 9.8 kg **310/046** **229.00**

home is everywhere

Strip Light Awning Case

LED strip lights suitable for outdoor use. They are drawn into the groove provided for this purpose, which is located in the lower part of the casing of the F45s, F45L and F70 awnings. Standard at 2.5 m (for awnings of 3.0 m) with:

- 1 strip with cable for 12 V connection
- 4 additional strips

The strips snap into place when pressed. The LEDs attached to the casing do not have to be removed while driving.

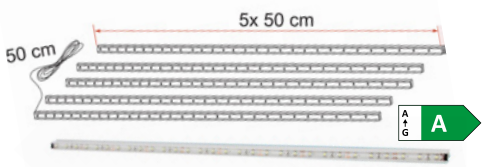

LED number: 150 pieces;
LED colour: neutral white.
Extension kit of 50 cm available as accessory (Kit LED Awning Case 50). 12 V | 12 W | 1400 lm
Dim. (L x W x H): 500 x 30 x 20 mm
Weight: 60 g

white	**321/271**	**17.25**
anthracite	**321/270**	**17.25**

Pin Reversal Switch Steps

Rocker switch with 6 contacts and step print. Two changeovers usable as opener or N/O contact. Separate input terminals. With flat plug connection.

anthracite	**321/253**	**26.90**

USB Socket

USB charging socket for tablets, smartphones, navigation devices and much more; 2 USB sockets depending on the version.

USB-A	★ **321/278**		**62.90**
USB-A/-C	**321/007**	NEW	**76.90**

LED Rotary Dimmer

Turning the knob dims the light and pressing it switches the light on/off. Suitable for Berker Integro Flow. Installation depth 40 mm, without socket 22 mm. Capacity: 30 W at 12 V

anthracite	**321/281**	**96.50**

Dimmer Touch

By touching the front plate in the symbol area, you can regulate the brightness of the LEDs. Power: 2 x 15 W at 12 V or 2 x 25 W at 24 V.

anthracite	**321/277**	**127.90**

Installation Programmes 10,000 and 20,000

Electricity in the smallest of spaces. The 10,000 and 20,000 systems are a full range of sockets and switches in a small format: the external dimensions per element including frame are only 60 x 60 mm and the inside micrometer is only 53 mm. Indoor installation for caravans, ships and boats.

Travel Adapter Schuko/CH

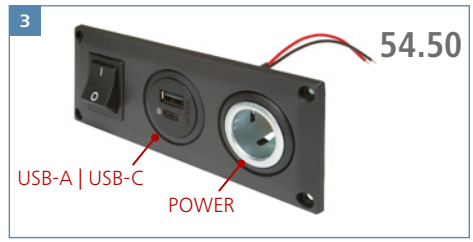

The travel adapter CH serves as an adapter for connecting electrical devices with earthed safety plug system in countries with the CH plug system. The adapter is not a voltage and frequency converter. Child-proof socket. With partially insulated pins. 230 V/10 A.
Dim. (W x H x D): 4.7 x 8 x 4.2 cm; Weight: 40 g
321/057 **6.50**

PRO CAR AUTO- UND BOOTSZUBEHÖR

Since 1991, **PRO CAR** has been producing 12 – 24 V connectors for manufacturers and retailers in the car and caravan sector. The company and some PRO CAR products are certified and monitored by TÜV Rheinland and tested according to the quality management system DIN EN ISO 9001:2008 and the environmental management system ISO 14001:2004.

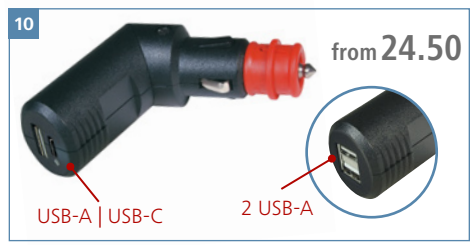

1 | Surface-Mounted Triple Socket

Surface-mounted socket for operating various consumers with power socket. Fastening with screws under cupboards, in ventilated storage boxes in cars, motorhomes, lorries and boats. Load capacity: 20 A with a cable cross-section of 2.5 mm², 16 A with a cable cross-section of 1.5 mm². Inner diameter 21 mm.

2 Power | USB-A | USB-C	**324/107**	NEW	**48.00**
2 Power | 2 USB-A	**324/056**		**39.90**

2 | Surface-Mounted Triple Extension

Compact extension with voltage converter for charging USB devices such as smartphones, navigation devices and cameras. Robust plastic housing, universal plug for DIN, power or cigarette lighter sockets, including base plate. Cable length: 2 m; Inner ø: 21 mm

2 Power | USB-A | USB-C	**324/106**	NEW	**59.95**
2 Power | 2 USB-A	**324/055**		**49.95**

3 | Switchable Recessed Socket

Ideal for charging and operating USB-A/USB-C-capable devices with high charging current requirements.

Power socket for universal plugs (inner ø: 21 mm). Loadable with a cable cross-section of 2.5 mm² with 20 A and with 1.5 mm² with 16 A. Without base plate with fixing screws. With blue LED. Output 5 V. Switchable via on/off switch. Protection against overload, reverse polarity, overtemperature. Max. 3.6 A.

POWER | USB-A | USB-C	**324/025**	**54.50**

4 | Recessed Double Socket IP 54

Recessed socket IP 54 with cover. Operating voltage: 12 V/24 V DC, output power: 5 V DC, 3.6 A. Integrated voltage converter. Ideal for charging USB-enabled devices with high charging current requirements. USB-A | USB-C

without installation plate	**324/028**	**28.95**
with installation plate	**324/027**	**29.95**

5 | Recessed Socket

Built-in socket with integrated voltage converter, for charging and operating smartphones, navigation devices, PDAs, digital cameras, mobile phones and other electronic devices that can be charged via USB. Mounting plate included.

USB-A	**324/066**	**22.95**
2 USB-A	**324/057**	**26.90**
USB-A | USB-C	**324/048**	**30.95**

6 | Recessed Double Socket NEW

With integrated voltage converter; 12 V/24 V DC. Supports Power Delivery, Quick Charge USB-A/-C and Samsung AFC USB-A/-C.

USB-A | USB-C	**324/103**	**34.95**

7 | Surface-Mounted Double Socket NEW

Compact power USB double socket in round design: 12 – 24 V DC to 5 V DC with integrated voltage transformer and blue LED. Ideal for charging and operating electronic devices with a USB connection. USB-A | USB-C

without lid	**324/105**	**39.95**

PRO CAR AUTO- UND BOOTSZUBEHÖR

8 | Power Socket

For operating additional devices in cars, boats and caravans. Capacity of 20 A with a cable cross-section of 2.5 mm². Capacity of 15 A with a cable cross-section of 1.5 mm². Inner ø 21 mm, installation opening 27.8 mm. With spring dowel pin green, 12 – 24 V, unilluminated, for front installation, for e.g. thick-walled wood.

without installation plate	**324/082**	**9.50**
with installation plate	**324/075**	**11.25**

9 | Power Socket

For operating additional devices in cars, boats and caravans. Current-carrying capacity: 20 A (cable cross-section of 2.5 mm²), 15 A (cable cross-section of 1.5 mm²). Inner ø 21 mm. With screw thread.

20 A	**324/089**	**9.95**

10 | Charging Plug USB

Angled USB charging plug for 12 V vehicle electrical systems. Charges and operates mobile phones, smartphones, navigation devices, MP3 players, cameras and tablets efficiently with a high charging current. Automatic voltage reduction from 12 V DC to 5 V DC for USB devices.

2 USB-A	**324/053**	**24.50**
USB-A | USB-C	**324/054**	**33.50**

1 | Standard Socket with Cover

Recessed standard socket with cover. Fastening with hexagon nut. Suitable for standard and universal plugs. Inner diameter: 12 mm.

16 A 12 V, 24 V	**324/079**	**6.95**

2 | Surface-Mounted Socket with Lid

With 6.3 x 0.8 mm flat terminals, suitable for standard plugs, TÜV-approved and -monitored, with contacts according to DIN ISO 4165. Inner ø: 12 mm

16 A 12 V, 24 V	**324/081**	**9.40**

3 | Standard Socket Adapter

The adapter allows the operation of devices with large plugs in small DIN-sockets. Rigid model. Inner ø 21 mm for cigarette lighters.

16 A 12 V, 24 V	**324/095**	**12.75**

4 | Adapter

Adapter for power supply with large plugs ø 21 mm in smaller DIN sockets, inner diameter 12 mm. Cable length: 25 cm

	140/136	**11.25**

5 | Safety Plug

Plug with switch, 180° infinitely adjustable, incl. 8 A fuse.

with 2 m cable	**324/091**	**16.75**
without cable	**324/092**	**12.95**

6 | Two-Pole Plug Universal

Cable connection to screw contacts up to 2.5 mm², secured by screwable strain relief, TÜV-tested and -monitored.

8 A with fuse	**140/131**	**6.75**
16 A without fuse	**140/132**	**6.95**

Bewährte Qualität – Proven Quality

AUTO- UND BOOTSZUBEHÖR

7 | Twin Connector Socket

Universal plug for cigarette lighter sockets and standard sockets. Two large sockets (inner ø 21 mm), max. 2 x 8 A. Integrated, exchangeable 16 A fuse.

16 A; Cable length: 25 cm	**324/086**	**18.25**

8 | Twin Connector Socket

Universal plug for cigarette lighter sockets and standard sockets. With two sockets. Inner ø 21 mm. Compact design.

16 A	**324/058**	**30.95**

9 | Extension Cable

Extension with spiral cable 2 x 0.75 mm². Length: 0.6 – 3 m. With standard plug and socket. Nominal current: 8 A

Cable length: 3 m	**324/071**	**18.95**

10 | Extension Cable

Flat cable 2 x 0.75 mm. With 8 A universal safety plug (integrated fuse) and socket connector (inner ø 21 mm). Nominal current: 8 A

Cable length: 4 m	**324/087**	**16.50**

11 | Socket Power Supply Unit

For connecting 12 V devices, e.g. electric coolers, lamps, PRO CAR bathroom and heating mats as well as heating fabric. With connector socket (inner ø 21 mm). Nominal current: 5 A

Cable length: 1.2 m	**322/533**	**68.90**

12 | Surface-Mounted Power Socket

Surface-mounted socket for operating various consumers with power socket. Fastening with screws under cupboards, in ventilated storage boxes in cars, motorhomes, lorries and boats. Load capacity: 20 A with a cable cross-section of 2.5 mm², 16 A with a cable cross-section of 1.5 mm². Inner diameter 21 mm.

1-fold	**324/098**	**11.25**
3-fold	**324/074**	**29.90**

13 | Extension Triple Socket

Universal plug for cigarette lighter sockets and standard sockets. Max. 16 A with triple socket. Inner ø 21 mm. Cable length: 2 m

16 A	**324/061**	**37.95**

14 | TFT Connection Cable

Connection cable (2 m) for TFT with safety universal plug 8 A and hollow device connector (inner ø 2.5 mm, outer ø 5.5 mm, straight).

Cable length: 2 m	**324/059**	**13.75**

15 | Connection Cable Car Battery

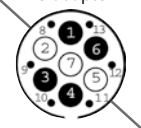

Cable for connection to a car battery. With crocodile clips, inner ø 21 mm. Nominal current: 8 A

Cable length: 1 m	**324/060**	**12.90**

16 | Universal Right-Angle Plug

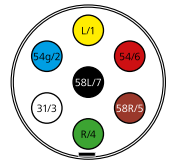

With operational check via LED. Adapter that can be firmly positioned by a bayonet catch, screwed strain relief, cable cross-section max. 1.5 mm², suitable for cigarette lighter and standard sockets according to DIN ISO 4165.

Fuse Box with Transformer

- Automatic switchover from battery to transformer operation (priority switching)
- Mains connection via 2-pole automatic fuse
- Mechanical strain relief for cable connection on appliance
- Automatic fuse for transformer
- Phono filter and LED display for mains voltage or 12 V DC input
- Car fuses for 12 V outputs

Fuse box with transformer, suitable for 230 V power systems, for electricity supply of 230 V appliances (lights, electrical devices), as well as 12 V appliances in caravans and motorhomes. The integration of a 12 V transformer in one housing enables the connection and simultaneous operation of 230 V and 12 V consumers. Can also be used in motorhomes to relieve the battery by connecting load-defined consumers such as fans and lighting to it.

Approved for continuous operation!
The fuse box is equipped with priority switching. When the supply voltage is applied (mains operation), the integrated transformer takes over the supply of the 12 V consumers and switches off the battery. The appliance has a thermal circuit breaker to protect the transformer from damage, as well as a car fuse that protects against short circuits.
CAUTION: Cannot be used as a charger!
Nominal voltage: 230 V
Nominal current: 15 A
Nominal capacity: 140 W
IP protection class: IP20
Dim. (W x H x D): 23 x 12.5 x 23 cm
Weight: 4 kg **322/431** **369.00**

Always be well connected and safe!

DOMETIC OUTDOOR

Continuous output: 350 W

Switched-Mode Power Supply

The power supply unit is designed for 12 V power supply in recreational vehicles. An integrated priority circuit supplies the consumers connected to it when the 230 V mains voltage is available and reduces the load on the connected 12 V consumers and the RV battery. **Approved for continuous operation!**

- Input: 230 V (198 – 264 V) 50 Hz
- 5 outlets with 5 – 15 A
- Incl. additional fuses
- Display for defective fuse
- Suitable for furniture installation
- Indoor use only
- 12 V connection via 6.3 mm blade receptacle

Continuous output: 350 W
Dim. (L x W x H): 24 x 20.7 x 5.6 cm

Battery Disconnector

With the high-quality disconnector, you always have control over the power supply to your vehicle or system. The compact one-pole switch with ø 45 mm offers a reliable solution for safely disconnecting the battery and thus interrupting the power supply.
Nominal current: 100 A

322/331 **13.95**

High Current Relay MT HS 500

The high current relay with USG function can be used as a main switch for very high currents up to 500 A duration (1000 A/min). Can be used as battery main switch and externally controlled. Can also be activated as undervoltage protection. Power consumption only 0.0001 A. Thread M10.
Dim. (W x H x D): 50 x 150 x 94 mm;
Weight: 785 g

322/024 **284.95**

284.95

BÜTTNER DOMETIC

Pressure Switch High Current Relay

Pressure switch with discreet functional lighting (green). With this switch, the high current relay can be controlled and switched on and off from inside. If the undervoltage protection in the high current relay is activated and triggers automatically, it is indicated by the switch flashing.

BÜTTNER DOMETIC

Minus Distribution Board MT MV-12

Compact 12-fold distributor for battery minus-side. Input over collective terminals (max 50 A); distribution via 12 individual outputs (max. 20 A). Dim. (W x H x D):
90 x 40 x 60 mm; Weight: 92 g

322/125 **43.95**

MT Displays and Switches

MADE IN GERMANY

With the MT display and switch programme by BÜTTNER ELEKTRONIK, you can put together your own personal control centre. All measuring devices are designed as built-in units (installation templates included), illuminated and compatible with the switch and fuse programme. All displays are made in Germany and have been specially developed for use in travel vehicles. For example, the LCD thermometer not only displays the outside temperature but also saves the lowest value. Important for all those who are also on the road in autumn and want to estimate when the waste water tank will start to freeze.

MTiQ InfoPanel

MT Duo Battery Check

Displays the start/onboard voltage via LEDs. Nominal voltage: 12 V;
Dim. (W x H x D): 4.7 x 8.5 x 2 cm **322/806** **64.95**

MTiQ InfoPanel

Displays onboard voltage and the fill level of fresh water/waste water/waste tank. Integrated main switch (16 A) and pump switch (10 A).
Nominal voltage: 12 V; Dim. (W x H x D): 20 x 5.5 x 2 cm **322/816** **124.95**

MTiQ InfoPanel Basic

Digital display of: start/onboard voltage, fill level of fresh/waste water. Programmable undervoltage. Main switch function, on/off switch (pump, ICC, etc.). Solar information of all MT solar controllers (from 2014 on).
Nominal voltage: 12 V; Dim. (W x H x D): 20 x 6.5 x 2.4 cm
322/176 **258.95**

MTiQ InfoPanel Digital

With integrated battery computer MT 4000 iQ plus fill level of fresh/waste water. Main switch function, on/off switch (pump, ICC, etc.). Solar information of all MT solar controllers (from 2014 on).
Nominal voltage: 12 V; Dim. (W x H x D): 20 x 6.5 x 2.4 cm
200 A-Shunt **322/178** **415.00** 400 A-Shunt **322/179** **499.00**

MT Pictogram Film

Film with 70 abrasion-resistant symbols that can be stuck onto panels. **322/819** **11.95**

MT Solar Remote Display

MT Solar Remote Display
Built-in devices that can be plugged into any MT Duo solar controller with the included 5 m power cable. No complex wiring is needed for you to instantly see how much energy your solar system is currently providing.

MT Solar Remote Display I
Displays the current output of your solar system gradually in per cent (10 – 100 %) via LCD.
silver grey **322/821** **97.00**

MT Solar Remote Display II + III
Equipped with a large LCD display and many additional functions. It shows: charging current (A), system voltage (V), charging function, solar energy in a bar graph, time and date. In addition, the Solar Remote Display II + III has an electric meter function (Ah and Wh), which calculates how much capacity has been passed on to the battery. This display can be universally set to zero. A switch output for free programming is also available.
Dim. (W x H x D): 4.5 x 8.5 x 2 cm
Weight: 25 g

silver grey **322/820** **119.00**
black **322/843** **119.00**

Accessories

MT EBL Cable Set

For connecting all MT solar controllers to the Schaudt electronic block (EBL). Cable length: 1 m
322/166 **18.95**

MTiQ Ammeter

Measures the current up to 100 A start/onboard, time and date; programmable switch output; battery measuring shunt included in the delivery. Nominal voltage: 12 V, 24 V; Dim. (W x H x D): 8.5 x 8 x 2 cm
322/804 **195.00**

MTiQ Voltmeter

Measures the voltage of start and RV battery, programmable switch output, time, date.
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 8.5 x 8 x 2 cm
322/803 **136.95**

MTiQ Thermometer

Measures the indoor/outdoor temperature via a remote sensor (min/max memory); sensor included in delivery. Nominal voltage: 12 V, 24 V; Dim. (W x H x D): 8.5 x 8 x 2 cm
322/805 **136.95**

MT Display Housing

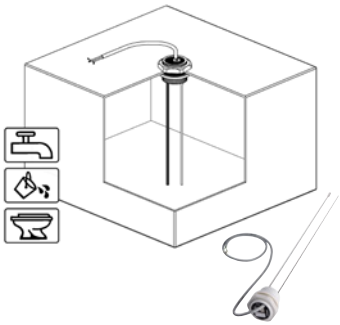

Dim. (W x H x D): 8.7 x 2.7 x 8.3 cm

MADE IN GERMANY

BÜTTNER DOMETIC

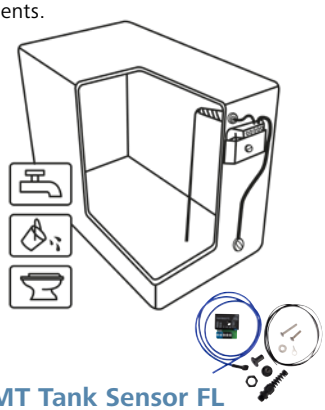

Tank Indicators

The tank indicators were developed for precise fill level measurement in fresh water, waste water and waste tanks. At the push of a button, the current fill level is displayed via light-emitting diodes. If the indicator button is not pressed, the entire system is currentless and does not drain the battery in the rest position. Since all instruments of this series have the same height dimensions, the tank indicators can be optimally extended to form a complete switchboard using the MT digital instruments.

Installation from above. For metal and plastic tanks. For all types of water. Measuring sensor can be cut to tank height. Tank height: 20 – 50 cm. Length: 49.2 cm

322/377 **77.95**

MT Tank Sensor FL

Installation from the top or the side. For plastic and metal tanks. Flexible tank sensor. For all types of water. For tank heights between 30 and 100 cm. Dim. (L x W x H):4.5x 4.5 x 1.5 cm **322/378** **78.95**

MT Waste Water/ Waste Tank Display

Bar graph display like fresh water tank display. Can be switched if two tank sensors (waste water/ waste tank) are connected.
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2 cm

322/808 **68.95**

MT Fresh Water Tank Display

The 10-digit bar graph display shows exactly how full the tank is.
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2 cm

322/807 **58.95**

Switch, Fuse and Socket Panels

These panels can be optimally extended to control panels in combination with the other displays or installed as individual components. Installation is simple and with the pictogram film, every fuse and switch can be easily and universally marked.

MT Main Switch 20 A

On/off switch with integrated overcurrent protection.
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2 cm

322/809 **55.95**

MT Switch Panel 2

Two separate switches (On/Off), withstanding 16 A each.
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2 cm

322/814 **29.95**

MT Fuse Panel 4

Panel with 4 fuse boxes: 6 A; 8 A; 10 A; 12 A – with circuit breaker.
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2 cm

322/810 **79.90**

MT Front Panel

Blind cover, can be used for installation of own components.
Dim. (W x H x D): 4.7 x 8.5 x 2 cm

322/815 **11.95**

MT Switch Panel 1

Separate switch, can carry a maximum current of 16 A. Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2.5 cm

322/813 **22.95**

MT Switch Panel 4

Panel with 4 on/off switches (8 A) with LED control.
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2.5 cm

322/811 **43.95**

MT Socket Panel

Standard socket for 12 V/24 V DIN plug (ISO 4165).
Nominal voltage: 12 V, 24 V
Dim. (W x H x D): 4.7 x 8.5 x 2.5 cm

322/812 **24.95**

MT USB Panel 2

Two USB sockets; power charging 5 V, 2.5 A. Nominal voltage: 12 V
Dim. (W x H x D): 4.7 x 8.5 x 2.5 cm

322/175 **61.95**

Solar Controller MPPT SmartSolar

from 124.95

Including Bluetooth Smart
The wireless solution for setting up, monitoring and updating the SmartSolar charge controller. For a wired data connection with a Colour Control GX, other GX products, a PC or other devices.

Nominal voltage: 12 V, 24 V

NEW

Ultra-fast Maximum Power Point Tracking (MPPT)
Particularly in cloudy conditions, when the light intensity is constantly changing, an extremely fast MPPT controller improves the energy yield by up to 30 % compared to PWM charge controllers and by up to 10 % compared to slower MPPT controllers.

Features:
- Protection class: IP43
- Connections: screw terminals for max. 6 mm² cable
- VE.Direct for data exchange

MPPT 75/10
Nominal capacity: 145 W;
Charging current: 10 A;
Dim. (W x H x D): 113 x 100 x 40 mm;
Weight: 400 g
322/381 **124.95**

MPPT 75/15
Nominal capacity: 200 W
Charging current: 15 A;
Dim. (W x H x D): 113 x 100 x 40 mm;
Weight: 500 g
322/382 **134.50**

MPPT 100/20
Nominal capacity: 290 W
Charging current: 20 A;
Dim. (W x H x D): 131 x 100 x 60 mm;
Weight: 700 g
322/383 **179.70**

MPPT 100/30
Nominal capacity: 290 W
Charging current: 30 A;

Battery Charger Blue Smart IP22

Blue Smart IP22 Charger is the new professional battery charger with built-in Bluetooth! It can be used with devices in your workshop or with motor vehicles such as (classic) cars, motorbikes, boats and motorhomes. The wireless solution for monitoring voltage and current, changing settings and updating the charger when new functions are available. With an efficiency of up to 93 %, these chargers generate up to four times less heat compared to the industry standard. The Blue Smart Charger has a microprocessor-controlled "adaptive" battery management system. The adaptive function automatically optimises the charging process depending on the way the battery is used.

1 output
Nominal voltage: 12 V
Charging current: 30 A

NEW

Phoenix Inverter VE.Direct

Inverters can be used to supply power to household appliances that require 230 V/120 V AC. Batteries for leisure applications or car batteries rated at 12 V, 24 V or 48 V DC are used for this purpose.

Type Phoenix 12/800
Continuous output: 650 W
Peak power: 1500 W
Dim. (W x H x D): 21.6 x 30.5 x 10.5 cm
Weight: 5.5 kg
322/721 **357.00**

Type Phoenix 12/500
Continuous output: 400 W
Peak power: 900 W
Dim. (W x H x D): 17.2 x 27.5 x 8.6 cm
Weight: 3.9 kg
322/720 **197.50**

Type Phoenix 12/1200
Continuous output: 1000 W
Peak power: 2200 W
Dim. (W x H x D): 23.2 x 36.2 x 11.7 cm
Weight: 7.4 kg
322/722 **472.40**

Votronic has been dedicated to providing a complete power supply on the road for over 35 years. Quality "Made in Germany" that you can rely on – be it in a caravan or motorhome (even off the beaten track), with the fire brigade or in rescue and special operations vehicles.

239.00

Product features
- Replaces the conventional cut-off relay
- Suitable for all alternators
- High charging capacity even for short journeys
- Full charge for longer journeys
- Optimised charging characteristics for acid, gel, AGM and lithium LiFePO4 batteries
- Significantly better energy balance with conventional alternators
- Automatic power control
- Parallel operation to increase power possible
- Simple installation, no intervention in the starter circuit
- Incl. temperature sensor 825

NEW

Charging Converter

More?
Online!

Reach your destination with a full RV battery
The problem is well known and yet always annoying: despite a powerful alternator, the RV battery is not fully charged even on long journeys. The VOTRONIC charging converters, which charge the RV battery quickly and gently in accordance with the battery manufacturer's specifications, provide a remedy. Even on short journeys, the battery is charged with the full charging current. Losses due to long charging cables in large vehicles and voltage fluctuations at the alternator (Euro 6) are perfectly compensated.

Especially suitable for EURO 6

Technical data
- Device type: VCC 1212-30
- Rated voltage (input/output): 12 V/12 V
- Adjustable charging current (limit/max.): 20 A/30 A
- Battery capacity (recommended/up to): 60 ... 200/260 Ah
- Dim. (W x H x D): 146 x 40 x 73 mm
- Pack size: 16 x 12 x 4.8 cm
- Weight: 260 g

323/462 **239.00**

Standby Charger Pro

Intelligent charge retention of the starter battery
Have you ever experienced this?
You leave the radio on in the camper or open the door frequently and suddenly the vehicle's battery management system reports a problem. The reason for this is the frequently high power consumption by the radio or the vehicle control systems, which consume a relatively large amount of power from the starter battery every time the door is opened.
The Standby Charger Pro, which automatically maintains the starter battery charge, provides a remedy. The device can be easily retrofitted without changing the existing wiring and, unlike simple, unregulated standby chargers, is also suitable for modern lithium (LiFePO4) supply batteries thanks to an adjustable undervoltage limit.

Product features
- IU charging characteristic
- Adjustable end-of-charge voltage from 12.5 V to 14.5 V
- Adjustable cut-off threshold from 12 V to 14 V
- Suitable for lead, gel, AGM and lithium (LiFePO4) batteries
- High output current of max. 8 A
- Passive cooling with overheating protection
- Two independent 12 V control inputs
- Parallel operation possible to increase power

139.00

Technical specifications
- Nominal battery voltage: 12 V
- Input voltage range: 12 V ... 15 V
- Current consumption in standby: < 1 mA
- Max. current consumption: 12 A
- Max. charging current: 8 A
- Dim. (W x H x D): 105 x 25 x 71 mm
- Pack size: 14 x 11 x 4.5 cm
- Weight: 50 g

323/465 **139.00**

LIPPERT

MADE IN GERMANY

1 | Battery Monitor BW 50

Battery monitor designed for electric consumers that need a lot of power (e.g. air conditioners).
- Cutoff voltage: 11.3 V
- Switch-on voltage: 11.9 V
- Switched current: 50 A

Dim. (W x H x D): 100 x 43 x 90 mm;
Weight: 210 g **322/082** **119.95**

2 | Power Supply Unit CSV 300

Power supply units power 12 V devices such as submersible pumps, fans, lamps, etc. They are particularly suitable for caravans that are predominantly connected to the 230 V power grid and only temporarily power devices using the vehicle battery.
- Output voltage 12.5 V DC, output current max. 24 A
- Five separately fused 12 V circuits
- Installation space (mounting rail 35 mm, 4TE) for 230 V basic supply
- Priority switching for power supply; otherwise, devices are powered using the vehicle battery
- Use without battery possible

Dim. (W x H x D): 225 x 85 x 210 mm;
Weight: 1.5 kg **322/114** **227.95**

3 | Battery Charger

Features:
- Charging characteristics curves for lead-acid, acid-gel and AGM batteries (AGM only LAS 1218 BUS)
- Steady charging current, even if the supply voltage fluctuates
- Can be used as a power supply unit with no battery connected
- Re-charging of the starter battery with a maximum of 3 A
- Weight reduction compared to a comparable thyristor charging device: approx. 80 %
- No ripple voltage at the output
- High efficiency of approx. 90 %

LAS 1218-2

Like the LAS 1218 BUS, the battery charging device LAS 1218-2 is operated as a primary-phase switched power supply unit. In comparison to the LAS 1218 BUS, the charging technology is accomplished without temperature compensation and with two charging characteristics curves.
Dim. (W x H x D): 145 x 90 x 245 mm;
Weight: 1 kg **322/112** **294.90**

LAS 1218 BUS

The battery charging device LAS 1218 BUS is operated as a primary-phase switched power supply unit. Due to this modern circuit technology, a high charging current with compact dimensions and low weight can be accomplished – no ventilation necessary. Also strengthens charging of systems with electronic block. Temperature-compensated charging. Suitable for SDT BUS. Including temperature control. Dim. (W x H x D): 150 x 90 x 250 mm; Weight: 1 kg
322/135 **379.95**

4 | Electronic Block with Control Display

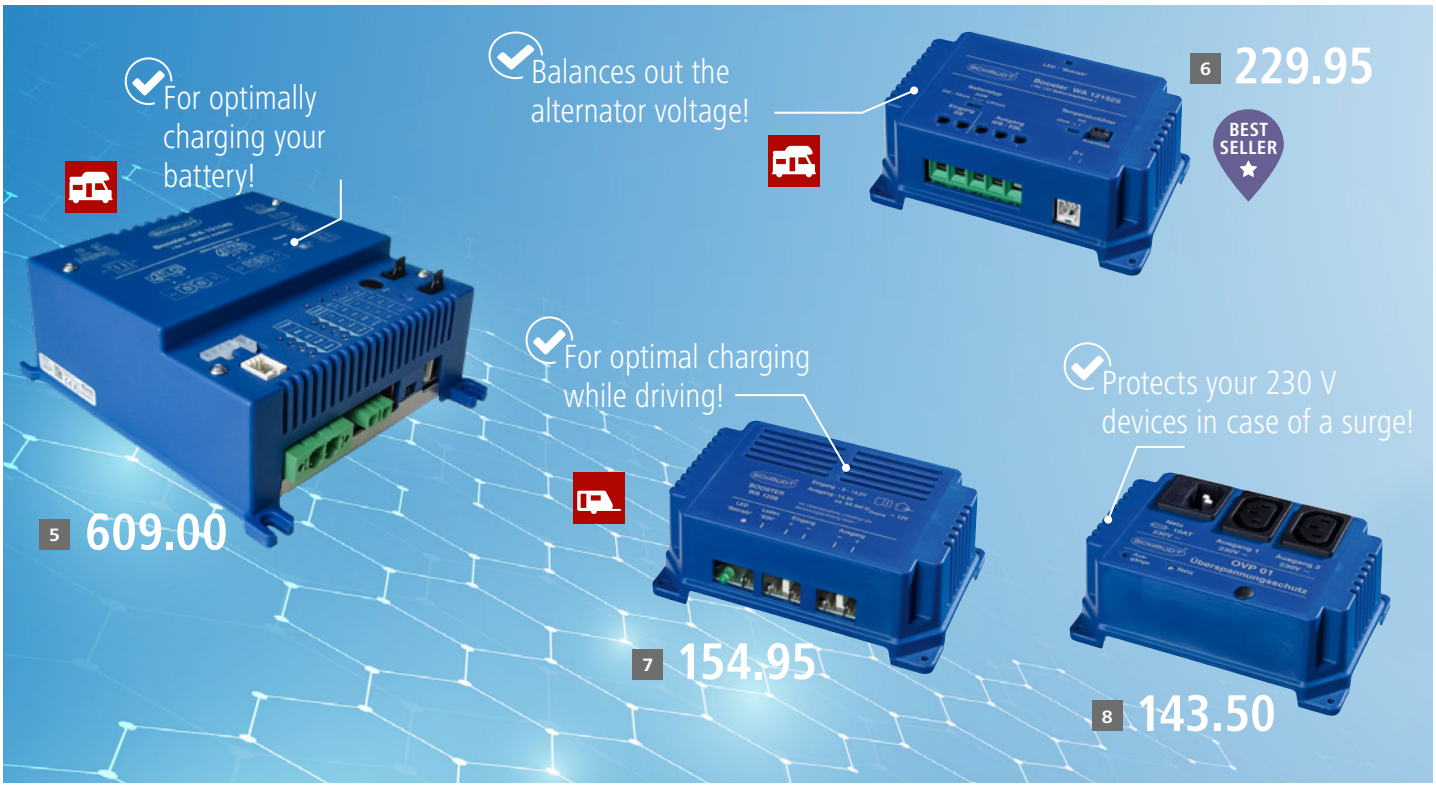

The classic. The electronic block EBL 211 contains a battery charger module, coordinates the complete 12 V circuit and assumes further control and regulation functions. Connection material is included. The LT 453 control panel and the complete connection material are included in the set as well.

System control display LT 453
- LED display
- Voltage indicator with 8 levels for living area and starter battery
- Visual battery alarm when battery voltage is very low
- Tank level display with 4 levels for two water tanks
- 12 V main switch with switch-on control
- 230 V mains control
- Pump switch with switch-on control

Dimensions (W x D x H): 180 x 25 x 112 mm

Electronic block EBL 208 S/211
- Bistable 12 V main switch relay and battery monitor module
- Charging module: characteristic curve IUoU, charging current 18 A for 6-cell lead-acid, lead-gel and AGM batteries
- Battery disconnector for winter shutdown
- Connection for solar charge controller LR(M) 1218

Dimensions (W x D x H): 275 x 170 x 130 mm
Weight 1.9 kg **322/134** **629.95**

5 | Booster WA 121545 (Motorhome)

The Booster WA 121545 is a clocked step-up/step-down converter with a very high level of efficiency. It balances the volatile alternator voltage and provides a high charging current. The booster is perfect for charging lead-acid, lead-gel, AGM1, AGM2 and lithium batteries while driving with 12 V mains power. If a battery temperature sensor is connected, the charging voltages are adapted to the battery's temperature. To guarantee optimal charging, both the voltage of the living area battery and the voltage of the starter battery are measured with a voltage sensor. **Scope of delivery:** all accessories except the connection cables.

Charging characteristic: IUoU (power-dependent switch to charge retention)

Adjustable battery types:

- Lead-acid battery: 14.4 V/13.4 V
- Lead-gel battery: 14.4 V/13.8 V
- AGM1 battery: 14.4 V/13.8 V
- AGM2 battery: 14.7 V/13.7 V
- Lithium battery: 14.4 V constant (CCCV or IU characteristic for LiFePO4 batteries with an autonomous battery management system

Temperature compensation: automatic after connecting the temperature sensor, maximum charging voltage then: 15.0 V

Input voltage range: 12.0 V – 15.0 V

Maximum charging current adjustable to four levels: 45 A/55 A/63 A/70 A

Level of efficiency: ≥ 93 % at maximum charging current

Dim. (W x H x D): 186 x 79 x 160 mm;
Weight: 1.15 kg **322/344** **609.00**

6 | Booster WA 121525 (Motorhome)

The Booster WA 121525 is perfect for charging 12 V lead-acid, lead-gel, AGM and lithium batteries while driving (independent of the alternator's voltage). For alternators with energy-saving charging strategies (Euro 6), the application of a booster is required as the charging voltage is especially volatile (12.6 V to 15.0 V). With standard alternators, battery charging in the living area is also improved by the application of the booster WA 121525. With AGM batteries that require a charging voltage of 14.7 V, the use of a booster is indispensable. The booster WA 121525 is a clocked step-up/step-down converter making up for the volatile alternator voltage and provides a high charging current.

- Suitable for lead-acid, lead-gel, AGM and lithium batteries
- Characteristic curve: IUoU
- Input voltage: 12 V – 15 V
- End-of-charge voltage: 14.4 V/14.7 V, depending on battery type (at battery temperature of 25 °C)
- Current-dependent switching to charge retention
- Average charging current: 25 A (max. 30 A)
- Optional: temperature-compensated charging

Dim. (W x H x D): 148 x 55 x 95 mm;
Weight: 400 g **322/133** **229.95**

Tip

Temperature Sensor

For battery temperature-dependent charging for Booster WA 121525. **322/602** **31.95**

MADE IN GERMANY

LIPPERT

7 | Booster WA 1208 (Caravan)

The Booster WA 1208 increases the available charging voltage to max. 14.4 V while driving, resulting in the best possible charging of the caravan battery. The booster separates the caravan battery from the starter battery of the towing vehicle when the engine and ignition are switched off.

- Input voltage 9.0 – 14.5 V
- Input current max. 11 A
- Output voltage 14.4 V
- Power output approx. 8 A at an input voltage of 12 V
- Return current from caravan battery < 0.5 mA. When the ignition is off, no current flows.

Dim. (W x H x D): 148 x 55 x 95 mm;
Weight: 270 g **322/437** **154.95**

8 | Surge Protection OVP 01 A

The OVP 01 surge protection device protects 230 V devices during surges and undervoltages. It is connected between the mains supply and the Schaudt devices that need protection. During a surge, the device disconnects the connected devices from the 230 V mains within milliseconds. The devices remain disconnected until the mains voltage is back to normal. Delivery includes an IEC extension.

- Two consumer outlets
- Cutoff voltage RMS: < 175 V AC, > 265 V AC
- Cut-off delay: 10 msec

Dim. (W x H x D): 148 x 58 x 95 mm;
Weight: 200 g **322/140** **143.50**

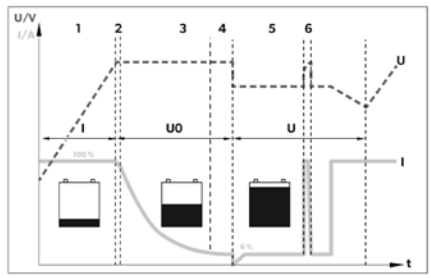

Charger PerfectCharge MCA

from 285.00

DOMETIC OUTDOOR

Starter batteries and supply batteries are designed for different tasks. To start the engine, starter batteries must initially supply a high current and then serve as an energy buffer with smaller partial cycles. Supply or RV batteries, in contrast, are discharged at lower currents over longer periods of time and then charged again. This means they are subjected to considerably higher loads. These characteristics must be taken into account and require special charging technology to avoid damage and to guarantee a long service life. The IUoU battery chargers use a unique six-stage charging cycle. They provide optimum charging for all gel, AGM and wet batteries because they charge quickly and gently at the same time.

- Gentle charging of 12 V batteries with optimised 6-stage IUoU charging technology
- Very compact and lightweight design, easy installation
- Sleep mode for quiet charging at half the power – ideal at night or in parking spaces with low electrical circuit protection
- Comes as standard with a bus interface for smooth integration into existing bus systems
- Compatible with the Dometic MPC 01 battery controller for perfect power management
- Useful additions: remote control, Hella battery sensor, temperature sensor

6-stage IUoU charging characteristic
I phase: At the beginning of the charging process, the empty battery is charged with constant current (100 % charging current) until the battery voltage reaches the charging voltage.

Uo phase: The 3-stage absorption charging phase (Uo phase) begins. The duration depends on the battery. The voltage remains constant (Uo). In the first two minutes, the charge of the battery is determined. Then, the main charging phase begins, during which the battery is fully charged. When the battery is fully charged or the charging current is below 6 % of the nominal charging current for 15 minutes, the Uo phase is completed.

U phase: The charger switches to trickle charging. Conditioning: Every 12 days, the charger switches back to phase 1 to revive the battery and prevent sulphation.

The necessary charging voltage for lithium batteries with BMS (battery management system) can be set via DIP switches. This way, lithium batteries can be optimally charged with MCA chargers.

Operating temperature: -20 – +50 °C
Nominal voltage: 110 V, 230 V

Output voltage: 12 V

	Charging current		Dim. (W x H x D)	Weight	Item no.	Price

Battery Sensor for MCA Chargers

This battery sensor measures the RMS current and the voltage of the connected battery and then calculates both capacity and charging status. It gives a warning signal if the battery is empty or defective and alerts you once it should be removed from the circuit. A useful accessory for the automatic charger Dometic PerfectCharge.
Cable length: 5 m **323/336** **159.00**

Remote Control MCA-RC 1

With the Dometic PerfectCharge MCA-RC 1, you can comfortably control your PerfectCharge battery charger. Simply press the button to activate the charging processor or to put the charger into sleep mode. In sleep mode, the charger works without ventilation and is therefore almost silent. For easy access, the remote control can be installed anywhere. Dim. (W x H x D): 2.8 x 7.2 x 5.8 cm;
Weight: 100 g **323/347** **79.00**

Temperature Sensor MCA-TS1

This temperature sensor is perfect for charging batteries in changing or extreme ambient temperatures. For optimal charging, Dometic PerfectCharge MCA-TS1 adjusts the charging voltage to the battery temperature. In high temperatures, the charging voltage is reduced to prevent battery gassing. In lower temperatures, it is increased to guarantee that the battery is charged completely.
Cable length: 7 m **323/348** **18.00**

DCC Charging Converter PerfectPower

from 205.00

DOMETIC OUTDOOR

This DC charging converter ensures that the supply battery is always optimally charged while you are driving, so that you never arrive at your destination with an empty battery. Highly recommended for modern Euro 6 class vehicles with intelligent alternators. Also recommended for vehicles in which the cable cross-section is not sufficient to supply the connected devices.

- The supply battery is optimally charged while driving.
- Reliable solution for Euro 6 compliant vehicles
- Stable output voltage – suitable as permanent power supply for sensitive devices
- Advanced IUoU charging technology – adapts to all battery types, even lithium batteries with BMS (battery management system). Required charging voltage can be set via DIP switches. This ensures that lithium batteries are optimally charged.
- Simple configuration thanks to DIP switches on the outside – you do not need to open the housing.
- Temperature-compensated charging with optional temperature sensor
- Elegant housing – exclusive Dometic design

Optimum battery charging while driving

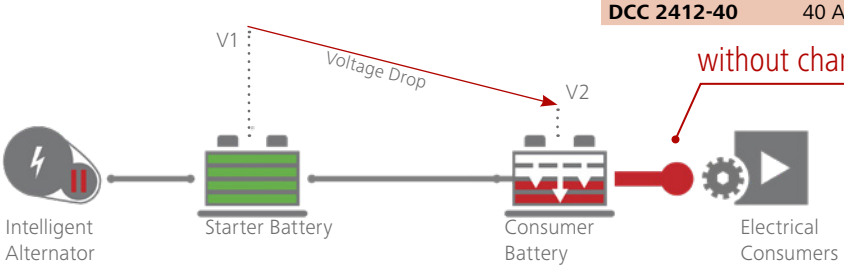

Operating temperature: -20 – +50 °C

Charger PerfectCharge IU 812

149.00

reliable IUoU charging technology at an entry-level price

IUoU battery charger for 12 V wet, gel and AGM batteries.
This tried and tested battery charger has been part of our product range for years now. It was developed for charging supply batteries with up to 100 Ah – e.g. the battery of your caravan's manoeuvring aid. Modern switch-mode technology guarantees high efficiency.

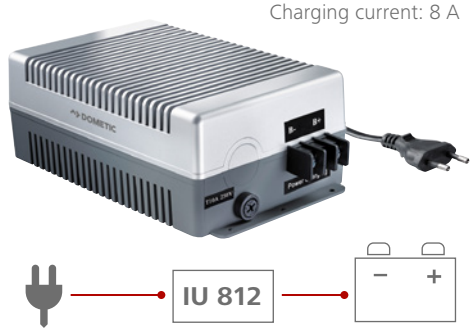

Charger and mains supply
PerfectCharge IU 812 is a universal accessory that offers you two useful features at a great price. The compact device charges batteries with up to 100 Ah and also serves as a power supply if necessary.

- For batteries with up to 100 Ah, e.g. for caravan parking sensors
- Quick and gentle charging despite fluctuations of mains voltage
- Can also be used as a power supply
- Prevents overcharging of battery
- Suitable for a variety of battery types – wet, gel and AGM batteries

Dim. (W x H x D): 120 x 70 x 200 mm; Weight: 800 g **323/345** **149.00**

MADE IN GERMANY

developed for charging in caravans and motorhomes

Onboard Charger Powerboozt

This compact and highly efficient onboard charger for the caravan and motorhome market was developed and also completely manufactured in Germany. The needs of modern campers, who demand high charging performance but want silent charging without annoying fan noises, were taken into account. The ingenious shape of the casing with its cooling fins ensures that the temperature on the surface does not rise above the permissible values even during continuous charging. Even though it is specially adapted to Powerboozt lithium iron phosphate batteries, it can also be adjusted to LiFePO4 batteries from other manufacturers as well as liquid acid lead batteries, GEL, AGM batteries and spiral cell batteries (Optima). Switching takes place immediately after plugging in the mains voltage and only needs to be done once. A temperature sensor is supplied to ensure that the lithium battery is not charged with the full charging current and potentially destroyed when charging at sub-zero temperatures. With lead-acid batteries, the charging voltage is adapted to the temperature.
Charging current: max. 25 A; efficiency: 93 %; charging cable: 2 x 4 mm².

Six different IUoU charging characteristics can be selected:
- Lithium (LiFePO4) 14.4 V
- Lithium (LiFePO4) 14.6 V
- Pb (wet, acid)
- GEL
- AGM (plate arrangement)
- AGM (spiral cell arrangement)

Incl. temperature sensor.
Nominal voltage: 230 V
Dim. (W x H x D): 150 x 65 x 160 mm
Pack size: 26 x 19 x 14 cm
Weight: 2 kg **322/866** **395.00**

BÜTTNER DOMETIC

Integrated temperature sensor!

from 469.00

removable control panel

MADE IN GERMANY

Charger MT Duo-Automatik

As with all products of Büttner Elektronik, the chargers are manufactured precisely according to their field of application.

Optimum charging is guaranteed by state-of-the-art IUoU charging characteristics combined with long-term activation and AGM/gel/LiFePO4 acid battery switching. This ensures unsupervised charging with automatic battery regeneration during longer periods of not using the caravan or in the winter. All devices can be connected in parallel to already existing chargers to increase the charging capacity and are protected against short-circuit, overload, reverse polarity, etc. A voltage regulation is integrated and ensures sufficient charging capacity even with weak or unstable power grids. The control panel with display options and night-mode switch can be removed and mounted inside the vehicle as a remote control (additional cable extension available).

From series MT 1240 onwards, a second main charging output is integrated. This makes charging independently operating battery banks possible. These units also come with a 3-step switch that can be used to reduce the input power in weakly fused locations. All MT chargers are supplied with a battery temperature sensor to optimise charging performance.

	Charging current	Dim. (W x H x D)	Weight	Item no.	Price

Inverter RKB-Reitz

Nominal voltage: 12 V

from 289.00

- Safe design with electrical insulation of input and output
- Most advanced SPWM (Sine-Pulse-Width Modulation) technology – pure sine wave output
- Optional output: 220/230 V AC, mains frequency selection by DIP switch 50/60 Hz
- Lower standby consumption
- Ready-to-use USB output: 5 V DC/1 A

LED display

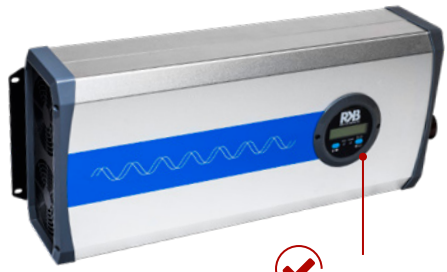

Inverter RKB-Reitz 400 W/1200 W

- LED display shows error and operating status
- Extensive protection thanks to input protection device: overvoltage protection, undervoltage protection, overload protection, short-circuit protection, overtemperature protection
- Ready-to-use USB output: 5 V DC/1 A

Continuous output: 400 W
Peak power: 1000 W
Dim. (W x H x D): 240 x 75 x 130 mm
Weight: 1.4 kg
322/751 **289.00**

Continuous output: 1200 W
Peak power: 2400 W
Dim. (W x H x D): 330 x 100 x 232 mm
Weight: 3.9 kg
322/752 **499.00**

The RKB inverter is a pure sine wave inverter that ensures that all 230 V mains consumers with a power consumption of up to 400 W/1200 W/3000 W in motorhomes can be operated at any time at maximum efficiency.

With LCD display!

Inverter RKB-Reitz 3000 W

- EMC characteristics for power supply systems with higher quality requirements (EMC = electromagnetic compatibility)
- Suppression of input peak currents to protect lithium battery systems
- High output power factor
- Double air cooling control
- LCD design for easy monitoring and configuration of parameters
- Extensive protection: input reverse polarity protection, input overvoltage protection, input undervoltage protection, output overload protection, short-circuit protection, overheating protection

Continuous output: 3000 W
Peak power: 6000 W
Dim. (W x H x D): 560 x 123 x 235 mm
Weight: 10.5 kg
322/753 **1,289.00**

Sine Wave Inverter SinePower DSP

from 139.00

Ideal for Euro 6 vehicles with smart alternator

The SinePower DSP sine wave inverters deliver pure sine wave voltage, which optimally supplies even sensitive 230 V devices. Due to the large input voltage range, they also work perfectly in modern Euro 6 vehicles. In the event of overload, overheating, overvoltage or undervoltage, the clever inverters switch off as a precaution – and switch on again automatically when everything is fine again. The integrated ventilation adjusts flexibly to the load and temperature conditions and runs quietly. With the models from 600 W onwards, a remote control is included in delivery and the devices feature an energy-saving standby mode.

Sine Wave Inverter SinePower DSP-T from 889.00

DOMETIC OUTDOOR

This convenient sine wave inverter converts battery current into pure 230 V alternating current. This ensures reliable operation of electrical appliances up to 1200 W with power from the vehicle battery.

The intelligent mains priority circuit ensures smooth switching from battery current to mains current when the vehicle is connected to the mains. If not needed, the inverter switches to the energy-saving smart standby mode. It switches back on automatically as soon as the preset "wake-up" range is reached. With the elegant control panel (please order separately), all settings can be made conveniently and flexibly.

pure sine wave voltage – also for sensitive devices

premium inverter

More? **Online!**

Highlights:
- Battery-saving mains priority circuit
- Energy-saving smart standby mode
- The pure sinusoidal output voltage of 230 V AC is suitable for sensitive electrical appliances.
- Smart standby mode saves energy when the device is not in use
- User interface for perfect operation and control
- CI bus compatible – can be easily integrated into the vehicle network
- Integrated mains priority circuit with voltage synchronisation
- Large DC input voltage range – ideal for Euro 6 compliant vehicles
- Load- and temperature-controlled, low-noise fan

Accessories

Remote Control SinePower — 82.95

This convenient remote control was developed for controlling all sine wave inverters of the Dometic DSP-T series and features the most important standard functions: On, Off and Smart Standby. Optionally available as accessory.
- Convenient remote control for the most important functions: On, Off and Standby
- Easy operation at the touch of a button

Dim. (W x H x D): 80 x 55 x 28 mm; Weight: 100 g **323/322** **82.95**

Cable Set for Sine Wave Inverters — from 77.00

The Dometic SinePower MSI-CCBL connects Dometic SinePower sine wave inverters to the vehicle battery.

1000 | 1300 W	**323/325**	**77.00**
1500 | 1800 W	**323/326**	**94.00**
2000 I 2300 W	**323/327**	**105.00**

Control Panel SinePower — 154.95

This versatile control panel for DSP-T inverters offers maximum convenience. It controls all basic functions (On, Off, Smart-Standby *), displays important performance parameters, and can be configured and expanded as needed. By connecting a battery sensor (item no. 323/336), it becomes an intelligent energy monitoring device that allows you to control the batteries' charging status at any time. An MCA charger can also be programmed via the control panel and switched to silent night mode at the touch of a button.

*** Energy-saving Smart-Standby mode:**
SinePower DSP-T sine wave inverters automatically switch to the energy-saving Smart-Standby mode if no (or only little) energy is required. On your control panel, you can set when the sine wave inverter is supposed to "wake up" again, be it only for charging your mobile phone or for powering devices such as water boilers or hairdryers. You can also activate the battery protection mode: the sine wave inverter automatically switches off after a certain time if set to its standby mode to avoid an unnecessary drain of the battery.

Dim. (W x H x D): 150 x 110 x 23 mm
Weight: 150 g **323/323** **154.95**

MT PL 300 SI

MT PL 600 SI

MT PL 1500 SI

Sine Wave Inverter PowerLine

PL series 300 W/600 W/1500 W

from 199.00

The PowerLine inverters by Büttner Elektronik supply a pure sine wave voltage. Within the respective power window (300 W, 600 W, 1500 W), even sensitive consumers can be operated smoothly. All devices are equipped with a remote control to operate the inverter from the inside. Moreover, the devices can also be started via a control input. Either directly via a 12 V signal or via a battery computer MT 5000iQ. This means that an e-bike charger on board can be charged directly via the inverter even without a mains connection if there is a power surplus (e.g. solar).
All safety and monitoring functions are integrated. They, as well as the temperature-controlled high-performance fans, ensure a smooth operation. The no-load current consumption is very low to put as little strain on the RV battery as possible.

Ready-for-installation delivery: All inverters are delivered ready for installation with socket, remote control (cable length: 5 m) and battery connection cable with integrated fuse.
Input voltage: 10 – 16 V.

	Continuous output	Dim. (W x H x D)	Weight	Item no.	Price

Information

Charging your e-bike

The ideal solution for this is the MT NU 3600 mains switch in combination with the MT 5000 iQ battery computer, which can be used to control the mains switch. All indoor sockets are then automatically supplied either from the mains of the campsite or pitch or autonomously from the inverter. In addition, you can always keep an eye on the battery capacity. Simply program the control output on the battery computer (e.g. at 95 % ON and 90 % OFF) and connect it to the mains switch. The RV batteries are charged first. The surplus current, for example from solar energy when the mains switchover is active, is then used to charge the e-bikes.

Sine Wave Inverter PowerLine Combination Package

The combination package ensures that 230 V are always available on the interior sockets, regardless of whether the inverter is switched on or shore power is plugged in.
MT-PL 1500 SI + MT NU 3600
Continuous output: 1500 W
Nominal voltage: 12 V
Weight: 13 kg **322/567** **859.00**

Switching System MT NU 3600

for sine wave inverters

Intelligent motorhome priority switching with very high switching capacity. Suitable for all sine wave inverters that do not have an integrated switching system and those that would overload because of connected devices. The switching system ensures that the interior power outlets always have the optimal voltage supply of 230 V. This happens either through shore power, when it is charged at a campsite, or independently through an inverter. Additionally, a 230 V output can be unlocked. Accessible through Battery Computer MT 5000 iQ or any desired 12 V control signal. Therefore, if there is a power surplus (e.g. solar), an E-bike charger can be activated on board even without a grid connection, as it will be charged through the inverter. If the charging capacity is sufficient, the interior air conditioning may be used while driving.

185.00
MT NU 3600

The following connection options are available:
- Input mains/shore power
- Input inverter
- Output for charger and refrigerator, etc.
- Output to interior power outlets
- Output 230 V after activation 12 V
- Signal output for operating status

Nominal voltage: 230 V
Nominal current: 16 A
IP protection class: IP55
Dim. (W x H x D): 160 x 145 x 77 mm
Weight: 400 g **322/713** **185.00**

124.95
MT NU 2300

Switching System MT NU 2300

for sine wave inverters

External mains priority circuit with a switching power of up to 2300 W. Suitable for sine wave inverters in motorhomes without integrated switching system. Either the inverter is connected through to the interior sockets or, if available, 230 V from the external power supply.
Nominal voltage: 230 V
Nominal current: 10 A
IP protection class: IP55
Dim. (W x H x D): 113 x 55 x 93 mm
Weight: 255 g **322/029** **124.95**

MADE IN GERMANY

removable control panel

Information

Which inverter is suitable for which application?
An inverter produces an alternating voltage of 230 V from 12 V on-board voltage. Commercially available end devices can therefore be operated via the standard RV battery. The appropriate inverter must be selected depending on the power input of the consumers.
Should I use a pure sine wave inverter or a modified sine wave inverter?
MT devices are pure sine wave inverters. The current is comparable to a normal household current. If the performance class is right, any electrical appliance can be operated without restriction. Simple, cheaper devices that are advertised as "modified", "quasi" or "trapezoidal" inverters can operate many end devices only with restrictions or not at all. If you want to be on the safe side, we recommend an inverter with pure sine wave voltage.

Inverter: 230 V from the RV battery

MT inverters are "Made in Germany" and guarantee an optimal 230 V supply from the RV battery – anywhere and at any time.

Inverters of the MT series operate as pure sine wave inverters and are consequently suitable for even the most sensitive energy consumers on board (e.g. coffee machines by Saeco, Jura, Senseo, etc.). Even modern vacuum cleaners with sensor control and highly sensitive receivers can be operated easily and unrestrictedly. The MT 600 SI-N is already sufficient for operating TV/SAT, video units, DVD, computers or battery chargers. For larger energy consumers, inverters with 1200 W or 1700 W are available.

All units are capable of handling overloads and are equipped with whisper fans as well as monitoring and shutdown functions. The operating unit with display options can be removed and mounted inside the vehicle as a remote control. An integrated load detection turns the units to energy-saving mode while they are not needed, or completely off, if need be. The larger inverters are also available with an integrated mains switching function.

Via this function, the inverter detects whether external shore power is available and switches accordingly. As long as shore power is available, the inverter remains switched off and the interior sockets are supplied with shore power. If no shore power is available, the inverter can be activated and then, the same sockets are supplied with power by the inverter.

All inverters are delivered ready for connection with integrated socket and battery cable (1.2 m).
- Input voltage: 10.5 V up to 15 V
- Output voltage: 230 V AC/50 Hz, quartz-stabilised

Accessories

Inverter Installation Kit KlimaBox

With the MT 1700-SI-K 12 V sine wave inverter and the KlimaBox, it is possible to operate 230 V air conditioners of medium power class even while driving.
In standby mode, the sine wave inverter supplies all household appliances up to 1700 W on board with 230 V from the 12 V RV battery. At the touch of a button, the inverter switches on the air conditioning system if there is sufficient on-board or charging power. The air conditioner can then also be operated while driving.
Dim. (W x H x D): 480 x 70 x 299 mm

Weight: 8 kg	**322/152**	**1,439.00**

Cable length: 5 m	**322/121**	**17.95**

Charger with Inverter

integrated remote control

from 1,735.00

ICC Inverter/Charger Combination

The ICC is the universal power supply for recreational vehicles. The devices were developed especially for mobile use and combine an automatic charger with a sine wave inverter. It meets all requirements of modern caravans. If shore power is used, the charger starts automatically and depending on battery type and capacity (adjustable), charges the RV batteries and, if required, also the starting battery. If the shore power input is insufficiently fused, the devices can be limited. If high starting currents (e.g. for air conditioning) are needed, these are temporarily provided by the RV battery. The integrated sine wave inverter fulfils this task. It can be loaded very heavily and is equipped with an automatic mains switching system. As long as shore power is used, the inverter's power is switched to the indoor sockets. If no external power source is available, the inverter supplies the sockets with power. The inverter also has an integrated load identification to set the inverter to energy-saving mode if it is not used for a longer period of time. A remote control for the interior is included in delivery. With this device, the inverter is started and can then be switched to automatic/permanent/night mode. It also shows if shore power is used and displays the inverter's current power output.
Input voltage: 10.5 – 15 V

Type ICC 12V 1600 SI-N/60A

Battery Control Booster MT BCB 10/10 IUoU

Charger/booster/pulser for optimum charging inside the caravan

439.00

removable control panel

The ideal charging combination for caravans and small travel vehicles: The battery is charged at the 230 V mains with 10 A. The device comes with a long-term charging programme (incl. temperature sensor) and guaranteed constant charging at 230 V. An integrated pulser additionally prevents sulphation of the battery. If the caravan is connected to the towing vehicle, the integrated 12 V booster ensures optimum charging while driving. Voltage loss due to overly long and insufficiently dimensioned connecting cables is fully compensated. The input charging power is limited to 11 A due to the plug-in connection.

For Euro 6 vehicles

MADE IN GERMANY

Battery type: adjustable (liquid/AGM/LiFePO4/gel)
Charging current: operated with 12 V booster: 10 A/10 A, 230 V charging: 10 A

Scope of delivery: temperature sensor; cable extension (5 m) for removable control panel.
Dim. (W x H x D): 223 x 70 x 270 mm
Weight: 2.45 kg

	322/128	**439.00**

Optimal Charging for Recreational Vehicles

BÜTTNER DOMETIC

Charging RV batteries is rarely ideal. Most of the time, the 230 V charge is too weak, does not have the right characteristics and is simply not sufficient while driving. Newer vehicles (Euro 5 and Euro 6), which are equipped with a shutoff option of the alternator, do not charge the battery intermittently. This results in partly charged batteries, fast performance degradation and an early failure. Büttner Elektronik has the ideal solution "made in Germany".

MT Charge Boosters are the right choice when the existing 230 V charge is absolutely sufficient. The units are directly switched into the charging line and take over charging (IUoU) while driving, each with 25/30/45/50/60/75 A or 90 A.

The **MT BCB** is a smart combination consisting of a 230 V charger with pulser and a 12 V charge booster. While driving and when connected to the mains, the RV batteries have access to the latest IUoU charge characteristics. Even long-time charging is no problem at all. A pulser prevents harmful sulphation.

MT BCB 25/20 is the ideal addition to any motorhome that is equipped with a wet, AGM or gel battery. The BCB is connected to the battery in parallel to the existing charging line. If 230 V are available, 20 A are additionally provided. The MT BCB acts as a booster while driving. It requests charging power, regulates the required charging voltage and charges the RV battery with the same output and ideal characteristics.

MT BCB 30/30; MT BCB 40/40 and **MT BCB 60/40** have the same features. Due to their high output, they are perfect as a main charger for self conversions and for use in camper vans. There is no need for a cutoff relay. Simply guide the charging cable of the starter battery to the RV battery via the MT BCB and the batteries are charged ideally in any operating state.

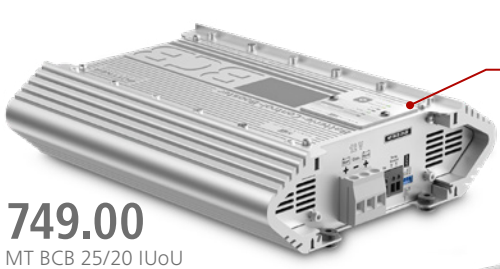

With the **PowerPack**, all charging problems have come to an end. A powerful solar system in combination with an MT BCB and a battery computer. For everyone who does not want to compromise in any situation.

164.95

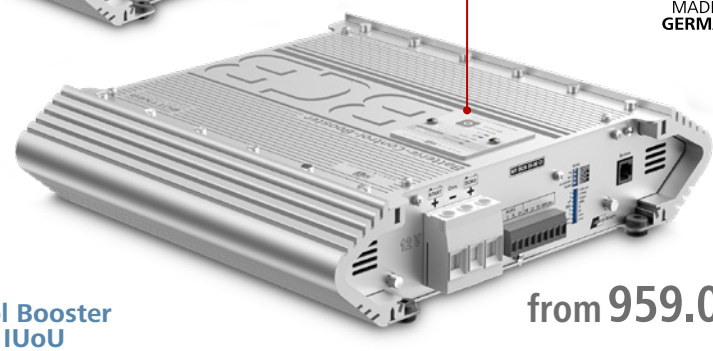

High-Current Relay (80 A) with Installation Kit

The BCB 30/30 can be installed in vehicles with an already integrated electrical management system (EBL) and vehicles with already installed basic electronics (EBL, CBE, etc.). For its installation, a high-current relay (80 A) with installation kit is required. **322/123** **164.95**

MT BCB 25/20 IUoU

from 959.00

For Euro 6 vehicles

MADE IN GERMANY

Battery Control Booster MT BCB 25/20 IUoU

The **Battery Control Booster MT BCB 25/20** by Büttner Elektronik is the ultimate 3-in-1 solution for optimally charging your RV battery/batteries. The booster can be installed in parallel to the existing charging technology in the recreational vehicle.

1. **At the 230 V mains:** The BCB supports any existing charger with additional 20 A and fulfils the charging characteristic required by the battery manufacturer with its temperature-controlled IUoU characteristics (liquid acid/gel/AGM/LiFePO4).
2. **While driving:** Thanks to the booster function, the **MT 25/20 BCB** optimises charging while driving. Again, the IUoU charging is active and, depending on the charging state, the BCB supports charging with an additional 25 A. Voltage loss due to long charging lines is fully compensated. Hence, it guarantees a full charge at longer distances; overcharging the RV battery is impossible.
3. **Pulser function:** can be activated. Prevents falling out of the Pb-batteries due to sulphating.

Installation: The BCB 25/20 includes a high current relay with cable kit and fuse, which makes installation extremely easy even in vehicles with pre-installed electronic block (EBL, CBE).

Dim. (W x H x D): 233 x 70 x 270 mm
Weight: 4.4 kg

BEST SELLER

MT BCB 25/20 IUoU **322/496** **749.00**

Battery Control Booster MT

charger/booster/pulser in one device

Due to their higher output power (30 A, 40 A, 60 A), these devices are not only suitable for parallel charging with existing charging devices, but can also be used as the main charging device. For self-conversion or van conversion, the BCBs can be mounted directly between starter and RV battery. Adjustable to wet, gel, AGM and standard LiFePO4 battery systems.

1. **At the 230 V mains:** The BCB provides 30 A or 40 A, which can be reduced by 10 A directly on the device.
2. **Driving mode:** The IUoU charge is active while driving. The booster is activated with either 30 A, 40 A or 60 A depending on the current power level to ensure a full charge.
3. **Pulser function:** As with BCB 25/20, the pulser function can be activated.

Installation: If the BCB is used as the only charging device, no high-current relay is necessary. BCB 30/30 can be installed in vehicles with integrated electronic block (EBL, CBE, etc.). This requires a "high current relay (80 A) with installation kit".
Dim. (W x H x D): 300 x 70 x 270 mm
Weight: 3.8 kg

IUoU Charging Booster MT

from 469.00

Optimal charging even during short journeys!

removable control panel

Finally, it is possible to guarantee optimal and quick charging even while driving: simply connect the IUoU charging booster to the charging cable of the RV battery. The devices are available with several power levels. Thanks to the IUoU charging characteristics, they not only increase the charging current from the alternator when required, but also raise the charging voltage to the value that is necessary for the respective battery type for a full charge and is required by the battery manufacturers.

- Latest technology for high charging capacity even during short trips
- For longer journeys, the IUoU charge guarantees a full charge and prevents overcharging.
- All devices are switchable to gel, AGM, standard acid, and LiFePO4 batteries.
- Removable control panel for monitoring the booster from inside the caravan
- Ideal charging for "Euro 5" vehicles with battery management and "Euro 6" vehicles
- Delivery including temperature sensor
- Dim. (W x H x D): 270 x 70 x 223 mm

Information

Charging Booster – Today, using a charging booster to charge the body battery while driving is **inevitable** because the alternator either no longer takes over that function or is generally no longer designed for it.
If you want to install one, however, you have to check beforehand whether the serial wiring, or the built-in power supply unit, is adequately dimensioned for a high-powered device.
Generally, all basic systems that we are aware of are designed for a minimum of either 25 A or 30 A. This means that an **MT LB 30** can be installed without a problem as it can be reduced to 25 A. Many vehicles and their infrastructures are, however, also designed for a charging capacity of up to 50 A and are protected accordingly. If that is the case, we recommend an **MT LB 50**, which can also be reduced by 5 A and will guarantee optimum and high-powered charging even if you only drive a short distance.
If you have a charging booster with over 60 A, a **specialist workshop** has to **check** beforehand whether the existing wiring and the potentially existing power supply unit are designed for this high a charge. This is also the case for the **BCB devices** described overleaf, in which the charging booster and a 230 V charging unit are contained in a casing. Both devices (booster + BCB) are located in a specially designed aluminium casing. This is due to the unfavourable installation situation in motorhomes and the fact that, if they only had a simple casing, the devices would heat up significantly when charged constantly. The charging capacity would then have to be reduced due to the built-up heat. MT devices by **Büttner Elektronik** are designed especially for travel vehicles and **continuous output**, which is why they always do well in benchmark tests.

Charging Booster MT LB 2412

MADE IN GERMANY

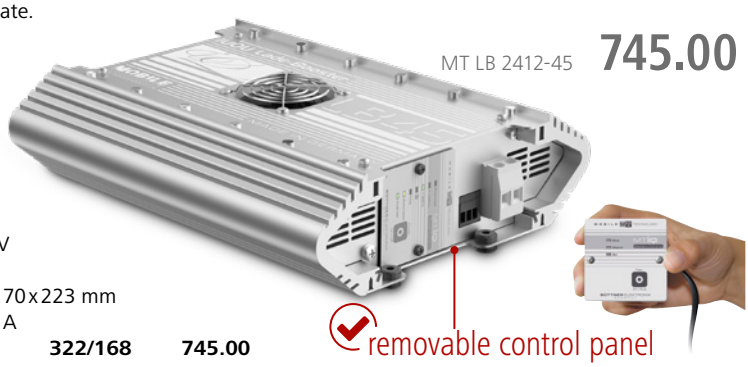

Charging the 12 V RV battery/batteries with 24 V

Ideal charging of 12 V RV batteries for vehicles with a 24 V system. More economical than a second alternator and additionally providing an ideal IUoU charge for vehicles with modern alternator control. A battery cut-off relay does not have to be used. When the vehicle is started, the charging booster starts to supply power. Unit available in two power levels (25 A and 45 A). Depending on the battery type set, the charging voltage is increased to the level required by the battery manufacturer in order to reach the fully charged state.

- Latest charging technology for high charging capacity, even on short trips.
- Full charge during longer journeys is guaranteed by the IUoU charge while overcharging is impossible.

AGM LiFePO4 +Gel

MT LB 2412-45 **745.00**

SOLARLINES by Frankana Freiko®

optimal price-performance ratio

Solar Panel FF from 304.90

MADE IN GERMANY

Frankana Freiko offers solar panels and complete systems with an optimal price-performance ratio. Particularly suitable for battery charging in motorhomes and caravans and for home and cabin supply.

FF solar panels are equipped with monocrystalline high-performance cells that are protected against any weather conditions by a special glass. FF solar panels are designed for mobile use, but are also ideal for stationary use – even in the most adverse conditions.

The all-round aluminium frame offers a wide range of mounting options (mounting profiles, roof racks, etc.). A sturdy junction box is integrated into the back.
Performance warranty: 20 years.

- Specially developed for mobile use in motorhomes, caravans as well as at home or in cabins
- Equipped with high-performance monocrystalline cells
- Easy-to-install complete systems, optimally coordinated, with high-quality components

LILIE Campere Solar Panel – Customised Solar Power

The monocrystalline **campere** solar panels by LILIE with tested first-choice cells (78 x 39 mm) allow you to make optimum use of the available free space.
A variety of superstructures make the roof area of your motorhome a challenge for the installation of a solar system.

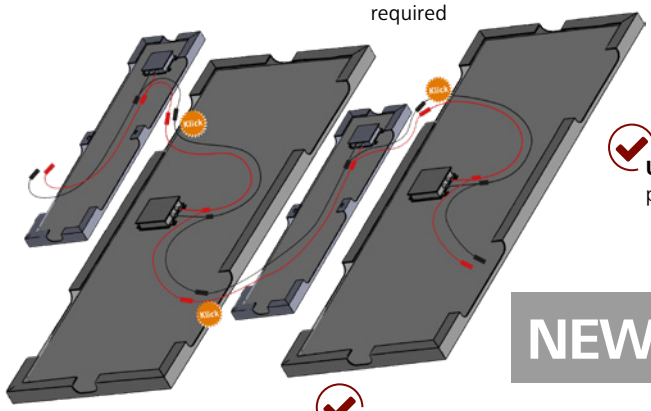

In contrast to classic series mounting, **campere** solar panels connected in parallel can also be installed with different amperages. The amperages of all panels are added together to form the total amperage. The solar panels only need to have the same voltage.

If a solar panel is partially shaded in a conventional series connection, this reduces the current yield of all other panels. The innovative parallel connection of the **campere** SPL25 and SPL105 solar panels by LILIE prevents this effect. As the voltage remains constant when connected in parallel, only the output of the partially shaded panels is reduced. All other panels continue to deliver full power.

Simple expansion of the system possible thanks to plug & play, no complex cable laying necessary

Simple expansion of the solar system on the roof using accessories, can be extended as required

NEW

Combine panels with different sizes and currents

Cost-effective expansion option, installation work is minimal for retrofitting

Solar Cable with Plug

For connecting solar panels and charge controllers, single-core. The special OF LEX insulation is temperature-, UV-, ozone- and weather-resistant. Suitable for SPL25 and SPL105.

+ Solar device for recharging without power supply

Optional inverter:
230 V on board

from 1,784.00

For a higher solar yield even in unfavourable weather conditions

All-In-One Solar System PowerPack Classic

The **PowerPacks** can be installed parallel to an existing basic electronic system in any touring vehicle. The BCB combination unit ensures that an additional charging current (20 A, 30 A, 40 A) is available at 230 V. During the journey, the BCB works in booster mode. It switches on when required, requests charging current (25 A, 30 A, 40 A), regulates to the required charging voltage (adjustable according to battery type) and charges the RV battery/batteries fully with an optimal characteristics curve. It also guarantees a constant charging current for "Euro 5" and "Euro 6" vehicles equipped with an alternator regulation. The **MT 5000 iQ** battery computer controls and monitors the system. At the push of a button, for example, the remaining capacity or the remaining running time is displayed. The solar system also integrates perfectly into the system. The PowerPacks are equipped with 110 Wp or 170 Wp 72-cell MT Black-Line modules. Specially developed for touring vehicles and optimally matched to the complete set, they guarantee optimal charging performance even in unfavourable weather conditions.

The **PowerPack Classic I**, as described, is supplemented by a solar set MT 110 MC. Optimum charging in the classic travel season between spring and autumn for small to medium-sized travel vehicles. See also Solar Info.

The **PowerPack Classic II** provides more solar power. The solar set MT 220-2 MC is equipped with two solar modules of 110 Wp each to supply larger motorhomes or vehicles with more consumers on board self-sufficiently.

Danger!, H225, H319, H336, H412, EUH066, EUH208, EUH210, EUH211

PowerPack Classic Power

The more powerful **PowerPack Classic Power** and **PowerPack Classic Power Plus sets** are equipped with a BCB with an output power of 30 A and 40 A respectively. They are suitable for travel vehicles for faster recharging or if a little more battery capacity is planned or intended. The charging power can be throttled on the device. In addition to the already mentioned advantages of all BCB systems, these devices are not only recommended for the extension of an existing charging system, but also as the sole central charging station for self-installation or van extension. Optimal IUoU charging at 230 V and also while driving. Parallel feeding into the existing on-board power supply or as sole base with direct connection to the starter battery. All battery types (wet, gel, AGM) can be charged, as can switchable common LiFePO4 batteries. Continuous charging for "Euro 5" and "Euro 6" is guaranteed. **PowerPack Classic Power** and **PowerPack Classic Power Plus** are equipped with an MT 5000 iQ battery computer and additionally with one or two MT Black Line solar modules with 110 Wp or 170 Wp for the Classic Power Plus. **EBL high-current relay with installation kit** (item no. 322/123) is required when PP Classic Power and Plus are installed in a vehicle with EBL or in parallel to already installed charging electronics.

for caravans, gardens and boats

Solar Panel MT Black Line from 379.00

The series' 72 MultiCell technology ensures ideal charging of the 12 V RV battery in every field and weather condition. Independent tests have shown that by doubling the cells, the charging performance improves significantly in both optimal and bad weather conditions. At the back of the panel, a robust and waterproof junction box is installed. The robust, all-round aluminium frame and the specially hardened glass protect the panels against even the worst operating conditions. Usually, solar panels are equipped with 36 solar cells per panel. MultiCell solar panels of the same size, however, are equipped with 72 solar cells.

All-In-One Solar System MT Black Line

NEW from 599.00

The installation kit includes everything you need to mount a solar system onto your recreational vehicle. Each all-in-one system comes with matching spoiler profiles and a robust, concealed cable routing to the roof. These high-quality PUR plastic components are extremely weatherproof and protected against harmful UV radiation. The solar panels are screwed onto the spoiler profiles. Therefore, it is possible to remove the solar system when changing your vehicle. The bracket itself is glued to the roof with a special adhesive. Adhesion has the advantage that no fixing holes need to be drilled into the roof. The solar systems' controllers come with the latest characteristics curves and can be switched from LiFePO4/gel/AGM to acid batteries. They also come with a second charging output (starter battery) and a connector for the solar remote display (optional). The solar controllers of the systems MTxxMC(-S) are designed so that a panel of the same output can be added if required. A matching set of connecting cables for vehicles with EBL base station (Hymer Group vehicles) is included in the set.

Scope of delivery: MT Black Line solar panel(s) · solar controller MPPT with temperature sensor · roof spoiler set including accessories · cable routing to the roof · adhesive for spoiler and cable routing to the roof · cable set internal/external · cable kit for vehicles with EBL base station (Hymer Group) · small components · mounting instructions

CDS LINE BÜTTNER ELEKTRONIK

Developed for **Recreational Vehicles**

Solar Panel **Removable**

Performance Advantages **in Partial Shade**

Long **Warranty Period**

More power in partial shade

Solar Panel MT CDS Power Line

from 879.00

MADE IN GERMANY

Thanks to a new type of circuit technology, MT CDS Power Line solar panels are far less sensitive to partial shade than all conventional solar panels. Particularly in the mobile sector, this results in a higher yield when – depending on the location – it cannot be avoided that branches, an attached roof box, the satellite system or an open skylight partially shade the solar panels. CDS panels are equipped with 44 monocrystalline high-performance cells and should always be used in combination with an MPP charge controller for optimum performance. Due to the special and complex assembly process of these solar panels equipped with 44 cell diodes, they are also manufactured in Büttner Elektronik's assembly centre in Germany. A robust, all-round aluminium frame protects the cells, which are completely embedded in special safety glass.

NEW

These installation sets equipped with CDS solar panels include everything you need. All all-in-one solar systems are supplied with the matching spoiler profiles and a robust roof cable routing. Made of high-quality PUR plastic, these components are safe from harmful UV radiation and also extremely weather-resistant. The solar panels are screwed onto the spoiler profiles. This makes it possible to remove the system at any time when changing vehicles. The bracket itself is glued to the roof with a special adhesive set, which has the advantage that no fastening holes have to be drilled into the roof. Each system is equipped with an MPPT solar controller. These have the latest characteristic curves and can be adjusted to liquid/AGM/gel/LiFePO4 batteries. They also have a second charging output (starter battery) and a connection for the solar remote display (option). For vehicles with EBL base station (Hymer Group vehicles), a suitable connection cable set is also included.

POWER LINE BÜTTNER ELEKTRONIK | Developed for **Recreational Vehicles** | Small Surface **High Performance** | Solar Panel **Removable** | Long **Warranty Period** | BÜTTNER DOMETIC

Solar Panel MT Power Line from 549.00

40 POWER CELLS | MADE IN GERMANY | Bewährte Qualität Proven Quality

With monocrystalline cell technology. Only the MT Power solar panels by BÜTTNER ELEKTRONIK guarantee maximum performance on a small surface area. The absolute best cells are selected during the manufacturing process and only these cells are used for Power solar panels with a high degree of efficiency. In the latest generation of MT Power Line solar panels, 40 cells are interconnected instead of the usual 36. We recommend using an additional MPP charge controller to make the most of the extra voltage. As a result, an optimal yield is always guaranteed, even in unfavourable weather conditions or with partial shading. As with all BÜTTNER ELEKTRONIK solar panels, a robust aluminium frame protects the solar cells and a waterproof socket is installed for easy wiring. Performance warranty: 25 years.

40 cells for higher yield: Four high-power cells more than usual plus MPP control technology guarantee the highest yield possible – even with limited space available.

TRAVEL LINE BÜTTNER ELEKTRONIK | Developed for **Recreational Vehicles** | **Lightweight** | Suitable for **Boats** | Small **Construction Height** | BÜTTNER DOMETIC

Solar Panel MT Travel Line

Travel Line solar panels – the mobile solution!

MADE IN GERMANY | AGM LiFePO4 +Gel | from 865.00

Mobile solution for solar panels for recreational vehicles in a high-quality design – made in Germany. The panels are not only light and folding, but also very durable, even under the most adverse conditions. Powerful solar cells ensure maximum solar power on a small surface area – ideally protected by a newly developed, highly robust, light back material and sewn into the best tarpaulin fabric currently available in the marine sector.
Another novelty are the industrial magnets integrated into the fabric. They provide a strong hold, e.g. on the van roof or on the side of the vehicle, while textile material protects the coated support surface.
Thanks to the integrated eyelets, the solar panels can also be mounted individually, e.g. with pegs at the sunny spot or hanging in a tree, while the vehicle itself is standing in the shade, which is possible because of a 10 m connection cable. Furthermore, the mobile solar controller (battery type adjustable) included with every panel ensures the correct charging voltage.
Simply unfold the solar panels, plug in the charge controller and connect it to the RV battery via the plug connection – done!

Travel Line solar panels include: folding panel with crystalline cell technology, 10 m connection cable with universal plug, integrated eyelets and industrial magnets + Travel Line solar controller.

322/826 **1,059.00**

All-In-One Solar System MT Flat Light

from 1,095.00 **NEW**

The ultra-flat **MT Flat Light** all-in-one solar systems include all installation accessories. Every system is equipped with high-quality components in a high-quality design. All ultra-flat solar panels are equipped with monocrystalline high-performance cells. These retain their high output voltage even in extreme external temperatures and thus guarantee high daily outputs even in southern holiday locations. The exterior cable is UV-proof, like the cable set in the interior, resistant to all environmental influences. The cable connection to the interior is routed through an extremely flat cable gland. This ensures that the installation height is extremely low. The solar control system is also state-of-the-art. Each all-in-one system is equipped with an EBL connection cable set and therefore state-of-the-art.

Solar Panel MT Flat Light Q

The solar panel by Büttner Elektronik was developed for pop-tops and high roofs of camper vans, vans, campers or as a walk-on version for your motorhome's roof. The panel combines high quality and maximum solar capacity. Thanks to its square design, it is possible to operate consumers such as compressor fridges and/or inverters self-sufficiently despite limited space and battery capacity. When adhering the panel to high roofs, it is possible to lead the connection cable downwards inside the panel. However, an ultra-flat roof cable routing is also included in delivery. For this 42-cell high-performance panel, an MPP solar controller is mandatory.

MT SM 170 FLQ

Nominal capacity: 170 Wp; Daily output: 750 Wh; Dim. (L x W): 980 x 980 mm;
Weight: 4.9 kg **322/827** **1,028.00**

Solar Panel Light & Flat

Extremely flat, light and compact!

The panel is extremely flat, light and compact and can be glued directly onto the vehicle roof. The high-performance cells are protected by a weather-resistant plastic film. The connection cable (5 m) is firmly cast onto the panel so that no moisture can get in. The included flat roof duct is resistant to pressurised water and can be glued on.

SM LFS 120

Nominal capacity: 120 Wp, Daily output: 480 Wh
Dim. (L x W): 1090 x 670 mm; Weight: 2.5 kg
322/696 **439.00**

Gap Filler Set

Due to the longitudinally profiled roof surface of the Fiat Ducato van, it is not easy to glue on solar mounting profiles and Flat Light solar panels. There is not enough adhesive surface in the front area and there is also the risk of wind noise. This is why special "gap fillers" were developed. They are glued into the recesses with Sikaflex (included with every all-in-one system). The bracket or the Flat Light solar panel is then glued onto the continuous surface. In the rear area, this is not necessary and also not advisable as it would hinder water from running off the roof.

Gap filler set consists of 2 specially pretreated aluminium sheets. The number of sheets required depends on the panels' width and positioning. Weight: 160 g **322/561** **20.95**

Solara Profi Pack from 489.00

SOLARA module. komponenten. systeme

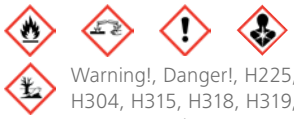

The Solara Profi Pack combines high quality with the high-performance panels of the Solara S series.

- Panel(s) of the Solara S series with silver frame profile
- Solara charging controller with up to 16 A charging current suitable for retrofitting with additional solar panels
- Charge controller with LED display for battery charging status
- ABS retaining spoiler, in white, special coating, UV-resistant, incl. screws
- ABS roof cable routing, in white, for absolutely waterproof cable routing
- Special adhesive kit Solara Fix Pack for gluing the retaining spoiler and the roof cable routing
- Panel connection cable with UV-resistant casing and MC4 plug-in system
- Comprehensive installation instructions
- 5 years product warranty on all components

Panel Connection Cable

Matching panel connection cable for the S-Series to connect the panel to the charge controller.
Cable length: 5 m

322/499 **36.90**

Information

Function of a charge controller
The charge controller is connected to the solar panels and the battery for overcharge protection. If there is no deep discharge protection, the charge controller is also connected to the battery to prevent consumers from draining it. Therefore, the charge controller is the control centre and an important protection for the battery. Charge controllers must match the battery type.

5 Jahre Garantie / 5 Years Warranty

Charge Controller from 49.90

Optimal battery charging
The Solara single-circuit controllers charge the battery according to the battery type with a regulated charging characteristic. They guarantee high reliability, state-of-the-art technology and easy installation at minimum cost. An optional load output can protect the battery against deep discharge.

- Automatic detection of battery voltage
- Solar power 90 – 350 W
- Electronically protected against overcharge, reverse polarity, overvoltage
- Battery deep discharge protection in each controller 5 to 20 A
- Battery type (GEL, AGM, lithium) manually adjustable
- LED display for battery status
- Lithium-Ready (in coordination with manufacturer)
- Low self-consumption < 4 mA
- 5 years product warranty

Charge controller for two battery circuits (e.g. motor battery and supply battery) with LCD display.

module. komponenten. systeme

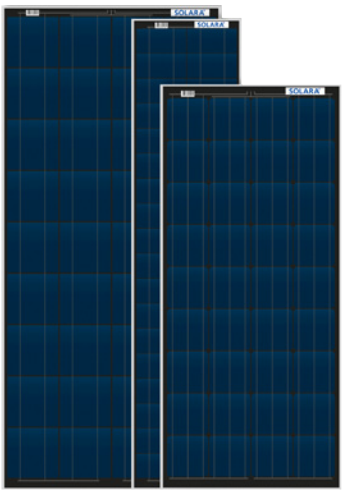

MADE IN GERMANY

robust and reliable

Solar panels especially for campers and motorhomes

from 369.00

Solar Panel S Series

The framed S Series solar panels impress with their high levels of performance and robustness. The S Series panels work even in extreme weather conditions: storm, hail, ice, snow, high humidity and extreme temperature fluctuations. The high-performance cells reliably utilise the available light for maximum electricity yield.

- Appealing design
- Special glass that protects the panel against any weather
- Robust aluminium profile frame (even seawater-resistant)
- Socket installed on the back

Long service life
- Weather-resistant and waterproof protection films used in production
- Drainage holes in the frame prevent frost damage
- Large, waterproof junction box with clamp connector

	Nominal capacity	Daily output	Dim. (L x W x H)	Weight	Item no.	Price

maximum power

Solar Panel Power S Series

from 719.00

High-end solar panels for a maximum daily output.

Maximum performance on the smallest surface
- Elegant and aesthetic design in black
- Slim construction – versatile installation possibilities
- Increased number of cells for maximum daily output
- Cell technology with over 22 % efficiency

Long service life even in extreme conditions
- Use of 3.2 mm thick, scratch-resistant, thermally hardened solar glass
- Excellent mechanical capacity thanks to the torsion-resistant panel frame
- Specifically developed for permanent use in extreme heat or high humidity

	Nominal capacity	Daily output	Dim. (L x W x H)	Weight	Item no.	Price
S555M36	125 Wp	555 Wh	1250 x 550 x 35 mm	8.6 kg	**322/590**	**719.00**
S705M44	160 Wp	705 Wh	1500 x 550 x 35 mm	10.1 kg	**322/591**	**839.00**

Performance warranty
- Only high-performance solar cells used in production
- Best low-light performance
- Product warranty: 5 years
- Exclusively made in Germany

Solar Panel Power M Series (Boats)

from 859.00

The Solara Power M series has been specifically developed for **permanent use** under extreme conditions such as **heat** and **humidity**. With highly efficient **back-contact cells** ensuring a maximum daily power output on the smallest surface.
- Stability and maximum heat dissipation thanks to an innovative aluminium sandwich support plate
- Unique, bendable flex connector, semi-flexible, up to 3 %
- Completely accessible
- Teflon-like, extremely robust protective film made of Nowoflon on the front and back
- Extremely flat, glued and screwed cable output with strain relief
- Prepared cable routing directly through the support plate
- Extremely high power outputs thanks to crystalline high-performance cells
- Maximum daily power output thanks to additional single cells
- High power output in every season – even on cloudy days
- External hotspot protector with bypass diodes against possible cell overheating included in delivery

	Nominal capacity	Daily output	Dim. (L x W x H)	Weight	Item no.	Price

ANTARION

NEW

89.00

Solar Controller MPPT 10 A

The MPPT solar controller continuously adjusts the charging voltage and charging current to achieve the best possible solar yield. The charging voltage can be adjusted depending on the battery type. Suitable for all 12 V/24 V acid, gel, AGM or lithium batteries.

Type: SR1010; Nominal capacity: 170 W; Dim. (W x H x D): 14.7 x 4 x 7.9 cm; 340 g

323/432 **89.00**

All-in-One Solar System All Black

from 289.00

The ALL BLACK PERC cells in the all-in-one system generate up to 20 % more energy than conventional solar panels. Each system is equipped with an MPPT charge controller, which additionally increases the output of the solar panel by up to 20 % compared to conventional controllers. This set is supplied complete with controller, adhesive (DEKASYL MS-1), cleaning agent (DEKACLEAN ULTRA) and roof cable routing.

Nominal capacity: 140 Wp; Daily output: 760 Wh; Dim. (L x W x H): 115.7 x 67.6 x 6 cm; Weight: 10.3 kg

323/436 **289.00**

Nominal capacity: 160 Wp; Daily output: 870 Wh; Dim. (L x W x H): 130.1 x 67.6 x 6 cm; Weight: 11.8 kg

323/437 **319.00**

NEW

Danger!, H225, H319, H336

Nominal capacity: 190 Wp; Daily output: 1040 Wh; Dim. (L x W x H): 151.5 x 67.6 x 6 cm; Weight: 13.8 kg

323/438 **389.00**

All-in-One Solar System Kit Monocristallin

All-in-one system with compact dimensions, customised for use in motorhomes. Equipped with a 10 A PWM charge controller and all necessary cables. The scope of delivery includes a complete kit which, in addition to the controller, also contains adhesive (DEKASYL MS-1), cleaning agent (DEKACLEAN ULTRA) and a roof cable routing.

Danger!, H225, H319, H336

NEW

from 175.00

Nominal capacity: 120 Wp; Daily output: 560 Wh; Dim. (L x W x H): 106.8 x 58.5 x 6 cm; Weight: 7.4 kg

323/433 **175.00**

Nominal capacity: 140 Wp; Daily output: 660 Wh; Dim. (L x W x H): 127.8 x 58.5 x 6 cm; Weight: 8.8 kg

323/434 **195.00**

Nominal capacity: 160 Wp; Daily output: 760 Wh; Dim. (L x W x H): 136.8 x 58.5 x 6 cm; Weight: 9.4 kg

323/435 **215.00**

Phaesun

from 595.00

NEW

All-in-One Solar System Solar Peak

from 265.00

These kits are easy to install on your caravan or sailing boat. They enable the operation of various 12 V consumers: lamps, radios, TV/SAT or even small pond pumps. With a 230 V inverter, you can even connect electronic AC devices. These kits are available in various versions with different charge controllers and modules to suit every need. This makes these kits the ideal solution for sufficient power on board.

Danger!, H222, H229, H336, H412, EUH066, EUH208

MPPT SMS15 120

Nominal capacity: 120 Wp; Daily output: 480 Wh; Dim. (L x W x H): 108 x 59 x 7 cm; Weight: 9.4 kg
Number of panels 1

323/476 **595.00**

MPPT SMS15 170

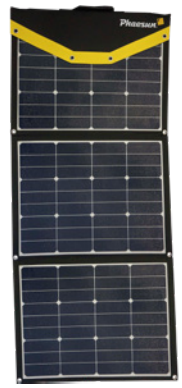

Nominal capacity: 170 Wp; Daily output: 380 Wh; Dim. (L x W x H): 108 x 59 x 7 cm; Weight: 13.5 kg
Number of panels 1

323/477 **750.00**

MPPT SMS15 240

Nominal capacity: 240 Wp; Daily output: 960 Wh; Dim. (L x W x H): 152 x 69 x 7 cm; Weight: 19.2 kg
Number of panels 2

323/478 **990.00**

NEW

Folding Solar Panel Fly Weight

This solar panel lives up to its name with its high energy yield in the smallest of spaces and low weight. Folded up in a textile frame and strapped down, this panel is an unobtrusive companion. Integrated brackets and long panel cables as well as battery cables with crocodile clips make installation quick and easy.
Folding solar panels with 3 wings each 45 W, 4 m panel cable, battery cable with 3 different connections, foldable and portable.
Nominal capacity: 135 Wp; Daily output: 540 Wh; Dim. (L x W x H): 44 x 56 x 2 cm; Weight: 5 kg

LIPPERT

329.95

MADE IN GERMANY

Solar Controller LRM 1218

The MPP solar controller LRM 1218 is a clocked converter that ensures perfect operation of the connected solar panels while the battery is in the main charging phase, regardless of solar radiation, battery voltage and panel temperature. Charging voltages are perfectly adapted to the RV battery with an optional temperature sensor and the various settings. The LRM 1218 is capable of SDTBUS. Delivery includes connection material and 2.5 m temperature sensor.

- Charging current into the RV battery max. 20 A (starter battery 2.5 A)
- Suitable for 6-cell 12 V lead-acid, AGM or lead-gel batteries
- Characteristics curve: IUoU, regulating principle: MPP
- Charging voltage range: 13.2 V – 14.9 V (temperature-controlled)

Nominal voltage: 24 V;
Dim. (W x H x D):13 x 4.7 x 9 cm;
Weight: 360 g **322/600** **329.95**

LIPPERT

MADE IN GERMANY

132.50

Charge Controller LR 1218

The solar charge controller LR 1218 limits and regulates the solar panels' charging voltage. It ensures gentle charging of one or two batteries. An integrated isolating diode prevents a discharge if the charging voltage is insufficient (e.g. in darkness).

- Max. total current: 18 A
- Suitable for 6-cell 12 V lead-acid or lead-gel batteries
- Charging end voltage for both batteries: 14.2 V; characteristics curve: IU
- Open-circuit voltage 25 V

Nominal voltage: 12 V
Dim. (W x H x D): 7.5 x 11 x 5.6 cm
Weight: 160 g **322/601** **132.50**

Solar Controller MPPT

BÜTTNER DOMETIC

The MPPT solar controller is suitable for all battery types and with two solar inputs also for different solar systems. For example, a Black Line can be connected to input 1 and a Power Line to input 2.

- Mobile app control and Bluetooth possible
- Bus display (optional)
- Charging output for starter battery
- Incl. temperature sensor for temperature-controlled charging of all battery types

from 159.00

NEW

SC330

Nominal capacity: 330 W;
Dim. (W x H x D): 170 x 48 x 88 mm
Weight: 400 g **323/426** **159.00**

SC480

Nominal capacity: 480 W;
Dim. (W x H x D): 170 x 48 x 88 mm
Weight: 400 g **323/427** **199.00**

Solar Remote Display TD283

NEW

A display for monitoring the new solar regulator and the new Büttner Dometic Tempra lithium battery. **323/429** **139.00**

Solar Controller Power Plus

from 88.95

AGM LiFePO4 +Gel

BÜTTNER DOMETIC

Specifically designed for ideal battery charging in recreational vehicles. The battery type (fluid/gel/AGM/LiFePO4) is individually adjustable. Equipped with overcharge protection, onboard electrical system filter and additional charging output for the starter battery. Battery activation programme for long-term charging.

MT solar controllers come with an **included battery temperature sensor.** The sensor is needed to charge cycle-stable RV batteries (fluid/gel/AGM/LiFePO4) according to regulations. Integrated LED monitoring, connection option for MT solar remote display and EBL connection cable set (optional) available. Manufacturer's warranty: 5 years.

MADE IN GERMANY

Nominal voltage: 12 V

MT 350 PP

Nominal capacity: 350 W; Charging current: 22 A
Dim. (W x H x D): 130 x 77 x 40 mm
Weight: 165 g **322/139** **128.95**

MT 230 PP

Nominal capacity: 230 W; Charging current: 14.5 A
Dim. (W x H x D): 130 x 77 x 40 mm
Weight: 150 g **322/137** **88.95**

MT 550 PP

Nominal capacity: 550 W; Charging current: 35 A
Dim. (W x H x D): 130 x 77 x 40 mm
Weight: 170 g **322/142** **178.95**

Solar Controller MPP

from 161.95

BÜTTNER DOMETIC

Equipped like the MT Power Plus models, these solar controllers work with a special MPP control technology. Performance advantages are primarily achieved with solar panels with a high number of cells and thus a higher output voltage – ideal, for example, for MT Power Line solar panels with 40 cells.
MT solar controllers come with an **included battery temperature sensor.** This sensor is needed to charge cycle-stable RV batteries (fluid/gel/AGM/LiFePO4) properly. Integrated LED display, connection option for MT solar remote display and EBL connection cable set (optional) available – manufacturer's warranty: 5 years.

AGM LiFePO4 +Gel

MADE IN GERMANY

MT MPP 260

Nominal capacity: 260 W; Charging current: 16 A
Dim. (W x H x D): 130 x 77 x 40 mm
Weight: 240 g **322/138** **198.95**

MT MPP 170

Nominal capacity: 170 W; Charging current: 11 A
Dim. (W x H x D): 130 x 77 x 40 mm;
Weight: 220 g **322/136** **161.95**

Weight: 285 g **322/196** **349.00**

BÜTTNER DOMETIC

Bewährte Qualität Proven Quality

Information

Simply stick on your solar mounting profiles!

Sturdy, UV-resistant mounting profiles made of high-quality PUR material guarantee optimum stability for the entire service life of your motorhome. The profiles can be screwed to all solar panels with all-round aluminium frame. They ensure optimum ventilation and a secure hold and are glued to vehicle roofs with the adhesive set – without drilling. Available either as corner profiles for one panel (with connecting profile for several panels next to or behind one another) or as spoiler profiles which – attached to the front and rear of the panel – aerodynamically adapt to the vehicle roof.

Cable Extension for MT iQ Basic

Solar Remote Display MT IQ Solar Pro

Universal remote display for all solar systems, showing charging current (A), voltage (V), solar capacity (%) – also as a bar chart – and a reset-table power consumption calculation (Ah) on a large LCD multi-display. It shows you how much capacity has been transferred to the battery. This display can be universally set to zero. Thanks to precise induction measurement, the performance can even be determined when several solar controllers (up to 200 A) are being used.
Scope of delivery: incl. induction sensor and mounting casing (installation as well as surface mounting possible). Cable length: 5 m
Nominal voltage: 12 V, 24 V; Installation depth: 20 mm; Dim. (W x H x D): 90 x 95 x 20 mm;
Weight: 400 g **322/510** **245.00**

The "fuel gauge" for the RV battery

MADE IN GERMANY

BÜTTNER DOMETIC

If only it were that simple:

Plug the sensor into the battery, connect it to a display unit – and the available current is displayed. Cheap display units simply measure the on-board voltage and try to derive a fill level from it. Today's RV batteries keep the voltage in the upper range for a very long time, but then it drops almost abruptly. Such an indicator is therefore completely useless as a capacity indicator. Ultimately, only special electricity meters such as the battery computers MT iQ BASIC[PRO] or the MT 4000/5000 iQ by Büttner Elektronik offer a functional solution.
These devices measure the current flowing into and out of the RV battery/batteries. In the Basic, the battery cables are simply fed through an induction sensor. The determined value is transmitted to the electronics and shown on a display. At the same time, the current value is processed in a calculation programme to determine the current battery capacity, which is also displayed. This may sound simple, but it is not, as many parameters have to be taken into account.
It is, however, easy to install: attach the induction sensor or shunt to the negative terminal of the RV battery/batteries and fully charge the battery pack. The battery computer then displays the currently available battery capacity in Ah or, at the touch of a button, also in %. Both devices also display the system voltage, the remaining running time and the currently flowing charge/discharge current. The MT 4000/5000 iQ can also determine the remaining running time and switch a consumer on or off via a freely programmable switching output using an additional relay. The outdoor temperature (min/max memory) as well as date and time can also be displayed.

Which device should I use?
The MT iQ BASIC[PRO] with its 200 A induction transmitter displays all important basic information. How much battery capacity is left? With how much current is the battery currently being charged or discharged? Simply feed the battery cable through the transmitter.Connect the positive and negative cables directly to the transmitter (5 m, included in the scope of delivery). Fully charge the battery. Done.

The MT 4000/5000 iQ works similarly. However, with this model, a measuring shunt must be connected to the negative terminal of the battery. To do this, remove the existing battery cables and attach them to the shunt.

The MT 4000/5000 iQ is available with three shunt versions. The 100 A version is sufficient for recreational vehicles with standard consumers and an inverter of less than 1000 W. For larger consumers, the 200 A version (inverter up to 2000 W) or the 400 A version (inverter over 2000 W or bow thruster) is used.

255.00

Battery Computer MT iQ BASIC[PRO]

The basic model with induction measurement provides information on current flow as well as the remaining capacity (in % and Ah) in the vehicle battery/batteries. At the push of a button, the remaining time is also available. This shows how much time is left until power runs out with current consumption. The values are displayed on a multi-display. Simply specify the value that interests you the most. The other values will be displayed on the screen as well.

Installation and programming are very simple: just disconnect the existing battery cables from the battery, lead them through the induction measuring sensor and reconnect them. Then set the battery computer according to the existing capacity and carry out a full charge. At the push of a button, you will see how much battery capacity is still available.

Scope of delivery: induction sensor and housing (both recessed and surface mounting possible).

Nominal voltage: 12 V, 24 V
Nominal current: 3 mA
Installation depth: 2 cm
Dim. (W x H x D): 9.5 x 9 x 2 cm
Weight: 400 g **322/833** **255.00**

Cable Extension for MT iQ Basic
Cable length: 5 m **323/140** **39.95**

from 249.00

Please order the housing separately.

Battery Computer MT 4000/5000 iQ

Easy-to-use combination unit for displaying voltage, charge/discharge current and remaining battery capacity in Ah and per cent. It also shows the remaining operation time (at current consumption), the outside temperature (min./max. memory) as well as the time and the date. Via a switching output, consumers can be switched on and off automatically at certain switching thresholds (freely programmable). The flowing currents are detected by a so-called measuring shunt, which sits directly on the battery pole and passes the measured values on to the computer electronics.

The MT 4000/5000 iQ is delivered as a built-in version. Please order the housing separately.
Nominal voltage: 12 V, 24 V
Nominal current: 3 mA
Installation depth: 1.5 cm
Dim. (W x H x D): 8 x 8.5 x 2 cm
Weight: 340 g

black **322/847** **31.95**

from 49.95

Standby Charger

In travel vehicles, the RV battery is primarily charged when the vehicle is stationary (charger, solar panel, fuel cell, etc.). If the vehicle is not used for a longer period of time, the starter battery will continue to be discharged because the battery is disconnected. However, many vehicles also discharge the starter battery during the season, as some consumers (radio, multimedia, parking lights, alarm system, etc.) are always connected to it. Standby chargers ensure that the starter battery is also charged – depending on the state of charge of the RV battery. For pure battery maintenance, the 0 A – 2 A variant is usually sufficient. However, we generally recommend the 0 A – 5 A Pro variant, as modern LiFePO4 (lithium) batteries can then also be connected as an RV battery.

Standby-Lader 0 – 2 A

Charging current: 2 A; Dim. (W x H x D): 90 x 38 x 60 mm; Weight: 50 g **322/489** **49.95**

Standby-Lader Pro 0 – 5 A

Charging current: 5 A
Dim. (W x H x D): 130 x 33 x 72 mm
Weight: 100 g **323/127** **81.95**

Information

Many Euro 5 and almost all Euro 6 vehicles are equipped with an intelligent alternator. In these vehicles, the function of 12 V isolating relays and D+ simulators is either limited or no longer possible. To ensure that the RV battery/batteries is/are charged, a charge booster or BCB must be installed.

30.95

Isolating Relay MT RE 70/12V

After stopping the engine, the relay MT RE 70 disconnects the starter battery from the RV battery. The relay is controlled via the D+ signal of the alternator or the D+ simulator. Diode protection for the alternator is already integrated.
Operating voltage: 12 V
Max. switching capacity: 70 A
Dim. (W x H x D): 27 x 30 x 60 mm; Weight: 51 g
322/215 **30.95**

from 94.95

Battery/Voltage Monitor MT USG

Is connected between the battery and the 12 V consumer. Protects battery as well as consumer from harmful undervoltage (consumer off at 10.7 V) and the connected consumer from harmful overvoltage (off at 15.5 V).

MT USG 40: This can be remote-controlled via a separate switching output and can thus also be used as a main switch (all consumers off/on)

Switching current continuous/short: 40 A/60 A
Dim. (W x H x D): 90 x 60 x 38 mm;
Weight: 100 g **322/159** **94.95**

MT USG 120: Functional principle as with the MT USG 40, but with much higher switching capacity. In addition, an interior control unit can be plugged in, with which the vehicle can be disconnected (battery main switch) at any time.
Switching current continuous/short: 120 A/200 A
Dim. (W x H x D): 86 x 76 x 38 mm;
Weight: 100 g **322/162** **239.00**

Accessories

75.00

MT Control Panel

Allows the MT USG 120 to be switched on/off independently of the voltage. Is simply plugged in. Cable length: 5 m; Dim. (W x H x D): 58 x 58 x 20 mm; Weight: 16 g **322/219** **75.00**

53.95

Isolating Relay MT RE 140/12V

Voltage-dependent isolating relay: If the voltage of the starter battery (engine running) rises, the RV battery is charged. If the voltage drops below 12.8 V, the connection is cut.

Operating voltage: 12 V
Max. switching capacity: 140 A
Dim. (W x H x D): 68 x 68 x 50 mm; Weight: 200 g
322/221 **53.95**

BÜTTNER DOMETIC

MADE IN GERMANY

D+ Signal Simulator

In many newer vehicles, it is difficult or no longer possible to tap a D+ signal directly from the alternator. However, this D+ switching signal is needed to recognise that the engine is running and to put various additional devices into function. On engines without an intelligent alternator, this works with a D+ simulator, as it detects the rising voltage of the starter battery and connects through. For vehicles with an intelligent alternator – mostly Euro 6 – this is only possible with a D+ active simulator. It is attached directly to the engine (cable set or similar) with cable ties and triggered by the engine vibration. When the engine stops, the signal switches off automatically. The delay is individually adjustable. Function is indicated via LED.

D+ Simulator

Dim. (W x H x D): 70 x 17 x 36 mm;
Weight: 30 g **322/160** **74.95**

D+ Aktiv-Simulator

Dim. (W x H x D): 32 x 50 x 32 mm;
Weight: 100 g **323/134** **118.95**

Makes your battery last longer!

Battery Refresher

MT Batterie-iQ DUO 142.95

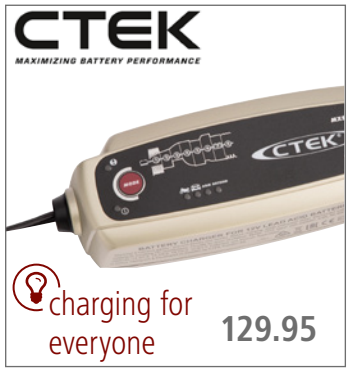

The MT-iQ-DUO is specifically designed for use in caravans. It prevents the build-up of harmful sulphate deposits and keeps the battery in shape with various programme intervals. Depending on the operating state (driving state/charging mode or idle time), interval boosts are applied according to precisely recorded characteristics. Switchable to battery type (starter or RV, acid, gel or AGM) and its respective capacity. Accessory (not included): remote control. Please order separately.
Dim. (W x H x D): 86 x 38 x 76 mm; Weight: 244 g

Charger Xenteq LBC 512-10S

Microprocessor-controlled universal HF charging device in a compact housing. Suitable for LiFePO4/LiFeYPO4 Li-Ion as well as for AGM, gel and wet batteries. **Safe, fast and yet gentle charging with automatic soft start function.** Enjoy a battery that is always charged as long as it is connected to the charger. The restart function automatically starts the recharge process as soon as the battery voltage is dropping. Thanks to the automatic wake-up function, batteries with a battery management system in "sleep mode" are reactivated without any problems. The 6 LEDs allow an easy indication of charging and operating condition as well as error messages. Equipped with temperature control sensor input.

- **Suitable for:** LiFePO4, wet, gel, AGM, AGM² – 13.5 V
- **LiFePO4 mode:** 14.4 V, automatic restart at U < 13.3 V
- **Automatic wake up function:** automatic waking up of deep-discharge batteries
- **Charging periods:** pre-charge, soft start and constant current
- **Charging current monitor/safety timer:** to end CV phase.
- **Auto-restart:** after voltage drop
- **Passively cooled, silent**
- **Power supply mode:** 13.5 V

Scope of delivery: charger, manual, clamps, M8 cable lugs.
IP protection class: IP25;
Dim. (W x H x D): 20.4 x 5.9 x 13.3 cm;
Weight: 1 kg **322/101** **149.95**

Temperature Sensor for Charger LBC 512-10S

Temperature sensor (cable approx. 5 m) for the charging unit LBC 512-10s. **322/101-1** **23.95**

Battery Charger EXIDE 12/7

EXIDE chargers are suitable for all battery types (gel, AGM, wet). Benefit from the experience of one of the world's leading battery manufacturers.

- Fully automatic chargers for lead-acid batteries (car, motorbike, boat, motorhomes and agricultural machines)
- Adapts to the charging profile of the battery technology (GEL/AGM/Standard Wet) and battery capacity (Ah)
- Integrated temperature sensor that measures the ambient temperature and therefore prevents overcharging
- Spark protection against polarity reversal and faulty batteries
- Built-in hand lamp, helpful when connecting clamps to the battery in the dark
- Specially designed clamps for easy and quick connection to the battery
- Includes an additional cable for permanent installation

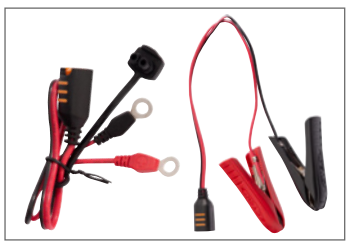

Suitable for up to 150 Ah
Specifically designed for gel, AGM and lead-acid batteries. With automatic 5-step charging profile. Mains adapter mode for charge maintenance and voltage maintenance in standby mode.
Charging current: 7 A;
Dim. (W x H x D): 50 x 225 x 50 mm;
Weight: 500 g
322/106 **149.95**

Battery Charger MXS 5.0

All-round charger with professional features

The charger MXS 5.0 is equipped with the latest technology, which previously was only reserved for CTEK professional units. This charger solves plenty of battery problems; it is perfect for those with the highest demands.
Battery capacity: 1.2 – 110 Ah, up to 160 Ah for trickle charging

Functions:
COLD/AGM: charging in cold weather and charging AGM batteries
RECOND: maintenance charging of deeply discharged batteries
AUTO: fully automatic for optimal charging
12 V: for all lead-acid batteries
Step 7: fully charged battery
Step 8: maintenance charge

Charging current: 5 A;
Dim. (W x H x D): 16.8 x 3.8 x 6.5 cm;
Weight: 500 g
322/108 **129.95**

CS One Battery Charger and Maintenance Device

With the CTEK CS ONE, charging batteries (3 to 180 Ah) is now even easier. The APTO™ adaptive charging technology takes care of everything – you do not even have to think about which terminal to connect to what! It is the easiest charger you will ever use. With dedicated app controls to unlock additional features, it is the most sophisticated charger on the market today. Super simple. Super smart. Robust design for ease of use and unique rear mounting system for quick connection of CS accessories. Can remain securely connected for extended periods of time during trickle charging. Five-year warranty.

Functions:

- **RECOND** for restoring and reconditioning lead-acid batteries.
- **WAKE UP** for reviving presumably dead lead-acid and lithium ion batteries.
- **12 V SUPPLY** for supporting the battery during maintenance and for continuous power supply when removing/replacing the battery.
- **ADVANCED SETTINGS** for monitoring the charger's voltage and current.

Scope of delivery: charger; 2 m cable, detachable clamps, operating instructions, CTEK APP for Android and IOS

Charging current: 8 A
Dim. (L x W x H): 235 x 88 x 52 mm;
Weight: 790 g
322/110 **233.00**

Varta Longlife Power

from 5.00

Varta Longlife Power batteries are the longest-lasting batteries. They work particularly well in devices with constant, low energy consumption, e.g. remote controls, wall clocks or radios. The Longlife battery is characterised by a long running time and a reliable energy output.

Batteries must be disposed of properly!

Please refer to the standard procedure for returning used batteries: According to the German Batteries Act, which governs the return and disposal of used batteries,

- accumulators and batteries must never be disposed of in normal residual waste.
- batteries containing harmful substances must be returned to a distributor or to collection points set up for this purpose by the public waste management authorities.

AGM Battery Dual Purpose

from 269.00

Starter battery RV battery

For recreational application with moderate power requirements, the Varta® Professional Dual Purpose AGM is ideal since it can be used to start the engine and to provide power for any additional equipment and onboard electronics. It is also ideal for seasonal operation – when you take your boat or caravan out of winter storage, the battery simply comes along without needing to be recharged.

Main advantages:

- Especially designed for motorhomes, caravans and boats with moderate power requirements
- Durable: cycle stability up to four times higher compared to conventional wet batteries (up to 400 cycles at a discharge rate of 50 %)
- Minimal self-discharge: ideal for seasonal operation
- AGM technology for excellent shock and vibration resistance
- Ideal for dual-power applications (suitable as starter and supply battery)

Dual Purpose LA95

Capacity: 95 Ah
Dim. (W x H x D): 353 x 190 x 175 mm
Weight: 26 kg
322/353 **299.00**

Dual Purpose LA80

Capacity: 80 Ah
Dim. (W x H x D): 315 x 190 x 175 mm
Weight: 22 kg
322/352 **269.00**

Battery EXIDE Dual AGM from 275.00

Batteries for the most common motorhomes and caravans. Their construction offers high flexibility in terms of installation. The AGM technology (Absorbent Glass Mat) with a calcium alloy and VRLA ventilation covers a power range between 450 and 2100 Wh and therefore offers a wide selection for any kind of recreational vehicle.

- Maintenance-free
- Suitable for long periods of rest with 0 A power consumption
- Without any spatial limits
- Safe and clean (re-ignition-protected & leakproof)
- High vibration resistance & tiltable
- Saves up to 50 % charging time

EXIDE Battery Equipment GEL from 239.00

MADE IN GERMANY

Batteries for well-equipped motorhomes and caravans.
Their construction provides extreme flexibility in terms of installation. The integrated gel technology with a calcium alloy and a valve-controlled ventilation covers a power range of 650 to 2400 Wh and therefore offers a wide selection for the latest and most demanding recreational vehicles. EXIDE GEL batteries offer you the best possible cycle stability: at a discharging depth of 50 – 60 %, EXIDE GEL batteries provide 1600 cycles compared to AGM batteries, which only provide 360 cycles at a discharging depth of 50 – 60 %.

- Maintenance-free
- Capable of long-term power consumption
- Capable of long-term periods of 0 A power consumption
- Saves up to 30 % of space (vertical installation possible)
- Safe and clean (re-ignition-protected and leakproof)
- Vertical installation
- Extremely high cycle stability

Optima Battery YTS

from 249.00

Truma recommends: OPTIMA® YellowTop® – power packs with 38 Ah, 55 Ah or 75 Ah

Enjoy the advantages of a mechanically stable, closed and maintenance-free battery with excellent electrical features. With either 38 Ah, 55 Ah or 75 Ah, depending on your requirements. The completely maintenance-free OPTIMA® YellowTop® batteries by global leader Clarios combine the features of a starter and an RV battery due to their Spiralcell® technology. Benefit from the decisive advantages of a patented AGM spiral cell technology compared to conventional gel or lead-acid batteries.

- Max. performance: up to 100 % of the stated capacity
- Low recharging times with conventional chargers
- Service life: up to 2 x longer
- Completely maintenance-free
- Completely leakproof thanks to fixed electrolyte
- Installation possible in any position (no leakage possible)
- High performance – even after a long storing time
- Up to 15 times less sensitive to vibrations

Type YTS 2.7 Capacity: 38 Ah
Dim. (W x H x D): 237 x 227 x 129 mm
Weight: 11.8 kg **322/319** **249.00**

Energy Bull Battery

Advantages:

- **High cyclical resistance and longevity** – the cyclical resistance is four times as high as that of a starter battery
- **Maintenance-friendly** – easy to open and MIN/MAX label on transparent casing
- **Re-ignition-proof** – re-ignition protection integrated into surge protectors in the battery lid
- **Low-maintenance** – low water usage, low self-discharge
- **Easy charging** – charging possible with every standard charger
- **Vibration-resistant** – panel sets glued to the floor and glass mat covered pocket separators; with high rating V3 as per EN 50342-1
- **Optimised capacity** – ideal for cyclical usage
- **Environmentally friendly and easy to use** – will be delivered filled and fully charged

The Banner Energy Bull is THE special battery for hobbies and leisure. Thanks to its properties, the Energy Bull is robust and the ideal energy storage for camping and caravans. Its robust grid structure, together with pocket separators and a special mass composition, for example, ensure an extremely high cycle resistance.

Capacity: 100 Ah

Dim. (W x H x D): 354 x 190 x 175 mm
Weight: 24 kg
322/300 **199.00**

Running Bull AGM Battery

AGM stands for the use of absorbent glass mats for battery construction. This efficient technology is the logical enhancement of lead-acid batteries and makes a more flexible energy management in modern vehicles possible. It reduces CO_2 emissions and petrol consumption. Due to a higher performance compared to usual batteries, Running Bull, in particular, is ideal for vehicles with a high energy demand. Flexible power for vehicles with start-stop-systems, luxury vehicles, ambulances, taxis, recreational or retrofitted vehicles (sound system, parking heater, TV/telecommunications).

Benefits:

- Ideal starting power
- High vibration resistance
- Extremely long service life
- Maintenance-free
- Leakproof

Gel Battery Powerboozt

Powerboozt GEL is a VRLA (Valve Regulated Lead Acid) battery made of calcium flat plates in special alloy with a GEL electrolyte. The casing is made of reinforced PP material. This battery is a reliable and maintenance-free all-rounder.

Advantages:
- Completely maintenance-free – all you need to do is install it
- Very low self-discharge rate
- Immobilised electrolyte thanks to GEL (protects against electrolyte layering and leaking)
- Less than 2 % self-discharge rate per month, i.e. less trouble with transport and storage
- No corrosive exhaust gases (suitable for the food and pharmaceutical industry)
- Robust design, vibration-resistant
- Charging voltage: 14.3 – 14.5 V
- Trickle charging: 13.4 – 13.7 V
- Max. charging current: 30 % of the C20 (e.g. 30 A at 100 Ah C20)
- 700 cycles according to IEC/EN 60254-1

PB-80 GEL

Capacity: 80 Ah
Dim. (W x H x D): 353 x 190 x 175 mm
Weight: 25.5 kg **322/873** **279.00**

AGM Battery Powerboozt Dual Purpose

PB AGM is a VRLA (Valve Regulated Lead Acid) battery produced with AGM (Absorbent Glass Mat) technology according to the EN 60254-1 standard.

Advantages:
- 30 % higher energy density compared to wet batteries
- Very low self-discharge rate
- Very good current consumption and current output
- No corrosive fumes (thus suitable for the food and the pharmaceutical industry)
- Robust design, vibration-resistant
- Low charge factor (1.08) reduces energy consumption during charging
- Electrolyte immobilised in the AGM (thus preventing leakage in case of damage to the casing)
- Completely maintenance-free – simply install and forget
- Charging voltage 14.4 – 14.8 V
- Trickle charge 13.5 – 13.8 V
- Max. charging current 30 % of C20 (e.g. 30 A for 100 Ah C20)
- 400 cycles according to IEC/EN 60254-1

PB-70 AGM

Capacity: 70 Ah
Dim. (W x H x D): 278 x 190 x 175 mm
Weight: 21 kg **322/871** **179.00**

PB-95 AGM

Capacity: 95 Ah
Dim. (W x H x D): 353 x 190 x 175 mm
Weight: 26 kg **322/872** **245.00**

AGM Battery Powerboozt Deep Cycle

The Powerboozt battery was developed specifically for recreational vehicles, electric motor boats and yachts. Thanks to AGM (Absorbent Glass Mat) technology, it can provide huge energy reserves and operate a wide range of additional electrical equipment during its long service life. The minimal self-discharge makes it perfect for seasonal use and absolutely maintenance-free.

Advantages:
- Perfect for demanding recreational vehicles
- AGM technology for outstanding shock and vibration resistance
- Extremely durable with up to 8 times the cycle life of conventional batteries (up to 800 cycles at 50 % discharge)
- Robust and leakproof
- Ideal for your starting and supply needs
- Completely maintenance-free

PB110

Capacity: 110 Ah
Dim. (W x H x D): 331 x 220 x 176 mm
Weight: 33.3 kg **322/867** **299.00**

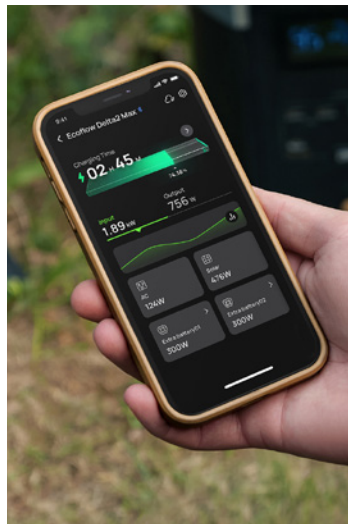

PB150

Powerstation DELTA from 999.00

ECOFLOW

The portable power stations for indoors and outdoors are particularly powerful and therefore perfect for both at home and trips. On the road, you can easily power your devices with the EcoFlow DELTA power stations. Thanks to the different outputs, the power station can be adapted to all your devices – be it mobile phone, laptop or household appliance. At home, the batteries of the DELTA series turn into environmentally friendly emergency power generators. Thanks to their high storage capacity, you can supply your devices at home with power for several hours even in the event of a power failure. Sustainably and environmentally friendly with renewable energy.

Powerstation RIVER from 299.00

The portable power stations with fast charging function are perfect for your next camping holiday. Equipped with different power outputs and a capacity between 256 Wh and 768 Wh, the EcoFlow RIVER solar batteries can power several devices at the same time – be it mobile phone, laptop or household appliance. Thanks to the patented X-Stream function, the RIVERs can be charged from 0 to 100 % in just one hour. Since they can also be charged with solar energy, they are particularly environmentally friendly and sustainable and provide you with renewable energy while camping. It is not for nothing that the EcoFlow RIVER series power stations are among the best portable lithium batteries on the market.

RIVER 2 Max

Continuous output: 500 W; Capacity: 576 Wh; Short-term peak power 1000 W; outputs (9): AC, DC, USB-A, USB-C, car.
Dim. (W x H x D): 27 x 19.6 x 26 cm
Weight: 6.12 kg

323/370 **599.00**

RIVER 2 Pro

Continuous output: 800 W; Capacity: 768 Wh; Short-term peak power 1600 W; outputs (9): AC, DC, USB-A, USB-C, car.
Dim. (W x H x D): 27 x 22.6 x 26 cm
Weight: 7.9 kg

323/371 **799.00**

Solar Panel Set 400 W

The solar panels are designed for easy wall mounting and are supplied with mounting feet to optimise the use of vertical space.
Scope of delivery: 2 x 400 W solar panel, 2 x mounting kit
Dim. (W x H x D): 172 x 3.5 x 114 cm; Weight: 40.8 kg

323/390 **399.00**

PowerStream

The PowerStream is a microinverter that can feed 600 W/800 W into the power grid. Connected to a portable power station. The EcoFlow Smart Plug and the EcoFlow app enable real-time monitoring and optimisation of energy consumption.

323/385 **329.00**

Smart Plug NEW 36.00

The Smart Plug is a compact Wi-Fi socket that enables energy monitoring and intelligent control of appliances. As part of the PowerStream system, it works with the microinverter and the EcoFlow app to provide real-time power consumption statistics and optimised automatic power allocation.

323/386 **36.00**

Caution – danger to life!

Shore Power Adapter NEW 99.00

Shore power adapter for Delta 2, Delta Max and Delta Pro powerstations.
Without this shore power adapter, the fault circuit breaker in the vehicle **cannot trip** and there is a risk to life.

323/382 **99.00**

NEW

Window Cable Routing MC4
This super flat cable has been developed by EcoFlow to remove all obstacles for easy installation. With this cable, you can connect the solar panels to the micro inverter in your home/recreational vehicle through the gaps under windows and doors without having to drill through a wall.

50 cm **323/387** **19.00**

Charging Cable for Vehicle Electrical System NEW
Charging cable with XT60 plug and POWER plug. You can use this cable to connect the EcoFlow Powerstations to an on-board power socket of a motor vehicle for charging.

1.5 m **323/375** **39.00**

Folding Solar Panel

ECOFLOW

High-efficiency solar panels: This one-piece, foldable solar panel is perfect for at home and for camping. With a high solar output and an improved efficiency of 23 %, you can charge your portable power station even faster than before.
Self-supporting: The protective case conveniently folds out into a sturdy stand that adjusts from 40° – 80° to allow the flexible solar panel to catch the most rays.
Durable and lightweight: Made from flexible EVA and durable fibreglass. The low weight, the robust design and the integrated shoulder strap make the panel ideal for outdoor use.
Weatherproof: Each monocrystalline silicon cell is covered with an ETFE film that protects it from dirt and water. Thanks to the IP68 waterproof rating, this portable solar panel works safely in any weather.
Foldable and portable: The solar panel is easy to assemble and disassemble. After use, it can be safely stored in the combined protective bag for transport and storage.

Nominal capacity: 160 Wp; Daily output: 640 Wh; Dim. (W x H x D): 183 x 2.5 x 82 cm; Weight: 9.96 kg

323/368 **349.00**

Nominal capacity: 400 Wp; Daily output: 1600 Wh; Dim. (W x H x D): 236.5 x 2.5 x 105.8 cm; Weight: 16 kg

323/367 **949.00**

MC4 to XT60 Solar Cable NEW
The MC4 to XT60 replacement cable enables the connection of a portable EcoFlow Powerstation to a solar panel. It is used to extend the two supply lines from the solar panel to a power storage unit. The cable has two MC4 connections at one end and an XT60 connection at the other end for the input to the power storage unit.

3.5 m **323/373** **29.00**
5 m **323/374** **39.00**

Extension Cable MC4
Two extension cables (3 m) for the connection between solar panel and power storage unit. With MC 4 connections. **323/372** **49.00**

PowerStream Cable to Powerstation NEW
The EcoFlow BKW-DELTA cable is designed for the portable power stations to connect to PowerStream microinverters.

50 cm **323/388** **49.00**
40 cm **323/389** **39.00**

Powerboozt Powerstation

Countless application possibilities indoors and outdoors. Ideal for camping, outdoor activities or in the garden – whenever you cannot find a power socket. The compact power station can reliably charge or operate your devices such as mobile phones, laptops, Bluetooth speakers, coolers, etc. The display provides you with detailed information about charging or remaining discharge time, battery status and current consumption. During the day, you have three options for recharging the power station: via socket, 12 V car socket or solar panel (solar panel not included).
Protection against overvoltage, undervoltage, overtemperature, overload, short circuit at AC output.
Battery type: lithium-ion battery.

Powerboozt power bank with Jump Starter, LED spotlight and compressor

Powerboozt Power Bank

This universal, portable power bank should not be missing from any outdoor activity. The high capacity of the power bank (20,000 mAh) and the integrated 12 V starting aid, which can also restart large-volume engines even with a defective battery, are indispensable. The highlight, however, is the integrated compressor that inflates your motorhome's tyres, your inflatable boat or your stand-up paddling board (adapter included) if you do not have electricity. The integrated high-performance LED spotlight provides the necessary illumination.

Lithium Battery

from 449.00

Rechargeable lithium iron phosphate battery for camping and boats with integrated BMS system. Compared to lead-acid and other lithium batteries, lithium iron phosphate batteries offer significant advantages, including improved discharge and charge efficiency, longer life and the ability to be discharged deeper while maintaining performance. LiFePO4 batteries are often more expensive, but have significantly lower lifetime costs. No maintenance and an extremely long life make them a worthwhile investment and a smart long-term solution. The PB100-D is equipped with the familiar base strip for attachment to the existing lugs in the vehicle and is the same height as a standard AGM or GEL battery. In most cases, it will fit in the space under the seat.

- LiFePO4 technology is particularly safe
- All batteries certified according to UN38.3
- 1:1 replacement for lead-acid batteries
- Very light (approx. half the weight)
- Very long life
- More usable capacity
- Constant power during discharge
- Temperature-resistant
- Fast and safe charging
- Can be operated and stored in a partially charged state
- Intermediate charging possible
- Low self-discharge
- Maintenance-free
- Bluetooth 4.0 with Android/iOS app
- No dangerous acid

Lithium Cold Weather Battery

The LT series lithium iron phosphate batteries are powerful cold weather batteries that can be charged at temperatures as low as -20 °C.

How?
The system has an internal control that draws the current from the charger/solar controller/alternator itself and initially operates the internal heating at cell temperatures below 0 °C. The charging current is then transferred to the cells. Only at +1 °C is the charging current passed on to the cells. No additional components are needed for this. The entire process of heating and charging is seamless. Simply connect the battery to the normal charger and the internal heating and monitoring system does the rest. The PB100-LT is the perfect choice for use in motorhomes, off-grid solar and electric vehicles, and for all applications where charging at very low temperatures is required.

Batteries must be disposed of properly!

Please refer to the standard procedure for returning used batteries: According to the German Batteries Act, which governs the return and disposal of used batteries,
- accumulators and batteries must never be disposed of in normal residual waste.
- batteries containing harmful substances must be returned to a distributor or to collection points set up for this purpose by the public waste management authorities.

Solar Panel

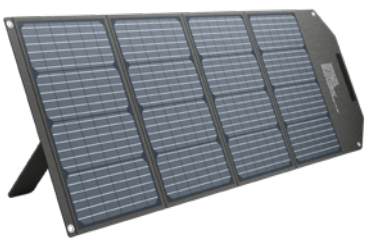

The foldable Powerboozt solar panel is ideal for mobile use in conjunction with a Powerboozt power station. With foldable stands on the four panels, it can be optimally orientated towards the sun. The solar panel was specially designed for the PS1000, PS1500 and PS3000 power stations. Therefore, no additional MPPT controller is required. **Scope of delivery:** adapter cable (1 m) with MC4 plug and extension cable (5 m).
Nominal voltage: 36 V

Lithium Batteries Super B

RV battery

from 1,599.00

Lithium Battery Super B Epsilon

The Epsilon has integrated battery monitoring that provides details on the status of the battery as well as voltage, current, temperature, charge level and remaining battery life. The data can be displayed via Bluetooth by app or by LED display so that you are always informed about the status of your battery. The fully automatic heating function makes it possible to charge and use the battery even in frosty conditions.

- A-quality prismatic cells for the highest possible energy density
- Lithium iron phosphate battery (LiFePO4): safest lithium technology
- Multi-connectable, coated aluminium terminals incl. temperature sensors
- Integrated short-circuit protection
- Integrated battery management system (BMS)
- Fully automatic heating function for charging below 0 °C
- Communication via CANopen, LIN and CI bus
- Adaptive cell balancing
- Robust housing made of environmentally friendly materials (fully recyclable)
- Bluetooth connection: round-the-clock insight into the battery status with the app "Be in Charge" (compatible with iOS and Android)
- ECE-R10.06
- 5-year warranty

Lithium Battery Super B Nomia

The Nomia is a rechargeable lithium iron phosphate (LiFePO4) battery. The unique combination of state-of-the-art technology and intelligent software makes this lithium battery a robust, safe and simple energy storage solution.

- Low maintenance
- Fast charging
- Safest lithium technology
- High discharge current
- High capacity
- Low weight
- High number of cycles
- Low self-discharge
- Integrated battery management system (BMS)
- 5-year warranty when using the protective relay

Lithium Batteries RKB-Reitz

RV battery

Performance, low weight and durability. These are ideal prerequisites if you want to be self-sufficient on your journey with your motorhome.

from 599.00

Lithium Battery RKB Basic

More and more motorhome owners are opting for a conversion and are using lithium batteries. The RKB Basic lithium battery LiFePO4 was developed with the aim of replacing lead-acid batteries and fully meeting the high demands placed on storage batteries today. These batteries have a high performance and are light and durable, which makes them perfect for use in motorhomes. They are ideal if you want to be self-sufficient when travelling with your motorhome – independent of any power outlets.
The batteries have lithium iron phosphate (LiFePO4) cells, which are considered to be very safe and cycle-resistant. In addition, the batteries are protected against overcurrent, overcharge, deep discharge, short circuits and overtemperature by an integrated BMS.

- Full capacity (100 %) usable
- Very low self-discharge, < 3 % per month
- Safe thanks to built-in battery management system
- Easy installation
- Maintenance-free

Capacity: 50 Ah

Dim. (W x H x D): 20 x 17 x 17 cm

Lithium Battery RKB Smart Premium

The RKB Smart Premium lithium battery is incredibly convenient. With the Smart Premium, you can be as self-sufficient as possible and save electricity at the same time. The battery management system (BMS) built into each battery ensures that the battery is protected from incorrect use. For example, it switches the battery off in the event of undervoltage or overvoltage and automatically switches it back on again as soon as the problem has been rectified. The built-in display allows easy switching on and off as well as activation of the status LEDs.

- "Deep-Sleep Mode" – electronic battery disconnector
- When the motorhome is not in use, recharging or trickle charging is not necessary for up to one year.
- Display with status LEDs
- More compact & lighter than comparable batteries
- Up to 60 % lighter than conventional lead batteries
- Full capacity (100 %) usable
- Very low self-discharge, < 3 % per month
- Safe thanks to built-in battery management system
- Easy installation
- Maintenance-free

Lithium Power RV Battery MT Li

from 889.00

RV battery with lithium LiFePO4 technology for recreational vehicles

The LiFePO4 RV batteries are characterised by their high storage capacity, their low weight and their high cycle stability. Thanks to an intelligent battery management system (BMS), the batteries are internally monitored. The use of inverters is easily possible even at a higher output. Even the smallest version (MT Li 85) can be used with an inverter (e.g. MT 1200SI/SI-N) to power a Nespresso coffee machine or a hair dryer with up to 1200 W. From MT Li 105 onwards, you can use inverters for up to 1700 W. The batteries with 120 Ah and 180 Ah can easily be used with consumers (hair dryers, vacuum cleaners, coffee machines, etc.) that need up to 2000 W. Higher outputs are available with the versions MT Li 240 and MT Li 300.
The internal BMS not only provides high output power and monitors the battery. Several temperature sensors are also installed internally, which optimally charge the battery in every climate zone when using parallel charging devices (chargers, solar regulators, boosters, etc.). It is also possible to completely disconnect the battery from the power supply via an additional switch input. This is ideal when the vehicle is parked for a longer period of time or if you generally want to have a main switch function when leaving the vehicle. Of course, an auxiliary output is also available at the battery to keep an alarm system or important standby consumers working. In conjunction with a Pro-finder by Thitronik, it is possible to control the battery remotely via an app. The current voltage can also be read on the app and a special highlight is the alarm function. Triggered by the battery, an SMS is automatically sent to your mobile phone when the voltage of the RV battery reaches a critical undervoltage.
The battery casing of the MT Li 85 and the MT Li 105 was adjusted to standard dimensions. This makes it possible to install them in the existing standard bracket. Already installed cables can simply be set on top of it thanks to the round poles.
From battery size MT Li 120, the connection cables can be screwed on directly. However, it is also possible to attach adapters for round poles later on.

RV battery

Type MT Li 85 Capacity: 85 Ah

Lithium Battery Power Set

RV battery

BÜTTNER
DOMETIC

Easily upgrade or retrofit your motorhome with Battery Power.

The Lithium Battery Power Set is the optimal combination for motorhomes or vans. Use the set to switch to lithium batteries or to equip your new vehicle with them right from the start.
The combination of the individual components guarantees constantly full capacity and safe operation in all climate zones and all year long.
The set is designed in such a way that it works as an independent system, but can also be connected in parallel to existing on-board electronics.
It consists of a lithium RV battery MT Li 85, MT Li 105 or MT Li 120 in combination with a charger/booster combination and a battery computer (MT iQ Basic). All devices were developed by Büttner Elektronik and are optimally geared to each other. The charger/booster combination unit (BCB 25/20) supplies the battery with charging current (20 A) if there is a 230 V mains supply and automatically switches to booster charging (25 A) while driving. In both charging situations, the device receives information directly from the lithium battery, so that it can optimally charge it. Additionally, the battery computer monitors the battery and displays battery capacity (in % and Ah), current consumption (A) and the remaining time inside the vehicle.

from 1,989.00

The set includes a ready-to-plug-in installation cable set for the battery computer as well as a cable set for integrating the charger/booster combination unit into existing on-board electronics.

Lithium Battery Tempra 150

from 1,374.00

RV battery

NEW

Premium lithium battery 150 Ah with the new generation of HDP cells (High Density Power) – small and compact. The battery has an N-Bus and a CI-Bus interface. The Display Bus and/or the mobile app inform you about the battery's charge status. Version F has an innovative heating system and enables operational readiness down to -30 °C. Thanks to an internal DC-DC charger, all charging sources can be used. A charging booster is required for use in a motorhome.

Capacity: 150 Ah
Dim. (W x H x D): 341 x 176 x 190 mm
Weight: 16.1 kg

Lithium Battery PowerUnit

BÜTTNER DOMETIC

Lithium power in combination with the existing RV battery (AGM or gel).

from 1,259.00

The PowerUnit enables the simple and safe combination of an MT lithium power battery with the existing RV battery (AGM/gel/liquid acid). The combination of both battery systems offers a number of advantages:

Both battery systems are connected with the enclosed cable set. The system is monitored and controlled by the battery computer control. This is connected to the BMS (Battery Management System) of the lithium battery and prevents further charging by the existing charging systems if the lithium battery is fully charged but the charging systems still need to charge the installed RV battery further due to its AGM or gel characteristic curve. In addition, the battery computer displays the total available capacity of the entire battery system in the interior.

- Simple installation
- Considerably more capacity
- High current draw possible
- The vehicle can finally be used independently.
- Temperature-independent system
- Extremely long service life of the entire battery system
- No need to convert the on-board electronics to lithium

Scope of delivery: LiFePO4 battery MT LI 85, battery computer control including Hall sensor and control box, connecting cables (2 x 400 mm; 1 x 800 mm; 35 mm²) for parallel connection, fuse set

EFOY Lithium Battery

from 1,153.00

The lightweight among batteries
The EFOY lithium battery is a real lightweight due to its high energy density. Conventional 100 Ah lead-acid or AGM batteries weigh around 30 kg. The largest EFOY Li battery (105 Ah) weighs just half that at 16 kg. That reduces weight!
Battery capacity at almost 100 %
The EFOY lithium battery offers greater battery capacity compared to lead-acid or AGM batteries. The battery capacity can be used almost completely. This is extraordinary as lead-acid batteries can only be discharged up to 50 %. Use the full EFOY energy reserve!

- High discharge current
- Almost 100 % available capacity
- Protected charging down to -20 °C
- Integrated heating element
- Battery Management System (BMS)

Tip

TIP: EFOY Hybrid Power
With EFOY Hybrid Power, you can travel without worries and have power at all times. EFOY Hybrid Power combines an environmentally friendly fuel cell with the efficient EFOY lithium battery.

You can find the EFOY fuel cells on page 586!

The EFOY lithium battery (LiFePO4) as a power storage unit is the ideal entry into off-grid power supply. The integrated Smart Battery Management System (BMS) continuously controls and optimises the battery parameters for ideal efficiency and battery protection. Thanks to the built-in heating element, the EFOY lithium battery can be charged even at sub-zero temperatures. The robust housing protects against splash water.

Included: battery activator; 2 battery clamp adapters M8; sealing plug RJ12; operating instructions.

Type EFOY Li 70

Capacity: 70 Ah

Fuel Cell EFOY BT

The EFOY fuel cell produces power by means of a chemical reaction, charging the on-board battery and therefore being the perfect power producer for on the road. It operates fully automatically, maintenance-free and quietly and is compatible with all common battery models. Via a power inverter, 230 V devices can also be used.

Scope of delivery:
EFOY BT adapter, sling swivel, Service Fluid, fuel cartridge holder with strap, exterior cover, exhaust gas tube and bow, charging cable CL5, insulated exhaust gas hose.

Control via the EFOY app
The fuel cell can be controlled easily by the EFOY app via smartphone or tablet. To do this, the Bluetooth adapter just has to be connected to the fuel cell. The app shows at a glance all information on the fuel cell,

2,999.00

4,999.00

All around carefree!
The EFOY charges the battery entirely automatic and maintenance-free. It turns on when the battery has to be recharged and off when its fully charged. Only the tank cartridge has to be exchanged when empty. Screw off- screw on- done!

interesting news and energy consumption calculator to find the right version

For the sake of the environment
The EFOY generates environmentally-friendly energy. In a chemical process, besides energy, exhaust heat and water vapour with a small amount of CO2. Therefore, it can be installed in the interior without hesitation.

A lot of energy on the smallest space
The EFOY is light and compact and thus fits into the smallest of spaces. Ideal installation spots in the motorhome are, for example, the rear garage, the side compartment or even under the seat.

Enjoy the silence!
The EFOY produces particularly quiet power and is just as loud as a laptop's fan. Noise pollution from noisy diesel generators is a thing of the past.

Independence
With the EFOY fuel cell you always have your own compact power generator with you and are completely independent from the power grid. The EFOY recharges all common 12 or 24 volt battery types reliably, quietly and environmentally friendly, whether in a motorhome, on a boat or in a (garden) cabin.

Information

EFOY Hybrid Power
Fuel cell and lithium battery - the perfect combination
EFOY Hybrid Power is a perfectly matched energy package, consisting of an EFOY fuel cell as a power generator and an EFOY lithium battery for power storage. They both have been developed particularly for one another, the EFOY fuel cell works at its maximum efficiency and the battery profits from perfect charge, special protection and a long service life. The smart battery management system (BMS) of the EFOY lithium battery ensures an intelligent communication between fuel cell and battery.

– For suitable EFOY lithium batteries, see page 585 –

Tank Cartridges

To ensure safe and comfortable operation, special fuel cartridges have been developed. They meet the highest security standards and are equipped with a safety valve, which prevents the liquid from accidentally leaking out. It does not open until the cartridge is connected to the fuel cell. When the cartridge is removed, the safety valve hermetically locks again.
Up to 15 self-sufficient days of use with the M5 and up to 30 self-sufficient days of use with the M10.

Generator Honda

Exceptionally silent, lightweight and very robust mobile power generators with 4-stroke engine. Operating time ranges, depending on the version, between 4.5 and 25 hours. The version EU 10i is equipped with 1, the versions EU 22i and EU 30is with 2 protective sockets. It uses the inverter technology, providing perfectly stable frequency and voltage. All versions feature an eco set-up, a control automatically adjusting the rpm to the used voltage, extending the operation time of the generator significantly by doing so. Faulty operation is close to impossible thanks to excellent and comfortable handling. For safety reasons, all versions feature an overload protection, as well as an oil deficiency automatic cut-off. Additional bonus: 2 identical models can easily be connected in parallel to double the output power.

Power Generator EcoFlow Smart Generator Dual Fuel

ECOFLOW

1,599.00

NEW

The Smart Generator Dual Fuel is equipped with WiFi and can be operated with fuel or liquid gas. It charges all mobile Powerstations of the EcoFlow DELTA series directly via direct current, saving fuel and reducing charging times. Moreover, it is equipped with an AC output (pure sine), to provide power for several other power consumers simultaneously. The device comes with an electric starter, which enables the user to start and control the Smart Generator also via the free EcoFlow app without having to directly operate the device. Furthermore, it can be set at which battery capacity the Smart Generator is activated or deactivated when a Powerstation is connected. With its 4 L fuel tank, the Smart Generator reaches an operating time under full power of approx. 3.5 hours. With a power output of up to 1,900 W, you are prepared perfectly for every emergency situation. The EcoFlow Smart Generator simplifies emergency power supply with a LCD display, a CO alarm and an automatic switching-off as well as a fuel alarm.

Technical data:
AC output 230 V/ 50 Hz, DC output 42 - 58.8, m, nominal current 32 A, output power fuel 1900 W/ gas 1700 W, engine capacity 79.7 cm^3, sound level (7 m) 56 – 67 dB (A), dimensions W 30 x H 47.5 x D 59.7 cm, weight 30.5 kg.

Generator Dometic TEC

For wanting to be absolutely independent without giving up the comforts of home, the installation of a Dometic TEC energy generator is the perfect solution. With their capsuled casings, the devices are either installed underneath the vehicle or within a compartment. The inverter technique provides current of highest quality with a perfectly shaped sine curve (absolutely stable frequency of 50 Hz), additionally it protects connected consumer loads against overload. Thanks to variable revolutions per minute, the fuel consumption is reduced. The user-friendly on-board computer with illuminated, alphanumerical display, provides complete control: parameters like power consumption, voltage, operating hours etc. can be read at a glance. A useful feature is the auto-start function, providing automatic charging of the onboard battery via the generator's 12 V output. Furthermore, various alarm options for possible malfunction are integrated. Delivery completely with control panel, 5 m extension cable, transfer relay, a separate silencer with flexible metal hose (length 2 m) and mounting materials. The optional external tank, needed for gasoline and diesel generators, is available as an accessory.

PP polypropylene, FSC wood

Tableware Series Organic

MADE IN GERMANY

koziol Made in Germany

The sustainable **Organic Collection** is made from biocircular plastic and wood fibres. The plastic is obtained from used sunflower and rapeseed oil from industry and catering. The wood fibres come from trees that are left over from forestry maintenance and from paper production waste. The material combines the positive properties of wood, such as insulation and naturalness, with the advantages of plastic, such as elasticity and lightness. Free from melamine, BPA and bamboo, food-safe and fully recyclable. Microwaveable and dishwasher-safe.

Tableware CLUB

In a highly contemporary facet design. The lightweight tableware pieces are extremely robust, easy to clean, compactly stackable and therefore particularly space-saving to store. Dishwasher-safe and 100 % CO_2-neutral! BPA- and melamine-free!

Tableware Series Vivid Line

Vivid Line is a modern two-tone tableware collection with a combination of plain anthracite grey as the base colour and sophisticated trendy colours on the inside of the plates, bowls and cups.
The tableware features GIMEX's unique non-slip, self-adhesive 3M strips for added comfort when enjoying meals on any occasion. The melamine tableware is lightweight, durable and easy to clean.

Tableware Set Vivid Line

A stylish tableware set from the Vivid Line collection. Made from 100 % high-quality melamine, practically unbreakable and scratch-resistant. The set consists of 12 pieces. The tableware is quiet and hygienic thanks to the interchangeable non-slip solution. The set also comes with a convenient and luxurious bag. Ideal for camping, at home or on a boat. The tableware is also lightweight, dishwasher-safe and food-safe.

The 12-piece set consists of:
- 4 dinner plates ø 25.5 cm
- 4 breakfast plates ø 20.5 cm
- 4 bowls ø 15.5 cm
- Incl. storage bag

Tableware Set Royal

The tableware set Royal is versatile and can be put in the microwave, the dishwasher and the refrigerator. It is temperature-resistant from -10 °C to +110 °C, food-safe and lighter than ceramic. The surface is easy to clean, which prevents bacteria, oil and dust from sticking to it. The tableware is unbreakable, stackable as well as shock-, scratch- and cut-resistant. It is environmentally friendly and can be recycled completely.

The 16-piece set consists of:
- 4 dinner plates ø 26.5 cm
- 4 dessert plates ø 21.7 cm
- 4 cereal bowls ø 15.3 cm
- 4 mugs 320 ml **551/182** **65.00**

melamine

Tableware Series Colour Line

The Colour Line impresses with its extremely cheerful design. The tableware is equipped with unique, non-slip 3M strips from Gimex, which provide additional comfort at every meal. This melamine tableware is lightweight, durable and easy to clean.

PLA

PLA is produced by polymerising lactic acid instead of crude oil. This lactic acid is obtained from plants such as maize or sugar cane (renewable raw materials). PLA also produces around 60 % less CO_2 emissions than conventional plastic.

The benefits of PLA tableware:
- Completely biodegradable
- Tested according to DIN EN 13432
- Compostable
- Climate-friendly
- Odour- and tasteless
- Suitable for hot and cold food
- Temperature resistance: -20 °C (unlimited) to 120 °C (max. 60 minutes)
- Microwaveable
- Dishwasher-safe
- BPA-free

Should be part of every camping kitchen!

Omnia Oven 52.45

Simple and sturdy design
Using the Omnia is simple and does not require installation. The tried and tested oven is suitable for almost any stove (not suitable for induction stoves). You can find the user manual under the item no. on www.frankanafreiko.com.
Material: steel sheet/aluminium.
Volume capacity: approx. 2 l.

Three parts
Omnia consists of three parts. The aluminium mould, into which the ingredients or the dough are placed, resembles a round cake mould with a hole in the middle. A special stainless steel base is located beneath it. The aluminium lid has small air holes and is high enough so that the bread or cake can rise properly.

Top and bottom heat
The heat of the oven is transported to the bread or pastries by convection and thanks to the oven's shape, there is both top and bottom heat. Not suitable for food with a high acid and/or salt content. Not dishwasher-safe.
Dim. (W x H): 250 x 140 mm; Weight: 500 g
310/685 **52.45**

Click & Cook Series

Be it at home or on the road in a caravan or motorhome – there is often not a lot of space in the kitchen and it is hard to fit all the pans, pots and lids.
Thanks to Ballarini, this is now a thing of the past!

The innovative Click & Cook cookware is perfect for small kitchens. All parts of the series are equipped with retractable handles and can thus be stored in the cupboard or stacked inside each other to save space. Stacked, the pots only need a height of 14.5 cm.

Thanks to the scratch-resistant Keravis coating, dishes can be prepared without much fat. The durable and wear-resistant 3-layer non-stick coating, which is reinforced with extremely hard ceramic particles, is particularly heat-resistant and therefore perfect for cooking at up to 250 °C.
The cookware is robust, easy to clean and cuts a good figure everywhere thanks to its cast iron look. Suitable for electric, gas and ceramic hobs. After cooking, everything can simply be put in the dishwasher. All pots are available in three sizes.

Click system:
Thanks to Ballarini's ingenious click system, all handles can be folded in and out in one simple movement. The patented locking device of the handles allows safe handling during cooking, is as practical as it is handy and allows space-saving storage before and after cooking.

5 years warranty – Keravis coating – non-stick coating
Not suitable for induction (except Click & Cook Granitium)!

Space-saving storage and dishwasher-safe.

click system

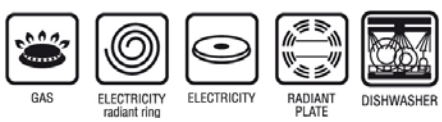

Space-saving
The handles are thermo-insulated and ergonomically shaped. Once folded, the pot, pan and lid can be stored in a particularly space-saving way.

Robust
Especially when camping, robust and resistant cookware is needed. Thanks to the scratch-resistant non-stick coating, you can even use metal kitchen utensils.

Convenient
Do you have any leftover food? With the handles folded in, the pot and lid easily fit into the fridge. That way, you can still enjoy your meal the next day.

QUALITY MAKES THE DIFFERENCE. SINCE 1921.

NEW

The highlight of b.perfect – removable handles

With these pots and pans, you are the hero of every camping kitchen. Indispensable for savoury stews, crispy roasted meat or fluffy pancakes. Conventional handles are often bulky and unwieldy. But that is not the case with the outdoor-optimised BERNDES series with removable handles. No more space problems on the gas stove or in the camping box, no more trouble when carrying the pot or pan from the stove to the table. The handle of the b.outdoor series is universally adaptable for all models and can be removed and attached with a simple click.

Robust cookware

Made in Italy, the Moneta Melodia Minispace series combines sustainability with space-saving design – perfect for outdoor enthusiasts. Made from 100 % recycled material, the pots and pans are characterised by their environmentally friendly, ceramic FINEGRES coating. The innovative removable handle, which fits all pieces, saves valuable packing space and ensures versatility when cooking. With an oxidation-protected base for long-lasting use, this cookware is a must-have for any camping adventure.

Teflon coating

Gourmet Frying Pan

The Gourmet frying pan by GSI combines the advantages of stainless steel, aluminium, and Teflon. Stainless steel inside makes the pan robust and durable. Due to the exterior made of aluminium, good heat conductivity is ensured. The two-layer brand coating Teflon Classic is abrasion-resistant so that you can use metal kitchen utensils for cooking. Moreover, with the folding handle, the pan is easy to store.

Food Storage Box Set Nest™ Lock

Boxes for food storage often take up a lot of space in the kitchen cupboards and searching for the right lid can quickly become annoying and time-consuming. The Nest Lock product line by Joseph Joseph has found the ultimate solution for this problem. Due to their unique design, the boxes with matching lids can be stacked inside each other, which means they hardly take up any space. Furthermore, the colour coding on the box and lid makes it very easy to find the right lid for your box. All products of the Nest Lock line are tightly sealable, airtight and leakproof. Dishwasher-safe and microwaveable. 5 pieces, Material: PP polypropylene; Dim. (W x H x D): 20 x 24.5 x 16.3 cm; Weight: 900 g

550/485 **44.95**

Multifunctional Kitchen Set, 5 Pcs.

This multifunctional kitchen set by Zeller should not be missing in any kitchen! The handy kitchen utensils can be stacked inside each other and thus take up very little space when stored. The lemon squeezer is equipped with a collecting container with a pourer (ø 15 x 7.5 cm) and a measuring scale on the inside from 100 – 500 ml. The two strainers are ideal for either draining rice (ø 18.5 x 8 cm) or washing lettuce (ø 22 x 12 cm). The latter can be served in the white bowl (ø 26 x 12.5 cm). The set is made of robust plastic. White, grey, berry.

Stylish grinders made of glass and stainless steel!

Magnetic Spice Grinders

In combination with the metal nano gel pads, the magnetic spice mills do not fall over, even when you are travelling. The ceramic grinder is manually adjustable (fine, medium, large-grain). The grinders made of stainless steel, glass and BPA-free plastic are refillable and therefore particularly sustainable. They are also easy to clean and can simply be cleaned by hand with water. The pads are attached without screws or glue and can be easily removed, washed and then reused.

Please note: Only attach the pads to smooth, sealed surfaces!

Scope of delivery: 2 magnetic spice grinders (100 g) and 2 metal nano gel pads (7.5 cm)
Content: 2 pieces; Dim. (H x ø): 13.5 x 4 cm

Froli

... and adjust it individually.

Universal Holder

Be it glasses, coffee mugs, bottles or cutlery – the Froli universal holder keeps everything in its place. Without clattering.
The kit consists of 16 plastic honeycombs that can be put together as required:

- Suitable for glasses, cups, bottles, cans, cutlery and much more
- For cupboards and drawers in motorhomes and caravans
- Made of 95 % organic plastic
- Adjustable diameter (58 mm to 89 mm)
- Can be rotated by 180° (for a higher support edge)
- Protruding bars can be removed, which is why the kit fits into almost all cupboards and drawers.

16 pieces; Colour: green; Material: plastic; Weight: 235 g **550/239** **25.90**

from 9.70 extendable

Barkeeper

The rod made of plastic-coated aluminium holds securely. Telescopic clamping rod with non-slip rubber end caps, light, robust and stainless. The rod is clamped against the contents of cupboards and prevents slipping while driving. A nuisance when you are on the road: After opening the cupboard, its contents fall out. Thanks to the Barkeeper, such mishaps are a thing of the past. Available in four lengths and three colours.

Keeps everything safe!

Washing Machine White Magic

The White Magic hand washing machine without electricity is the ideal solution for camping, caravans, boats and for doing laundry on the side. With muscle power and no electricity at all, you can easily wash your laundry regardless of your location. The laundry will be clean and fresh again in a few minutes. With the help of a unique high-pressure system, the washing powder is absorbed deeply into the fibre, which means that your laundry is not only washed quickly and easily, but also thoroughly and in a cost-saving manner. Requires much less water than hand washing. Laundry load size up to 2.2 kg. Dim. (H x ø): 40 x 30 cm; Weight: 2.6 kg

MADE IN GERMANY

1 | Household Cleaner live

Cleanliness is possible even without chemicals: awiwa live is a microbiological household cleaner and odour remover. It cleans thoroughly, smells pleasantly fresh and is gentle on colours and sensitive materials. It can be used on all water-compatible surfaces and also removes residues that conventional cleaners cannot reach. One litre of concentrate yields up to 50 litres of application solution. PH-neutral and harmless to humans, animals and the environment.

1000 ml 17.95 / l **450/496** **17.95**

2 | Washing Up Liquid Shine

The awiwa shine washing up liquid with a fresh bergamot rosemary scent is particularly efficient against grease and dirt and also gentle on the skin. It ensures that your dishes are shiny and do not have water stains. Very economical concentrate based on plant-based surfactants. Vegan, without animal testing and biodegradable.

500 ml 7.90 / l **550/320** **3.95**

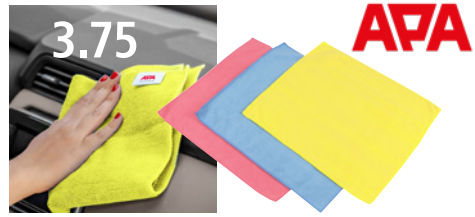

For washing body, hair, clothes or tableware!

Organic Outdoor Soap

Pharmavoyage organic soap is an all-purpose outdoor soap that is biodegradable and can therefore be used in nature without any problems. It is the ideal companion for hiking tours, camping or travelling and is suitable for washing body, hair, clothes or dishes. The organic soap has a subtle but pleasant smell and can be used with both fresh and sea water.

Full power against dirt!

549.00

Central Vacuum Cleaner CV 1004

BEST SELLER

The vacuum cleaner system CV 1004 by Dometic efficiently removes dirt located in any crack, even though it is only the size of a shoe box. Therefore, it can be easily integrated into unused storage spaces. The suction hose can be used directly on the main unit or alternatively at the external "socket". Starts automatically when the suction hose is inserted into the socket, switches off when removed.

- High suction power and efficient cleaning of air
- Small dimensions of the main unit
- Suction hose can be inserted in two different places (e.g. external nozzle installed in the garage of the motorhome)
- Wide range thanks to 12 m suction hose
- Incl. various brushes and nozzles

Nominal voltage: 230 V; Nominal capacity: 950 W; Dim. (W x H x D): 29.8 x 17.5 x 17.1 cm; Pack size: 61 x 36 x 19 cm; Weight: 2.7 kg

ECOMAT2000

Das Premium Heizgerät — *swiss designed made in Germany*

Ceramic heating element
The PTC heating element generates pleasant convection heat and does not dry out the air.

Frost monitor function
Reliably keeps the temperature above freezing and prevents frost damage.

Automatic switch-off
Whether at home, on a boat or when camping, the Ecomat 2000 switches off automatically when it tips over.

Can be connected almost anywhere
Many campsites and boat moorings only have 500 W. No problem with the Ecomat 2000!

Safe
There are no glowing components in the Ecomat 2000, so that the risk of fire is greatly reduced.

Very quiet
Also suitable for continuous operation and, thanks to the metal housing, without unpleasant odours.

The premium heater

Pleasant heat for caravans, boats, conservatories and homes.
The Ecomat can be operated at three different power levels (450/750/1800 W with fuses of 2/4/10 A) and can therefore also be connected to weakly fused lines. The temperature is infinitely variable via the electronic thermostat.

awiwa

Perfect care for your pet.

Pet Shampoo

The pet shampoo by awiwa is a microbiological coat care shampoo for dogs, cats and small animals. Free from silicone, parabens and colourants. The shampoo is suitable for all coat types and neutralises unpleasant smells. It restores the natural balance between coat and skin. Due to its mild formula with natural microorganisms, the shampoo cleans your pet's coat particularly gently.

250 ml 39.80/l **551/217** **9.95**

Pet Towel

Your dog's coat is wet after a bath or a walk outside in the rain? With the pet towel by awiwa, your dog will be dry in no time. The towel is made of fluffy and very absorbent microfibre. It dries your pet's coat up to 4 times faster than a regular terry towel. It is very robust, soft and tear-proof. The soft silk edges and the removable care tag prevent annoying scratching while drying. Dim. (W x D): 90 x 60 cm; Weight: 285 g

Reclining Chair HighQ

The HighQ reclining chair combines durable comfort and pleasant luxury. The combination of an ergonomic design, high-quality padded fabric with removable headrest and a sturdy, powder-coated steel frame meets even the highest requirements of quality and comfort. The infinitely adjustable and lockable backrest ensures comfortable sitting and an individually adjustable, relaxing lying position. Another advantage is the detachable and therefore easy to clean cover.

Sun Lounger Transabed AC Acier

The sun lounger by Lafuma Mobilier is slender, comfortable and stylish. The exclusive lounger has three adjustable positions. This guarantees a variety of application possibilities both as a sun lounger and as a chair. It is easy to fold and only weighs 6.5 kg, which makes it easy to transport. The tensioning of the padded Air Comfort cover allows you to get up comfortably and to relax in a sitting or reclined position. The armrests are a special feature of the sun lounger that only this model of the Lafuma Mobilier family has. The system consisting of carabiner hooks and loop is an eye catcher when it comes to design and functionality.

Three-Legged Lounger AL/367

The lounger is elastic thanks to tensioning rubbers and adjusts to your body. The backrest is adjustable to four positions.
Camping furniture by Crespo is characterised by its high-quality finishing and materials and fulfils quality and safety standards (TÜV-certified).
Two different leg types provide an always secure stand: the loop legs are ideal for soft grounds and the single legs for firm grounds. The fabric is made of sturdy, tear-resistant multifibre. Crespo furniture has a particularly small pack size.

Camping Chair Noblesse Deluxe

The seat cover consists of ultra-soft DuraDore® 3D Mesh with a 0.8 cm elastic middle layer and makes the chair extremely comfortable. Additional comfort is provided by the 3.5 cm longer seat equipped with the unique Ergoshell® seat technology. A head cushion with adjustable thickness is integrated into the backrest. The frame is made of ultra-light DuraLite® material and manufactured with the established SpaceBox technology. The folding hinges are made of aluminium.

Cover: 100 % PES polyester; Frame: aluminium oval tube; max. load: 150 kg; Seat height: 48 cm; Dim. (W x H x D): 63 x 125 x 68 cm; Pack size: 112 x 65 x 14 cm; Weight: 4.8 kg

Camping Chair Noblesse Grande

Due to the slightly raised seat height of 50 cm, the Noblesse Grande is particularly suitable for people who are over 1.75 m tall. The chair is super light and, thanks to the interconnected back and seat cushion made of DuraDore® 3D extra Soft Mesh, super comfortable to boot. The seat with integrated ErgoShell® cushion gives you a unique sitting experience. The special frame made of double-coated DuraLite® material and SpaceBox® technology reduces the folding size. When folded, the chair measures just 115 x 66 x 12 cm. The DuraLite® folding hinges and the DuraProtect armrests make this chair durable and of high quality.

Cover: 100 % PES polyester; Frame: aluminium oval tube; max. load: 150 kg; Backrest height: 82 cm; Seat height: 50 cm; Dim. (W x H x D): 66 x 129 x 68 cm; Pack size: 118 x 66 x 13 cm; Weight: 5 kg

Reclining Chair AP/262-TCR

The extremely luxurious and comfortable reclining chair can be adjusted to 3 positions and therefore offers optimum seating comfort. In addition, both the backrest and the armrests are ergonomically shaped and the chair is very flat when folded. The chair is equipped with a comfortably padded Tex-Comfort fabric. Thanks to its open cell structure, this fabric is very easy to clean, water-repellent and particularly resistant to discolouration caused by the sun.
Cover: 100 % acrylic; Frame: aluminium round tube; max. load: 110 kg; Backrest height: 79 cm; Seat height: 45 cm; Dim. (W x H x D): 72.5 x 93 x 85 cm; Pack size: 119 x 74 x 14.5 cm; Weight: 3.85 kg

Folding Chair Crespo AP/737-TCBP

Deckchair and folding chair in one – with a 7-fold adjustable, ergonomic backrest and padded Tex Supreme fabric, the chair offers maximum comfort. The fabric is easy to clean, resistant to discolouration caused by the sun and water-repellent. This means it dries particularly quickly. The cover is also removable and therefore easy to wash. The seat and armrests are ergonomically shaped. With powder-coated, reinforced frame and safety lock. The chair is very compact when folded.

Colour: grey; Material: PES polyester; Frame: aluminium oval tube; max. load: 140 kg; Backrest height: 80 cm; Seat height: 50 cm; Dim. (W x H x D): 72 x 122 x 69 cm; Pack size: 114 x 29 x 17 cm; Weight: 7 kg **601/606** **169.95**

The High-Tech boxes of the TropiCool Classic-Series are available in 3 sizes. They come connection-ready for 12 / 24 and 230 V, with an automatic priority switch for power supply operation. For increased battery protection, 3 battery guards have been integrated. The boxes are equipped with the TC special electronics and a soft-touch operation panel. Cool up to 27 °C below ambient temperature and heat up to +65 °C – the temperature can be adjusted individually in 7 steps via the soft-touch operation panel: in cooling mode between 0 °C and + 16 °C and in the heater mode of +50 °C to +65 °C. The memory function saves the latest setting.

MyFridge MF 05, 230 V

Small mobile refrigerators with a holding capacity of 5 L – usable on the road, at home or at work. It's also ideal for cooling milk for coffee makers (lockable openings on both sides; delivery includes a 40 cm milk tube).

Technical data:
Supply voltage 230 V, power consumption AC max. 55 W, cooling capacity 22 °C below ambient temperature, +1 °C with fixing point thermostat, heating capacity up to +65 °C with fixing point thermostat, cooling system: maintenance-free thermoelectric with exterior ventilation, dimensions W 19 x H 31.3 x D 28.1 cm, weight 3.3 kg.

33 832 **195.00**

CoolFun CK 40D

This hybrid cooler is operated via the 230 V power supply as standard. Optionally, an operation via the 12-V connection with cooling via a thermal element is possible. With the box, groceries can not only be cooled, but also frozen while the box is operated with 230 V- even at high ambient temperatures. It has a minimal energy consumption. In comparison: the CK-40D, a standard absorber cooler, consumes approx. 4 to 5 times as much. For comfortable use, the CK-40D provides a stepless thermostat. Its maintenance-free cooling circuit makes it a reliable outdoor companion for many years.

Technical data:
Supply Voltage 230 V, for the hybrid version also 12 V, holding capacity 38 L, power consumption at 12 V 47 W, at 230 V 75 W, temperature range at 230 V mode (compressor) +10 °C – -15 °C, cooling performance of the hybrid version in 12 V mode (thermo electrical) up to 20 °C below ambient temperature, ø running time (230 V mode) at +5 °C ti and 20 °C tu = 20 %, at 32 °C tu = 25 %, space for 2 L bottles, dimensions W 52 x D 51.5 x H 45.4 cm, weight 22 kg.

Dometic ACX3

The high-quality ACX3 absorption coolers from Dometic present a convincing design and handling. They run on 12 V in the vehicle and on 230 V at home or at the campsite and can be switched to gas operation where there is no power connection. They operate absolutely silently and offer a remarkable cooling capacity of up to 30 °C below ambient temperature. The ACX3 family is equipped with a sturdy aluminium housing with recessed grips and a robust lid, an ice cube maker is included. The boxes are available with a capacity of 33 (ACX3 30) and 41 litres (ACX3 40). The large version is also available in a version for a standard gas cartridge.

CoolMatic CB, 12 / 24 V

The CoolMatic CB built-in boxes for refrigeration and deep-freezing designed for cramped conditions make perfect use of the available space. Thanks to their format, they fit perfectly into the mini galley and can be combined with the decor of the interior.

System:

Fully hermetic compressor for combined 12 / 24 V connection with automatic switchover, integrated low voltage protection and electronic reverse polarity protection. The cooling unit of the CoolMatic CB 36 is attached at the side, that of the CB 40 is located under the box. On both models it is removable and can be mounted at a distance of up to 1.5 m. The clever arrangement of the refrigeration components results in a volume of 36 or 40 L and a standing height for 2-L bottles.

Technical data:

Temperature range +10 °C to -12 °C, infinitely variable, outer container made of galvanized sheet steel, inner container made of stainless steel, base parts made of black, shock-resistant plastic, separate inner lid with seal and insulation, 40 mm PU full foam.

CoolMatic CD 30, 12 / 24 V

This compressor cooler fits in concealed hollow spaces in caravans, boats or trucks, e. g. in galleys, under seat benches – in every unused space. Even exterior storage space can be used for cooling purposes. If needed, the cooling aggregate can be detached (up to 1.5 m supply cable). CoolMatic CD-30 is ideal to have a picnic in front of the caravan.

Technical data:

Power supply 12 / 24 V, gross capacity 30 L, average power consumption 40 W, power consumption at +5 °C ti and 20 °C tu = 0.67 Ah/h, at 32 °C tu = 1.33 Ah/h, range of temperature +12 °C to -2 °C, dimensions W 44 x H 25 x D 73 cm (without aggregate 56 cm), weight 19.3 kg.

33 439 **885.00**

CoolFreeze CFF Freezer Boxes, 12 / 24 / 230 V

These surprisingly light compressor coolers are as uncomplicated as thermoelectric freezer boxes. They have been specifically developed for all cases in which a high mobility and frequent location changes are required. By using a more compact compressor, their weight has been reduced significantly.

A flexible placement of these boxes is also no problem: a super-slim design allows putting them in any corner. Both devices have a digital display and an interior LED lighting. They are ready to connect for 12/ 24 and 230 V. The CFF 12 has an integrated, 3-step battery guard. It is easy to transport thanks to a shoulder strap. The larger CFF 20 with detachable lid and sturdy carrying handles has a significantly larger storage capacity. Both devices provide excellent freezing and cooling performances, even at high outside temperatures.

CoolFreeze CFX3 Freezer Boxes, 12 / 24 / 100 – 240 V

The Dometic CFX3 series coolers set a new standard in mobile refrigeration and freezing. Fresh food and chilled drinks at any time – Dometic's market-leading VMSO3 cooling technology makes it possible. At the heart of the boxes are the speed-controlled compressors with optimised software for powerful refrigeration and deep-freezing with superior energy efficiency. The temperature can be set on thedesigned integrated TFT control panel or via CFX app from a smartphone or tablet PC via Bluetooth or WLAN. The CFX3 is equipped with a light and robust protective frame, making it ideal for outdoor use. Sturdy, spring-mounted aluminium handles make lifting and transporting easier.

Features:

- Refrigeration and deep-freezing down to -22 °C, regardless of the ambient temperature
- Speed-controlled high-performance compressor
- Fully insulated lid with aluminium hinge-integrated
- TFT control panel shows the operating status
- Removable wire baskets
- Ice cube maker for the production of ice cubes within a few hours (CFX3 55IM only)
- CFX Smartphone app for temperature control and recording of performance data

Truma Cooler, 12/ 24/ 100 – 240 V

The newest compressor coolers Truma Cooler cool or freeze reliably up to -18 °C even with high outside temperatures. They have been developed on the basis of decades of experience and tested in the Australian Outback under extreme conditions. The small and light Blue Compressor provides an extremely quiet operation. Thanks to the high-quality insulation and low power consumption, they cool efficiently while saving energy – a large-scale evaporator in the boxes ensures a homogeneous temperature distribution. The 3-step battery discharge protection preserves your vehicle battery. If at risk of overheating, the coolers automatically reduce their performance instead of switching off directly. Especially convenient is the possibility to control the coolers with the Truma Cooler App via smartphone and Bluetooth. Flexibly removable basket inserts, an LED interior illumination and a USB charging connection round off the overall picture.

The Truma Cooler App is now available in 9 languages.

ECOFLOW

EcoFlow Glacier, 12 / 24 / 230 V

With this up to 38-litre-containing cooler, the pleasure of ice-cool beverages and food is secured at all times. The EcoFlow Glacier is the first cooler to be able to, besides cooling and freezing, also create ice cubes in a short amount of time. This is provided by the 120 W-strong compressor.
The box is equipped with 2 separated zones, which independently of each other can cool down or freeze from + 10 °C to - 25 °C. The divider can be taken out so that more cooled or frozen goods can be transported.
The EcoFlow Glacier can be operated via the optionally or as a set available accumulator without cable for up to 40 hours. Moreover, thanks to a maximum USB-C charging power of 100 W, even mobile phones or laptops can be charged.

Features:
- App control via Bluetooth or WiFi
- Detachable divider
- Ice cube maker for 18 ice cubes in a short amount of time
- Up to 40 hours cable-free operation
- Very quiet operation (< 52 dB while making ice cubes, < 42 dB in cooling mode)
- Charging option for mobile phone/ laptop

TOTALCOOL

TotalFreeze, 12 / 24 / 230 V

The compressor coolers by TotalFreeze use the latest cooling technology and are suitable for direct and alternating current. Made of high-quality components, they are robust and visually appealing. The boxes allow cooling at a very low power consumption and freezing down to -20 °C – the large interior is divided into a cooler and a freezer compartment; a detachable basket establishes an interior order. Other bonuses are the very low operating noise, the operating panel which is equipped with a LED display and the battery protection system, which saves the onboard battery. The coolers can be controlled by app via Bluetooth.

Polarys Freeze DZ, 12 / 24 / 100 – 240 V

The perfect companion for all outdoor activities. Via the "Dual Zone", 2 temperature areas can be set separately. Operation is done via an LCD display with touchscreen, temperature setting is possible via the app. Frozen goods can be deep-frozen with up to -20 °C. Thanks to a detachable battery (optional), the application without a power supply is no problem for up to 8 hours, a 3-step battery protection saves the battery. The high-quality compressor by LG ensures a quiet operation and a superior cooling performance. The boxes can be operated with a direct as well as alternating current. Other attractive features is a durable, shockproof construction and a changeable lid mount (rotatable lid) which enables a double-sided opening.

MR-040F, 12/ 24/ 230 V

This deep-freeze cooler is distinguished by its extremely low power consumption, even at extreme outside temperatures and needs no increased starting current when switched on. The Engel MR-040F performs completely unsusceptible by vibration, shocks or inclined position due to the integrated oscillating compressor. The box, whose lid stop can be changed, is 100 % maintenance-free and user-friendly with an automatic priority circuit for mains operation. A digital thermometer (dimensions W 5.5 x H 4.3 cm) with temperature sensor (cable length 1 m) is included in delivery.

Technical data:
Voltage 12 / 24 / 230 V, net capacity 40 L, temperature range +10 °C to -18 °C, infinitely adjustable, power consumption 32 W (12 / 24 V), 42 W (230 V). Dimensions (without handle) W 63 x H 47 x D 39.4 cm, weight 22 kg. **33 605** **599.00**

Engel Coolers MD, 12/ 24 C and MT 12/ 24/ 230 V

The versions of the MD and MT series leave nothing to be desired. Thanks to the latest technology and the combination of cooling and freezing feature, there are nearly unlimited possibilities for outdoor-use, even in tropical regions. The user decides to either cool or even to deep-freeze the box's content. All this is done by an automatic temperature control. The optionally used wire basket is removable and the even inside surfaces are easy to clean. The compressor coolers convinces with the highest-quality materials, perfect manufacturing and excellent cooling performance at a low power consumption! The versions MD-17 and MD-27 have an ABS housing; MT-35 and MT-45 a steel case, coloured silver-metallic. The latter are equipped with an additional digital display for temperature display and can also be operated with 230 V. All versions are equipped with modern oscillator compressors. The low-noise boxes can even be operated with a solar panel.

Engel MD, 12 / 24 V

These coolers with net capacity of 57 to 80 L are perfect to cool a lot or even freeze. The versions MD-60-F-C and MD-80-F-C-S combines a cool and a freezer compartment in their interior, another second compact lid protects the freezed goods additionally. The freezing temperature can be regulated freely via the thermostat, the normal cooling compartment is cooled automatically with it. The boxes which are operated with 12 or 24 V are in no way inferior to smaller versions by Engel with regards to technology, consumption and workmanship: all devices have a steel casing, are equipped with particularly durable and quietly operating swing compressors, their insert baskets can be taken out and the boxes have a smooth interior wall for easy cleaning.

Engel MT F-V, 12/ 24/ 230 V

With the anthracite models F-V of the MT line, Engel presents 2 particularly high-quality units that are very robust and comfortable: The lower corners have been provided with protection, the handles have been reinforced, the clasp is made of stainless steel and is lockable. A switchable LED light for the interior has been integrated. As for the cooling capacity, it is even more efficient thanks to the all-round evaporator. A priority switch ensures that the battery power is automatically switched to shore power as soon as it is applied to the vehicle. The boxes offer space for 12 upright bottles (MT-35 1-L bottles, MT-45 1.5-L bottles); 5 years manufacturer's warranty.

Refrigerator CK-100, 12/ 24 V

This model is suitable for permanent use. The robust construction as well as the compressor are made for a long service life: the body consists of a metal casing with polyurethane rigid foam. The door frame is stove-enameled in grey, the door is equipped with a magnetic closure and an exchangeable door hinge and is glossy black. The décor can be changed. Moreover, the compressor refrigerator is equipped with a spacious **-freezer compartment. With an optionally available frame, the device can also be used as an integrated refrigerator. Included in delivery is a power supply with an additional 230 V connection.

Technical data:
Power supply 12/ 24 V, gross capacity 80 L, power consumption 32 W at 12 V, temperature range of +10 °C or below -2 °C, dimensions W 52 x D 54.8 x H 78 cm, weight 28 kg.

33 750 **135.00**

CoolMatic CRX-65, 12 / 24 V

The compressor refrigerator CRX-65 is available with a net capacity of 57 litres. It has a powerful, rpm-controlled compressor with 3 performance levels for an efficient, low-noise operation. The ventilator speed adjusts to the ambient temperature: full power at high temperatures, low power at low temperatures. The desired temperature is set in 5 levels on the soft-touch operation panel. The panel is flush-mounted with the inner wall and elegantly integrated into the LED illumination. Intelligent electronics are behind this: the system optimises the compressor's rotational speed, reaching an energy reduction of up to 25 % in contrast to the previous version. The freezer compartment can be pulled out easily to create space for a larger refrigerator or freezer. The device is ready to connect for 12 and 24 V (automatic switchover).

Technical data:
Power supply 12/ 24 V, net capacity 57 litres, net capacity freezer compartment 7 litres, power consumption at + 5 °C interior and + 32 °C exterior temperature: 1.8 Ah/h. DOMETIC OUTDOOR

CoolMatic NRX Series, 12 / 24 V

All compressor refrigerators of the NRX series impress with an attractive design and an excellent energy efficiency. They are available in 4 sizes from 44 to 113 litres.
The NRX series persuades an elegant, frameless door, a comfortable handle across the entire width and a versatile cooling chamber. The patented freezer compartment can be pulled out quickly and easily to use the entire net capacity to cool or to freeze. All NRX versions are equipped with a frameless door with dark-silver trim and provide an intelligent 3-in-1 cooling solution: refrigerator, freezer, or both combined. The energy-efficient high-performance compressor works in 3 operating modes Eco, Boost or Silent. The door provides a changeable door hinge and can be installed according to your needs on the left or right. With the optional installation frame, the refrigerator can be installed as standard or flush.

NEW

1,299.00

Dometic NRX 90V, 12 / 24 V

The compressor refrigerator NRX 90V is available with a net capacity of 92 litres. It is the 3-in-1 solution: refrigerator, freezer compartment, or both combined. The NRX 90X uses a compressor technology which in contrast to equivalent absorber refrigerators are more energy efficient. The refrigerator is very easy to install, without cu-outs, ventilation grilles and gas installations. The frameless door is kept in black with its front, the handle reaches across the entire width.

Thanks to the changeable door hinge, the door can be installed on the left or right.

Technical data:
Power supply 12/ 24 V, power consumption* 0.4 kWh/ 24 h, nominal output 1.39 Ah/h*, net capacity 92 litres, dimensions W 48.6 x H 82.1 x D 48 cm, weight 22 kg.

Removable freezer compartment

Separate compartments ideal for fruit and vegetables

Clear interior with storage compartments

Flexible adjustable shelves, bottle holder, eggtray and separate baskets.

Control panel with integrated lighting

1,459.00

Dometic RC 10.4M90, 12 V

Compressor refrigerator with a net capacity of 90 litres, a TFT-display and a door with double hinge. This versatile, 90-litres refrigerator for camping vans perfectly fit below the kitchen worktop. In limited space, control panel and/ or compressor can be detached and installed in a different place within the vehicle. The freezer compartment can be taken out; moreover, a powerful cooling aggregate is integrated, reliable even in hot climate zones. Via the self-explanatory TFT-control, the cooling temperature is easily regulated. The cooling aggregate can change nearly soundlessly into the night mode. A booster function for a particularly quick cooling can be activated.

Technical data:
Power supply 12 V, power consumption 3.6 Ah/ h, nominal power 56 W, net capacity 90 litres, dimensions W 42 x H 90 x D 45 cm, weight 21 kg.

33 541 1,459.00

The control panel can be mounted anywhere you want – the appropriate installation kit is included.

NEW

The removable compressor can be mounted up to 1.5 m away from the refrigerator.

Double-sided door hinge for opening the door left or right

The patented freezer compartment is removable if more space is needed for fresh food.

DOMETIC OUTDOOR

Dometic Refrigerators of the 10th Series

The refrigerators of the 10th series are equipped with a very innovative feature which is bound to make camper and caravan owner's who always aim for perfect use of space very happy: thanks to the patented door bearing, the door can be opened on both sides, so left and right. Captivating is the exterior, characterised by the elegant aluminium door handles across the entire refrigerators' height.

Compressor Refrigerators, 12 V

The 12-V compressor of this series is very frugal in its energy consumption compared to other absorber models. A space-saving feature is that there is no need to carry additional gas for power supply. Thanks to its boost function, it is possible to cool down goods quickly; at night it operates very quietly and economically in the corresponding mode. As with the absorber versions of the 10th series, the RCD 10.5T and RCD 10.5.XT are very spacious units with 2 doors for the freezer and refrigerator compartments. The RCL 10.4ET version is used wherever the space in width available is limited. The two RC 10.4T versions were specifically developed by Dometic for installation into the Fiat Ducato. With the versions RC 10.4T and RCL 10.4ET, the freezer compartment is removable.

DOMETIC OUTDOOR

Absorber Refrigerators, 12/ 230 V / Gas 30 mbar

The refrigerators offer the best cooling performance of its product class: with exterior temperatures of up to 32 °C, the fridge can cool down to 7 °C, the freezer compartment even down to -12 °C. Its operation is highly intuitive thanks to TFT display and rotary/ push button. An LED light strip for uniform illumination of the interior rounds off the innovative overall picture. The energy selection is made automatically by Automatic Energy Selection (AES). Thanks to CI-bus connection, the refrigerators are ready for Smart-solutions. In detail, the RMD 10.5T and RMD 10.5XT feature two doors for the refrigerator and freezer compartments, whereby the RMD 10.5XT has an extra-deep interior. The particularly slim RML 10.4T with one door is suitable for installation in narrow spaces. The 2 models RM 10.5T and RMS 10.5T have been designed for installation under the worktop.

N4175 A

N4142 A

N4090 E+ NEW

N4000 E+ / N4000 A, 12 / 230 V / Gas 30 mbar

The evolved 4-piece refrigerator series by Thetford jumps a few steps ahead in the way of user-friendliness: the devices are now equipped with an automatic power selection. Thanks to the intelligent, patented electronics, a self-regulating power supply is ensured at an input voltage of 200 – 250 V; meaning you can be assured of permanent cooling. The refrigerators are CI-bus capable – they can be controlled via the central vehicle display. Moreover, the series is available in 2 versions: the electric LED version N4000 E+ and the comfort version N4000 with Touch Control LCD. For installing situations with little space in its width, there is the slim, but very spacious version N4142.

Features:
- Automatic power selection
- 2 door shapes: flat and curvy
- CI-bus connectivity standard
- Ready-to-connect for 12 / 230 V and gas (30 mbar)
- First-class cooling performance
- 3 years warranty
- Door hinge right and left interchangeable
- Interior illumination
- Energy type and error display
- Electric ignition and gas valve
- Models N4145 A, N4150 A and N4175 A with separate door for freezer compartment

Additional for the N4000 A series:
Large and wide touchscreen operation with clear symbols. After using the operation panel, the display fades slowly.

THETFORD

T2000, 12 V

The new T2000 series offers a wide choice of 12 V compressor refrigerators, developed with particular attention to changing customer needs: Compared to the absorption range in the same class, these units offer better performance, more usable volume and lower weight. At the same time, they operate quietly and energy-efficient. The door handle design integrates seamlessly into the modern exterior with its matt black look. The interior shows the Fresh Ice Grey design. A controlled freezer compartment is integrated in all versions except for the T2090. The versions T2160 and T2175 have a practical drawer for frozen food. The devices have a day mode and a very silent night mode.

Features

- Powerful with very good cooling capacity
- Exchangeable door hinge
- Door shape flat
- User friendly touch screen
- Automatic Temperature Control (ATC) with most efficient cooling power
- Regulated freezer compartment with 3 temperature settings (except T2090)
- Ready for CI-Bus connectivity
- 3 years warranty

Van models

The versions T2090 and T2138 have been specifically developed for the PSA campervan chassis. The new T2138 is an extended version of the T2090 with a wider climate class (10 – 43° C) and a bigger net capacity.

Compressor Refrigerators Cruise, 12/ 24 V

The refrigerators Cruise by Indel B are real high-performance refrigerators with compressor operation, which are comparable to household refrigerators. The energy consumption has been improved by optimising the cooling system, to ensure a high and constant operating performance at the same time. All devices are equipped with a freezer compartment, even the smallest versions, which belong to the most compact on the market.

Features:
- Available in 7 different sizes
- Easy-Fix system (except for Cruise 100) for quick installation
- Handy handle design
- Very small construction with the Cruise 86

Compressor Refrigerators Cruise, Slim 12/ 24 V

The Cruise Slim line has been developed for space-saving installation specifically and is available in 3 sizes with a load capacity of 70 to 140 litres. Its vertical conception makes a generous inner volume possible, which can be compared to a household refrigerator. The integrated energy-saving mode of these compressor refrigerators spares the RV battery. The Silent Night function makes a low-noise operation with a simultaneously high cooling performance possible.

Features:
- LED display
- Energy-saving mode and Silent Night function
- Individually-designable door bezel
- Reversible door opening
- Handle with ventilation block
- Easy Fix system for quick installation

Compressor Refrigerators Cruise Drawer, 12/ 24 V

The compressor refrigerators of the Cruise Drawer line with pull-out drawer have been developed for the flexible application in the van or smaller campers as well as for unconventional installation solutions on board. Thanks to the special mechanism with very robust stainless-steel guide rails and roller bearings of the drawer, the refrigerator can be opened and closed with a simple handle. Thanks to a stable drawer, movable compartments, bottle holders, adjustable poles and the freezer compartment, the interior can be used to store different cooled goods flexibly.

Features:
- Pull-out drawer
- Flexible, customizable interior
- Blue LED interior illumination

Ventilation Grille Dometic

Specifically for installation on the outer wall of the vehicle designed ventilation systems. They help to prevent an energy wasting heat accumulation behind the refrigerator, and in addition allow easy access for service and maintenance, like the cleaning of the burner, without dismounting the fridge. The lower ventilation grille leads cold air behind the refrigerator while the upper grille allows warm air to escape.

120 mm	35 123	59.90

10 | Refrigerator Ventilatior Vento Swift

With this new double ventilation, there is no need for control panel wiring at all – a simple connection to the 12 V onboard power system is all that is needed to start it. The battery-operated touch display allows convenient control of all settings. With mounting parts.

ø	Item no.	Price
92 mm	35 124	109.90
120 mm	35 125	114.90

11 | Refrigerator Double Ventilator Titan SC09

Although its additional cooling effect is strong, this double ventilator for 12/ 24 V works very silently. Speed can be regulated manually by the external control unit, or automatically by the rpm-regulator with temperature sensor. The housing of this sturdy ventilator, which is available in 3 sizes, is made of aluminium.

ø	Item no.	Price
92 mm	35 131	39.90
120 mm	35 132	49.90
140 mm	35 133	59.90

from 39.90

Information

The connector of the double ventilator SC09 must only be connected to a pure direct current! A connection to a non-pure DC can lead to damaging the electronics. In such a case, no warranty is granted.

from 49.90

Sensor-controlled

TITAN

12 | Refrigerator Double Ventilator Titan SC20+

The new 12 V double ventilator is watertight according to the IP55 norm. It is equipped with a functional rack mounting set and an intelligent external aluminium control unit, via which the rpm can be adjusted in two different ways: manually in 6-step setting or by the sensor-controlled, temperature-dependent automatic which switches off at temperatures below 20 °C, and runs at 45 °C at maximum speed. The integrated timer allows the adjustment of 6 different starting times. Despite the strong additional cooling effect, this double ventilator runs quietly. The ventilator is now equipped with a surge protection and can be operated with the 12 V on-board mains without problems.

ø	Item no.	Price
92 mm	35 147	55.00
120 mm	35 148	65.00
140 mm	35 149	75.00

from 55.00 12

13 | Refrigerator Double Ventilation Titan SC22+

Very quiet 12 V double ventilator which has been designed for the installation to existing ventilation grilles in particular, to transport exhaust heat e.g. of refrigerators quicker to the outside, thus increasing their cooling performance. The following IP55 norm water- and dust-tight ventilator can be set to 6 different levels via the external speed regulator, or run with the sensor-controlled automatic in a temperature range from 20 °C (switch-on point) up to 45 °C (maximum speed).
The ventilators are equipped with an overvoltage protection, which ensures a safe operation with the 12 V on-board mains.

ø	Item no.	Price

5 | Ceiling Ventilator

Foldable ceiling ventilator with high airflow, ideal for use under awnings, in tents, caravans or even at home. The 5 blades of the whisper-quiet fan are removable, so that the unit can be stowed away when not in use with a small packing size. It is equipped with a hook for hanging and a 3 metre long power cable.

Technical data:
Voltage 230 V, ventilator power 8 W, rotations 272 rpm, ø 55 cm, packing dimensions W 13 x D 12 x H 25 cm, weight 420 g.

72 928 **19.95**

7 | Clamp Ventilator

Rechargeable table ventilator with clamp and LED illumination. The ventilator has 3 speed level and is equipped with an adjustable LED illumination. The ventilator can be used not as a table version, but thanks to its clamp, it can also be attached basically anywhere. Perfect for application in the car, camper or caravan, but also perfect at home! Dimensions ventilator without foot ø 14.5 cm, overall dimensions W 14.3 x H 21.3 x D 11.8 cm, weight 370 g. **72 930** **49.95**

evapolar

10 | Air Conditioner EvaLIGHT plus

The proven air conditioner has been revised and equipped with a high-quality rotating display, a larger water tank of 1 litre capacity and a leak-proof water system. The EvaLIGHT plus reproduces the natural cooling effect created by evaporation and distributes the humidified air individually through the adjustable air outlet evenly and quietly in a cooling range of 3 to 4 m³. Advantages besides the cooling effect: too dry room air is humidified and the air circulation through the unit filters dust particles from the air. The evaporation cartridge made of mineral fibre prevents deposits inside the unit. A tank filling of 1 L cools for 6 to 8 hours. The EvaLIGHT plus can be operated at 100 – 240 volts or over 5 V via USB; dimensions W 18 x D 18 x H 18.2 cm.

Colour	Item no.	Price
white	72 913	179.90

Spare Cartridge 72 916 36.90

11 | Air Conditioner TotalCool3000

The TotalCool3000 can be set to 4 ventilation levels and produced when operated with water an approx. 45 % cooled air flow. The ventilator cools to a distance of up to 7 metres and can be used in nearly every surrounding with the possibility of a fresh air supply. The low weight, the low consumption and the 3 supply voltages are unique in this performance class and support and help in high heat. Power supply 12/ 24/ 230 V, power consumption 1st level 5 W, 2nd level 7 W, 3rd level 11 W, 4th level 21 W; dimensions W 24 x H 21 x D 25 cm, weight 2 kg. **72 934** **369.00**

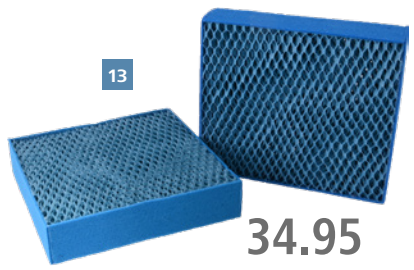

12 | Oil Set

The TotalCool3000 can be used in combination with these essential oils. The set of 5 contains the oils citronella, tea tree, lemon, eucalyptus and peppermint. These are perfect to spread a pleasant smell in your surroundings. **72 936** **29.95**

13 | Spare Filter

2-piece set, for if the used filters produce unpleasant odour when operated, or the cooling performance decreases, the filters should be changed. We recommend the change after a maximum of 12 months. **72 937** **34.95**

Ventilation System ACC 3100

Ventilation system with warmth recovery technology: the roof ventilation system Dometic ACC 3100 provides a powerful air exchange within the vehicle, even if all windows and doors are closed. The intelligent warmth recovery system ensures that it stays nice and warm inside even with cooler temperatures outside – and comfortably cool in the summer. This means, the system provides a comfortable and healthy air atmosphere. In the winter, the warmth losses of the heating are reduced, and in summer, less energy is needed for the cooling mode of the air conditioner. Modern sensor technology detects potential health risks, such as a bad air in the sleeping area. As soon as the programmed limits are surpassed, the ventilation system takes up its work – this way, you can breath clean and healthy air at all times. The integrated LED illumination provides a cosy ambience.

Technical data:
- Input voltage: 12 V
- Power intake: 16.5 W
- Energy consumption: 1.3 A
- Efficiency of the warmth recovery: 72 % – 87 %
- Dimensions: L 54.3 x W 55.3 x H 12.7 cm
- Dimensions inner frame: L 51.8 x W 51.8 x H 4.6 cm
- Installation dimensions: 40 x 40 cm
- Weight: 7.14 kg

Whether in a motorhome, caravan or van, the Polarys Twinair split air conditioning system offers a pleasant room temperature on every trip.

Air Conditioner Polarys Twinair, 230 V

The Polarys Twinair Split air conditioners are the perfect solution for all that want to enjoy a comfortable cool inside their vehicles on hot days and nights. The air conditioner is easy to install and to operate and can be used in basically any vehicle.
The Polarys Twinair Split air conditioner consists of 2 parts: one capacitor and one vaporiser. The capacitor goes onto the exterior of the vehicle, the vaporiser in the interior. Both devices are connected between themselves with a hose. The installation of the air conditioner is easy and can be done within a few minutes.
Thanks to modern technology, the Polarys Twinair Slit air conditioners are very efficient and consume little electricity. The Polarys Twinair 3 has a cooling performance of 800 W (3000 Btuh), the Polarys Twinair 5 of 1460 W (5000 Btuh). The air conditioner keeps rooms of up to 25/ 30 m³ cool and thus is suitable for application in recreational vehicles.

Features:
- Easy installation
- Quiet
- Efficient
- Cools rooms of up to 25/ 30 m³
- 3 ventilation levels

Air Conditioner Plein-Aircon, 12 V

The first 12-V air conditioner for motorhomes only supplied by the auxiliary battery. In comparison to solutions operated with 230 V, this 12 V system eliminates the need to install a converter or auxiliary generator. Thanks to the Softstart, the air conditioner has a very low starting current. Moreover, we recommend the installation of a charging booster (such as item no. 322/498, catalogue page 557). The system has been designed for roof installation in the sleeping area, cooling and de-humidifying the interior of campers and camper vans with an overall length of up to 6 m. This increases the comfort at stops and for sleeping, keeps up the perfect temperature while on the road and ensures the ideal cold distribution in the vehicle. A timer and the included remote control additionally increase the operating comfort. A battery guard (e.g. item no. 322/162, catalogue page 572) can optionally be connected.

Technical data:
- Nominal voltage 12 V
- Nominal current 18 Ah (auto) / 48 Ah (max)
- Cooling performance 1150 W
- Cooling agent R134A
- Dimensions air distributor (L x W x H) 60 x 53.3 x 5 cm
- 2 air outlets (front and back)
- Four-step ventilation (3 steps and automatic)
- Moved air mass 350 m³/h
- Roof thickness 30 – 70 mm
- Cut-out dimensions 40 x 40 cm
- Dimensions L 80 x W 72 x H 24.6 cm
- Weight 28 kg

DOMETIC OUTDOOR

Roof A/C Systems Dometic FreshJet FJX4

Roof air conditioning systems of the next generation: fresh design, superior cooling performance, optimised air flow, incredibly quiet operation – these are the excellent features of the A/C systems generation by Dometic. Available in different equipment versions: with a simple rotary knob operation, or with an electronic touch operation panel and CleanAir technology. In the colours white and black.

Dometic FJX4 1500

The air distributor with manual rotary knob operation to adjust the temperature and the air flow has to be ordered separately.

Features:

- Cools the vehicle's interior down particularly clearly and dehumidifies
- Comfortably quiet operation for a quiet night and restful sleep
- Entry-level version with manual operation – for small and medium-sized vehicles
- Optimised air distribution – stronger air flow and less noise
- Reusable dust filter – simply take it out to clean
- Low weight
- Particularly durable and robust design

Dometic FJX4 1700 / 2200

2 versions are available. Both come with a comfort remote control, the air distributor with LED illumination, which has to be ordered separately, has an electronic touch operation panel for a comfortable setting of temperature and air flow.

Features:

- First-class cooling performance – the vehicles interior is cooled down in record time
- Less noisy in comparison to other roof air-conditioning systems on the market
- Excellent energy efficiency – less energy consumption
- CleanAir air cleaning system for fresh, clean air inside the vehicle

Roof Air Conditioners Dometic FreshJet FJX7

Thanks to its modern compressor and heat pump technology, the FJX7 has a lower power consumption while providing an excellent cooling performance for cooling down the vehicle's interior in record time. The CleanAir technology effectively reduces bacteria and odours so that your motorhome smells fresh and clean. Thanks to the variably adjustable compressor rotational speed, the FJX7 can work especially quiet while in sleep mode always and reliably keeping the desired temperature. The striking LED light curve and the aerodynamic housing impart an exclusive design to it. The air conditioner can be controlled comfortably via the Dometic Climate app. The air distributor with touch operation panel to adjust temperature and air flow has to be ordered separately.

Compatible with the Dometic smartphone app

Features:
- First-class cooling performance
- Rpm-controlled inverter compressor
- Reduced power consumption
- Low-noise operation
- Optional control via the Dometic smartphone app
- CleanAir air cleaning system for fresh, clean air inside the vehicle

Dometic FreshLight 2200

Unique combination of air conditioner and skylight! For this innovative air conditioner no skylight has to be removed – quite the contrary: there is a skylight integrated into the Dometic FreshLight. The result: Feel-good temperatures on board of the caravan or motor home and natural light from above! The cool, dehumidified air can be directed to the back, to the front or to both directions simultaneously, thanks to the patented distribution system. Heating is also no problem – it is equipped with a energy efficient heat pump. And so it turns out to be very powerful at cooling and particularly at heating, consuming less energy than comparable devices. Another advantage is the user friendly remote control and the 2 dimmable LEDs, integrated into the air outlet, which emit a pleasantly dimmed light. The Dometic FreshLight 2200 is made for vehicle lengths of up to 7 m. With the optional 12 V connecting kit DSP-T 12 (item no. 72 813), it can also be run while driving.

Technical data:

- Cooling performance: 2050 W, 7000 Btuh
- Heat output: 2700 W*
- Consumption in cooling mode: 950 W
- Consumption in heating mode: 1200 W
- Power consumption in cooling mode: 4.1 A
- Power consumption in heating mode: 5.2 A
- Dimensions: L 110.5 x W 75.8 x H 21 cm
- Weight: 44.5 kg **72 810** **3,059.00**

* max. heating capacity = heat pump capacity, the heating capacity of the heat pump decreases with sinking outside temperature. Operation is recommended at outside temperatures of more than +2 °C (35.6 °F).

Accessories

Air Purification Set Dometic Breathe 2500

Compact upgrade set for FreshJet roof air conditioners, providing clean and healthy air inside the vehicle. Thanks to the modern ionisation technology, the Breathe air purifier reduces effectively the concentration of dust particles, bacteria, mould fungi and undesired odours. The installation is easy – the Breathe system is installed directly onto fans, air ducts, transition units or directly behind the air outlet grille with a screw connection; the power supply is done via the fans and the purifier only works when the fan is on. Suitable for Dometic FreshJet air conditioners. With the new systemsFJX7, the air purifier is already installed. Dimensions W 13.85 x H 4.05 x D 9.6 cm, weight 270 g. **72 819** **135.00**

Truma Aventa compact / Aventa compact plus

Refreshes reliably – light, quiet, powerful

The roof air conditioners Truma Aventa compact and Aventa compact plus are dimensioned to fit onto every vehicle roof. At the same time, they are the lightest and most quiet roof air conditioners available on the market. With their excellent cooling performance and individually adjustable air diffuser, they are the first choice for all recreational vehicles. Temperature and ventilation levels are remote controlled – or optionally with the Truma iNet X Panel (item no. 309/837, see catalogue page 502) and the Truma iNet X app, or with the Truma CP plus (item no. 309/496, see catalogue page 503) and the Truma app (the Truma CP plus and the Truma app only in combination with the Truma iNet box).

The Truma Combi with the operation panel Truma CP plus is installed in most vehicles. This makes it very easy to integrate the Aventa compact into the existing system. The automatic climate control is controlled either over the panel or the app.

Features:

- Compact: most lightweight roof air conditioner of its class on the market
- Universal: fitting onto all RV roofs
- Comfortable: very quiet operation
- Powerful: cools faster than all other roof A/Cs of its class
- Smart: app-controlled air conditioner and automatic climate control

Truma Aventa comfort

NEW

The roof air conditioner Aventa comfort by Truma excels with its performance power as well as very simple and fast retrofitting – even though extremely economical in its power consumption, the vehicle changes to a comfort zone thanks to a high performance. This is provided by the powerful cooling capacity on hot summer days. During cool nights, the economical heat pump function ensures pleasant temperatures. At the same time, the air is not only dehumidified but also cleaned by a new honeycombed air filter. The integrated sleep mode reduces the speed of the ventilator at night, achieving a particularly quiet operation of the A/C thanks to a very silent air distribution. The individually adjustable air-outlets offer various possibilities to distribute the conditioned air throughout the vehicle. Thanks to its 2 different colour variants, its very slim design and the integrated dimmable LED-ambient-illumination, the air distributor is a highlight perfectly tailored to the living area. The air conditioner is operated by an ergonomic and intuitive IR remote control with clock and timer. Aventa comfort is suitable for vehicles with more than 7 m length and can be controlled via the Truma iNet X panel (item no. 309/837, see catalogue page 502) and the Truma iNet X app, or via the optional control unit Truma CP plus (item no. 309/496, see catalogue page 503).

truma

Truma Saphir

Specifically developed for the use in caravans or motorhomes, the compact and light devices are mounted in the inside of the vehicle. Hence, the centre of gravity is shifted downwards. Thanks to its compact measurements, these devices fit into any standard seating bench located in a caravan or motorhome. Regarding the weight, Saphir devices distinguish themselves with their special EPP housing technology as uniquely lightweight and define standards for modern air conditioners. The temperature is adjusted via an infrared remote control and automatically controlled. An integrated timer allows setting the operation of the devices. The cooled and dried air stream is spread equally into the passenger compartment via 3 adjustable air outlets. Thanks to the included filters, Saphir devices are suitable for those suffering from allergies.

Saphir compact

The Saphir compact is the smallest and lightest air conditioner within the product family. With a cooling performance of 1800 W, it has been designed for small and medium-sized caravans or motorhomes. With its low power consumption of 2.8 A, it can also be used on low-fused campsites. A special comfort at night is provided by the integrated Sleep mode, which reduces the rpm's of the fans (condenser and vaporiser fans) in such a way that it results in a particularly quiet operation of the air conditioner. Dimensions: L 56 x W 40 x H 29 cm, weight 20 kg. The Saphir compact from series number 23091001 can be controlled via the Truma iNet X Panel (item no. 309/837, see catalogue page 502) and the Truma iNet X app, or via the control panel Truma CP plus (item no. 309/496, see catalogue page 503).

72 860 **1,749.00**

1,749.00

1,999.00

Saphir comfort RC

With its reversible cooling circuit, the Saphir comfort RC also offers an integrated heating pump – it cools very powerful with 2400 W (power consumption 4.2 A) and heats in the heat pump mode with up to 1700 W (power consumption 3.7 A). Dimensions: L 62.8 x W 40 x H 29 cm, weight: 23.5 kg. From series no. (KA24RC-)29033001, the Saphir comfort RC can be operated via the Truma iNet X panel (item no. 309/837, see catalogue page 502) and the Truma iNet X app, or the operating unit Truma CP plus (item no. 309/496, see catalogue page 503).

72 865 **1,999.00**

Mounting accessories

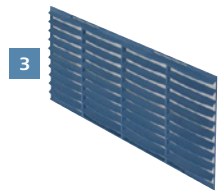

Thanks to the versatile accessories, individual installation of the Saphir family air conditioners is easy as pie. Because of the 3 tube connections, it is possible to place the cold air tubes individually with adjustable air outlets at the desired locations.

EasySat

A sat system where the name says it all. With the EasySat, the TV entertainment literally starts by pressing a button. The system simply has to be switched on via the one button operating device, aligning automatically, quickly and reliably to the ex works set satellite. As the EasySat works receiver-independently, every digital or HDTV receiver can be connected. The 45 cm offset mirror provides excellent reception in nearly all over Europe. Apart from the especially simple operation, the EasySat is characterised by its compact construction and its dimensions and weight, which have been reduced to a minimum.

Performance features:

- Micro-processor controlled searching procedure
- Fully automatic alignment without adjustment and positioning details
- Automatic antenna retraction upon starting the motor
- Robust exterior unit made of stainless materials (aluminium, V2A)
- Double protection against electronic overload
- 12-V operation
- No power consumption when deactivated
- Easy installation
- Universal LNB with 0.3 dB noise factor
- Installation height: 15.5 cm
- Weight: 6.5 kg.

AutoSat Light S Digital

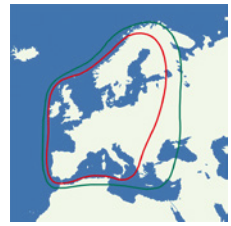

Activate AutoSat Light and lean back- the consciously simple, self-explanatory operation of the AutoSat Light S Digital with just 3 buttons on the external operating unit provides all necessary functions without the need for a receiver. Even more user-friendly is the version with one-button-operation, which aligns by itself after having been switched on. With its 65 cm offset dish, AutoSat Light S Digital offers optimal reception in Western Europe. And with its construction height of only 15 cm and weight of only 11 kg the system lives up to its name. All functions of the control box can be recalled and operated via the external cable-bound control unit. The following satellites can be called up by key: Astra 1, Astra 2, Astra 3, Astra 4, Eutelsat 5, Hotbird, Thor. The box can be installed flexibly. Dimensions W 20 x H 5 x D 16 cm.

Features:

- Microprocessor controlled search
- Automatic adjustment in typically 60 – 90 seconds
- Self-dependent closing when the engine is started
- Robust exterior unit made of non-rusting materials (V2A, Aluminium)
- Double protection against electronic overload
- 12 V operation
- No power consumption when deactivated
- Easy assembly
- Universal LNB with a noise figure of 0.3 dB

AutoSat 2

AutoSat 2 Control is a receiver-independent solution, equipped with a separate control box to digitally search for the desired satellite. This device is always the right choice: future-proof, compatible and can always be retrofitted- best technology and all you can expect.

Performance features:

- Operation as easy as possible
- Directly alignment to the last satellite position
- Modern 32 bit processor and Smooth Motion technology
- Fully-automatic alignment, typically in 30 – 90 seconds
- High searching speed (50°/ sec.)
- Automatic retraction upon starting the vehicle
- High-quality manufacturing and non-corrosive materials (aluminium, V2A)
- Robust, reliable mechanism (bearing, engine, gearing)
- High compatibility, as mechanics and electronics come from the same fabrication
- Double protection against electronic engine overvoltage
- No power consumption when switched off
- Optionally available with 10 m cable length
- Optional with app control
- Easy assembly
- 5 years functional warranty by the manufacturer

Height and weight:

- AutoSat 2S 85: 20 cm/ 19 kg
- AutoSat 2F: 20 cm/ 18 kg

Space requirements:

- AutoSat 2S 85: L 105 x W 90 cm
- AutoSat 2F: L 75 x W 75 cm

Scope of delivery:

Motor-controlled, 12V exterior unit, complete with antenna dish and low-noise universal LNB with noise factor 0.3 dB typ. (AutoSat 2S 85) or 0.6 dB typ. (AutoSat 2F). Control box, external control panel (length connection cable 2 m), mounting material, user manuals and all connection cables (control cable 6 m).

Control box and control panel:

Via the cable-bound operation unit, all functions of the control box can be operated. Both components can be installed flexibly. Dimensions Controlbox W 20 x H 5 x D 16 cm.

NEW

ten Haaft®
Innovative Mobile Technology

Oyster® V

There are several pioneering innovations that characterise the Oyster®. A new chapter in the history of mobile antenna technology is opened up. Go for reception!

Key features:
- One cable technology
- App control
- Automatic updates via app
- GPS, 3D compass, inclination sensor for fully-automatic alignment and satellite finding
- 85 cm antenna mirror for pure range
- Processing of high-quality and robust materials
- Solid, secure and weather-resistant construction
- Rotating-head-technology
- Automatic satellite change upon programme change
- Automatic retraction upon vehicle start (clamp 15 has to be connected)
- 3 years manufacturer's warranty
- Type-approval sign E1 10R - 068566

Scope of delivery:
- Motor-driven 12 / 24 V exterior unit, complete with ø 85 cm dish and low-noise LNB
- Mounting material, instruction and connecting cable
- Quad-LNB upon request

Subject to technical changes!

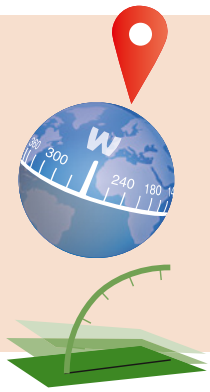

Don't search – find!

GPS determines the location, the 3D compass determines in which direction the vehicle (and thus the antenna) is pointing, the tilt sensor identifies a possible tilt of the vehicle.

The system aligns itself to the satellite.

GPS, 3D compass and tilt sensor, this combination is crucial.

Intelligent rotational-head-technology: Only the head rotates, the body of the antenna stays fixed.
Advantages:
- Reduced power consumption
- Less space requirement
- Lower mechanical load

Including App Operation

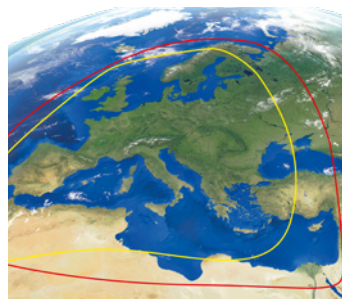

The Oyster® can also be comfortably controlled via the ten Haaft® app, with which updates can be installed very easily, ensuring your system is always up to date.

Suitable for Android and iOS.

CARO®+

With a mounting height of 14 cm, the flat antenna Caro®+ by ten Haaft is unmatched in its compactness and flatness, hiding high-profile technology in its interior which is protected by a robust exterior.

MADE IN GERMANY

Only approx. 14 cm

Key features:
- One-cable technology
- App operation
- Automatic updates via app
- Pure range
- Space-saving installation onto nearly every vehicle roof
- Extremely low mounting height
- Fully automatic alignment and satellite finding
- High-quality processing of robust materials
- Robust, secure and weather-resistant construction
- Swivelling-head technique
- LEM technology: antenna searches in the latest adjusted tilting angle (reducing the searching time)
- Automatic satellite change upon programme change
- Automatic retraction upon starting the vehicle (clamp 15 has to be connected)
- 3 years manufacturer's warranty and reliable service
- Type-approval mark E1 10R - 068566

Scope of delivery:
- Motor-controlled 12/ 24 V exterior unit, complete with flat antenna and low-noise LNB
- Mounting material, instructions and connection cable

Subject to technical changes!

Including app operation

The Oyster® can now also be operated conveniently via the ten Haaft® App, which makes it very easy to install updates, so your system is always up to date with the latest software.

Suitable for Android and iOS.

Reception range CARO®+

Astra 1
Hotbird

Some programs have a short range.
The respective satellite operators are responsible for the exact ranges.

There are Two Operating Options

VISION

The vision version is suitable for customers which already have a receiver or a TV set with integrated receiver. The operation of the satellite system happens via a connected operation panel.

TELECO

Teleco Flatsat BT

The fully-automatic satellite systems by Teleco – FlatSat BT – can be controlled via Bluetooth via the Teleco app on your smartphone. Alternatively, they are operated via the anthracite mini wall operation panel with just 2 buttons. Here, 16 satellites are saved. The system is available in different sizes: the version Classic BT is available with Single or Twin-LNB and with dish sizes 65 or 85 cm. The versions Easy BT and Easy Skew BT Smart, on the other hand, come with a slightly larger mirror (up to 91 x 85 cm). The Flatsat Easy Skew BT Smart also provides the Skew function: an automatic satellite locating system which localises with a highly-precise adjustment the perfect reception angle thanks to the installed GPS module. A safety system ensures that the antenna is automatically retracted when the vehicle's engine is started.

Technical data:
- Control and software updates via Bluetooth via the Teleco App
- Supply voltage: 10 / 24 Volt
- Automatic retraction of the antenna upon starting the motor
- Max. power consumption 3.2 A
- All important satellites are available: Astra 1 to 4, Hotbird, Eutelsat 5W, Astra 28, Thor, Hispasat, Türksat
- Dimensions control unit: W 16 x H 2.5 x D 11.5 cm
- Weight control unit: 250 g

Scope of delivery:
- Satellite antenna
- Control unit DVB-S2 HD
- Intelligent mini operation panel for wall installation
- All connection cables
- Single or Twin LNB

SMART

Bluetooth

Information

Skew: Automatic satellite alignment system with the extremely precise regulation of the perfect reception angle of the LNB via an installed GPS module. While in the centre of the Footprints, one has a perfect signal reception with a horizontal position of the LNB, driving to the furthest South-East or –West of the Mediterranean Sea (e.g. Turkey or Morocco) requires adjusting the receipt angle of the LNB manually. Skew enables a better receipt in these areas: due to the GPS module, Skew "knows" the exact vehicle positions and automatically turns the LNB in the best signal receiving the position.

Smart: A satellite system equipped with Smart knows exactly which channels are sent by which satellite. Thus, only the desired channel needs to be selected, the antenna automatically adjusts to the right satellite.
The FlatSat Skew Easy Smart is compatible with all Sat receivers and TV sets with Digital Satellite Equipment Control (DiSEqC), such as Teleco, Tivùsat, TNT Sat, Fransat, SKY, Canal Digitaal, TV Vlaanderen, and Telesat.

Telesat BT

The satellite system persuades with an excellent price-performance ratio. A number of 16 satellites are pre-saved with the fully-automatic Telesat BT. The system is available with a 65 or 85 cm large dish, and either equipped with Single or Twin LNB. Via Bluetooth with the Teleco app, the Telesat BT can be controlled with your smartphone. A security system provides automatic pulling-in of the antenna when started the motor of your vehicle.

Technical data:

- Control and software updates via Bluetooth with the Teleco app
- Supply voltage: 12/ 24 V
- Automatic retraction of the antenna upon starting the motor
- Max. power consumption: 3.2 A
- 16 pre-programmed satellites
- Dimensions Telestar BT 65: L 73 x W 59 x H 19 cm, weight approx. 9 kg
- Dimensions Telestar BT 85: L 94 x W 78 x H 20.2 cm, weight: approx. 10.6 kg
- Dimensions control unit: W 16 x H 2.5 x D 11.5 cm, weight approx. 250 g.

Configure your satellite TV system

All satellite systems by ALDEN are available in combination with a Smart TV. Basically, you can choose between 2 different TV solutions in the display sizes 19", 22" and 24":

If you wish to install the control module S.S.C.®, you need a TV of the Smartwide LED series on top. These TVs are also available separately as stand-alone devices.

With the all-in-one televisions TV A.I.O® EVO Smart TV, the control module is already integrated into the television. These televisions are only available as a set with a satellite system.

Caratec CASAT

All Caratec satellite antennas of this series receive signals from Astra 1 and Hotbird upon pushing a button (Dual Sat). With the optional operation panel CASAT-102M, the reception of 12 satellites is even possible. Now, all versions are also available as a Smart version: in connection with the new Caratec TV set, steering for the desired satellite is very easy. The CASAT 500 series is the perfect solution for vehicles with little space on the roof, such as vans. The CASAT 850 series is highly suitable also for far journeys thanks to its large dish. All CASAT versions are quick and easy to install – just a cable to the interior has to be installed.

Technical data:

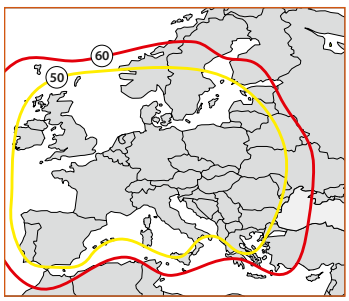

- Safety circuit and automatic retraction upon starting the motor
- Updates via microSD card
- Elevation/ inclination angle 15° – 75°
- Rotation angle 400°
- Frequency range 10.7 – 12.75 GHz
- Suitable for DVB-S SD and HD
- Suitable for DVB-SD and HD
- Operating temperature - 15 °C – + 45 °C
- Power supply 11 – 14 V
- Retrofittable for Twin operation
- Low mounting height 16 cm
- CASAT 500
  Dish size 50 cm, dimensions L 63 x W 50 x H 16, weight 7.8 kg
- CASAT 600
  Dish size 60 cm, dimensions L 73 x W 60 x H 16 cm, weight 8.2 kg

Scope of delivery:

- Exterior unit with detachable connection cable (3.5 m) and roof cable routing
- Dish made of aluminium with UV-resistant powder coating (pre-installed for all), control unit with operating buttons

Maxview Target

Aerodynamically designed and fully automatic sat system with precisely shaped 50, 65 or 85 cm powder-coated dishes made of aluminium that guarantee best reception even on the edge of the footprint areas. The receiver-independent Maxview Target needs only one button for operation and finds one of the 5 preprogrammed satellites (Astra 1, Astra 2, Astra 3, Hotbird and Thor) within a very short period of time. Their high-quality motors and gear run submerged in a fully encapsulated oil bath, ensuring the device's functionality for years.

Features:
- Manually adjustable skew angle
- Robust and anti-corrosive external unit
- Overload protection
- Future-proof design with USB updates for prospective satellites
- 3 year manufacturer warranty
- Made in Europe

Scope of Delivery:
Motor-controlled outdoor unit with satellite mirror, low-noise LNB, pre-assembled cabling (10 m coax cable and 5 m control cable), control box, mounting material.

Technical Data:
- Power supply 10 – 15 V
- Automatic retraction of the antenna when the vehicle is started
- Average searching time 30 – 90 seconds (approx.)
- Power consumption while searching max. 2 Amperes
- Universal LNB with 0.1 – 0.2 dB noise factor
- Can store up to 10 satellites
- Pre-programmed for 5 satellites, other configurations on request
- Mirror size 65/ 85 cm
- Weight antenna unit 10 kg (65 cm) and 11 kg (85 cm)

Maxview Target Connect

The fully automatic Target Connect comes with the same qualities as the Maxview Target, but on top providing an intelligent software making its control even easier and more comfortable. The free Maxview Connect app makes the controlling of sat antennas via smartphone possible. The app is available for iOS and Android. The app opens up versatile operation options such as software updates upon frequency changes and uncomplicated changes of saved satellites.

Maxview Scope 50

The anthracite Scope 50 by Maxview has been developed for caravans and campervans specifically. The very compact, equipped with a 50 cm-large satellite dish, fully-automatic satellite system can be applied where space on the roof is limited due to other installations. The following satellites are pre-programmed: Astra 1, Astra 2, Astra 3, Hotbird and Thor. Via the free app for Android and iOS devices, the Scope 50 can be controlled completely. Possibly required updates can be downloaded via the app. Optionally, the system can be controlled via the control unit included in delivery.

Performance features:
- Low, aerodynamic profile; height retracted just 18.5 cm
- Free app for satellite searching, selection, software update

Technical data:
- Power supply 12 V
- Automatic retraction of the antenna upon starting the motor
- Power consumption while searching max. 2 A
- Universal LNB
- Pre-programmed to 5 satellites
- Dish size 50 cm

Megasat Caravanman V2

The new generation of receiver-independent fully automatic machines aligns within a very short period of time to the chosen satellite by pushing a button. The system is controlled and aligned either via the external operating unit included in delivery, or via Bluetooth via the free app. In a folded state, the system has a mounting height of only approx. 20 cm – thus, it only influences the vertical clearance insignificantly. The Caravanman V2 is pre-programmed to 6 satellites (Astra 1, Astra 2, Astra 3, Hotbird, Eutelsat 9 B, Thor) and available with 2 dish sizes (ø 65 und 85 cm). Two equipment versions are offered: the Premium version has been designed with Single LNB for one user, the Professional GPS offers 2 users the option to watch at the same time (Twin). Moreover, it is equipped with an Auto Skew function, with which the shift in polarisation by turning the LNB, the best possible reception is available even in the European periphery.

Technical data:

- Dish size 65/ 85 cm
- Universal LNB
- Frequency range 10.7 – 12.75 GHz
- Search angle 360°
- 2-axxis direct current motor
- Caravanman 65 Premium / 65 Professional GPS: dimensions L 82.5 x B 65 x H 20 cm, weight 12.1 kg
- Caravanman 85 Premium / 85 Professional GPS: dimensions L 97.5 x B 77 x H 20 cm, weight 13.3 kg

Scope of delivery:

- Exterior unit with connection cable and roof cable routing
- Control unit (dimensions W 18 x H 4 x D 13 cm) with control cable
- Operating unit

Megasat Caravanman Kompakt 3

The Caravanman Kompakt 3 is the perfect fully automatic system for caravans, campers or motorhomes with a low mounting height. With its small mirror and swivelling area of just 77 cm, the antenna finds its place in every vehicle. Via the Bluetooth-compatible control unit, you can connect to every smartphone or tablet. With the free Megasat app- available for iOS and Android- the system can be controlled comfortably via Bluetooth. Moreover, future firmware updates are possible via this way, too. The Caravanman Kompatkt 3 is pre-programmed for the following satellites: Astra 1, Astra 2, Astra 3, Astra 4, Hotbird, Thor, Hispasat, Türksat, Eutelsat 5 W, Eutelsat 9 B. With its low height of only 17 cm, it is one of the lowest components on the roof. Tanks to a new base, it can also be installed onto the refined Mobil-Kit (item no. 72 249), making it flexible in its use. Available as a Single or Twin version.

Technical data:
Dish size W 46 x H 32 cm, Universal LNB, frequency range 10.7 - 12.75 GHz, search angle 360°, alignment approx. 1 - 2 min., dimensions L 46 x W 46 x H 17 cm, weight approx. 5.1 kg.

Scope of delivery:

Megasat Traveller-Man 3

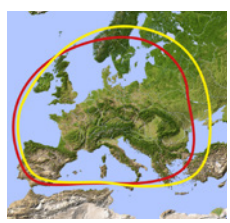

The very flat satellite system with a height of 14.5 cm hardly effects the overall height of the vehicle. New is the Bluetooth-compatible control unit, which serves as a connection to smartphone or tablet. With the free Megasat app – available for iOS and Android – the system can be controlled comfortably via Bluetooth. Firmware updates are possible via smartphone. Also optimised has been the changed base plate with which the system can be installed onto the new Mobil Kit (item no. 72 249). Thanks to this and the compact construction, the antenna can also be used on the way. It has an exceptionally large reception area and fully automatically aligns to the desired satellite. The Auto Skew function enables the best reception possible at all campsites in Europe, also the periphery of the footprint. The control unit is pre-programmed for 10 satellites (Astra 1, Astra 2, Astra 3, Astra 4, Hotbird, Thor, Hispasat, Türksat, Eutelsat 5 West, Eutelsat 9 B). The Traveller-Man 3 is equipped with 2 ports as a twin system.

Technical data:
Search angle 365°, elevation 0° – 90°, Auto Skew, voltage supply 12 V, operation temperature - 25 °C – 70 °C, dimensions L 52.5 x W 48 x H 14.5 cm, weight 8 kg.

Scope of delivery:
Exterior unit with connection cable, control unit (dimensions W 19.5 x H 3 x D 15 cm), 2 coaxial cables (lengths 1 and 10 m), roof cable routing. **72 247** **1,199.00**

Megasat Shipman

Receiver-independent, fully automatic satellite system that aligns to the selected satellite at the push of a button within 1 – 2 minutes. It is preassigned to radio- and TV-signals via Astra 1, Astra 2, Astra 3, Astra 4, Hotbird, Thor, Hispasat and Tuerksat. Its parabolic dish (46 x 32 cm) is optimally protected against external damage by the elegant plastic cover. An SD card reader and an RS232 interface enable a potentially necessary software update of the control unit. Thanks to the included mounting kit, the external unit can be very easily attached to an even surface. With its automatic tracking system, the model Shipman guarantees best TV reception while driving (up to 160 km/h). Shipman recognises any change of direction, corrects it automatically and thus holds the position of the satellite. The version Shipman GPS AutoSkew fully automatically adjusts the LNB to the suitable polarisation and enables the best reception possible all over Europe.

Technical data:

Universal LNB, elevation/ inclination angle 15° – 62°, azimuth/ search angle 360°, power supply 12 V, power consumption while searching max. 33 W, operating temperature -25 °C – +70 °C, dimensions exterior unit ø 67 x H 40 cm, weight exterior unit 9 kg, dimensions control unit W 20 x H 4.5 x D 13.4 cm, weight 617 g.

Scope of delivery:

Exterior unit with connecting cable (length 10 m), connecting cable between control unit and receiver (length 1 m), control unit, adhesive set for installation on smooth surfaces. **72 493** **1,799.00**

Megasat Campingman Kompakt 4

The space-saving Campingman Kompakt 4 is suitable for fix installation into a caravan or motorhome. Upon pushing a button, the antenna finds the chosen satellite in shortest time possible. The integrated Auto Skew system ensures the correct polarisation adjustment of the LNB and thus first-class reception also in the periphery of the footprint. This way, you have a good reception also in areas outside of central Europe. In the very compact control unit, 5 satellites are already pre-programmed: Astra 1, Astra 2, Astra 3, Hotbird and Thor. The elegant plastic housing protects the antenna perfectly against weather effects- it is storm-proof and reception is possible at every wind force. As a twin system, the satellite antenna is suitable for 2 user.

Technical data:

Dish size W 46 x H 32 cm, universal LNB, Twin versions, frequency range 10.7 - 12.75 GHz, search angle 360°, power supply 12 V, dimensions exterior unit Ø 55.4 x H 36.7 cm, weight 8.6 kg. Dimensions control unit W 6 x H 2.4 x D 6 cm, weight 100 g.

Scope of delivery:

Exterior unit with connection cable, control unit , 2 coaxial cables (length 1 and 10 m), **72 248** **999.00**

from 799.00

Megasat Campingman Portable Eco

The single-satellite system with parabolic antenna, which is available in white, does not need a separate control unit as the coaxial cable is directly connected to the television or the receiver. The coaxial cable also serves for the power supply – as soon as the TV or the receiver is on, the antenna starts and searches automatically for the satellite (pre-programmed for Astra 1). Thanks to the elegant plastic housing, the antenna is perfectly safe from weather effects and damage, and thanks to the 10 metre long cable, the exterior unit can be set up at any desired spot. For future transponder changes on the satellite, no antenna updates are required.

Technical Data:
- Universal LNB
- Elevation/ inclining angle 23°- 43°
- Azimuth/ search angle 360°
- Power supply max. 300 mA
- Operating temperature -20 °C – +70 °C
- Dish size ø 38 cm
- Dimensions: ø 45 cm x H 43, weight 4.2 kg

Scope of Delivery:
- Exterior unit
- 10 m coaxial cable

Megasat Campingman Portable 3

Fully-automatic, portable satellite system with AutoSkew and Twin-LNB to connect a 2nd receiver. Thanks to its portable and small construction, a flexible application is possible and it can be put up anywhere where there is an unblocked view to the satellite. Thus, trees and other objects in the way can be avoided easily. Transportation is done via the carrying handle attached to the housing. The connection is done with just one cable, by pushing the button, the system finds the set satellite within 1 - 2 minutes and delivers excellent reception with its 38 cm-sized mirror. The new control unit offers a highly comfortable operation via Bluetooth with the smartphone or tablet. Via the free Megasat app, besides the operation, also firmware updates of the system are run. It is pre-programmed for Astra 1, Astra 2, Astra 3, Astra 4, Hotbird, Thor, Eutelsat 5 West, Eutelsat 9 B, Türksat, Hispasat.

Technical Data:
- Universal Twin LNB
- Elevation/ inclining angle 0°- 90°
- Azimuth/ search angle 360°
- Power supply 12 V
- Power consumption in search mode max. 33 W
- Operating temperature -20 °C - +70 °C
- Dimensions ø 45 x H 39 cm
- Weight of the exterior unit 4.5 kg
- Dimensions control unit: W 19.5 x H 3 x D 15 cm

Scope of Delivery:

Maxview VuQube Auto II

The fully automatic and receiver independent VuQube Auto II impresses by its extraordinary design, low weight and compact shape. One push of a button and it finds the desired satellite within 60 – 90 seconds by itself; the satellite can be chosen comfortably from inside the vehicle by an external control device. It is preconfigured to Astra 1, Astra 2, Astra 3 and Hotbird. With its powerful Cassegrain dish (ø 35 cm) and a sub-reflector especially developed for this sat antenna, it nearly matches to the reception strength of a flat antenna. It delivers high-quality TV pictures in European holiday regions and moreover allows to connect a second receiver due to its Twin-LNB. Possible unevenness of the floor is balanced out automatically by the VuQubeAuto II, and it can be transported in any position. The optionally available roof mounting set (item no. 72 316, 72 319) allows permanent installation of the system on the roof of a vehicle.

Technical Data:

- Twin Universal LNB
- Power supply 12 V
- Power consumption operation 0.6 amperes
- Azimuth 380°
- Dimensions W 49 x H 34 x D 43 cm
- Weight of the external unit 3.5 kg
- Dimensions control unit W 8.5 x H 2.5 x D 4 cm
- No software update necessary - always functioning antenna
- Alarm-protected

Scope of Delivery:

- 0.3 m micro coaxial cable
- 10 m coaxial cable
- Control unit
- Connecting cable (with plug) 12 V
- Mains adapter 230 V

Antenna Set HDS 166 plus

With this antenna set a low-priced and space-saving set was created as an alternative to the fully automatic satellite system. Perfect, if you have no satellite reception directly at the vehicle, e.g. if you are shaded by trees and you want to place the system in some distance to the vehicle. The interaction of the supplied components with the revised "CAPcontrol" app (Android and iOS) is optimally coordinated. As soon as all components are set up and connected, the antenna is aligned in 60 seconds.

Functionality

The heart of the antenna set is the CAP converter, which is connected between the flat antenna and the TV set. Together with the USB WLAN adapter UFZ 131, these two components activate functions never seen before.

- Language wizard during setting
- 11 satellites preset
- After installation of the CAPcontrol app on your smartphone/tablet the simple alignment can start

Scope of delivery:

Flat antenna BAS 66 (with twin LNB), tripod, adapter joint, CAP converter (dimensions W 22 x D 17 x H 3.5 cm), USB-WLAN adapter UFZ 131, 15 m coaxial cable, inclinometer HDZ 66 and carrying bags for tripod and antenna.

71 161 **599.00**

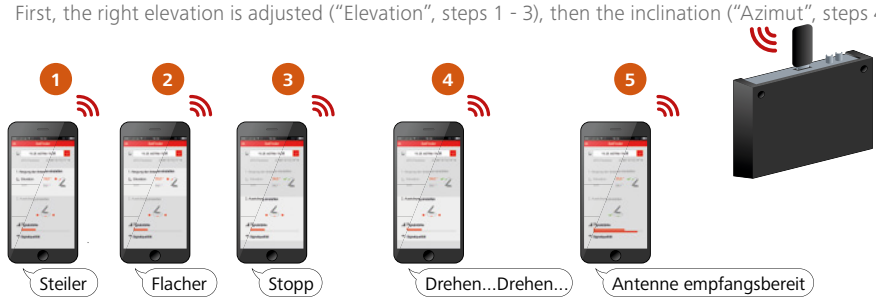

379.00

Information

The app "CAPcontrol" (available for Android and iOS) in connection with the CAP converter and the USB WiFi adapter UFZ 132 gives acoustic and visual direction how the satellite antenna has to be aligned: First, the right elevation is adjusted ("Elevation", steps 1 - 3), then the inclination ("Azimut", steps 4 - 5).

Antenna Set HDS 166

The antenna set for manual satellite reception consists of flat antenna, satellite tripod, adapter joint, 15 m coaxial cable and carrying bag. The adjustment and satellite search is done with the help of a compass and spirit level app (depending on the smartphone and operating system, appropriate apps are already installed). Dimensions flat antenna W 50 x D 50 x H 12.5 cm, weight 6.5 kg **71 160** **379.00**

Accessories

69.90

Switch Master/Slave HDS 42

It is possible that, for example, trees may shade the direct transmission route of the satellite system on the vehicle roof. In this case it is advisable to use an additional manual system with a tripod, which is then optimally positioned. In combination with the CAP converter, the HDS 42 connects both systems and automatically detects which system is currently receiving a signal. Manual replugging of the cables is completely unnecessary. **71 463** **69.90**

Satellite Articulated Masts

For optimal installation and quick alignment of the flat antenna from inside the vehicle. The articulated masts are made of rustproof and seawater-resistant duraluminium, the rod ends are made of injection-moulded aluminium.

Satellite Articulated Mast HDM 140 / 141

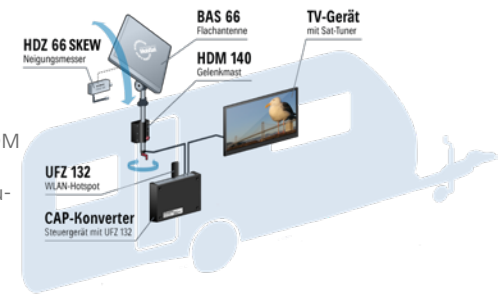

Serves for mounting the BAS 66 Skew on a caravan or motorhome and is equipped with 2 retracted connection cables and 4 F plugs; including mounting bracket and roof seal.

	Type	Length	Item no.	Price
1	**HDM 140**	103 cm	**71 166**	**239.00**
2	**HDM 141**	76.5 cm	**71 167**	**239.00**

3|Retrofit Satellite Articulated Mast HDM 143

For converting a terrestrial reception system to a satellite reception system with the flat antenna BAS 66. The mast is equipped with 2 retracted connection cables and 4 F-connectors; length 103 cm.

71 168 **219.00**

Information

The flat antenna BAS 66 Skew can be combined with the satellite articulated masts HDM 140 / 141. Supplemented by further accessories, such as the HDZ 66 inclinometer, the CAP converter and the WLAN USB adapter UFZ 131, it becomes a fully-fledged semi-automatic satellite system by using the “CAPcontrol” app.

Accessories

Inclinometer HDZ 66 Skew

The inclinometer is installed in a few, easy steps to the back of the LNB casing of the BAS 66 and the BAS 99 Skew. Together with the CAP converter V2, WiFi USB adapter UFZ 132 and the acoustic instruction of the app “CAPcontrol”, aligning the antenna is as easy as pie. Required and current elevation are displayed in the receiver set up and in the app “CAPcontrol”. Displaying the elevation is also possible with an adjusted skew.

71 170 **99.00**

99.00

Display And Control Unit HDS 66

Displays the current elevation of the HDZ 66 Skew inclinometer and, in conjunction with the azimuth/ elevation table, allows the antenna to be aligned.

71 172 **129.00**

129.00

39.90

WiFi USB Adapter UFZ 132

Creates a WiFi hotspot with which TV and radio programmes can be streamed without an additional internet router to mobile devices (smartphones, tablets, etc.) The free Kathrein app “CAPcontrol” has to be installed.

71 459 **39.90**

259.00

CAP Converter V2

Replaces the receiver in connection with an older, fully-automatic satellite system by Kathrein. Please note: to retrofit, a firmware update of the old CAP exterior unit is required, which is done at Kathrein service points.

71 458 **259.00**

Maxview Precision Sat-Kit

Manually adjustable, portable satellite antenna with tripod. Maxview Precision was especially developed for intuitive operation. Attention was directed to the assembly and disassembly as well as the adjustment of the pre-installed antenna. The installed sat finder simplifies the finding of satellites. One leg of the tripod is tagged with a south-direction mark that only needs to be turned to the south. The rotation limit on the tripod only permits a search angle of approx. 30°, in this segment is the desired satellite. The tripod is equipped with a level indicator, thus safe standing on uneven grounds is possible. The included 10 m coax cable is equipped with multi-strand core – hence, it is very flexible and less likely to tangle. Includes 2 carrying bags for storage. To secure the hinged LNB arm when transporting, the Precision is equipped with a magnetic LNB-arm lock.

Simple Assembly:

- Direct the marked tripod leg towards south
- Mount the dish
- Adjust elevation
- Select a satellite on the receiver
- Scan for satellites

Dimensions and weight:

- Precision 55: W 100 x H 156 cm / 6.1 kg
- Precision 65: W 100 x H 164 cm / 6.6 kg
- Precision 75: W 100 x H 172 cm / 7 kg

Scope of delivery:
Satellite antenna with satellite tripod, universal LNB with low noise factor, transportation bags for tripod and antenna, 10 m coaxial connection cable.

The sat stand is equipped with a spirit level on the south leg.

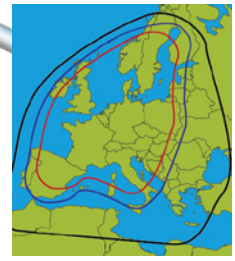

With magnetic LNB arm attachment for a safe transportation.

MAXVIEW

Maxview Precision-I.D Sat-Kit

Based on the easy to use Maxview Precision, the handling has been simplified again. The new satellite identification module is connected between receiver and antenna and additionally to the audio output of the receiver or TV set. Integrated into the antenna beside the sat-finder, an identification-LED shows when the selected satellite is detected. Maxview-Precision-ID works with any receiver featuring an audio output.

Scope of delivery:
As for Precision Sat-Kit, additionally with Sat-ID module for connection between receiver and antenna.

Camping Case

Mobile digital satellite system with extensive accessories. It is kept in a sturdy transport and storage case. The entire set consists of an offset dish, 41 x 38 cm, with detachable LNB arm and universal LNB, 10 m coaxial cable with F connectors. The suction foot, which is also included in delivery, guarantees stable and firm installation on any even surface. Extensive equipment for wall and table installation is included in delivery if it is not possible to find an even surface. A mast holder for mounting to the satellite tripod is included. Dimensions case W 45 x H 47 x D 12 cm, weight 3.9 kg. **72 283** **49.90**

Incl. receiver HD stick 310 V3 with 12 V connection cable. Also available separately (item no. 72 388, catalogue page 812).
Technical data:
Power supply 12 / 230 V, 4000 channels, video text, 2 USB ports, HD receiver, which thanks to its compact form (dimensions W 10.8 x H 1.8 x D 6.5 cm, weight 68 g) can be placed flexibly, e.g. behind a TV; with external display for channel display. **72 282** **99.90**

MEGASAT
Brillantes Fernsehen

1 | Sat Stand Alu Black

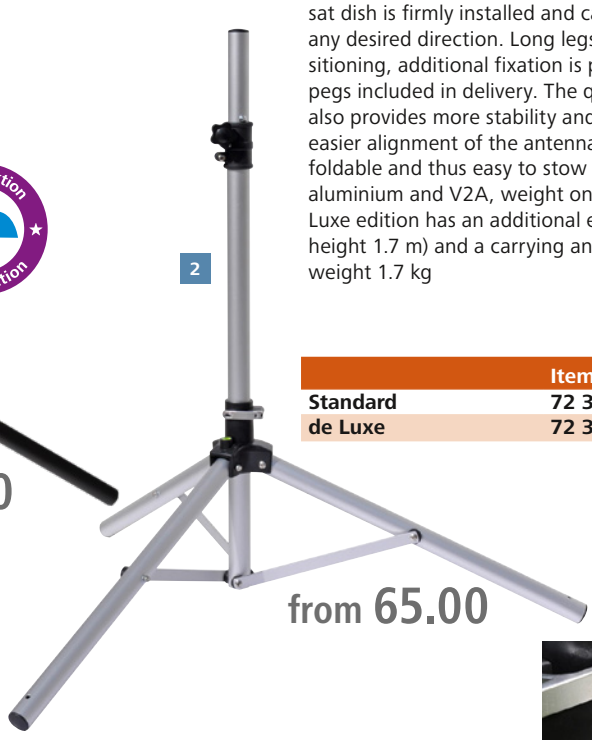

This optically appealing tripod stand of the Frankana Freiko Collection is compatible with all sat antennas with universal mast mount. The extra-long bases provide a secure stand- even for large antennas, the middle tube can be telescoped. The stand whose construction parts are entirely made of aluminium, can be compactly folded. Weight 1.7 kg. Height-Adjustable: 85 - 160 cm. **72 358** **38.90**

2 | Maxview Sat Stand

Ultra-light, stable stand with a tube diameter of 34 mm, height 96 cm. It is equipped with a free rotating mast end and can be used with any sat antenna with mast holder (up to ø 85 cm). The sat dish is firmly installed and can be turned in any desired direction. Long legs ensure safe positioning, additional fixation is possible with tent pegs included in delivery. The quick-action lock also provides more stability and a spirit level for easier alignment of the antenna. The tripod is foldable and thus easy to stow away. Made of aluminium and V2A, weight only 1.35 kg. The de Luxe edition has an additional extension (max. height 1.7 m) and a carrying and storage bag; weight 1.7 kg

ten Haaft®
Innovative Mobile Technology

Oyster® Access and EasyNet V1

Mobile internet just like at home – also while driving!

Adjusted to campers' needs
Like all products by ten Haaft, the new internet systems Oyster® Access and Oyster® EasyNet have been developed with the real needs of campers in mind. The benefit of such systems is that all devices within the vehicle can use a joint internet connection. This happens by providing a private dual band WiFi and a cable-bound LAN within the vehicle, resulting in 3 separate WiFi modules.
The connection between the Oyster® Access/ the Oyster® EasyNet and the internet can be established in 2 different ways:

- Via a LTE-connection over the mobile network with a SIM-card inserted by the customer
- Using a locally available, publicly accessible WiFi (e.g. on the campsite/ camping pitch or another public WiFi hotspots)

The tried and tested has been retained and yet everything is new
With the Oyster® Access as well as the Oyster® EasyNet, the system consists of an electronics unit installed in the vehicle and a exterior antenna mounted onto the vehicle's roof. The connection between the electronics unit and the exterior antenna is established via Oyster® Access and Oyster® EasyNet in the very classic manner via 4 high-quality, coaxial antenna cables.
Card readers can be stored easily accessible at the front of the Oyster® Access and Oyster® EasyNet.
A new, active thermal management ensures an undisturbed operation, especially in warm environments.

Subject to technical changes!

Router Set Oyster® EasyNet

- Space-saving semi-sphere exterior antenna with integrated cable routing
- Compact antenna with 2 x LTE and 2 x WiFi MIMO
- 4 x low-loss antenna cables, firmly connected to the antenna, length 1.5 metre
- Thread length available with 27 or 45 mm
- Incl. electronics unit with router function

Type	Item no.	Price
Thread length 22 mm	70 772	799.00
Thread length 45 mm	70 775	799.00

Router Set Oyster® Access

- Full-size antenna with separate roof cable routing for the antenna cable
- 2 x LTE all-band antenna with Diversity technology
- 4 x WiFi antennas for 2.4 GHz and 5 GHz MIMO
- 4 x high-quality antenna cable with protective hose, mutually detachable, length 2 metre
- Incl. electronics unit with router function

70 779 879.00

Oyster® Access/ Oyster Easy Net electronics unit

- 2.4 GHz/ 5 GHz dual band WiFi for the private network
- LAN-connection for the private network
- 2.4 GHz/ 5 GHz WiFi module for connection with external WiFi via exterior antenna
- LTE module for the use in the EMEA region
- 2 SIM card readers
- Optional CI/ LIN-BUS
- Optional CAN-BUS
- Temperature-controlled ventilator

ten Haaft®
Innovative Mobile Technology

Oyster® Connect System

Mobile internet just like at home– also while driving!

With the Oyster® Connect, ten Haaft has developed a special antenna system for enhanced requirements: the mobile hotspot ensures a stable connection– even while driving. Comfortably surf in your motorhome, camping bus or caravan– and enjoy all advantages of a "mobile home network". The connection is maintained regardless of the location, regardless of which network the external signal comes from - the registered end devices connect to their own hotspot automatically. **70 782** **995.00**

Oyster® Connect - Outdoor Unit

Oyster® Connect Indoor-Unit

3 Jahre Garantie
3
3 Years Warranty

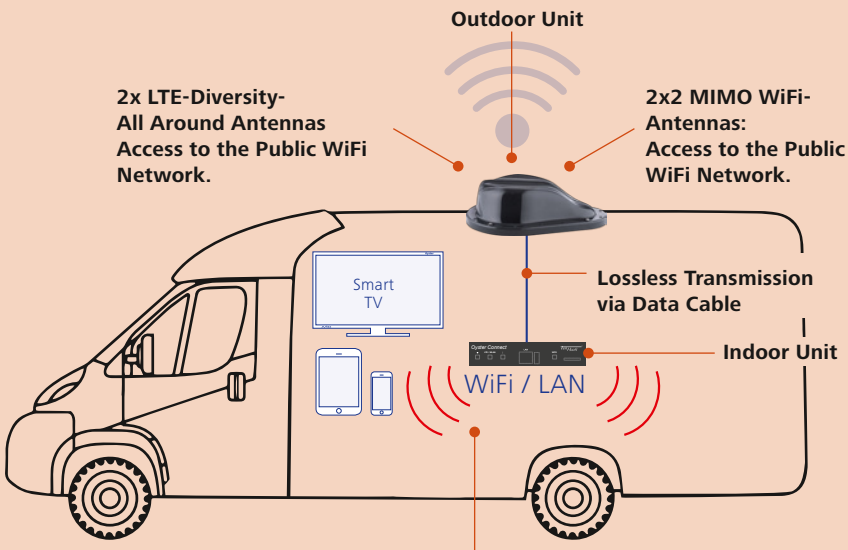

The advantages at one glance

- Mounting the transmitter and receiver unit on the vehicle roof prevents attenuation loss
- Powerful WiFi antennas (2x 2 MIMO) and LTE Diversity antennas
- One-time and easy set up of the "mobile home network"
- Free choice 2,4 GHz / 5 GHz in the WiFi network for the indoor as well as the outdoor unit
- Europe version: supports the European LTE-bands B1/3/7/8/20/28/38/40/41
- Private LAN network enables WiFi network relief, not every Smart TV is WiFi-capable
- Aerodynamic body
- Easy installation and space-saving construction
- weather-resistant
- Comfortable operation
- 3 years warranty

Scope of delivery:

- Oyster® Connect Outdoor Unit
- Oyster® Connect Indoor Unit
- Roof cable routing to the roof with 4 m data cable
- Power supply connection cable Oyster® Connect Indoor Unit
- Installation base

SIM-card/ Multi SIM-card

We recommend using a MultiSIM-card, which can be situated in the card reader in the outdoor unit. This is the best installation spot because there is no dampening of the signal through the chassis and thermal insulation glazing.

ROAM

Router Set Maxview Roam

A comfortable internet connection everywhere where there is mobile phone connection. The combination of LTE mobile communications antenna and WiFi LTE router makes it possible while offering a powerful, mobile WiFi solution. As soon as an active SIM card is in the slot of the router, also at remote places, a maximum 3G/ LTE signal can received, even where the smartphone has basically no connection any more. If a WiFi connection is available, this is preferred automatically, if not, the router changes to 3G/ 4G reception. The connection of router and antenna creates a safe and reliable hotspot inside the vehicle. The router is prepared for every SIM card, also for SIM cards from foreign providers. If there is a sufficient WiFi reception available at the campsite, it can be switched to WiFi reception to save data volume.

Scope of delivery:

- 5G-capable, 360° round antenna (ø 19.6 x H 6.5 cm, weight 500 g)
- LTE/ WiFi router with internal WiFi antenna (W 7.4 x H 8.3 x D 2.5 cm, weight 125 g)
- 12 V connection cable
- 230 V mains adapter
- Wall mount for the router
- 2 x coaxial cable (length 80 cm) with plugs
- Ethernet cable
- Mounting banjo screw

MAXVIEW

ROAM X

Router Set Maxview RoamX

A perfect combination, the LTE high-performance router and the powerful 5G LTE antenna. This combination is perfect for the ambitious camper who wants to use their motorhome or camper as a home office. The reception of LTE signals is done via the exterior antenna, the reception of WiFi signals via the rod antennas mounted to the router. The router is tested by automotiv and thus is suitable for vehicle installation. Via the free ROAM X app for Android and iOS operation systems, the router is quick and easy to configure.

Scope of delivery:

- 5G-capable 360° round antenna (ø 19.6 x H 65 mm, weight 500 g)
- CAT6 router with 2 WiFi antennas (W 9.5 x H 11.5 x D 4.4 cm, weight 550 g)
- WiFi 5: 2.4 GHz and 5 GHz
- 12 V connection cable
- Wall mount for the router
- Coaxial cable (80 cm) with plugs
- Ethernet cable
- Mounting banjo screw

white	**71 203**	**899.00**
anthracite	**71 198**	**899.00**

ROAM 5G

Router Set Maxview Roam 5G

The ROAM 5G LTE/ WiFi is the ideal combination of the 5G high-performance router and a powerful 4x4 5G LTE antenna. The powerful high-speed roof antenna has been developed for camping vehicles in particular. Perfect for use in rural areas with a bad internet connection. Four coax antenna cables create a powerful connection to the router. The router is tested by automotiv and as such suitable for vehicle installation. Via the free ROAM 4x4 5G app for Android and iOS operating systems, the router is quick and easy to configure.

Scope of delivery:

- 5G-capable 360° all-around antenna (ø 19.6 x H 6.5 cm, weight 550 g)
- CAT20 LTE/ WiFi router with 2 WiFi antennas (W 13.2 x H 27 x D 4.5 cm, weight 577 g)
- WiFi 5: 2.4 GHz and 5 GHz
- 12 V connection cable
- Wall mount for router
- Coaxial cable (length 80 cm) with plugs
- Ethernet cable
- Fastening screws

white	**70 701**	**1,399.00**
anthracite	**70 702**	**1,399.00**

Two different installation options available:

Directly onto the roof

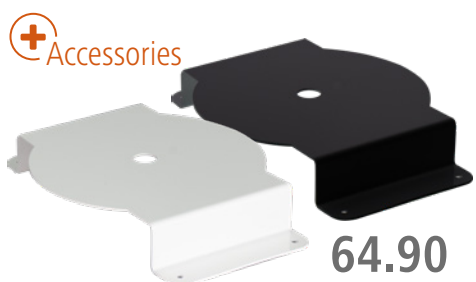

The cable are led directly below the antenna through the connecting hollow screw to the vehicle's interior. A powerful self-adhesive seal prevents moisture from entering while providing additional support on the roof. For this, all necessary components are included in delivery.

With optional roof mount

This aluminium mount provides multiple installation options. Included in delivery are roof cable routing, 3 m extension cable, cable fastening clamps, screws.

Accessories

ROAM CAMPERVAN

Router Set Maxview Roam Campervan

Particularly for installation in spaces where there is hardly any space available, the 5G-capable antenna-router-combination Roam Campervan has been developed. It is perfectly suitable for installation on the roof of a van. Like the Roam, it is available in 2 equipment variants in the colours white and anthracite.
The Roam Campervan standard version comes with a 3G-/ LTE-router which suffices for standard online applications.

499.00

Scope of delivery:
- 5G-capable 360° round antenna (‘W 6 x H 6.5 x D 18 cm, weight 390 g)
- Router with internal WiFi antenna (W 7.4 x D 2.5 x H 8.3 cm, weight 125 g)
- 12 V connection cable
- Wall mount for router
- 2 x coaxial cable (length 80 cm) with plugs
- Ethernet cable
- Mounting banjo screw

KATHREIN
Digital Systems GmbH

Router Sets Kathrein CAR

The Kathrein WiFi and mobile network router sets transport you into the internet quickly and easily at every site. Thanks to its two SIM card slots provides you with the possibility to access 2 mobile networks all the time without changing the cards. The user-friendly user interface of the router shows at a glance which networks are available with which signal strength, making it easier to switch between the different networks. The router is easy to configure via the web interface. Also via web, software updates are automatically installed.

FindMyCaravan function
With the new function of the camping routers CAR 150/ CAR60, you can have the GPS data of your camper or caravan sent to you anytime via SMS.

Kathrein CAR 160

The LTE/ WiFi router set has been designed for the best internet reception. Besides WiFi, the roof antenna receives LTE and also 5G signals. The router processes WiFi and LTE.

Features exterior antenna:
- LTE-/ 5G-reception
- 2 LTE, 1 GPS and 2 WiFi antennas
- Dimensions ø 11 x H 5.5 cm
- Weight approx. 550 g
- Colours: black or white

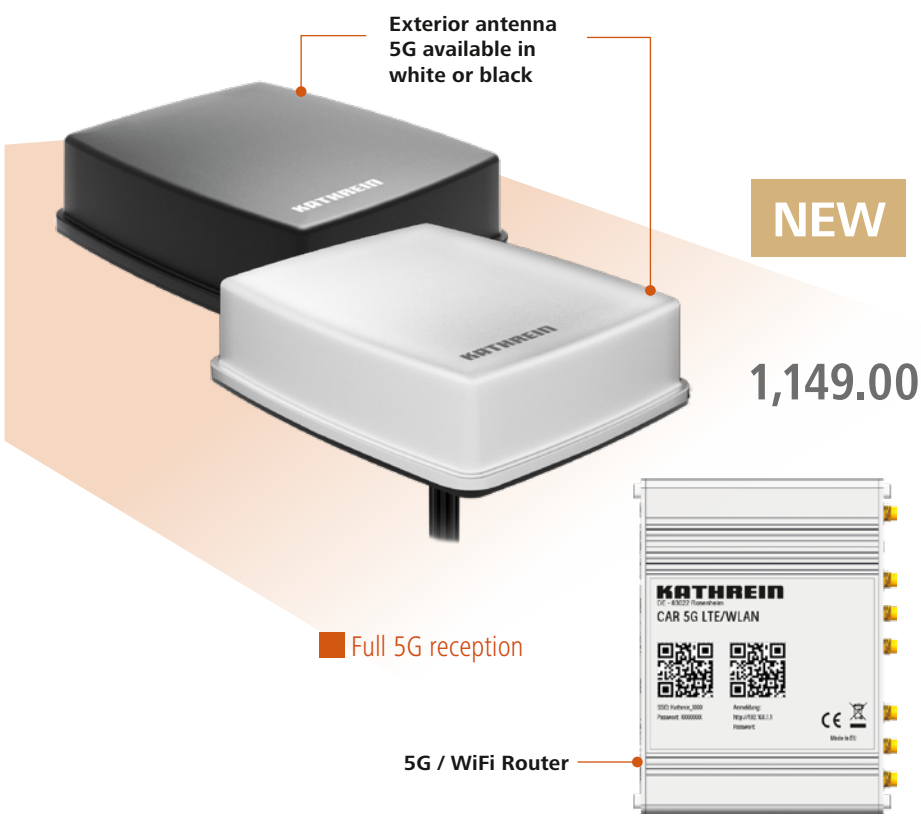

Features router:
- LTE-reception (MIMO) or WiFi
- 2 SIM card slots of the use of different networks
- 5 antenna, 4 ethernet and 1 USB port
- German service hotline, made in the EU
- Supply 12/ 230 V

Router Set Caratec Electronics CET305R

Reliable and ultra-fat internet inside the motorhome: no matter if its WiFi from the campsite, LTE or 5G. With the CET305R, ultra-fast and stable internet to work or surf and for the smart TV is always at hand. The powerful LTE/ 5G WiFi router ensures, together with the exterior antenna, a reliably stable internet connection with a high data flow rate. The telephone module provides 2 SIM card slots for, for example, one main card and a local card of your holiday destination. The WiFi module provides, via the flat and powerful exterior antenna, reception of external signals such as WiFi from the campsite. The interior antenna is used to connect devices, such as smartphones, tablets, PCs or a Smart TV. Thanks to the clearly structures web application, the router is very easy to control.

Features exterior antenna
- LTE/ 5G reception
- Dimensions W 19.9 x H 16.7 x D 5.3 cm (height with bracket 10.3 cm)
- Weight 628 g

Features LTE/ 5G/ WiFi router
- 5 LAN ports
- 2 SIM card slots
- USB port
- Antenna ports 4 x 5G/ LTE, 2 x WiFi, 1 x GNSS
- 5G up to 3.3 Gbps (4 x 4 MIMO)
- LTE Cat 20 up to 2.0 Gbps
- WiFi 5 with up to 867 Mbps (MU-MIMO)
- Dimensions W 13.2 x H 4.4 x D 9.5 cm
- Weight 533 g

Router Set Caratec Electronics CET

This router set by Caratex is perfect for a reliable internet connection inside your motorhome. The set consists of a high-performance LTE-WiFi router and a compact roof antenna, which is available in 3 different versions: with a round antenna structure, either in black or white, or alternatively, in a square, flat structure in white. This combination ensures a reliable internet connection with a high data throughput. With the help of the WiFi mode and the antenna, external signals can be received, i.e. WiFi from the campsite, and also devices inside the motorhome can be connected. The selection between external WiFi and LTE reception is done via a web application. Moreover, via this, a guest access can be set up and configurated. The router provides 2 SIM card slots for, for example, one main card and a local card of your holiday destination.

Features router:
- 2 SIM card slots
- 3 LAN ports
- Antenna inputs 2 x LTE, 2 x WiFi
- LTE Cat 4 with up to 150 Mbps
- WiFi 2.4 GHz 802.11b/g/n
- Dimensions W 10.9 x H 10 x D 5.1 cm
- Weight 265 g

MEGASAT
Brillantes Fernsehen

Router Set Megasat Camper Connected

An efficient exterior antenna as well as an equally efficient router – this is the Megasat Camper Connected LTE-WiFi system. It amplifies the performance of the mobile signal – LTE or WiFi from the campsite's hotspot – to a maximum, thus providing brilliant internet reception. Via the cable connection included in delivery, the signal is send to the corresponding router, from where it is distributed in the accustomed WLAN quality in the vehicle's interior. Also included in delivery: a detachable mounting plate for the installation of the exterior antenna onto the vehicle's roof. The router, equipped with a SIM card slot, is protected by a stable industrial housing and can be installed inside the vehicle, simply at a hidden spot. Weight exterior antenna, roof mount and router: approx. 900 g.

Features multi-functional exterior antenna:
- LTE/ WiFi
- 2 x SMA coaxial connectors
- Aerodynamical design, weather-resistant
- Dimensions L 18 x W 8.5 x H 19.5 cm
- Weight 576 g

Features LTE/ WiFi router:
- LTE
- WiFi
- 1 SIM card slot
- 4 LAN ports
- micro SD
- USB
- Dimensions W 13 x H 3 x D 8.5 cm
- Weight 325 g

Scope of delivery:
- Roof antenna
- Router incl. antenna and power supply unit
- 2 x 3 m connection cable antenna/ router
- Installation plate and roof cable routing

Router Set alphatronics Stream

The new alphatronics stream package is a powerful combination of a WiFi router, antennas and the alphatronics web app for a very easy set up and operation of your own WiFi network inside the vehicle. In doing so, you can choose between interior and exterior installation. This combination allows for the external connection to mobile internet, meaning the LTE network and to free WiFi networks. The set consists also, besides the standard rod antennas, a compact antenna with only 1.7 cm in installation height, which has been adapted specifically to the router to obtain the best reception result in the LTE as well as the WiFi area. The router is equipped with 2 SIM-card slots. This way, for example, you can use an additional prepaid card when abroad. You can choose between two 4G router solutions: alphatronics Stream with CAT 4 allows for a transfer rate of 150 Mbits, alphatronics Stream 2 with CAT 6 provides 300 Mbits.

Features exterior antenna:
- 2 x LTE + 1 WiFi reception unit
- Very low installation height 17 mm
- Weather-resistant, IP67 certified
- Dimensions Ø 8,2 x H 1.7 cm
- Simple installation via 3M adhesive tape
- Weight: 180 g

Router Set Crystop WebBooster

The roof module with integrated WiFi- and radio antennas for LTE/ 5G combined with the 5G router by Crystop creates the perfect tandem to receive multimedia data. The roof module is available as a versions specifically for vans, which is adjusted to the trapeze roof shape of this vehicle type. Thanks to its powerful layout, the router can receive LTE, 5G as well as WiFi signals. In the interior of the recreational vehicle, WiFi via a router functioning as an Access Point (hotspot) is set up. The CAT20 router is equipped with 2 SIM-card slots; one SIM-card with 5G data volume valid for 2 years is included in the price and can be requested at Crystop (see instruction manual).

Features roof module:
- 1 WiFi antenna, 4 LTE/ 5G antennas
- Dimensions L 27 x W 9.5 x H 10 cm
- Weight 410 g

Features router Crystop 5G:
- LTE / 5G
- CAT20
- WiFi
- 2 SIM-card slots, 4 x LAN, 1 x WiFi
- Dimensions L 13.2 x B 9.51 x H 4.42 cm
- Weight 533 g

alphatronics

alphatronics SL-Line

The SLA line is available with display sizes 22“, 24“, 27“, 32” and 40“. Its exterior is captivating thanks to a slim, nearly frameless design as well as the illuminated LG logo beneath the TV set. Highlight is the operating system webOS Hub in the next configuration level; providing a plethora of new features: among it, PVR recordings, Timeshift, Apple AirPlay and HomeKit as well as the integration of the Matter Smart Home standards. A large app supply is available via Content Store. To ensure all devices are always up to date, updates are provided regularly via OTA (Over-The-Air). The TV line is equipped with a triple tuner, HbbTV, CI+, DVD player (insertion from the right, 40” without DVD player), 2 x USB port, 2 x HDMI port, Bluetooth® 5.0 as well as a light wave port (SPIDF/ Toslink), enabling the connection of digital soundbars or hearing aids. All displays are manufactured in the highest quality class (pixels class 0 - no pixel errors allowed). The TV devices can be connected via WiFi to 2.4 GHz as well as 5.0 GHz networks. The external DVB-T antenna AN5 is included in delivery.

Features:
Power supply 12/ 24 V (230 V via optional mains unit), alphatronics Triple Tuner ((DVB-S/S2, DVB-T/T2, DVB-C with CI+) for high-resolution TV (HDTV), DVD player with right insertion (the 40” version has no DVD player), Bluetooth 5.0, OTA (Over-The-Air) updates, 3 years manufacturer’s warranty.
In-/ Outputs:
Antenna (F-socket + IEC-socket), 2 x HDMI/ ARC, AV in, headphones, RJ45 (LAN), 2 x USB port, SPIDF (optical), Common Interface (CI+).

Neck Loudspeaker Caratec Audio BeatSnake

79.90

An alternative for music and television entertainment in the motorhome is the Caratec BeatSnake. Simply put it around your neck and go. Thanks to the direct alignment of the loudspeakers towards the ears, perfect audibility is ensured without disrupting fellow passengers. Nonetheless, a conversation with the BeatSnake, in contrast to headphones, is possible without any problems. BeatSnake is perfectly suitable for the combination with the Caratec Smart TVs. The pairing is done via Bluetooth and as a result, is also not a problem with other devices such as smartphone or tablet. Two BeatSnakes can be connected with each other. Bluetooth 5.0, frequency response from 68 Hz to18 kHz, wireless range approx. 10 m (open field), battery life of up to 9 hours, battery charging time approx. 3 hours, battery capacity 800 mAh, charging voltage/ power 5V / 0.5 A, charging connection USB-C, cable included in delivery, dimensions W 24.5 x D 20.5 x H 4.5 cm, weight 300 g. **70 107** **79.90**

Sound System Caratec CAS101BT

The ideal solution to easily and almost invisibly have a better sound for TV and smartphone in a motorhome or trailer. The compact 4 channel amplifier is connected with the earphone jack of the television. The integrated Bluetooth unit can be used as a different source. Herewith, the music coming from the smartphone can easily be streamed. 2 Caratec Exciter CAE70 are used as sound converters. They are mounted invisibly beneath the furniture and create a pleasant sound. The set can optionally be extended by 2 more CAE70. **70 096** **119.00**

Exciter Caratec CAE70

TFT LED Flat Screen TV Royal Line IV Smart

The Smart version distinguishes itself from the standard series through Bluetooth, LAN and WiFi interfaces. The Smart TV without DVD drive comes with an internet browser and many pre-installed apps on the basis of an Android 11 operating system with access to different media portals. Additionally, further apps can be installed via the integrated app store. The Bluetooth 4.2 port makes the wireless sound replay via Bluetooth audio devices, such as headphones and loudspeakers, possible.

Oyster® SMART TV

TFT LED Flat Screen TV Oyster® Smart TV

Features:
- High-end device with ultra-flat design
- Integrated 2.4 GHz and 5 GHz WiFi
- WiFi set-up with WPS (compatible WiFi sources required, e.g. Oyster® Connect, Oyster® Access and Oyster® EasyNet)
- Bluetooth 5.1
- Integrated tuner for DVB-S2, DVB-T2 HD/H.265
- VIDAA operating system with full access to a,l apps in the Google Play Store like, for example, streaming services and web browser
- HbbTV ("hybrid broadcast broadband television")
- Multiple sender favourites' lists (e.g. for Germany, Austria, Switzerland, etc.)
- WIDI/ Miracast
- OTA (Over-The-Air-Update - software updates via the internet)
- Connectivity via USB 2.0 and HDMI
- Freely nameable signal inputs
- Universal installation with VESA standard mount
- System remote control: just one remote control for the satellite system and the Oyster® Smart TV set
- EPG electronic programme guide with 7-day-preview
- ON-SCREEN display for supply voltage
- "Only audio"-function
- Barrier-free use
- Module slot CI / CI+
- Power consumption in standby < 0.5 Watt
- Stable construction for portable application in motorhome and caravan
- Pre-programmed channel lists for D/AT/CH/FR and update support by ten Haaft
- Power switch On/ Off
- Certificate of Conformity by KBA (German Federal Motor Transport Authority)
- 3 years manufacturer's warranty

In-/ Outputs:
- 3 x HDMI inputs (1 of them with HDMI ARC)
- 2 x USB 2.0 type A for power supply and data mediums
- CI+ slot for CA modules
- SPDIF optical output
- Headphone output 3.5 mm stereo jack connector
- AV IN (via optional 3.5 m jack adapter cable)
- IEC-socket for terrestric reception
- F-socket for satellite reception
- Network (100 Mbit LAN) RJ45 socket
- AVTEX DC input socket, protected against polarity reversal

LIPPERT

119.00

Swivelling Arm

To mount the flat screen problem free and space saving on walls or cabinets. The holder can be completely blocked while driving and provides an optimal adjustable viewing angle due to its 3 self-retarding joints. The inclination of the holding plate (VESA 75 and 100) can be adjusted variably. Carrying capacity 10 kg, arm length 41 cm. Weight 1.3 kg. **72 717** **119.00**

119.00

Console Extraction

Enables to pull out the flat screen about 37 cm. The holder (VESA 75 and 100) can be adjusted in height, inclined to the front and rotated. For space saving storage of the TV the holder can be folded backwards up to 90°. Carrying capacity 10 kg, dimensions W 26 x D 37.5 cm, weight 3.8 kg. **72 718** **119.00**

115.00

Ceiling Mount

To mount the flat screen on the ceiling or below upper cabinets. The holder can be rotated and tilted and locks automatically in closed position. Additionally the holder (VESA 75 and 100) can be adjusted in height and tilted downwards. The holding plate can be rotated. Carrying capacity 7 kg, dimensions W 26 x H 6 x D 27.5 cm, weight 2 kg. **72 719** **115.00**

HÄFELE

TV Swivelling Holder

Swivelling Holder made of aluminium and plastic, which locks firmly when pushed in. Swivelling area 180 degrees vertically and horizontally. For cabinet installation, suitable for flat screens with a screen diagonal of 19", for installations to the exterior wall, screen diagonals of up to 32" are possible. VESA standards 75 and 100, load capacity 8 kg, max. extension 50.2 cm, extended rail length approx. 70.8 cm at an installation depth of 40.3 cm. Dimensions W 13 x H 8.1 x D 39.7 cm, weight 2.7 kg. **72 652** **221.00**

FAWO

56.90

Extensions CFA

Extensions with an extremely stable, but lightweight aluminium profile with sliding guide enable a horizontal or vertical installation, for example in cabinets.

4 | Frontal Extraction Flex CFA100H

For TV cabinets, can be installed horizontally or hanging, enables to pull out the TV device by a maximum of 47 cm, the rail length reaches approx. 79.2 cm when pulled out. It can be turned or rotated, is made of aluminium, holds up to 6.5 kg. Dimensions approx. W 18 x H 8.5 (extended 31.3) x D 37 cm, weight 2.5 kg.

72 654 **209.00**

5 | Lateral Extension Flex CFA101L

For TV cabinets, mountable left and right, enables to extend a TV about max. 47 cm. Rail length extended 83.5 cm. Can be rotated and swivelled, the holding plate can be tilted +/- 8°; made of solid aluminium profiles and steel, load capacity 6.5 kg, dimensions approx. W 41 x H 15.5 x D 4.2 cm, weight 2.6 kg.

72 632 **199.00**

6 | Lateral Extension Flex CFA102L

Extension suitable for side mounting in and on cabinets, which can be easily locked and unlocked by means of Push Lock and a spring steel bracket. Its retaining plate can be rotated 190°, easily adjusting it to the desired position. The extension can be pulled out by max. 47 cm, rail length extended approx. 83.5 cm. Made of aluminium, load capacity 6.5 kg. Dimensions approx. W 41 x D 4.4 x H 15.5 cm, weight 2.2 kg.

72 659 **209.00**

7 | Swivelling Adapter Flex CFZ103

Swivelling adpater to install TV sets a TV mount vertically to safe space. For the drive, the TV set is turned into a vertical position and fixated with a magnet in this position. This way, also large TV sets can be installed in a space-saving way. To run the TV set, it is simply turned 90° into a horizontal position. The adapter is universally applicable to sufficiently resilient mouns with VESA-100 intake. Rotation angle 93°, construction height 23 mm. **72 657** **89.90**

Wall Mount Flex CFW

For TV devices with a weight of up to 6.5 kg, made of steel. The integrated locking prevents the TV-set from moving during the journey.

1 | Flex CFW200S

With 2 swivel joints, dimensions (folded): W 17.7 x H 12.8 (with locking lever 25.6) x D 2.8 cm, weight 900 g. Wall distance (extended): approx. 15 cm.

72 647 **69.00**

2 | Flex CFW301S

With 3 swivel joints, dimensions (folded): W 23.5 x H 12.5 (with locking lever 25) x D 3.4 cm, weight 1.4 kg. Wall distance (extended): approx. 37 cm.

72 648 **89.00**

1 | Reversing Camera FF-BAS 100

Robust rear-view camera, providing perfect vision even at night thanks to the integrated infrared LED technology. The camera is dust- and watertight according to IP69; connection cable length: 15 m. **82 608** **149.00**

2 | Reversing Camera FF-DUC100

Camera particularly designed for the installation into the 3. brake light of the Fiat Ducato van built since 07/2006, providing perfect vision even at night thanks to infrared LED support. As the original brake light console is still used, and only the glass of the brake light is exchanged, it can easily be seen why the camera's installation is very easy and no extra drilling holes into the chassis are necessary. The camera is dust- and watertight following IP69; connection cable length: 15 m.
82 616 **169.00**

3 | Reversing Camera FF-DUC200

Double camera specifically designed for the Fiat Ducato built since 07/2006, which is attached to the brake light just as the FF-DUC100. In doing so, one lens is directed downward as a parking view, the second for long distance view to the back. Included in delivery are 15 m special camera cable to connect 2 monitors or naviceiver with 2 video ports. **82 692** **229.00**

4 | Reversing Camera ESX VNA-RCAM-CS200

Elegant, high-quality camera that can be integrated perfectly into the vehicles design thanks to its slim, white casing. It convinces with an integrated cable arrangement and simple mounting, best installed underneath the third brake light. Thanks to its wide viewing angle, it has a flexible installation height; includes 15 m connecting cable.

Technical Data:
Image sensor 1/3" CMOS Viewing angle (D/ V/ H) 110° | 70° | 90°, light sensitivity 0.1 Lux, resolution 310,000 pixels, nominal voltage 12 V, temperature range -30 – +70 °C, IP protection class IP68, weight 500 g. **82 620** **179.00**

179.00

5 | Reversing Camera ESX VNA-RCAM-CS240

Equipped with 2 separate camera lenses, the Twin camera enables a view to the back and, while manoeuvring, directly behind the vehicle to avoid damages caused by obstacles. Supported with IR illumination (5 IR LEDs), the camera provides perfect sight even at night and this way a easy and stress-free manoeuvring. Included in delivery is a 15 m long connection cable from the camera to the monitor, connection 1 x QuickSafe 6-poles, male. **82 624** **299.00**

299.00

Twin camera with HD resolution

CAR MEDIA SYSTEMS

349.00

6 | Reversing Camera ESX VNA-RCAM-CS240 HD

Like the ESX VNA-RCAM-CS240-15, but with HD resolution. Suitable for al ESX navigation systems (see pages 842 – 844). Connection 1 x QuickSafe 6-poles, male, can be fixed with screws, in accordance with protection class IP69K. **82 617** **349.00**

7 | Reversing Camera ESX VNA-RCAM-DBJ220-15

Camera for short and long distance view for installation on the Fiat Ducato built since 2006/07. The small wide-angle camera with its 178° provides a particularly large viewing angle while manoeuvring, while the opposing, integrated wide-angle lens ensures a perfect view of the subsequent traffic. The LED-support ensures perfect night vision. Both cameras are already integrated into the break console included delivery, which in turn is installed onto the original brake light of the chassis. A seal on the chassis-side prevents the intrusion of moisture. The 15 m connection cable is suitable for moniceivers and navigation devices with 2 video ports, or to connect the cameras to 2 monitors.

82 694 **299.00**

7 | Reversing Camera ESX VNA-RCAM-DBJ225

Identical to the version DBJ220-15, instead of the 15 m connection cable, the set includes an adapter set to MINI-DIN 6-poles suitable for Pössl vehicles. **82 695** **299.00**

299.00

Breaklight console with integrated LEDs

Reversing Cameras ESX Ford Transit

Compact reversing cameras for the Ford Transit built since 2019/07 to install the third brake light. With its large 178° viewing angle, the cameras provide perfect vision. Night-vision mode thanks to IR LED support. Both cameras are integrated into the brake console included in delivery, which is installed onto the vehicle together with the original brake light. The 15 m long connection cable is suitable for moniceiver and navigation devices with 2 video inputs, or to connect the cameras to 2 monitors.

Garmin VIEO RV

Dock Garmin VIEO RV52

The fully integrated, yet mobile infotainment system in its 2 versions combines camper-specific Garmin navigation with the extensive Fusion premium entertainment. The system consists of the vehicle-specific RV 52 Stereo Dock installation element, onto which the selected control panel (to be ordered separately) with 8" or 10" screen is placed. The control panel can be detached from the radio and used as a remote control in the interior and exterior of the motorhome. Besides the vehicle-specific routing, an integrated hands-free function, voice control as well as driver assistance with notifications of danger points provide additional security while driving. Via smartphone and the Garmin Drive™ app, users receive smart notifications, traffic information, weather data and more in real time directly on the display. Moreover, comprehensive data bases with camping POIs and information by ACSI™ and NKC Campercontact™, Trailer's PARK parking lots for camper and caravans as well as recommendations by TripAdvisor and Foursquare with reviews. Besides the 4 ports for the installation of compatible cameras (for rear and front view as well as indicator-activated side cameras), the premium sound system offers a variety of media connectivity options such as Apple AirPlay and UPnP. With the multi-zone technology, the sound can be controlled directly via the dock in 4 independent audio zones, the detachable control panel or the FUSION-Link™ app for smartphones.

Charging Cradle CARica

With the innovative charging station CARICA, phones can comfortably be charged wirelessly. The charging cradle is integrated tailor-made into the dashboard of the Fiat Ducato and charges every smartphone which is suitable for inductive charging following the Qi standard. The smartphone just has to be put on top of the charging station. The charging process can be controlled by an on and off button to increase the battery life. The closable cover prevents the smartphone from falling out or sliding while driving. CARICA is connected via Plug & Play to the on-board power supply, appropriate vehicle-specific cables are already included in delivery and available in two versions which support more than inductive charging. Both also have extension cables with USB and HDMI or USB and jack connectors.

INBAY Qi Charging Station

This charging cradle perfectly integrated into the original dashboard and prevents an overheating of the smartphone or charging device. The smartphone can simply be charged while being used, for example for navigation or music. Simple installation with Plug & Play cable, no other cable kit is required. INBAY is compatible with all smartphones working with the Qi standard. Non-Qi-compatible devices with micro USB port can be easily retrofitted to meet the Qi standard with accessories. This way, nearly every smartphone can be charged wirelessly.

Ports to radio: VHF/FM (DIN plug) and DAB/ DAB+ (SMA plug, SMB socket), connection to antenna: DIN socket. **81 049** **89.00**

caratec®

Caratec Audio Sound System

Active Plug & Play sound system, especially customised for motorhomes. It consists of a compact amplifier with integrated DSP and a subwoofer. The amplifier optimises the sound of the pre-installed Fiat speakers and drives the powerful subwoofer. The weaknesses in high-pitch reproduction depending on installation reasons are optimized and the subwoofer provides an enlarged bass rendition, which takes away deep frequencies from the other speakers. This creates a clearer, more vivid sound and a completely new and compelling sound experience, which allows to enjoy music even at low volume. For the versions with 6-channel amplifier, possibly existent loudspeakers in the living area are controlled via a high pass with optimised frequency response. This makes the sound more dynamic. The Plug & Play cable set allows quick and easy installation, separate connections to the vehicle are not required. If no space is available, the installation at another location is also possible (e. g. behind the driver's seat instead of the cover). If required, a 2 m extension cable CAZ100L (item no. 72 748) is optionally available.

CAS200D, CAS201D, CAS202, CAS203, CAS207D, CAS215D

from 449.00

Features:
- Specific versions for the driver's cab and the living area
- User-specific DSP adjustment for best sound
- 4 or 6 channel amplifier
- High- and low-pass filter for the subwoofer
- Bass reflex housing incl. 17 cm chassis
- 2 voice coils 2 Ω
- Plug & Play

CAS204D, CAS205, CAS206, CAS208D

Sound Systems for Fiat Ducato

Sound systems configured for Fiat Ducato. The basic versions for the driver's cab (CAS200D / CAS201D / CAS207D) consists of a 4 channel amplifier with integrated DSP sound processor and a subwoofer. The extended version for the driver's cab and the living area (CAS204D / CAS208D) consists of a 6 channel amplifier, a subwoofer and 2 compact speakers, that can easily be integrated by 3 housing versions for top, flush and corner installation. The versions CAS207D and CAS208D have been designed for vehicles in particular, in which Caratec Audio CAK1650.DU loudspeakers (item no. 72 749) have been or are planned to be integrated. With the basic versions, any existing loudspeakers are still controlled by the radio.

Sound Systems for Integrated Motorhomes

Systems particularly designed to enhance the sound in integrated motorhomes. The basic versions with 4 channel amplifier and subwoofer are made for sound improvement in the driver's cabs with 10 cm speaker systems in the dashboard (CAS202) or with 13 - 16 cm speakers on the sides of the footwell (CAS203). The extended versions (CAS205 / CAS206) are equipped with a 6 channel amplifier and moreover contain 2 compact speakers for the living area, which can flexibly be installed by top-, flush- and corner mounting due to 3 housing versions. Possibly existing speakers in the configuration are controlled by the radio further on.

Soundsystems for Mercedes Sprinter

Sound system specifically designed for Mercedes Sprinter built since 2018/03 with 6-channel amplifier which significantly improve the sound of the loudspeakers installed in the vehicle. Any loudspeakers existing in the living area, are triggered by the amplifier via a high pass with optimised frequency response. This way, also these loudspeakers sound more dynamic than before. The version CAS211S is suitable for vehicles with radio preparation. For vehicles with MBUX 7" with navigation and 10" without DSP-box preliminary set-up, the version CAS212S has been designed. For vehicles with MBUX-systems with DSP-box preliminary set-up, the version CAS213S is available.

caratec®

Loudspeaker Set Caratec Audio CAK1650.DU

Consists of 2 loudspeakers (16.5 cm) with coated paper cone and long-term stable rubber surround and 2 tweeters (1.9 cm) with silk membrane. The vehicle-specific loudspeaker system provides increased dynamic, clear and pleasant voice reproduction as well as powerful basses. Installation and sound perfectly fit the Fiat Ducato built since 07/2006 and vehicles identical in construction: the tweeters fit exactly into the slots of the Fiat A-pillar trim and the Remis blackout system, the woofers are already completely pre-assembled and can replace the original woofers in no time.

Scope of delivery:
2 woofers, 2 tweeters, mounting material
72 749 **169.00**

169.00

Sound System ESX DBJ-Kit 1

Two-way, 16 cm (6") loudspeaker systems, particularly developed for the Fiat Ducato built since 2006/06 and vehicles identical in construction. The 16 cm bass-midrange speakers with fibre-reinforced membrane in a lightweight design with ABS basket fit perfectly without adapter rings into the original openings of the vehicle. At the top of the basket, the integrated plug socket is situated to connect the original loudspeaker cable originally integrated into the vehicle. The amplifier set provides a perfect solution for easy installation. The very small 2-channel amplifier hardly takes up any space and can be connected effortlessly with the included ISO cable kit via Plug&Play. Moreover, the digital amplifier is equipped with extra RCA outputs so that an additional active subwoofer can be actuated.

Technical data loudspeaker:
Nominal output 90 W, impulse capacity 180 W, frequency range 50 – 24.000 Hz, impedance 3 Ω, installation hole diameter 15.5 cm, installation depth 5.1 cm.

Technical data amplifier:
2-channel Class D Nano amplifier, 2 x 52/95 W RMS @ 4/2 Ω, 1 x 190 W RMS @ 4 Ω bridged, HPF / LPF switchable @ 80 Hz, frequency range 10 Hz – 60.000 Hz, line-level inputs with EPS, Cinch Line Out, automatic switch-on function, dimensions W 7 x H 3.5 x D 9 cm. **72 752** **429.00**

ESX CAR MEDIA SYSTEMS

Reversing Cameras PerfectView

Whether you drive a camper, a caravan or a van, you are supposed to always feel comfortable and safe. PerfectView cameras keep an eye on everything surrounding the vehicle. The cameras reliably delivery clear images– at day as well as by night, on cold winter days or in the bright summer sun. Thanks to its highly compact dimensions and low assembly form, the PerfectView cameras adapt perfectly to modern vehicle forms. The temperature-controlled heater ensures the best image quality also at low temperatures. Watertight housing ensure that rain and splash water leave the high-quality cameras unharmed. The cameras are suitable for all navigation systems with a connection for an external camera (cinch).

PerfectView CAM 35 NAV

Innovative camera solution specifically developed for the Fiat Ducato van built since 07/2006 (X250 and X290). It integrates the small cylinder camera (CAM 35) with wide-angle lens for a particularly large viewing angle while manoeuvring into a built-on breaklight console. The original breaklight is continuously used. Moreover, the console offers the option to install a second, optional camera (CAM 35FS) with a 60° telephoto lens for distant vision to the back while driving. The vehicle-specific design of the consol provides a perfect fit and an easy installation - without additional drilling into the car chassis. The camera casing is sealed with silicone water-thightly, so that additional sealing is unnecessary. For the perfect optics, it can be lacquered in the vehicle's colour.

CAMOS

Reversing Video System Camos

The range of reversing video systems by Camos consists of 4 cameras and 3 monitors. The compact HD cameras CM-200M HD and CM-5180M HD are situated in an aluminium housing; for the standard camera CM-48 and the twin camera CM-49, you have the choice between a black and a white metal housing. All housings are certified to IP69K (CM-5180M HD to IP68) and are protected against splash water. The monitors included in the sets are available in the sizes 4.3", 5" and 7". Camera input on all monitors can be activated manually or automatically, e.g. while reversing. Moreover, they can be operated at 12 and 24 volts and can therefore also be used in trucks.

Reversing Video System Camos MultiView HD

The very compact CM-5180M HD camera is an excellent all-rounder: due to software-protected, digital image processing, the camera offers- similar to a twin camera- 2 pictures at the same time- just with one lens. While driving forwards, the view straight back is activated to monitor the backward travel (view angle 95°), engaging into reverse, the camera changes to a broader view (140°), monitoring the direct back of the vehicle. This way, even manoeuvring is child's play .

Reversing Video System Camos TwinView

from 499.00

Included in the set is the double-camera CM-49 either with a black or a white casing, as well as a display with 5" or 7". Due to the two camera lenses, you can switch between a direct rear view and one direct view behind the vehicle. Thus, you can either watch the rear traffic while driving forwards, or see possible obstacles behind the vehicle while manoeuvring. The heating integrated into the camera as well as the IF illumination and the night vision function provide perfect vision even in bad weather conditions or at night.

Camos Reversing Cameras

The cameras integrated into the Camos backup video sets (technical data: see page 854) are also available individually. Supported by IR illumination, the high-quality image display of the cameras even at night-time provides perfect vision and thus, easy and hassle-free manoeuvring. The Twin cameras enable rear vision while driving and direct vision rear the vehicle upon manoeuvring. The cameras are compatible with navigation systems, moniceiver and already installed displays. Included in delivery are 18 m (13 m with the CM-5180M HD) connection cable from the camera to the display and an adapter to connect it to cinch inputs.

1 | CM-200M HD-NAV

Compact camera with large wide-angle, suitable for heavy duty applications.

219.00

2 | CM-5180M HD-NAV

Extremely small camera, which can be installed in a discreet way. It combines two angles in only 1 lens and enables via software protected, digital image processing the bottom sight upon shifting to rear gear and making it possible to watch the traffic behind you. Thanks to its HD resolution, you can enjoy particularly brilliant pictures.

249.00

3 | CM-48-NAV / CM-48W-NAV

Elegant colour camera with a metal housing. Available in the colours black and white.

259.00

429.00

4 | CM-49-NAV / CM-49W-NAV

With 2 separate camera lenses for the perfect rear view. They make watching the back of your vehicle and upon manoeuvring the bottom your vehicle possible, so that bumps caused by obstacles can be avoided effectively.

Reversing Video System PerfectView

The established components of the Dometic reversing video product range can be ordered separately. The two LCD monitors are equipped with the AHD technology for even more crisp images and can be arbitrarily combined with the compact colour cameras. This way, systems are created which meet every (comfort) demand. LCD monitors with latest AHD technology provide a first-class image replay. Large, easy to reach and illuminated push buttons make the operation very comfortably. The monitors are designed for an operating voltage from 11 to 30 V and have 3 camera inputs. They provide day/ night image function with individually-adjustable image parameters and selectable normal or mirror image function. Two sizes are available: 5" and 7".

Reversing Cameras PerfectView

PerfectView CAM 45

Compact rear view camera with mostly closed housing for nearly invisible cable duct. The particularly bright image sensor with infrared LED support for perfect night vision provides high-quality images. The camera, waterproof and dust-tight according to IP 69K, is embedded in a robust aluminium housing with a stainless steel bracket.

silver	**82 111**	**259.00**
white	**82 112**	**259.00**

PerfectView CAM 80 AHD

Small shutter camera, perfect for installation at high or inaccessible spots. It provides an extra-wide angle of 120 ° and perfect night vision thanks to an active IR LED illumination. The camera lens is protected by a motor-operated cover. The robust housing is equipped with an integrated microphone and a temperature-controlled heater.

	82 115	**525.00**

PerfectView CAM 44

Camera equipped with 2 separate camera modules. The 140° wide-angle lens shows the close range and the 50° telephoto lens provides long-range vision. Additionally equipped with a motorised camera cover and distance marks in reversing mode.

silver	**82 118**	**865.00**
white	**82 119**	**865.00**

PerfectView CAM 35

Cylinder cameras developed for the Fiat Ducato van built since 2006/07 with wide-angle camera lens for a particularly large viewing angle while manoeuvring. Integrated into a surface-mounted brake light console, the original brake light is continuously used. A second camera (CAM 35FS) with 60° telephoto lens for distance vision to the back while driving can be installed into the console. The vehicle-specific console is installed without additional drilling and can be varnished in the vehicle's colour.

360°

Reversing Video System PerfectView CAM360 ADH

The Birdview camera system offers perfect all-round visibility, showing the vehicle position and surrounding objects. This means that even bulky vehicles can easily master complicated parking manoeuvres and reduce the risk of dents, scratches and traffic accidents. 4 cameras with extra wide angle on the front, rear and sides of the vehicle provide images of the vehicle's surroundings and send them to a monitor in the cockpit. The switch box is the core component of this intelligent solution and is used for general control. Thanks to an integrated video splitter it is possible to choose between different views: front, sides, rear or 360° bird's eye view. To display the 360° bird's eye view on a monitor, the 4 individual images are combined to form a uniform image. With the handy remote control the selection of the desired view is especially easy. The system without monitor has an RCA (A/V) connector to which playback devices with A/V inputs, such as navigation devices or moniceivers, can be connected. The version including monitor contains a 7-inch AHD LCD monitor.

Features:
- 360° view around the vehicle
- Perfect control over the position of the vehicle to objects in the vehicle's surroundings
- Easy and safe manoeuvring even with large vehicles
- Different monitor views: front, sides, rear or all-round view
- Side view through indicator control
- Comfortable switching between the views by remote control

Technical data cameras:
Voltage 9 - 32 Volt, current consumption < 650 mA, image sensor CMOS, diagonal viewing angle 180°, resolution > 1,000,000 pixels, light sensitivity 0.1 Lux, operating temperature -20 - +75 °C, dimensions W 5 x D 2.7 x H 3.3 cm, weight 70g. **82 220** **2,095.00**

CAMOS

Reversing Video System Camos 360° 3D

Turning manoeuvres can quickly become complicated when there is little space available. With its 4 cameras which are mounted to the vehicle's sides, the 360° all-around system provides the perfect supervision over the entire vehicle. The vision from a bird's eye view in combination with a realistic 3D view of your vehicle ensures that you can no longer overlook obstacles and parking is made very easy. With the option to integrate up to 4 additional cameras into the View mode, manoeuvring is made even easier, e.g. with an underfloor camera for the wastewater tank, or a roof camera for vertical clearance. With the version without monitor, the image signal is transferred onto an already-existing monitor or a navigation system, the version with a monitor comes with a 10.1" large LCD monitor.

Scope of delivery:
4 cameras, control module, remote control

Features:
360° all-around vision around the vehicle, safe manoeuvring with large vehicles, cameras with solid aluminium housing, different camera views: front, side, back, mirror or full view in 2D and 3D reversing view activated by going into reverse, side view upon activating the corresponding turn signal, free selection of the views via keyboard (direct selection of the mirror view requires an external switch which is not included in delivery)

Technical data control unit:
Voltage 12 – 24 Volt, power intake< 5 mA, output voltage for cameras 5 Volt, power supply with cameras max. 19 Watt, video input HD 1280 x 720 pixels, video output 1280 x 720 pixels/ 720 x 480 pixels, camera selection by keyboard, going into reverse, turn signal or extra signal, operating temperature -30 – +75 °C, dimensions W 21.6 x H 2.54 x D 13.4 cm.

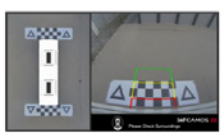

Technical data cameras:
Voltage 5 Volt, power consumption< 220 mA, image sensor ¼" Sony ISX016, viewing angle horizontally 190,5° ± 3° vertically 119.1° ± 3°, resolution 1280 x 720 pixels, image frequency 30 fps, light sensitivity 1 Lux, protection class IP69K, operating temperature -30 – +75 °C, dimensions W 6.1 x H 4.2 x D 5 cm.

Technical data 10.1" monitor:
Screen diagonal 10.1", resolution 1280 x 800 pixels, brightness level 400 cd/m², voltage 12 – 48 Volt, operating temperature -20 – +70 °C, dimensions W 25.7 x H 17.8 x T 3.7 cm, weight 1.14 kg.

The Global Harmonized System (GHS) for the EU
Classification and Labelling according to Regulation (EG) No. 1272/2008 (CLP-VO)
Hazard and Precautionary Statements

Source: www.baua.de

Please observe the application instructions and safety data sheets for products with hazard labels.

Dangers, additional hazards and marking elements, coding and wording.

H200 Codes: Physical hazards

H200	Unstable explosive.
H201	Explosive; mass explosion hazard.
H202	Explosive; severe projection hazard.
H203	Explosive; fire, blast or projection hazard.
H204	Fire or projection hazard.
H205	May mass explode in fire.
H220	Extremely flammable gas.
H221	Flammable gas.
H222	Extremely flammable aerosol.
H223	Flammable aerosol.
H224	Extremely flammable liquid and vapour.
H225	Highly flammable liquid and vapour.
H226	Flammable liquid and vapour.
H228	Flammable solid.
H229	Pressurised container: May burst if heated.
H240	Heating may cause an explosion.
H241	Heating may cause a fire or explosion.
H242	Heating may cause a fire.
H250	Catches fire spontaneously if exposed to air.
H251	Self-heating; may catch fire.
H252	Self-heating in large quantities; may catch fire.
H260	In contact with water releases flammable gases which may ignite spontaneously.
H261	In contact with water releases flammable gas.
H270	May cause or intensify fire; oxidizer.
H271	May cause fire or explosion; strong oxidizer.
H272	May intensify fire; oxidizer.
H280	Contains gas under pressure; may explode if heated.
H281	Contains refrigerated gas; may cause cryogenic burns or injury.
H290	May be corrosive to metals.

H300 Codes: Health hazards

H300	Fatal if swallowed.
H301	Toxic if swallowed.
H302	Harmful if swallowed.
H304	May be fatal if swallowed and enters airways.
H310	Fatal in contact with skin.
H311	Toxic in contact with skin.
H312	Harmful in contact with skin.
H314	Causes severe skin burns and eye damage.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H330	Fatal if inhaled.
H331	Toxic if inhaled.
H332	Harmful if inhaled.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H340	May cause genetic defects.
H341	Suspected of causing genetic defects.
H350	May cause cancer.
H350i	May cause cancer by inhalation.
H351	Suspected of causing cancer.
H360	May damage fertility or the unborn child.
H360F	May damage fertility.
H360D	May damage the unborn child
H360FD	May damage the unborn child. Suspected of damaging fertility.
H360Fd	May damage the unborn child. Suspected of damaging fertility.
H360Df	May damage the unborn child. Suspected of damaging fertility.
H361	Suspected of damaging fertility or the unborn child.
H361f	Suspected of damaging fertility.
H361d	Suspected of damaging the unborn child.
H361fd	Suspected of damaging fertility. Suspected of damaging the unborn child.
H362	May cause harm to breast-fed children.
H370	Causes damage to organs.
H371	May cause damage to organs.
H372	Causes damage to organs through prolonged or repeated exposure.
H373	May cause damage to organs through prolonged or repeated exposure.

H400 Codes: Environmental hazards

H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long-lasting effects.
H411	Toxic to aquatic life with long-lasting effects.
H412	Harmful to aquatic life with long-lasting effects.
H413	May cause long-lasting harmful effects to aquatic life.

The Global Harmonized System (GHS) for the EU
Classification and Labelling according to Regulation (EG) No. 1272/2008 (CLP-VO)
Hazard and Precautionary Statements

Source: www.baua.de

Please observe the application instructions and safety data sheets for products with hazard labels.

Physical properties

EUH001 Explosive when dry.
EUH014 Reacts violently with water.
EUH018 In use may form flammable/explosive vapour-air mixture.
EUH019 May form explosive peroxides.
EUH044 Risk of explosion if heated under confinement.

Health properties

EUH029 Contact with water liberates toxic gas.
EUH031 Contact with acids liberates toxic gas.
EUH032 Contact with acids liberates very toxic gas.
EUH066 Repeated exposure may cause skin dryness or cracking.
EUH070 Toxic by eye contact.
EUH071 Corrosive to the respiratory tract.

Keep detergents and chemicals out of reach of children!

Signal words

Danger!
Signal word for the serious hazard categories

Warning!
Signal word for the less serious hazard categories

Other EU hazard statements

EUH201 Contains lead. Should not be used on surfaces liable to be chewed or sucked by children.
EUH201A Warning! Contains lead.
EUH202 Cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of children.
EUH203 Contains chromium(VI). May produce an allergic reaction.
EUH204 Contains isocyanates. May produce an allergic reaction.
EUH205 Contains epoxy constituents. May produce an allergic reaction.
EUH206 Warning! Do not use together with other products. May release dangerous gases (chlorine).
EUH207 Warning! Contains cadmium. Dangerous fumes are formed during use. See information supplied by the manufacturer. Comply with the safety instructions.
EUH208 Contains <name of sensitising substance>. May produce an allergic reaction.
EUH209 Can become highly flammable in use.
EUH209A Can become flammable in use.
EUH210 Safety data sheet available on request.
EUH211 Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist.
EUH212 Warning! Hazardous respirable dust may be formed when used. Do not breathe dust.
EUH401 To avoid risks to human health and the environment, comply with the instructions for use.

Important!

Please observe the application instructions and safety data sheets for products with hazard labels.

GHS08		health hazard
GHS09		environmental hazard

Batteries must be disposed of properly!

The Battery Act (BattG) regulates the placing on the market, the return and the environmentally sound disposal of batteries and rechargeable batteries.

Consumers need to be aware of the following:

- Batteries/rechargeable batteries must not be disposed of with residual waste. Therefore, consumers are legally obliged to return used batteries/rechargeable batteries. Improper disposal can damage the environment and people's health. Important raw materials such as iron, zinc, manganese, cobalt, nickel, graphite, copper, aluminium and lithium are used in batteries/rechargeable batteries and can be recovered if the batteries are disposed of properly.
- Used batteries/rechargeable batteries must be handed in at recycling centres or collection points of the GRS (Stiftung Gemeinsames Rücknahmesystem Batterien – Foundation for a Joint Battery Return System).
- According to the BattG, all types of batteries/rechargeable batteries are affected, regardless of shape, size, mass, material composition or use. The law therefore also applies to installed and enclosed batteries.

An overview of all precautionary and hazard statements as well as labelling elements can be found on the website of the Federal Institute for Occupational Safety and Health (Bundesanstalt für Arbeitsschutz und Arbeitsmedizin): www.baua.de/EN/Home/Home_node.html
